EXTRA! EXTRA! UMI ANNOUNCES FREE MICROFILM READER OFFER! READ ALL ABOUT IT!

University Microfilms International now delivers newspapers in microform!

Great American newspapers like THE NEW YORK TIMES... THE CHICAGO TRIBUNE... THE LOS ANGELES TIMES... THE ATLANTA JOURNAL & CONSTITUTION... and THE MINNEAPOLIS STAR AND TRIBUNE.

They have more too! Literally dozens of award-winning newspapers from all over the world.

And, to help you and your patrons discover the many benefits of newspapers as a primary research tool, UMI is giving away microfilm readers FREE!

All you have to do is take certain newspapers in microform and their printed indexes. UMI will give you a new NMI 2020 roll microfilm reader worth $1,215.00!

Both current subscribers and new subscribers are eligible. It's easy to qualify, but some restrictions exist. For complete details, and a copy of UMI's 1984 Newspapers in Microform catalog, please complete and mail the coupon.

This offer expires March 31, 1984, so act today!

New NMI 2020 roll microfilm reader—with automatic opening glass flats.

Read all about it. For details about UMI's "Free Reader" Offer, and a copy of the 1984 Newspapers in Microform Catalog, please fill out and return this coupon.

Feeding the hand that bites us

It could have happened to any tax-supported library and some private ones, too. When yellow journalists are on the prowl in a slow week, all it takes to make headlines is a fat figure in a library budget. Libraries are more vulnerable to "exposés" than many agencies because they are commonly expected to be threadbare in all matters save books on the shelves and clerks to check them out.

Therefore, even to big-city taxpayers, some $50,000 a year for a director's city travel or for staff conference attendance can look fatter than a holiday goose. Here's how it looked on page one of the Sunday Chicago *Sun-Times*, Nov. 27:

LIBRARY CHIEF TAKES TAXPAYERS FOR $93,000 RIDE

And in a Dec. 1 *Sun-Times* headline:

115 JUNKETS BY CASH-POOR LIBRARY STAFF STUN ALDERMEN

Within a few days, enough mitigating facts were available to cause the local media to turn elsewhere for stories of taxpayer abuse. But within that short time, Chicago's library commissioner was caught in one of the city's famous political crossfires, strafed in City Council hearings, and set back in the good public relations she needs to move the library forward. The staff was in danger of losing funds for professional development, and, thanks to a national broadcast of the story, libraries in general lost a few points in their struggle for public support.

The particulars of the Chicago story are given in the news section of this issue—somewhat less sensationally than in the *Sun-Times*, which combined two years' expenditures to imply an annual cost, failed to allow that staff conference attendance might be legitimate, and so on. In fact, the worst charge the newspaper could make in an editorial during the week was that city drivers used by the library and other agencies earn too much salary and overtime pay. The library, of course, does not set the pay levels of the drivers.

The Chicago incident needs some untangling, both within the library and outside. But it raises a broader question worth considering right now: What makes a newspaper start scrutinizing a library's budget in the first place?

In Chicago's case, the impetus seems to have come from a tipster on the inside. Any library can house disgruntled staff who will delight in contributing to the director's grief. However, even the most dedicated staff are sometimes motivated to expose what they consider the library's rotten underside. Such an airing, they believe, will bring refor benefit library service in the long run.

Sometimes library unions act in this belief, sharing in grievances and problems with the press. A union offi CPL, even while fighting on behalf of the library agains Council accusations, was eager to plant a story on wh called a "brain drain" from the CPL system resulting deteriorating working conditions.

Worst resort

Occasionally there is no better way to bring about r than to start hollering to anyone who will listen. But other channel is available, then reformers should carefully before running to the media.

The general media do not understand modern l objectives and library professionalism and probably will. It's hard enough for us. When the Chicago library c daughter was promoted to a $28,392 post with two d and 6½ years as a competent professional, the *Sun-* heard of it and sensationalized the story, counting u many of her five promotions were under her mother's (two) and adding one for good measure. Was it the prom that made the story "news," or the fact that a newspape abide a librarian earning as much as, say, a city d

When library numbers are plucked out of context, th so easily give rise to shocking headlines. Here's just or could be constructed from actual figures: LIBRARY OF GRESS SPENDS LESS THAN 3% OF HUGE BUDGET ON B SALARIES GOBBLE 68%. Not everyone knows that LC get of its materials on copyright deposit and performs a tho national services beyond book-gathering.

Like every other public agency, libraries must be ac able. Expenditures and personnel practices must be sub public and press scrutiny—but not necessarily fed to the in half-stories: out-of-context, spiteful, distorted, or sighted bits and pieces. Anyone who assumes the med seek out and tell the whole story has never been involv media event.

Somehow, with or without the press, we have to g story to the public—all that we are and try to be. Until the half-stories that make headlines are going to hurt u and again.

in the news

Bruce defies Secret Service, protects library records

For Marie Bruce, the new director of the Huntington Memorial Library, Oneonta, N.Y., Nov. 9 was just a quiet Wednesday evening at work until a staff member brought her a book that had just been returned. During processing, the copy of *John Fitzgerald Kennedy Memorial Addresses in the Congress of the United States* had fallen open to a page defaced by a black-inked scrawl.

"Praise Oswald, USSR will kill every Yankee plus Reagan," said one note. "Reagan (1911–84). I mean this. Reagan killed on 2–18–84 for sure. Ha! Ha! Don't think I'm kidding. I'm not," read a message on another page.

Early the next morning, Bruce called the FBI to report the threats and was told the Secret Service would contact her. An agent telephoned from Syracuse and demanded to know who had checked out the book. Bruce explained that a New York State law protects the confidentiality of circulation records, but she would turn over the information when she received a subpoena.

The agent argued that federal statute takes precedence over state law, but named no specific federal statute. Bruce said he threatened to "make life difficult" for her if she did not cooperate. Time was of the essence, he said, because the threat mentioned a date.

Bruce, a member of the New York State Library Association (NYLA), immediately telephoned NYLA to confirm her action, then tried in vain to reach the agent Thursday afternoon and Friday, Veterans' Day.

On Monday morning another Secret Service agent appeared at the library, impounded the book, and demanded the circulation records. When Bruce gave him a copy of the New York State library confidentiality law, he tossed it on the floor, she said.

The agent hinted that "things have been put in force to make your life miserable," Bruce told *AL*. He questioned Bruce's professional ability as well as her patriotism. He ordered her to sign a statement accepting responsibility if an attack was made on President Reagan. She refused. She also refused to divulge her private phone number.

The library board, which happened to be meeting that day, supported its harrassed director. The board president, an attorney, told the agent Bruce had acted legally. The agent finally departed, but Bruce had no peace.

Local reporters called to ask about the story, causing the librarian to fear not only the Secret Service but the patron who had written the threatening notes. NYLA members and Judith Krug of the ALA Office for Intellectual Freedom assured her she was not alone.

At 2 p.m. Nov. 16, the agent returned with a subpoena calling on Bruce to bring the records to a grand jury in Syracuse, 90 miles away, Nov. 18. The media broke the story, and many residents and librarians began calling Bruce to commend her stand.

Outside the grand jury room, Bruce was counseled by an American Civil Liberties Union lawyer and Gerald Shields and James McPhee of NYLA and ALA. With their help, Bruce presented a 40-page deposition complaining of Secret Service harrassment.

Six hours after Bruce gave the library records to the grand jury, Secret Service agents arrested Oneonta resident Thomas Currie, 37, on charges of writing the death threats. A federal magistrate set bail at $100,000 and ordered a medical examination for Currie.

In an editorial, the Oneonta *Daily Star* applauded Bruce's grace, courage, and integrity. "It is comforting to know that even in such extreme circumstances, people like Ms. Bruce will stand for fundamental principles

(Continued on p. 9.)

Be VideoWise!

Display your growing Videocassette Collection in a new Gaylord Videocassette Displayer. Revolving 4-sided Towers are available in two tier sizes: 9" for VHS format and 8" for Beta format. Cassettes are held in molded clear plastic pockets with aluminum frames.

The ISLAND MODEL is ideal for large capacity, one unit display. Four towers suspended on aluminum pole and base provide multiple patron access at one time.

The WOOD PANEL MODEL holds towers in selected hardwood frames which bolt together in any configuration you wish. (Original purchase must be 2 panels for units to stand independently.) This high style model provides maximum flexibility for distinctive and useful display.

For more information, please call Toll Free 800-448-6160, in New York State 315-457-5070 for a full color brochure on Gaylord's Displaywise Line of Library Displayers.

Island Model

Gaylord also offers a full line of supplies and equipment to store, circulate and protect videocassettes.

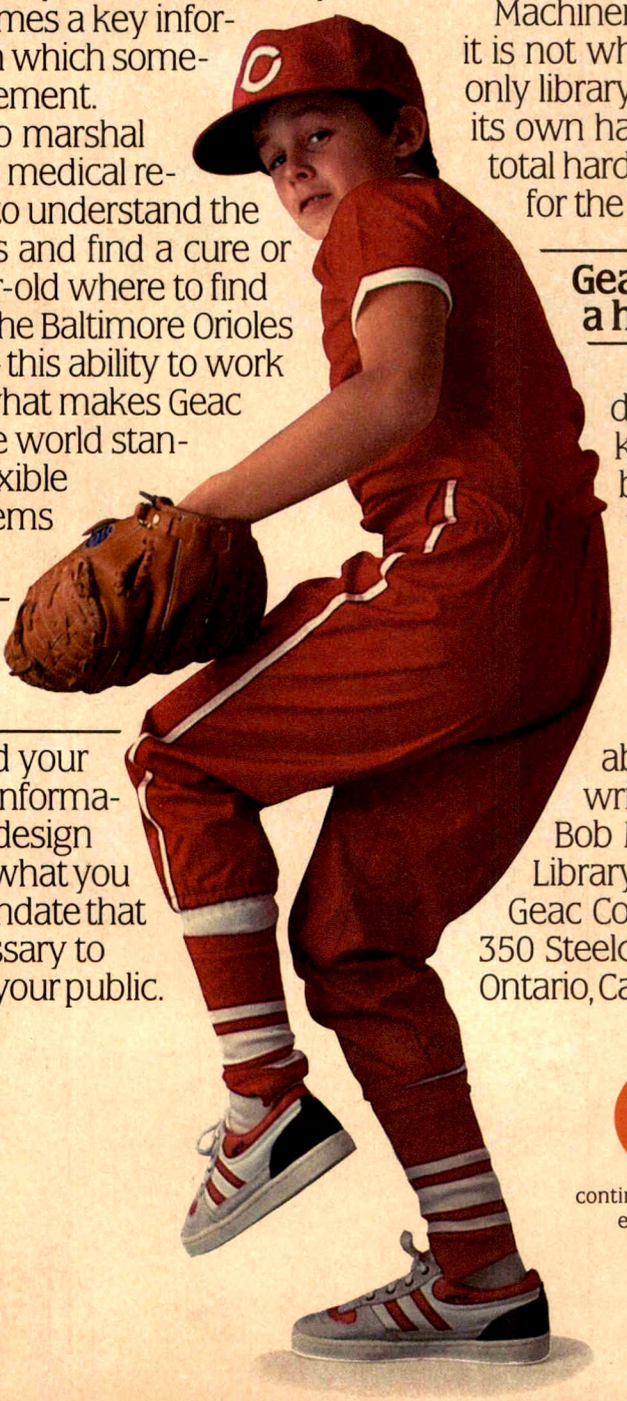
"Obviously, a man's judgement cannot be better than the information on which he has based it..."

Arthur Hays Sulzberger–The New York Times

And equally as obviously, it's the skilled librarian, supported by an efficient library system, who becomes a key information provider on which someone can base judgement.

Whether it is to marshal information for the medical researcher working to understand the nature of an illness and find a cure or to show a ten-year-old where to find how many times the Baltimore Orioles won the pennant–this ability to work with librarians is what makes Geac library systems the world standard–the most flexible and powerful systems you can use.



Geac–A system designed by librarians.

We understand your importance as an information resource and design our systems to do what you want; fulfill the mandate that you tell us is necessary to meet the needs of your public.

Geac–Total systems support.

Machinery without people to support it is not what you need. Geac is the only library vendor which manufactures its own hardware and provides you total hardware and software support for the life of the system.

Geac–Leadership that fills a human need.

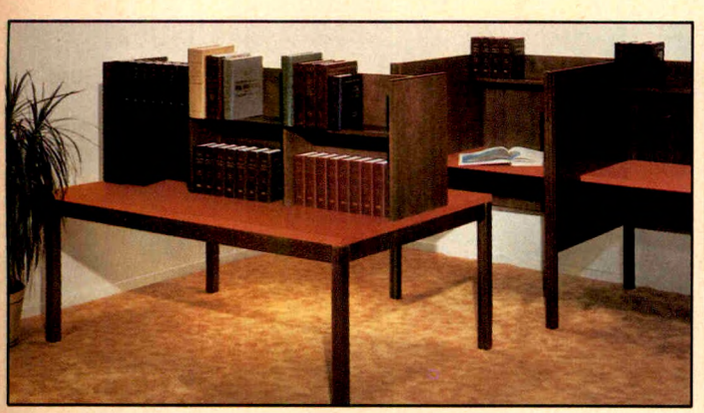
Geac leads in library system design simply because we know how to help you get the best out of today while working to take you where you want to be tomorrow. Progress and Geac–a partnership.

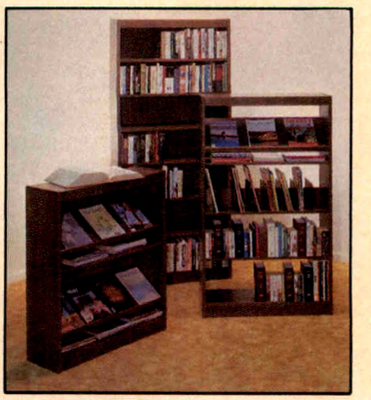
For further information about Geac Library Systems, write:
Bob Morton, Marketing Manager,
Library Systems Division,
Geac Computer Corporation Limited,
350 Steelcase Road West, Markham,
Ontario, Canada. L3R 1B3.

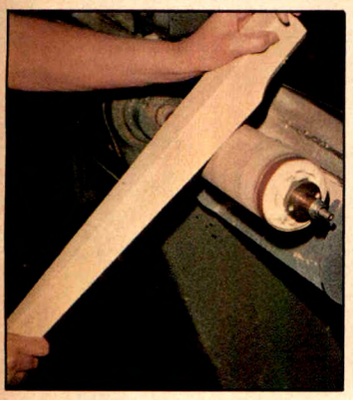
Geac

continuing the commitment to excellence and efficiency in information processing

Made by Gaylord, Furniturewise.







Remove the Middle Man. Do Business Directly With the Source—Gaylord. Manufacturer and Marketer of Library Equipment and Supplies Since 1896.

We surpass dealers, catalog houses and other middle men in three ways:

Full Selection

If libraries use it, Gaylord manufactures it.

Expanding, Remodeling, Retrofitting, New construction. With hundreds of special and technical products to choose from, Gaylord Furniture will harmonize with your interior and your intent.

Choices. From Wood shelving to reading, reference and index tables. From magazine and newspaper racks, atlas cases and dictionary stands. To browsers, book trucks and charging desks. And, you have a variety of select hardwoods to choose from—quality oaks or maples in nine stains and finishes. Middle men offer limited choices.

Ship from Stock

DELIVERYwise, we ship orders fast directly from our factory.

With our exclusive "Ship from Stock" program we keep a large central inventory. So your order is shipped in three to four weeks because items come from stock, not production runs—that start with your order.

Local Source

With Gaylord, the personal touch still remains. You get more than a catalog.

You're helped by our—your—local Gaylord sales person who values your library's business. And, they understand libraries; in fact, our sales force averages twenty years of services to the library field.

Trusted Source

Depend on a Furniturewise manufacturer . . . Gaylord, your trusted source.

(In the News cont. from p. 6.)

and protect the public's right to freedom of thought.

"The next time the Secret Service tangles with a librarian, it should have its agents armed with a subpoena when they walk through the door."

Bruce, who earned her MLS and a master's in developmental reading at the State University of New York/Buffalo, directed the Ripley (N.Y.) Public Library for eight years before being appointed to the Oneonta post last May. She told *AL* her goal is to prevent other librarians from ever being similarly harrassed.

Phone-line tariffs imperil online services, cooperation

In an eight-page appeal to the Federal Communications Commission Dec. 8, ALA Washington Office Director Eileen Cooke spelled out the expected consequences of the AT&T breakup and asked commissioners to exempt libraries from crippling increases in telecommunications rates. Librarians are also urging members of Congress to protect libraries from excessive charges.

The court-ordered divestiture of AT&T local operating companies cuts off income from long distance calls which AT&T claims subsidized local service. To compensate local companies for originating and terminating long distance calls, FCC proposed access charges which will go into effect April 3. The access charges will raise library phone bills and increase costs for users of networks like Telenet and Tymnet.

The FCC access charge plan required AT&T and other companies to file new tariffs for the private lines libraries use to link to OCLC, the Research Libraries Information Network, and the Washington Library Network. Increases are expected to average at least 60 percent.

Cooke attached to her comments five pages of reactions from public and university libraries in 22 states. The Scottsdale (Ariz.) Public Library wrote, "We will be left trapped between our obligation to provide current information to our community and the economics of rising telecommunications costs and/or return to manual systems." The Iowa State Library said "We cannot adjust our budgets quickly enough to absorb this sort of increase. We could reduce staff, or we could reduce buying library materials, but then we wipe out the ability to serve the citizens."

Ford argues for library links

Cooke also quoted Rep. William Ford (D-Mich.), who asked the FCC to investigate the impact of private-line tariffs on libraries. Ford pointed out that federal programs encourage libraries to share resources, yet the disproportionate and unanticipated telecommunications costs may make linkages impossible. (*Congressional Record*, Nov. 10, H9649-50).

ALA made three recommendations to the FCC: 1) reject the private-line tariffs as filed, 2) delay the access charges and tariffs beyond April 3 so that the long-range impact can be assessed, 3) if the charges and tariffs are approved, exempt nonprofit library and educational customers.

Rep. Ford's request to the FCC followed his approval of the Universal Telephone Service Preservation Act, HR 4102. The House passed the bill to repeal access charges for private citizens and single-line business Nov. 10. A pending Senate bill, S. 1660, would delay the charges for home users and small business for two years.

The ALA Washington Office urges all library supporters to tell their legislators how important telecommunications are to libraries and remind them to help libraries as well as individuals.

First continuing education course in *American Libraries* begins next month; Pauline A. Cochrane instructor

"Modern Subject Access in the Online Age," a five-lesson educational series, will appear in the February through June issues of *American Libraries*. Participants in this free course will learn how the latest online information systems, including public-access library catalogs, relate to one of the primary needs of information seekers: to search by subject.

Pauline (Atherton) Cochrane, a leading authority on use and design of information systems, has prepared the course for *American Libraries* readers. She has summarized its objectives as follows:

"Given the impetus to change a library's catalog from card to online, and given the recent findings that most users of online catalogs are searching by subject, this course is designed to help any and all professionals: 1) understand the effects that online systems may have on traditional processes and services in libraries; 2) prepare to aid in the design, use, and teaching of online public-access information services; 3) understand and influence some of the political and professional issues surrounding these services; and 4) grasp the range of opinions and theories about subject access."

A faculty member of the Syracuse University School of Information Studies since 1966, Prof. Cochrane is on leave from that post and serving as a senior staff analyst at the Library of Congress Automated Systems Office. There she is working on the new system for the Library of Congress Subject Headings and other thesauri.

Pauline A. Cochrane

From her library school days at Rosary College and post-master's study at the University of Chicago, Prof. Cochrane has been interested in subject access. Throughout her distinguished career as practitioner and educator, she has sought to improve access to information for diverse groups of users. With a dozen books and scores of other publications to her credit, she has served numerous public and private groups as consultant, project director, and researcher. An ALA life member, she recently received the Outstanding Information Science Teacher Award from the American Society for Information Science.

The course is the first in a series planned by *American Libraries* to help readers keep up with new and complex developments in the field.

Front-page headlines charge lavishness in library budget

"Library chief takes taxpayers for $93,000 ride," read the front-page headline in the Nov. 27 Chicago *Sun-Times*, a daily tabloid recently purchased by Australian publisher Rupert Murdoch. The subhead charged: "Facing a bare-bones budget and mapping library closings, Amanda S. Rudd spends $78,089 for chauffeur, $11,875 for a car with a $2,950 phone and a $269 alarm."

The story questioned Library Commissioner Rudd's expenditures for automobiles, office furniture, and travel, and minimized her explanations. Near the end of the article, the *Sun-Times* reported that Rudd said she needed the driver to save time and provide security on her evening visits to community meetings and library branches. Rudd claimed that her appearances had attracted grants and gifts that compensated for the expense. The city driver earned union-based wages of $27,000 a year plus overtime. The sum in the headlines covered two years' expenditures.

A fortnight earlier, when Mayor Harold Washington had presented his 1984 austerity budget to the fractious City Council, his opponents complained that the mayor's "attrition management" gave them little ammunition for the continuing council wars. One alderman had predicted: "People who want a

fight are going to dig harder, but the budget hearings should be the best show in town."

The *Sun-Times* story provided the grist the council majority opposition had been seeking.

Target: ALA conference attendance

Three days later, the library commissioner made her regular annual appearance before the council Finance Committee. Rudd came under the most intensive grilling of any city official in a budget hearing to date, the *Chicago Tribune* reported. Finance Committee Chair Edward Burke lashed out at her for spending what he estimated as $56,000 [out of a $35.5 million budget] to help send 45 staff members to the ALA Midwinter Meeting in San Antonio and 70 to the Annual Conference in Los Angeles last year.

Rudd explained that CPL employees were paid their salaries while attending ALA conferences and some were reimbursed for air fare, registration, and other expenses. The trips were partly funded by a $47,000 travel fund provided by the state, not the city. She pointed out, "We are called upon to contribute to the profession. Our people learn a lot at these conventions."

Alderman Roman Pucinski asked "Couldn't you send *me* to Los Angeles?" He said he would introduce a budget amendment to limit travel.

Chair Burke found the number of attendees "most distressing." He wanted to know: "Who didn't go?" Rudd replied that decisions on which employees of her 1,400-member staff attended conferences was based on involvement in ALA activities.

"You people are throwing money around like popcorn," another alderman charged.

Librarians defend ALA conferences

CPL employees were disgusted with Burke's cavalier attitude, according to Kathleen Prendergast, president of the Chicago Public Library Employees Union, AFSCME Local 1215. She asked to testify at the two-day public hearings on the budget, but the hearings were cut short by a bomb scare in Burke's office. Prendergast submitted a letter of complaint, a list of CPL employees, specific ALA committee assignments, and named seven special services developed by CPL as a direct result of conference training.

Prendergast also asked ALA Executive Director Robert Wedgeworth to help CPL employees fight for their professional privileges. Wedgeworth responded by writing to newspaper editors and Alderman Burke stressing the important contributions ALA conferences make to continuing education and professional development. Wedgeworth also wrote Mayor Washington urging attention to a planned new central library rather than media "trivia."

NEH offers challenge

The National Endowment for the Humanities brightened the prospects for CPL Dec. 7 with a $1 million challenge grant to help develop the humanities collection at the new central library. The three-year grant is one of the largest ever awarded a public library. When matched three-for-one by private contributions, it will provide $4 million.

"This is a challenge we are very happy to accept," Rudd declared. "This award will help us carry out our five-year plan to provide more services to all Chicago."

Friends of NYPL stage 90 parties, net $209,000

On Dec. 6, "The Night of 90 Dinners," the Friends of the New York Public Library earned $209,000 for the library by creating what the *New York Times* called "one of the most ambitious and far-reaching benefits in the city's history."

Volunteer hosts included Craig Claiborne, who entertained six guests at a black-tie Summit Meeting in East Hampton; Betty Friedan, who cohosted A Country Evening in the City for 14; and NYPL Director Vartan Gregorian and his wife, who offered Gregorian Chance to eight guests. Cookbook authors Madhur Jaffrey, Paula Wolfert, and others served as guest chefs. The Kissingers, the Brokaws, and Brendan Gill were among the 1,000 guests who paid $150 each to attend one of the 90 feasts.

The idea of theme dinners came from NYPL trustee and Friends Chair Barbara Fleischman, who cochaired the event with Sonny Sloan. "We looked for a new way to involve people throughout the tristate area in saluting the library in their own creative way," Fleischman explained. "We sent hosts about 80 suggestions for themes, but most people paid no attention to them. They came up with their own."

About 50 of the 100 hosts recruited by the dinner committee had never even contributed to the library before. Fleischman pointed out that the hosts should be able to deduct at least part of the dinner costs from their income taxes.

The committee of 18 women sent out 4,000 invitations describing the dinners. Recipients were asked to designate six choices in order of preference or check a box saying, "I/we are devastated that we cannot attend but would like to contribute $_____." The response was so enthusiastic some hosts enlarged their parties.

Each guest received *Tables of Content*, an 18-page souvenir booklet containing messages from Gregorian and Advisory Committee members Claiborne, Raymond Sokolov, and Sean Driscoll. The booklet featured illustrations from the library's rare cookbook and menu collections.

Mayor Edward Koch, one of 20 guests at a black tie Kosher Dinner in an Early 17th Century English Library, called the Friends' affair "a super idea. It's responsive to what dinner guests really want—a small party where they can actually have substantive conversations with other guests."

Former employee gets life for shooting Gus Harrer

The former University of Florida/Gainesville library employee who shot and permanently paralyzed library director Gustave A. Harrer last May was sentenced to life imprisonment Nov. 28 for attempted first-degree murder. The prisoner, David Lord Shelley, will serve a concurrent sentence of 30 years for attempted second-degree murder.

Shelley, 47, had worked as a technical assistant in the library for 19 years before he was dismissed last February. On May 4 he burst into Harrer's office and fired four shots, hitting the director three times in the upper torso (*AL*, June 1983, p. 334).

Shelley then walked into a crowded conference room and shot at Reference Department Chair Peter Malanchuk twice, missing both times. The gunman also threatened to shoot Associate Director Max Willocks.

Originally, Shelley pleaded not guilty; but after two psychiatrists determined he had been sane at the time of the shooting he changed his plea to guilty.

At the hour-long sentencing, Assistant District Attorney Ken Hebert told Circuit Court Judge Elzie Sanders that "Harrer is a certified quadraplegic. Mr. Shelley took down a giant when he shot Dr. Harrer."

Shelley has been diagnosed as a manic-depressive suffering from hypoglycemia and ankylosing spondylitis. Betty McMahon, his court-appointed attorney, said he needed structure in his life to function normally, and the library had provided that structure until he was fired.

"When I had lost my job, I felt I had lost my life. When I shot Dr. Harrer, I almost lost my soul," Shelley said.

After the sentencing, a library official told *AL* that Shelley will become eligible for parole three years after he begins serving his prison term. Harrer is expected to return to work part time this month. Paralyzed from the waist down, he may be in a wheelchair the rest of his life.

Past ALA President Castagna and wife die together

Edwin Castagna, retired director of the Enoch Pratt Free Library and a past president of ALA, and his wife Rachel, also a librarian, were found dead in their Baltimore apartment Nov. 26.

In a bathroom wastebasket authorities found an empty sleeping pill bottle. A package of personal records, legal papers, and instructions to a lawyer and doctor were left on a desk.

Edwin Castagna had been in poor health since contracting encephalitis a year ago. Rachel had taken constant care of him with the aid of two nurses, the lawyer wrote ALA.

"It was just their way of leaving, rather than becoming old people in a nursing home," the lawyer told the *Baltimore Sun*.

"He was a very smart man and remained that way until he died."

Born in Petaluma, Calif., 74 years ago, Edwin Castagna graduated from the University of California/Berkeley library school and directed libraries in Reno, Nev., and Ukiah, Glendale, and Long Beach in California.

As director of the Pratt library in 1960–77, Castagna began an inner-city outreach program, took over the Peabody Library, and made Pratt the state library resource center. He was known as a staunch defender of the right to read as fundamental to human liberty.

Castagna was president of the Nevada and California library associations. He served as president of ALA in 1964–65 and chaired the Committee on Legislation in 1966–68.

Rachel Castagna, 69, also graduated from the University of California/Berkeley library school. She worked in the San Benito County library and as an Army librarian in San Diego and San Francisco.

Friends of the Castagnas gathered for a memorial meeting at the Pratt library Dec. 6. A colleague described Edwin Castagna as "a very gentle, gracious, and gifted man."

ALA legislative "warrior," Edmon Low, dies at 81

During his 27 years as librarian at Oklahoma State University/Stillwater, Edmon Low planned and helped build the library that now bears his name. But Low's greatest contribution to librarianship, his successor Roscoe Rouse says, was the ability to work with legislators and get laws like the Library Services and Construction Act and the Higher Education Act passed and funded.

"Low walked the corridors and knew how to talk to lawmakers, citing examples successfully in Oklahoma City as well as Washington, D.C.," Rouse recalls. ALA Washington Office Executive Director Eileen Cooke remembers him as a "happy warrior."

Oklahoma-born Low directed the OSU library in 1940–67. During those years, he served as president of the Southwestern Library Association, the Oklahoma Library Association, and the Association of College and Research Libraries. He was elected second vice president of the American Library Association in 1961 and again in 1964. Low was a member of the ALA Committee on Legislation in 1958–62 and 64–69, and served as chair in 1967–68 (see photo.)

After leaving Stillwater, he taught library science at his alma mater, the University of Michigan, from 1967 to 1972. Then he moved to Bradenton, Fla., and became librarian of New College in Sarasota, 1972–1979.

Low died of cancer at his son's home in Tulsa Dec. 2. He is survived by his wife Mayme, sons Donald and Marc, and daughter Frances Finch, a SUNY College/Potsdam librarian and ALA member.

Low was buried in Stillwater. Contributions may be sent to the Edmon Low Memorial Fund, OSU Foundation, Oklahoma State University, Stillwater, OK 74078.

news in brief

Bradshaw to leave Dallas library. After 22 years as director of the Dallas Public Library, 68-year-old Lillian Bradshaw will retire Jan. 24. "It's time to look into other things that interest me in addition to libraries —like government, politics, and organizational management," she told *AL*.

Bradshaw said she enjoyed taking time off from the library to reorganize the city's municipal courts last year, and looks forward to taking a management role in Dallas city government.

"I may even have more time for American Library Association activities," Bradshaw added. A former Texas Library Association president, ALA Councilor, and Freedom to Read trustee, she served as ALA president during the first Annual Conference in Dallas in 1971. As a current member of the Committee on Program Evaluation and Support, she

We Circulate with a Tough Crowd.

Young readers can be tough customers. That's why at Bound to Stay Bound we use only the most durable materials for our prebound books. All BTSB books are bound to rigid specifications, so they'll stand up to the hard knocks your readers often give them. Every BTSB book will last five times longer than publishers' editions, more than 100 circulations.

So the next time you order new titles, get tough! Order the books that are made to be pushed and pulled, tugged and hugged, in the best circles...or the worst.

Write today for our free service brochure and General Catalog listing almost 18,000 in-stock titles.

BTSB

Bound To Stay Bound Books, Inc.
West Morton Road
Jacksonville, IL 62650
(217) 245-5191

will again be on scene at the 1984 conference.

Star gift. Actor Paul Newman recently contributed $25,000 to help build a new $4.6 million public library in Westport, Conn. The donation came from the earnings of his food companies, including Newman's Own Olive Oil & Vinegar Salad Dressing and Newman's Own Industrial Strength Venetian Spaghetti Sauce. The Newman companies earned more than half a million dollars since 1982; profits are donated to charities and educational products.

Joan Turner, director of the Westport Public Library, told *AL* that Westport residents Newman and his wife Joanne Woodward frequently use the library. "We try not to make a fuss, but I've noticed that the circulation desk is suddenly overstaffed when they come in."

Californians vote nuclear freeze. At its 85th annual conference held in Oakland Dec. 3–7, the California Library Association called for a nuclear freeze.

CLA members asked the United States and the Soviet Union "to halt the manufacture, testing, and development of nuclear weapons and to schedule an immediate summit conference so that plans can be made to prevent a nuclear holocaust."

The resolution, which was proposed by Director Victoria Musmann of the Santa Fe Springs Public Library, was sent to the presidents of the U.S. and USSR and California's senators and representatives in Congress. An amendment reiterated the librarian's responsibility to provide materials presenting all sides of the issue.

Held in the Oakland Convention Center and the Hyatt Regency Oakland, the conference attracted more than 2,500 librarians, trustees and Friends of the Library. In the keynote address, Frederick Ungar, founder and president of the Frederick Ungar Publishing Company, traced his 60-year career. Butte County Public Library Director Josephine Terry presided over the conference, which centered on the theme of "Animations." □

QUICK-BIBS: Featuring new & recent books on a timely topic

Bill Ott, compiler

LOVE

It seems only right that socially responsible librarians should do all they can to help lovers meet the challenges of the Valentine's season. A box of candy just isn't enough anymore. Love among the Baby Boomers has become a complex issue in need of careful analysis.

For example, a contemporary lover might find the love object asking an opinion on *relationships*. Whoever fumbles that question might be looking at a long string of solitary TV-dinners.

To help librarians help lovers face each new tete-a-tete, we offer our first "Quick-Bib": titles we've spotted relating to love and romance. Imprints are 1983 through spring 1984. Each book has its merits, but too much analysis might be bad for the liver and is not the purpose of this "alerting" service.

Alberoni, Francesca. *Falling in Love.* Random, 1984, $13.95. (0-394-53007-1, 83-4275)

A structuralist critic suggests that falling in love is analogous to the social forces at work in a revolution.

Bawdy Verse: A Pleasant Collection. Ed. by E.J. Burford. Penguin, 1983, $3.95. (0-14-042297-8)

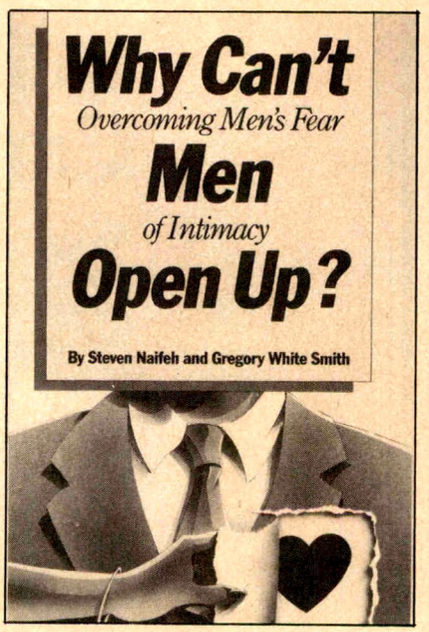
Offensive? Off-color? Trivial? Yes on every count, but we all have our guilty pleasures. (And who can resist a poem with a title like "Panders, Come Awaye.")

Fast, Julius and Bernstein, Meredith. *Sexual Chemistry: What It Is, How to Use It.* Evans; dist. by Dutton, 1983, $12.95. (0-87131-417-7)

The author of *Body Language* goes one step further; how to enhance sexual attractiveness through sight, sound, scent, and, of course, touch. Pillow talk for the MBA crowd.

Leonard, George. *The End of Sex.* Tarcher; dist. by Houghton, 1983, $12.95. (0-87477-178-1)

The jig is up, according to the controversial Leonard, who sees sexual liberation as having depersonalized the fabric of modern life. Get thee to a nunnery.



Timely book from Clarkson Potter

Liebowitz, Michael R. *The Chemistry of Love.* Little, Brown, 1983, $15.50. (0-316-52430-1, 82-20866)

Don't invite Michael Liebowitz to your Valentine's party. His idea that the problems of the lovelorn relate to body chemistry (and should be treated with drugs) is not exactly romantic.

Marshall, Megan. *The Cost of Loving: Women and the New Fear of Intimacy.* Putnam, 1984, $14.95. (0-399-50742-6, 82-19036)

Marshall argues that today's successful single woman is part of the "Control Generation," women who crave intimacy but fear losing the hard-earned control they maintain over their lives.

Naifeh, Steven and Smith, Gregory White. *Why Can't Men Open Up? Overcoming Men's Fear of Intimacy.* Clarkson Potter, 1984, $12.95. (0-517-54996-4)

You would think intimacy was malignant, the way everyone seems to be fearing it. Naifeh and Smith offer advice for fearful males who blanch at the notion of communication, especially in the bedroom.

Peterson, James R. *The Playboy Advisor on Love and Sex.* Perigee, 1983, $16.95. (0-399-50752-6, 82-19036)

Life can be rough out there on the sexual frontier, as these titillating questions and answers from the pages of *Playboy* attest.

Rose, Phyllis. *Parallel Lives: Five Victorian Marriages.* Knopf, 1983, $16.95. (0-394-52432-2, 83-47785)

The politics of marriage as seen through the relationships of five famous 19th-century couples, including Jane Welsh and Thomas Carlyle. The Victorians had it rough, too.

Rothman, Ellen K. *Hands and Hearts: A History of Courtship in America.* Basic Books, 1984, $18.95. (0-465-02880-2, 83-45261)

Our mating rituals have changed a bit over 200 years, but Rothman concludes that "the search for someone to love has not lost its urgency." □

***Bill Ott,** who writes this column freelance for* American Libraries, *is books-for-adults editor of ALA's* Booklist *magazine.*

How to handle tax forms, bookdrops, due-date guns, and snack bars

Q. In California, public libraries are the major distribution point for state and federal income tax forms. How do libraries handle this responsibility and does it cause problems for the staff or the public? ***Suzanne Foster, Head of Public Services, Stanislaus County Free Library, 1500 I St., Modesto, CA 95354 (AL,* Sept. p. 512).**

A. For two years we have maintained multiple copies of various popular tax publications and forms for free distribution. We also use the special library package of Internal Revenue Service forms designed for photocopying and we display the IRS poster that says the library does not provide answers to specific tax questions.

The library does all photocopy work for its patrons so we have had no problems with missing or lost forms. Patrons seem happy to pay the photocopy charge, since the IRS toll-free number is always busy and the nearest office is 25 miles away. *Rip Strautman, Librarian, Lehigh Acres Public Library, 1301 Homestead Rd., Lehigh Acres, FL 33936.*

A. We place IRS forms at the circulation desk on library-use-only reserve, under the reference librarian's name. No problems have developed. We found that it's wise to keep the tax materials on reserve after April, for we still receive requests for the old forms. *Sheila Rezak, Educational Resource Center Librarian, Purdue University/Calumet, Library, Hammond, IN 46323.*

A. This will be our fifth year in the chaotic tax forms business. Our major outlay in staff time is in helping the increasing numbers of people who come to us for forms. Because we provide a needed public service and see people who otherwise might never come to the library, we think our heroic extra efforts at tax time are worthwhile. Here's what works for us:

1. We place the tax forms in an attractive area far from the front door so the visitor (and possibly new patron) has no choice but to see the library. We display posters and brochures about library services and cartoons about tax time.
2. To avoid non-stop answering of the non-stop question "Where are the tax forms?" we run a 3-inch-wide heavy red tape on the floor from the front door to the tax forms. Now all we have to say is "Follow the red tape!"
3. Our state legislator lives nearby and brings us large supplies of state forms. We post a note to credit him.
4. We keep reference binders of state and federal forms at both the reference desk and the circulation desk near the copy machine, and hide extra copies of popular forms to replace worn-out or stolen ones. We have extra supplies of change and copier paper.
5. We keep six years' worth of all forms, one reference copy of each, and many copies of the current forms. They tend to disappear, and people ask for them all year.
6. The poor soul in charge keeps notes and at the end of April writes "What to do next January," including guesstimated numbers of forms to acquire.
7. We find it is the work of a moment to put labels on the edges of the adjustable bookcase shelves where we set out the forms, but the work of a week to get them off again. So we simply turn the shelves around, and then turn them back again next year. *Gray McCarroll, Assistant Reference Librarian, Acton Memorial Library, Main St., Rt. 27, Box 1015, Acton, MA 01720.*

Q. What libraries have installed a bookdrop in a location remote from the library? Who empties it and how often? What is the public reaction? ***Marian Milling, Outreach Librarian, Ela Area Public Library, 135 S. Buesching Rd., Lake Zurich, IL 60047 (AL,* Sept., p. 512).**

A. The Baldwin (N.Y.) Public Library has had four remote bookdrops for more than 10 years. Two are in shopping centers, one at the railroad station, and one in a parking lot. Our service area is approximately five square miles. About 30 percent of the more than 400,000 items circulated annually are returned through these Boardman Auto-page units. Our custodial staff empties them daily or they become overfilled.

Vandalism has been minimal and the service is very popular. We highly recommend it as a way to get books back faster and save patrons gasoline. *Walter Haber, Director, Baldwin Public Library, 2385 Grand Ave., Baldwin, NY 11510.*

A. The Decatur (Ill.) Public Library has 11 remote bookdrops located near our bookmobile stops within the city limits. On the day a bookmobile parks nearby, the drivers empty the bookdrops, otherwise we use a delivery van Monday through Friday. The public appreciates the bookdrops, since the library serves more than 94,000 people living within a 42-square-mile area. *Betty Lou Hicks, Extension Librarian, Decatur Public Library, 247 E. North St., Decatur, IL 62523.*

A. All of the Evansville-Vanderburgh County Library bookdrops are heavily used, which leads us to believe they are popular with the public. Patrons occasionally complain if the drop-boxes get too full, or they claim overdue materials must have been stolen from the bookdrop.

Two of our remote bookdrops are on a street near a parochial school and are emptied twice a week by our messenger van. The other one is on the circular drive of the University of

Over to you

1. What libraries lend musical cassettes (classical, Broadway, etc.) on interlibrary loan and also catalog them on OCLC? (Ind.)

2. How do libraries organize their costume vertical files? (Ind.)

3. How effective are the various glare-control filters (micromesh, polarization, etc.) on OCLC terminals? (Tex.)

4. Who has AV materials or computer programs for training library staff in library automation? (N.M.)

5. What libraries have established methods for predetermining a target enrollment for summer reading club programs? Does this include both preschool and school-age children? What factors in such a projection indicate a successful number of enrollments? (Tex.)

Please send replies to Action Exchange

Evansville. The university library empties the box and delivers the materials to our messenger. *Margaret J. Kyle, Assistant Director, Evansville-Vanderburgh County Public Library, 22 S.E. Fifth St., Evansville, IN 47708.*

Q. How do libraries with computerized circulation systems indicate due dates for their patrons on the outside of book covers? *Arthur Liebhaber, Circulation Librarian, Northeast Branch, Miami-Dade Public Library System, 2930 Aventura Blvd., Miami, FL 33180* (*AL*, Sept. p. 512).

A. We stamp due dates on 1½-by-4-inch labels placed on the back cover of the books at the Scottsdale (Ariz.) Public Library. The process eliminates the book pocket, allows check-in without opening the book, and assists in the weeding process. *Charline Longstreet, Support Services Manager, Scottsdale Public Library, 3939 Civic Center Plaza, Scottsdale, AZ 85251.*

A. The Victoria Public Library and the Victoria College-University of Houston/Victoria Library use Monarch label guns to indicate due dates on the outside of book covers. The Monarch Company prepared guns for us that print due dates instead of prices. The name of the library and the words "Due date" are preprinted on the labels. Our item numbers (OCR) are also located on the outside of the covers. Handling of materials by the circulation personnel at the time of charging and the length of queues at the circulation desk have been significantly reduced. *Michael L. Stevens, Associate Director, Victoria Public Library, 302 N. Main, Victoria, TX 77901.*

A. Since last March the Cleveland Public Library has been using label guns to indicate due dates on the back covers. When the book is returned we do not remove the label, but put a new one over it when the book is charged out again. When the labels start to build up, they are easily removed at charge-out time. Patrons and staff like the labels. *Edward Seely, Head, Technical Services, Cleveland Public Library, 325 Superior Ave., Cleveland, OH 44114.*

Q. What academic libraries house snack bars or food concession areas? Have the eating facilities affected food consumption in other areas of the library? *Carol Wall, Maag Library, Youngstown State University, 410 Wick Avenue, Youngstown, OH 44555.*

A. Libraries with food vending areas find that food travels to all parts of the library. The libraries at both the University of Chicago and Northwestern University have had to hire special staff to monitor the snack bar exits to see that no food goes out of the area. Academic library newsletters frequently mention the snack bar problem—it ranks right up there with getting people to clean out the staff lounge refrigerator. Recently one library removed its food concession because of the filthy conditions it caused.

If you don't have a snack bar already, avoid it at all costs. If you must put one in, make sure that part of the food-service profits come to the library to cover costs of extra guards and cleaning help. Vending companies will share their profits with you, but the money usually goes into a general university fund and the library never sees any of it. Make the facts clear to your administration: the library will need money to cover the costs attendant on providing food service. *Sandy Whiteley, Program Officer, Association of College and Research Libraries.*

LETTERS AND BRIEF COMMENT FROM OUR READERS

IRS thanks librarians

I WANT TO THANK THE MORE THAN 18,000 librarians who provide their patrons with tax information supplied by the Internal Revenue Service.

Librarians stock and distribute tax forms by the thousands, provide IRS publications as reference tools, circulate audio cassettes of tax instructions, and offer their library facilities as sites for Volunteer Income Tax Assistance (VITA) and Tax Counseling for the Elderly (TCE).

ROSCOE L. EGGER, JR., commissioner of internal revenue, Washington, D.C.

Commemorating "mistake no. 7000000"

I REMEMBER THE MORNING I logged on to OCLC and saw the announcement of the 10-millionth record. Out of curiosity, I called up the record and was dismayed, but not surprised, to find a wrongly tagged record for a thesis from California State University at San Bernardino (OCLC symbol CSB). The record was tagged as though the thesis were a published monograph rather than an unpublished manuscript. The thesis note was formatted incorrectly also. So I sighed heavily and went about my business.

Then I received my December issue of *AL* and on page 698 descried a photograph of two people with very self-satisfied smiles. I just had to know the cause and discovered that they were the creators of messy no. 10,000,000.

I decided to take action and give the lie to all this hoopla. I would write Michael Burgess and give him a chance to correct his record and let *AL* know that they had not reported an achievement but had commemorated mistake no. 7,000,000 (I read a study that asserted that one-third of the OCLC records were duplicates, which makes CSB's record about no. 7,000,000.)

I called up the record and, to my amazement, saw that OCLC had corrected all the errors. This gave me a brilliant idea. What if all records in OCLC were lauded as some milestone or another: ANNOUNCEMENT!! Record no. 10,535,621 was entered yesterday by Beverley Geer of the School of Public Health in Houston!!

Would OCLC march straight to the terminal and peruse the record for errors and replace the record if necessary? Would the database achieve nirvana?? Think of it, quality control in OCLC! I think the idea has merit.

BEVERLEY GEER, ALA member, University of Texas School of Public Health library, Houston.

One-person-library watch

For a book on one-person librarianship, I would like to hear from anyone who is now employed, or has been employed, in a one-person library. I need to know your experiences, problems, goals, successes, failures, interactions with management and with users; in fact, I would like to know anything you want to share with me regarding working in a one-person library.

Please address responses to: Guy St. Clair, P.O. Box 1259, Murray Hill Station, New York, NY 10156.

Defending access to nuke info

I'VE JUST READ THE STATEMENT OF Sandra K. Petersen, documents librarian of the College of William and Mary, for ALA, to the Department of Energy concerning its proposed rule: "Identification and Protection of Unclassified Controlled Nuclear Information (Oct., p. 580).

It is an admirably thorough and cogently presented position on a matter that is not only a serious concern to the library and information profession, but one that could present crippling impediments to effective service. Ms. Petersen deserves appreciation for her work.

JOSEPH C. DONAHUE, University of South Carolina library school, Columbia

We'd all be losers without "users"

"USE IT OR LOSE IT" ACCURATELY describes the library profession's choice in regard to the word "user." Michael Gorman was seeking another word (Oct., p. 597), because "user" had had its scutcheon smirched by drug-culture association.

Why should we surrender our good four-letter word without a fight? *Our* users deserve better. If we run up a white flag and substitute some carpentered word, the profession rightly merits the "timid mousie" image we say we don't deserve.

The American language is rich in words that carry many meanings. See "get" in your unabridged, for example. Some of our best humor, both high and low, depends on the play of words. The multiple meanings must be a trial to foreigners learning English, and to computers, but the rest of us cope handily with the subtleties and experience no difficulty. The struggle between high and low meanings is an old one. Take "queen" for example. Yet Elizabeth II is no less a queen because of the guy in drag. And that particular duality has been going on since the word was spelled "cwen."

"User" is a good word: short, simple, understandable. To keep it will not be much of a battle, because it is the natural word for its job. "User" has an important, useful, and honorable meaning for us. We can use "user" without apology or snicker of embarrassment. Our colleagues in the classroom have not thrown out Whitman. *Leaves of Grass* is safe in the canon of American Literature. The original significance of grass is not in dispute. The *gramineae* easily overwhelm the *cannabis*. Similarly we need not fear confusion or contamination for "user."

Substituting constructed words for good natural ones got us into the mess of jargon, gobbledegook, and bureaucratese we struggle through every day. We have learned the hard way that superfluous polysyllabic circumambient locutions potentially promulgate impenetrable obfuscation.

Let's keep "user" for ourselves and *our* users.

HELEN C. BALL, ALA member, Special Collections, Miami University Libraries, Oxford, Ohio

"Veering off" from Gorman

I'M SORRY, MR. GORMAN, BUT I must strongly disagree on the appropriate term for our library clientele (Oct., p. 597).

The term "client" is not as ill-suited as you insubstantially argued it to be. You yourself gave a dictionary definition that substantiated it as a feasible term, yet you disallowed it based on personal sentiment. A national contest based on *your* personal sentiment? Are you serious?

I can somewhat agree, though not for the same reasons, concerning the word "borrower." Those who frequent the hallowed halls of our libraries are, at times, merely loungers, sleepers, or vagrants, not apt to be borrowing anything other than space, and therefore need not always be true "borrowers" in order to be welcomed into the womb of the library. It is here, however, that we, shall I say, "veer off" (?) in rather opposing directions.

You can't seriously consider an unfortunate incident in a taxi a good enough reason to expect those who are satisfied with the term "user" *not* to use it, and to take part in some absurd contest just to make *you* happy? If you had been a pig farmer and your companion had commented on the upcoming snorting contest, and the cabbie had had a similar reaction, would you want to change *that* term as well? The mere fact that "user"

and "patron" are "commonly encountered" terms, should be enough for you to realize that not all of us are as dismayed as you are that Gertrude Stein is unavailable to aid us in this Gorman-induced dilemma.

I see no need for a national contest, but if you succeed with "libraree" (ugh!), you can teach the classes needed to learn to both pronounce and spell it, and you can also fund the national campaign to promote it!

Let's "use" what we now have for our "patrons" and not "borrow" or coin a new term to make our jobs more difficult, or to further confuse our "readers" and "clients." Haven't we better things to do?

ROSANNA O'NEIL, ALA member, Ohio State University Libraries, Columbus

False humility revealed

ALTHOUGH I REALIZE MICHAEL Gorman's article on what to call library users was meant to be funny, I found it nevertheless objectionable on several grounds:

1. While I too cringe at the sound of "patron," *Webster's Third International* specifically states one of its definitions is: a library user. Those who have difficulty with words having more than one usage would make poor reference librarians. It is they, not the English language, who patronize users.

2. The "-ee" suffix, as far as I know, is used with verb forms, e.g., payee, employee, absentee. Yet Gorman jokingly applies it to library, which has no verb form. With writers like this, is it any wonder we don't know what to call ourselves?

3. Gorman's objections to current words for users are based solely on his own associations, all negative, with the words, not on any inherent weaknesses in their usage. Unlike him, I don't think of shyster-lawyers when I hear "client." I think of someone using a professional service. And I suspect most patrons of the arts are willing patrons of their libraries too.

4. The search for a value-free term for our clientele is, I suspect, yet one more manifestation of the false humility of many librarians who, seeking and not finding professional status, are embarrassed both at being equal to and superior to their clients.

PAUL B. WIENER, State University of New York library, Stony Brook

Big $$ for bag of tricks

ALTHOUGH I MYSELF FEEL THE deficits of a library education that gave little place to practical knowledge about librarianship, I would like to ask Mark Plaiss (Oct., p. 618) why a prospective library school student should attend a graduate school, paying graduate school prices for a bag of tricks?

I will agree with Mr. Plaiss that a lot of library skills are, in the nature of human endeavors, fairly simple to learn and to use. A number of the problems that libraries face, however, are real stunners.

I can't believe that prospective librarians need graduate study to learn how to process an interlibrary loan. Perhaps most librarians should get this training on-the-job or through a vocational school quick course.

Mainly, however, I hope to see more evidence of rigorous graduate programs where students are taught critical and creative thinking about the problems that surround us.

LYNNE S. BERTALMIO, ALA member, Stillwater (Minn.) Public Library

Shoveling dirt for the wrong road?

ALTHOUGH REALISM FORCES ME TO appreciate the pragmatic attitudes expressed by Mark Plaiss (Oct., p. 618), I cannot help but sympathize with Mr. White's philosophical views.

Though basic skills get us through the day, theory guides us, makes us think, and helps us determine priorities.

Skills do "get the job done," Mr. Plaiss, but is the job useful? Jesse Shera's famous statement rests fixed in my mind: "Library efficiency frequently consists of doing well what need not be done at all." Alas, how many of us are shoveling dirt that will never help build the road that leads to knowledge?

(Continued on p. 18.)

How can we ever defend the freedom to read from those who love censorship if we do not discuss, read, and think about intellectual freedom? How can we open libraries to the poor if we do not consider their needs and find practical reasons to convince those in power to furnish the resources? How can we be librarians if we do not think about why we chose this profession? Library school provides the needed teachers, material resources, and environment to delve into these real and living problems.

Because of the present structure of the profession, it is absolutely necessary for us to be equipped with some skills when we leave with our MLS, but as the profession evolves, perhaps these needs will be better met in the library setting.

I strongly question Mr. Plaiss's implication that lawyers, doctors, and dentists are fully trained in school, as usually they spend several years under the close surveillance of experienced professionals upon completing their studies.

How, Mr. Plaiss, can a librarian bring patron and information together if the potential patron is afraid of entering the library or if the information has been censored? I believe that our purpose is more fundamental: this is, our function is to lead humanity to knowledge through information.

MARTHA CHILDERS, ALA member, Swiss Institute of Comparative Law, Lausanne, Switzerland

Error in ALA membership profile

UNFORTUNATELY, WE HAVE DISCOVERED an error in the data we prepared for the Oct. issue's profile of ALA's 1982 membership (p. 611–12), thanks to the eagle eye of Dimity Berkner of Unipub, who called to question some of the numbers.

The error affects tables 3 and 4. In table 3, under special libraries, ALA should be represented by 1,644 (8.4%) librarians, *not* 2,642 (14%). In table 4, 403 personal members should fall under the "03 State" category, representing 2% of respondents (*not* 1,431 and 7% as given)

MARY JO LYNCH, ALA Office for Research

Beyond "Disneyland of the mind"

MICHAEL HEDGES' VERY USEFUL and well intentioned piece (Sept., p. 558–60) points up a couple of problems which deserve comment. First, with the exception of Bullfrog Films and the three titles listed, there are no independent companies mentioned, nor small independent distributors of video software.

The domination of video acquisition money by large companies and big jobbers means that small, independent companies are threatened for their very existence; the drain of 16mm money into video acquisitions by public libraries has meant that small companies must enter the video market in order to survive, and yet libraries have turned almost exclusively to large companies and jobbers to spend their money. The first rationalization for this is price, and this is often given without looking at pricing by the independents.

It is commonplace for libraries to spend the first- and even second-generation video money exclusively on feature films. This is justified in much the same way as libraries have justified the bestseller syndrome. Michael Hedges does avoid this to some extent, but the majority of his suggestions focus on feature-length films. My hope is that librarians will get beyond what I have called the "Disneyland of the Mind" in another publication and truly concentrate on the video needs of all their patrons, especially those of children and young adults.

The most important thing is to select video on the subjects of interest to the patrons, and to do that you must use the "tools" available, two of which are: *The Video Sourcebook* from the National Video Clearinghouse, Inc., and *Film File* from the Media Referral Service. Magazine and journal reviews can be useful, such as those in *Booklist* and *Video Review* (Viare Publications, NYC).

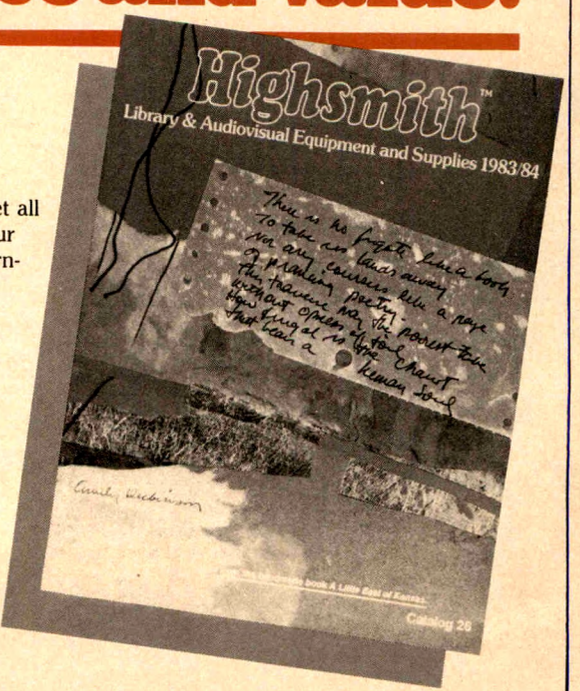
Highsmith™
A Generation of Service



The new computer-produced Library of Congress National Union Catalogs on Advanced Library Systems microfiche offer expanded coverage, more flexibility, more convenience and more effective searching capability than has ever been possible before. Yet the low cost makes them accessible to libraries of all types and sizes.

State-Of-The-Art Efficiency For Your Library.

The new NUC Books is in index/register format. Now you can search the comprehensive collection of current catalog records produced by the Library of Congress and some 1500 North American libraries not only by name, but by title, subject and series as well. The indexes are cumulated each month. A single look-up will complete a search in most cases. The full bibliographic record can then be located in the register in seconds.

The new NUC microfiche can be used alone as a primary bibliographic source, or to complement your other bibliographic tools for cataloging, acquisitions, interlibrary loans, bibliographic verification, reference and research.

Current LC Subscriptions/ Free Trial.

ALS can also provide current subscriptions to the LC NUC U.S. Books; Audiovisual Materials; Music, Books on Music and Sound Recordings; Cartographic Materials; Register of Additional Locations; LC Subject Headings; and Name Authorities. ALS offers a free 30-day trial to introduce you to the benefits of a current subscription.

Retrospective LC Catalogs.

ALS is the only source for the complete microfiche retrospective collection of the LC NUC from 1898; Subject Catalog from 1950; Audiovisual Materials from 1953; and Music, Books on Music and Sound Recordings from 1953. Our *new, low* prices make it possible for more librarians to acquire the complete collection or individual segments.

This year, take a giant step toward better bibliographic control. Keep your National Union Catalogs on ALS microfiche. They're surprisingly affordable. They reduce shelf space over paper catalogs by 94%. And they offer more efficiency than ever before.

Avis Mandel

Minneapolis magazine inspires new looks for librarians

"If you have two or three professionals working on you for six hours, you're going to look good," said Darlene Arnold (above) of the new makeup and hair style created for her portrait in a fashion article recently run in *Mpls./St. Paul Magazine*.

Arnold is senior librarian in the professional library at Minnesota's Office of Public Libraries and Interlibrary Cooperation.

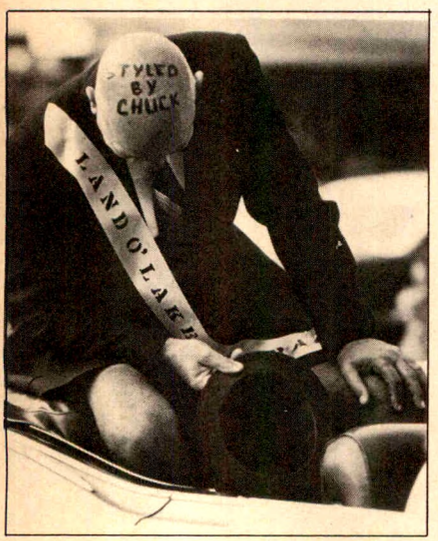
The editors of the article, "Looks for the Books," had asked three librarians to go to specified salons to change their appearance so "patrons would turn from their books for a second look." Arnold's experience was typical.

The magazine published "before" and "after" color photos of the librarians.

"It wasn't quite the image of librarians I would have projected," said Arnold, who thought the presentation was somewhat stereotypical. "I had to take vacation time to go through with the salon and photographic sessions, but it was a once-in-a-lifetime opportunity. Had I been paying for it, the job would have cost well over $125." Her hair was styled, trimmed, permed, and colored; her makeup, completely changed.

The magazine chose the Rocco Altobelli salon to glamorize Arnold.

The other librarians featured were Barbara Nemer, a media specialist at Robbinsdale Armstrong High School, and Kathleen Markowitz, head of cataloging with the St. Paul library system.



Dave Polcyn, *Tampa Tribune*

New mayor Clarence Charles Martin enjoys a joke on himself as he entertains voters at Fall Festival. Proceeds of the election went to Land O'Lakes library, which may use the money to start a building drive.

Mayor pays library for post

An unconventional Mayor's Race in Land O'Lakes, Fla., made the local library some $2,090 richer.

Though the small unincorporated community has no mayor to call its own, an honorary mayor is elected in September to preside over the Chamber of Commerce Fall Festival.

Anyone can be a candidate by paying a $25 entrance fee. Voters in the community of 36,000 cast their ballots in dimes, which they deposit in containers placed at two locations. Each container bears a candidate's name. The top dime-maker wins the mayoralty.

This year the COC selected the Land O'Lakes Library as the organization that would receive the proceeds of the election.

At a luncheon in late September COC President Phillip White announced that Clarence Charles Martin, a self-employed builder, had won the mayoralty. White presented the check to John T. Rauch, chair of the Friends of the Library board.

Librarian creates book on older black residents

In All My Years, a photo book and exhibit of older black residents of Champaign-Urbana, Ill., was on display at the Parkland College Library in Champaign through Dec. 14.

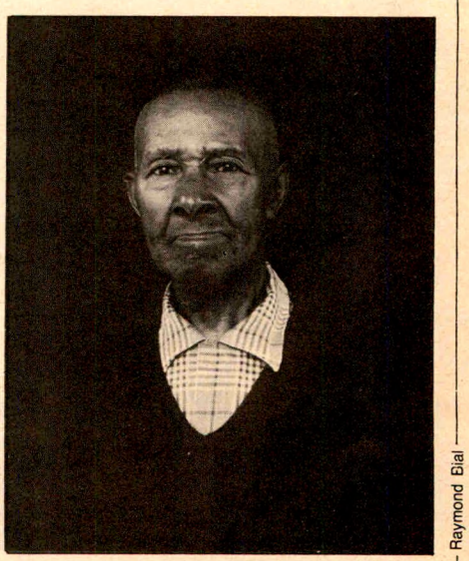
Raymond Bial, acquisitions librarian at Parkland and a photographer, shot the portraits and prepared biographies of each of the 52 subjects during the summer of 1983. What emerges from the book is a group of character studies of individuals who have endured through difficult times.

"I have long held that libraries are in an excellent position to offer many such cultural programs beyond traditional library service," Bial told *AL*.

The Parkland library and Champaign Public Library, along with the Champaign County Historical Museum, sponsored the project with LSCA Title III and Illinois Arts Council funding.

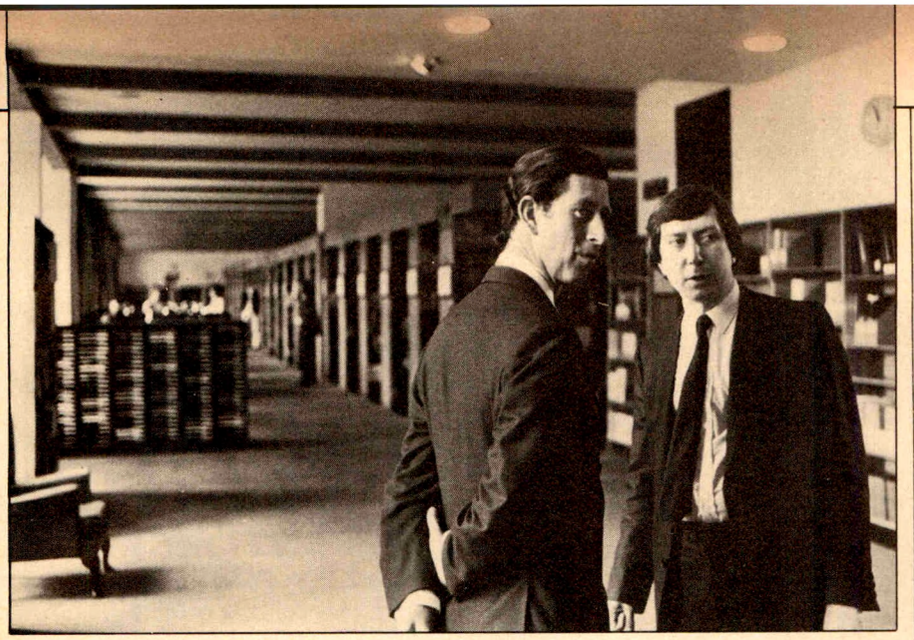
Champaign Public will display the Bial photos during February. Following that, they will be available as a traveling exhibit. The book can be obtained by sending a check (payable to the CCHM) for $7 plus $1.50 handling to the Museum, 709 W. University Ave., Champaign, IL 61820. For more information, contact Bial at Parkland College Library, 2400 W. Bradley, Champaign, IL 61821.

Illinois libraries sponsored the photographic project,* In All My Years, *in which Willie Holt (below) was featured. He worked in the WPA during the Depression and had his own sanitary hauling business from WW II until his retirement.



Raymond Bial

© 1983 Times Newspapers Ltd.



Little went according to plan when Richard Lester, librarian, conducted Prince Charles round the London Business School library.

Prince pays discomfiting visit to library

London Business School Librarian Ray Lester can confirm that little goes according to plan when showing Prince Charles around.

The plan was to enlighten the Prince on modern library techniques. He had come to LBS to formally open a new teaching facility, the Plowden Building. But he spent a total of five minutes in the library. Just after the above photo was taken, he turned to a group of people positioned by the card catalogs.

"Are you librarians?" he asked. "No," they said, "we are MBA students."

"And since these were the first students he had met . . ." Lester told *AL*, "the Prince used most of his five minutes talking to them about their courses."

According to Lester, the School principal was anxious to keep to the timetable laid down for the visit. "So he then whisked the Prince past the online demonstration carefully prepared by our senior assistant librarian, Andrew Ettinger, only allowing him to have a brief chat with the librarians staffing the Information Desk.

"The Prince asked how we issued books," Lester continued. "As we have a very simple manual issue system, we could hardly impress him there with how technologically advanced we were!"

Fortunately, Ettinger and other librarians were able to talk to Prince Charles later in the day at a reception.

Bob Haft

January brings *Annuary*

Evergreen State College Library staff have done it again: produced an upbeat publication introducing new users to its library services. "Library Life" described the Olympia, Wash., library's earlier creation in Feb. 1982.

Bob Haft, slide curator, did the photography and Judith Espinola, coordinator of media services, wrote the copy for *The Library Annuary 1983–84*, a 10½-by-16½-inch wall calendar.

In this photo from the January page, Media Production Center head Wyatt Cates poses as the New Year baby in a satirical "First Year Growth Chart." His media literacy skills are enumerated: e.g., "Mixes well, especially when words, sounds, and songs are involved."

Copies of the Annuary are available on loan through the LOEX Clearinghouse, Center of Educational Resources, Eastern Michigan University, Ypsilanti, MI 48197.

Staff acquires "handicaps"

"Staff meetings that day were really a trick," said media services head Rick Shriver of the John McIntaire Public Library in Zanesville, Ohio. "They were so unproductive, we had to go back a week later and run through all the material again."

Shriver was one of the staff who adopted a simulated handicap on "Handicapped Awareness Day," Oct. 12. He was playing deaf and said his lip-reading skills were not adequate for normal communication.

Debra Rhodes, extension librarian, coordinated the day. She was one of the first to realize that the physical barriers presented by the library building were formidable. A major drawback was the absence of an elevator to the second floor, where most adult services are located.

This sensitizing was part of two weeks of special programming in observance of "National Employ the Handicapped" week.

(Below) Marge Berry, children's librarian, learned how difficult it was to check in books with one arm in a sling as she simulated the handicap for a day.

P3448

THE CHINESE DISCONNECTION

An American in China finds his students severed from the library books they need

by John N. Miller

Author's note: This article is not meant as a general indictment of library services in the People's Republic of China. I have only limited experience with such services. I expect that many Chinese library officials strive to open their libraries to every authorized user. Indeed, conditions in Chinese libraries are likely to improve over the years to come, just as many other services are improving.

This article is meant rather as an expression of the dismay one feels when finding a wall blocking access to information in a library. It is such access that we in the United States cherish, or ought to cherish, and need to protect. We expect to meet with assistance and openness no matter where our intellectual curiosity leads us. We ought to be indignant when we or others are denied this privilege. We have a duty to be so. —J.N.M.

WHEN I WAS A graduate student in Wales, I lived in a small village overlooking the Irish Sea, a place frequented in the 19th century by Gladstone when on holiday. Everything was small there—the bakery, the school, the clinic, the library. The library—Welsh granite on the outside, and stuffy Welsh air inside, furnished with sturdy wooden tables, two of them, immovable as the walls. It was not a place to lounge with a newspaper. The very shelves seemed to frown at you, and each gave you a stern rebuke in a voice like Dylan Thomas's if you ignored it. But I couldn't stay away from the quirky place, and the librarian got used to my peculiar Ohio accent after a few weeks.

When I left Wales I moved to a town in Vermont. The library there was a modern, two-story affair with plenty of big windows, soft blue carpet, clearly labeled shelves, and the latest records in plastic covers. You could sit in cushiony easy chairs and browse through papers from Boston or New York, or read about local town meetings while keeping an eye on who was walking by outside.

Served in every conceivable way

Libraries. From the stolid cathedrals of the big cities of the East with the inevitable bum asleep in a corner chair, to the breezy, multimedia places in prosperous towns, bustling with teenagers doing their homework, to the ancient, top-heavy village landmarks with Carnegie's name etched above the entrance, to the excitement of the academic repository of ideas. I can't avoid them, and they've served me in every conceivable way wherever I've been. Would that I had a dollar for every hour spent browsing aimlessly, or nearly so, in libraries from San Francisco to Providence, from London to Edinburgh.

Not long ago I began teaching at a college in the city of Wuhan (population over three million) in central China. There, for the first time, I had a war with a library.

I taught English in 1981–82 at one of the largest teachers colleges in the country. My students, most of whom were perfecting their already reasonably good English, will be English teachers in Chinese high schools when they graduate. They have virtually no textbooks in any courses. China is still a very poor country. So with textbooks scarce, supplies in bookstores either non-existent or very meager, and any spare money going for food and clothing, the importance of the college library as a source of materials is magnified.

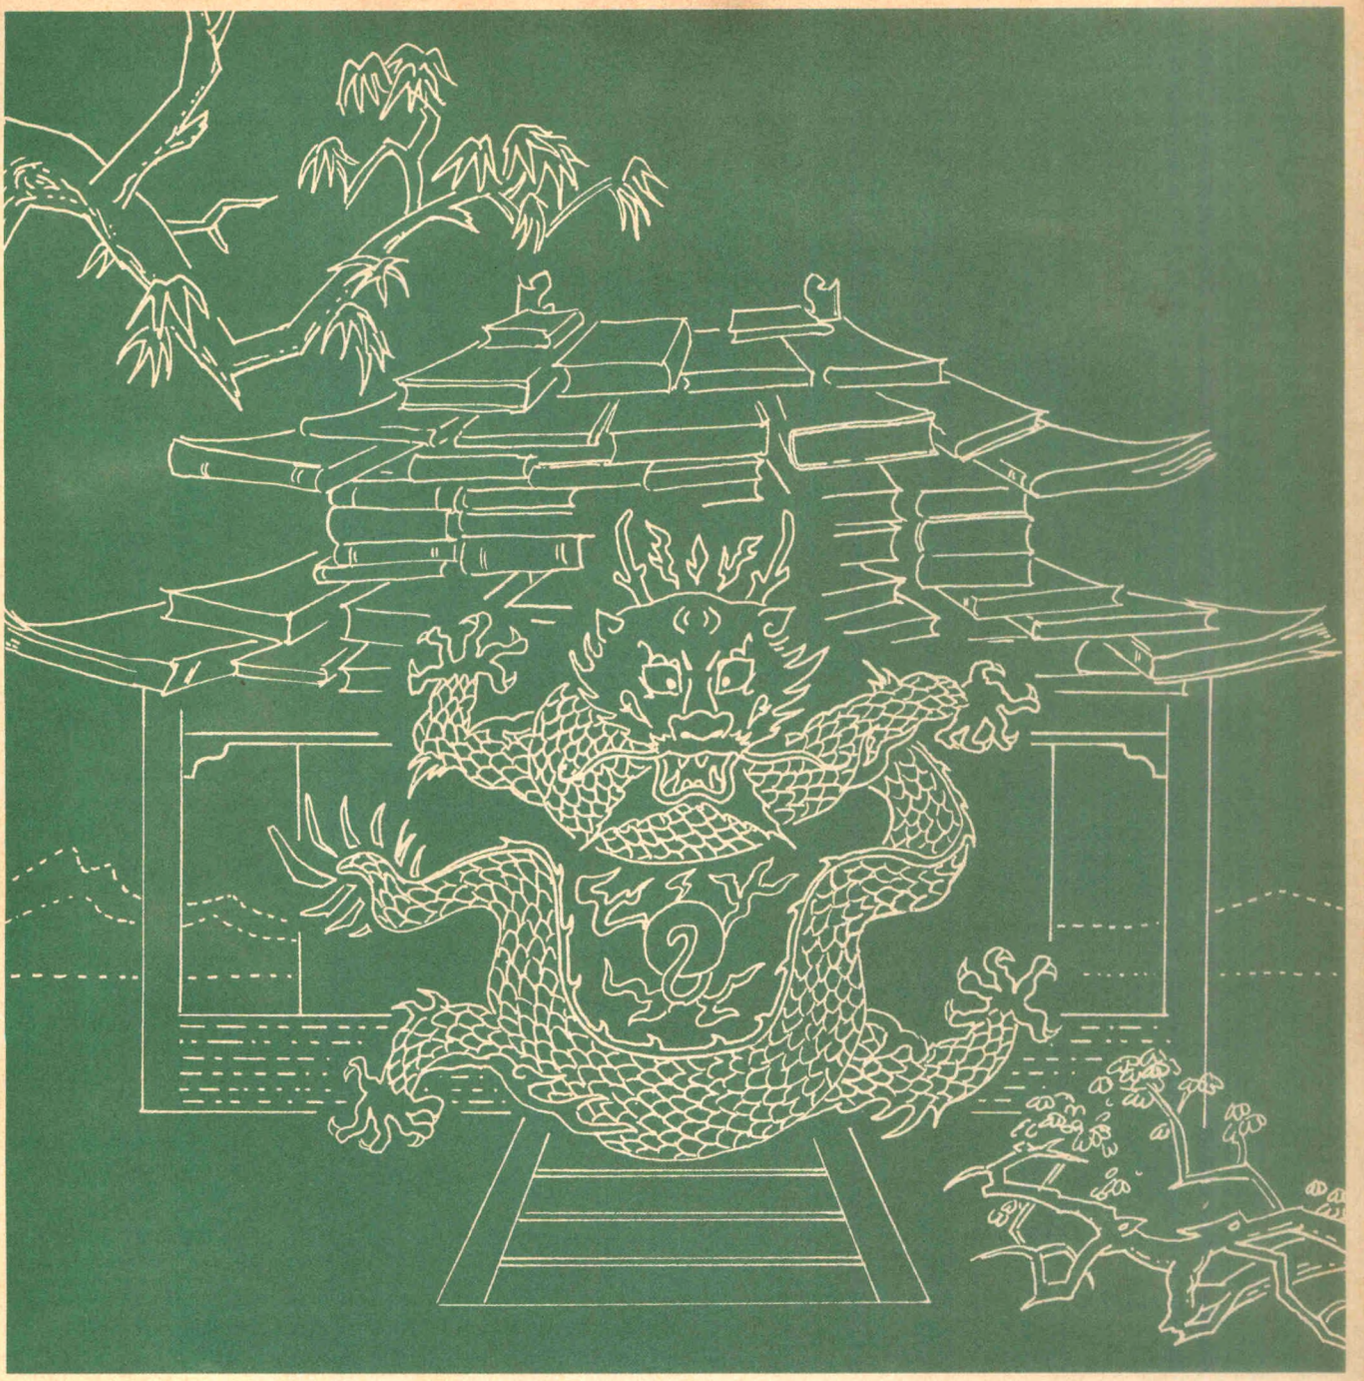
Our school's library, like most such buildings in China, is an ugly, rectangular monster, two stories of bare concrete. Reading rooms are jammed with tables and crowded with students who have no place else to study, and all are overseen by a gigantic portrait of Mao, still not entirely out of favor in Hubei Province.

The rooms steam in the notorious Wuhan summer, the walls dripping with humidity, and they freeze in the winter. There is no heat, no carpet, nothing to take the edge off the cold. Students come armed with stocking caps, bulky coats, and gloves with the finger tips cut out so they can take notes. There are never enough seats for the number of students, so between classes there is intense scurrying about. In all seasons the library reeks from the foul odor of the bathrooms as it winds its way up the staircases. You quickly learn the most important places to hold your breath as you walk down the halls.

Despite these handicaps, students never fail to fill up the library. It's a place to study. Such places are few, and students in China work hard; their future rests on their industriousness.

John N. Miller is an English teacher specializing in English as a second language. He has taught at Antioch and Wilberforce Universities, and earlier served with the Peace Corps in Guatemala. He spent the 1981–82 school year at the Central China Teachers College, People's Republic of China, where he taught English composition. He currently teaches in the Portland, Ore., area.

Pro Lingua Associates of Brattleboro, Vt., will publish his text on English as a second language early this year.



Mary Phelan

No one in authority objects to students bent over their studies at the library tables; but those who try to borrow a book, read a newspaper or a journal, or make easy use of a reference work run into trouble. The fact that students aren't allowed into the stacks would not be so important if there were other reliable means for them to find a book. But the obstacles placed in their way are sufficient to frustrate even the most determined.

If one can wade through the sea of confusion in the card catalog, one faces that creature notorious to all Chinese city dwellers: the clerk. In the department stores they are rude and careless, flinging merchandise at the customers with disdain. In the libraries, behind the formidable counters, their noses poked into a pile of bureaucratic busywork of the sort that plagues all of China, clerks and their bosses see customers as nuisances to be handled with suspicion and antagonism.

After a cursory look through the mysterious stacks beyond closed doors to the rear, the library clerk will, more often than not, return to announce without expression, "We don't have it," or "It's out."

The spoils of war

I lost my war with the library as I knew I would; but I won a battle or two, or at least I was allowed to think so.

My enlightenment began my second day in Wuhan, when I decided to investigate the library. I learned immediately that even faculty were not allowed in the stacks. I took it good-naturedly when I was referred to the card catalog by a heavy-set clerk with thick glasses. After half an hour I returned to

her with six titles in a neatly arranged list. She left, reappearing with two small books. "These two are out," she said pointing to my list, "and these two are picture books." No one was allowed to borrow picture books. Hoping to avoid the scourge of being labeled a bellicose American, I beat a polite retreat.

But I needed those picture books for my courses, and a discussion with the chairman of my department resulted in a letter enabling me to go into the stacks, borrowing the picture books I needed for one time only.

What curious wonders I found there, armed as I was with my wooden pass to flash for anyone who questioned my authorization. The English collection consisted of perhaps five thousand volumes, many of them old enough to be remnants of the colonial days when Wuhan was an outpost of British, German, and French trading. There were dusty copies of John Buchan novels, Agatha Christie mysteries whose rickety covers crinkled when opened, the odd history (one on German atrocities during World War I), collections of Dickens novels and G. K. Chesterton essays.

There was a section of gifts from the Soviet Union during the friendlier days of the fifties: Gorky's novels and stories in stern brown covers, the works of Lenin, Tolstoy's memoirs, all of them smelling as if they'd been in an attic for decades.

The Soviet collection stops at 1960, about the time the American one begins. And a surprising collection that is, beyond such authors as Mark Twain, Ernest Hemingway, and Jack London (perhaps the most famous American writer in China). It includes modern works such as Ann Beattie's *Falling in Place*, Nabokov's *Lolita*, Updike's *Couples*, and Erica Jong's *Fanny*. Most of these had been gifts of an American publishers' tour that stopped in Wuhan. There were also Chinese editions of pirated novels such as *Winds of War*, with the title pages empty of everything but the titles. (China is not a partner in the international copyright agreement.)

Infiltrating the stacks

Most valuable to me were classic English and American novels in paperback, and modern books on English grammar and linguistics. As the term progressed my students began asking me how they could find books in English for their language practice. Still naively confident, I referred them to the library, telling them of the collections I'd seen. They invariably returned to me with the bad news: the book they'd wanted was "out."

I was suspicious. A few days later I took my notebook to the stacks and listed titles the library held in at least a dozen copies. Among a total of about 40 titles were *Pride and Prejudice, Huckleberry Finn, English Idioms, English for the Foreign Student, Dombey and Son, Catcher in the Rye*, and *Sons and Lovers*. I made copies of this list and presented them to all 75 of my students, advising them to arm themselves with one on their next trip to the library. Thus ended any chance I'd ever had of befriending the librarians.

The outcome was predictable: "We don't have this book." "Someone has this book out." "This book has been stolen." My students returned to me disappointed, but neither surprised nor angry. If Chinese students had a tradition of activism, it was certainly dormant here.

I had other defeats at the hands of libraries. After being granted permission to borrow from the English collection of the history library, I was then summarily denied permission when I presented the librarian with the specific request: two books by Will Durant. The library, it seemed, was undergoing some sort of invisible renovation which precluded lending.

When, for my courses, I tried to borrow books from the library of another college, I was told it simply couldn't be done.

Were these and other incidents unique to my experience? If so, they would be less cause for concern. Bu I have heard similar stories from other visiting teachers. In a country whose colleges and universities are begging for books and materials, what is available is now sequestered and guarded, given out jealously only to the privileged.

A monumental waste

The Hubei Provincial Library in Wuhan is a cavernous building containing over three million volumes. Theoretically it is supposed to serve the population of Hubei, over 35 million. However, you need a library card just to get past the front door, and only one thousand of these are issued.

Libraries do not borrow from one another; school libraries grant no privileges to one another's faculty; libraries routinely keep such supplies as tape recorders, slide projectors, videotape machines, and movie projectors locked up and utterly unused, so that they remain in the pristine condition in which they were received. For all practical purposes this material, though it exists, doesn't exist.

In monetary terms the waste in books and other tools of learning that go untouched is monumental. In the meantime, students make do with pathetically poor homemade "textbooks" or no books at all.

The foreigner living in China gradually learns some of the many ways ideas are regarded as dangerous. Of all places this is especially apparent at colleges and universities, where we are given to expect intellectual challenge, exchange, and debate. Foreigners in China lead a curious existence, being both welcome and unwelcome, wanted and unwanted, revered and reviled.

So it is with books. Libraries spend precious money on them, then squirrel them away for decades, the ideas within them carefully enclosed between their deteriorating covers. (Hence, when we left the country we made sure to give our own books to individuals and not, as would have been my natural inclination, to the library.)

Librarians are not overseers of the dispensing of information, but managers of warehouses that boast of their contents but keep them under lock and key. As with a rich man who never spends his money, their treasures can only be guessed at.

In a society where intellectual creativity is dangerous, where professors neither publish nor discuss their thoughts if they happen to differ from the orthodox line, and where the orthodoxy may change next year or next month, libraries can be expected to be little else than what they are in China. Conservatism reigns. As some of our students told us, "It's the crowing chicken that gets thrown into the pot." The deadening influence of this on some of the best minds in the country not only makes the atmosphere of Chinese colleges and universities exceedingly dull (especially in the humanities), but produces a waste of talent the country can ill afford. □

Now another choice for your union list.

Faxon has specialized in serials management for libraries for over 100 years. Now we're offering a Union List module on Linx, the online serials management system. Union list groups can add, share, and maintain up-to-date information on their collective serial titles and holdings.

Because we're flexible, we can handle your current machine-readable lists or save time during your manual conversion, thus saving you valuable manpower resources. Our Union List products are available now and include both group lists and individual member lists in hard copy, tape, or microfiche.

Make a choice soon! You don't have to use Faxon's subscription service to take advantage of our Union List. Call our Sales Department at (800) 225-6055 or (617) 329-3350 (collect) and arrange for a demonstration of Faxon's Union List.

WANTED BY AMERICAN LIBRARIES

For special issues and new features

1. From publishers of professional literature for librarians:

In the April 1984 issue, *American Libraries* will highlight new books treating topics of importance to professional librarians. Wanted are review copies, galleys, or manuscripts from which interesting passages can be excerpted. All publishers, large or small, are invited to submit materials for consideration. Send them to the Editor, Professional Books, *American Libraries*, 50 E. Huron St., Chicago, IL 60611.

For those who wish to advertise in this issue, the rates begin at $170 (1/12 page, one-time insertion), or $4 per thousand readers, based on *American Libraries'* paid circulation of 42,311. The deadline for space reservations is *February 15;* materials must arrive by *February 22*. Contact Leona Swiech at 312-944-6780 for rate card and further information.

2. From producers of library software for microcomputers:

For its new feature, "Software Showcase," *American Libraries* is seeking interesting new library-function programs capable of running on 64K RAM micros. Send a brief description of your program to The Editor.

3. From producers of videotapes to train librarians or users:

For a new feature in development, *American Libraries* wants to hear of training videotapes available for loan or purchase. Send a description to The Editor, with, if possible, production stills or off-air photos.

The "gift" of vacant schools for branches

One library's policy for refusing or accepting this increasingly common offer

by William R. Gordon

DURING THE THREE DECades following World War II, the population of Prince George's County, Maryland, grew at a phenomenal rate, peaking at about 700,000. To provide classroom space for a mushrooming, school-age population, the county's Board of Education sustained a vigorous construction program for 30 years.

Suddenly, the growth rate slowed. By the mid-1970s it became evident that there were far more school buildings than the declining school-age population required. Since 1977 the Board of Education has closed 65 schools, and it expects to close 30 more at the rate of three each year for the next decade.

The board relinquished ownership of the vacant school buildings, and transferred the responsibility for disposal of the buildings to County Government. Task forces and committees were set up to decide what to do with nearly a hundred vacant buildings. Ranging from 10 to 50 years old, the buildings were all clearly designed as schools, divided into relatively small rooms.

William R. Gordon is director of the Prince George's County Memorial Library System, Hyattsville, Md.

A common scenario

It appeared that nearly every municipality and neighborhood in the county saw "its" vacant school building blossoming into a full-service community center, with programs for the aging, recreational services for all ages, and, of course, a neighborhood public library.

Once the economic realities of maintaining a community center in a 30,000–60,000-sq.-ft. building became evident, however, most municipalities abandoned their notions of full-blown centers. But the idea of a legion of neighborhood libraries is dying a more painful and prolonged death. The idea seems so reasonable to so many people.

With three exceptions, the Board of Trustees and administration of the Prince George's County Memorial Library System has said "no" to requests for small branch libraries in closed school buildings.

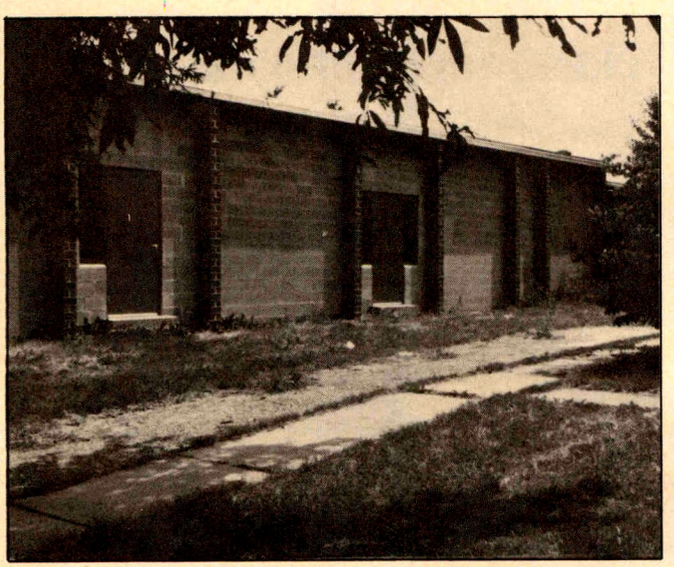
Over the years some of the school buildings were sold and converted into office buildings, housing for the elderly, and clinics. Others were converted into municipal and county office space. A few were razed.

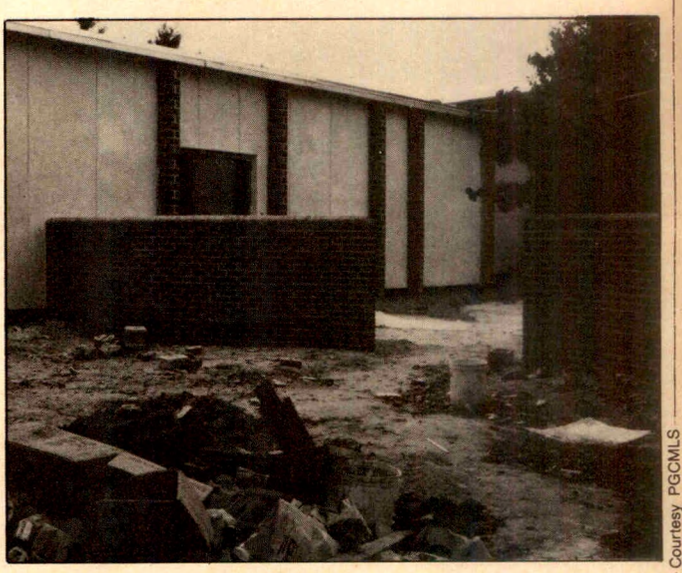
Disposal of most of the school buildings remained a problem, as did the belief that they would make good public libraries. At the instigation of the library's administration, the library board formulated and adopted a "Statement On the Use of School Buildings" in May 1983. This statement of policy is used each time the library is asked to consider yet another branch in yet another closed school building.

Policy statement

The statement is clear and straightforward. The first of its four sections focuses on the history and philosophy of physical facilities for public libraries in the county, the criteria for their design and location, and the reasons why the library system has used three closed school buildings for branch libraries: because the location criteria were met, and it was possible to satisfactorily renovate the buildings for library use.

The second section describes the library's "Public Facilities Needs Assess-





Courtesy PGCMLS

A portion of one converted school building received a new stucco facing and will house an administrative area, staff lounge, maintenance facility, and public meeting room. A walled patio has been added for storytelling activities.

Despite the availability of nearly one hundred vacant buildings, the board has refused all but three of them for library use.

ment'' and the ''Long-Range Plan 1982–1987,'' both of which deal with the number and location of public library facilities needed in the county. The section also emphasizes the logic of the planning process in making reasoned decisions about library development.

The third section explains the budget implications of maintaining branch libraries, and states that:

> Establishment of branches in vacated schools, when it does not fit into our overall capital improvement and service plans, would dilute service rather than improve it. We feel strongly that the Library should not waiver from its carefully drafted service and capital improvement plans. This stance will provide better service to all residents of the county and strengthen, not weaken, our resources in future years.

The policy concludes by saying that the library appreciates the need to find alternative uses for closed school buildings and understands the belief that neighborhood libraries are a value to a community. Yet the library cannot expand endlessly; it must conform to carefully developed plans reflecting the needs of the entire county and the library's financial ability to meet these needs, currently and in the future.

Supportive both ways

The board's statement on the use of school buildings has served the library well, confirming our position when we refuse to accept a building for library use. It has also supported our decisions to convert three school buildings into branch libraries.

Our most recent renovation is the conversion of a 42,000-sq.-ft. school building into a 30,000-sq.-ft. branch library and a 12,000-sq.-ft. police substation. Again, the library system accepted this particular building because it met location criteria and could be renovated with ease and at relatively low cost.

The library took on the design and renovation of both the branch library and the police substation through a bi-agency agreement overseen by County Government. The police substation opened in fall 1982; the branch library will open in February. One wing of the U-shaped building houses a fully equipped police substation; modest remodeling was required. The base of the U has been renovated to house the branch library's administrative functions, a staff lounge, maintenance facilities, a public meeting room, and an exterior reading/storytelling patio. The other wing was razed to the footings and has been rebuilt as a spacious, unobstructed public service area of 14,000 square feet.

The library board and administration have been pleased with the policy statement. It has helped us speak the same language and say ''no'' logically and consistently. It has also helped us explain how specific school buildings are acceptable, fitting into our overall plan for development. □

Single copies of the three-page ''Statement on Use of School Buildings'' are available on request to the author, Prince George's County Memorial Library System, 6532 Adelphi Rd., Hyattsville, MD 20782. Please provide a stamped, self-addressed envelope.

Census Records From the National Archives Are Now Available 1790 Through 1910

The National Archives has re-introduced its census film lending program. Census schedules, soundex, and American Revolutionary War records are available on 16mm and 35mm microfilm for a low rental price of only $2.25 per reel.

THIS PROGRAM IS OPERATED EXCLUSIVELY THROUGH LIBRARIES AND GENEALOGICAL ORGANIZATIONS. YOUR PARTICIPATION IS ENCOURAGED.

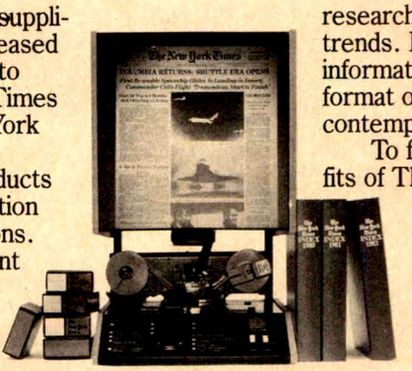
Details are available from the Census Microfilm Rental Program, P.O. Box 2940, Hyattsville, Md. 20784.

The New York Times

University Microfilms International delivers The Times to your readers.

UMI, one of the world's leading suppliers of information products, is pleased to announce a new arrangement to publish the hardcopy New York Times Index and to produce The New York Times in microform.

These New York Times products combine to create a vital information source for a broad range of patrons. For government officials who want to keep abreast of world events. For students writing term papers. For business researchers who monitor commercial trends. In short, for *anyone* who needs information in a convenient, accessible format on a variety of historical and contemporary topics.



To find out more about the benefits of The New York Times Index and The Times in microform, call our toll-free number: 1-800-521-3044. Or write: University Microfilms International, 300 North Zeeb Road, Ann Arbor MI 48106.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.

2 positions, University of California, Santa Cruz. 1) **Subject specialist for literatures of Western Europe and Latin America.** Assistant or associate librarian. The University of California, Santa Cruz, is seeking a service-oriented bibliographer to develop its collections in Western European literatures, and the history, literature, and social science of Latin America. Serves in the collection planning section and is responsible for building collections to support undergraduate programs in the literatures and graduate programs with an emphasis on French literature. Provides bibliographic and reference assistance in the humanities and social sciences in general. Qualifications: MLS or equivalent, fluency in French or Spanish and a strong working facility in the other language. Prefer graduate work in French and prior collection development and reference experience in an academic library. 2) **Science bibliographer.** Assistant or associate librarian. The University of California, Santa Cruz, is seeking a service-oriented bibliographer to develop its science collections. Serves in the collection planning section and is responsible for building collections to support strong undergraduate programs, 7 graduate programs, and 3 organized research units. Works closely with staff in the Science Library. Qualifications: MLS or equivalent, graduate work in the sciences or equivalent experience. Prefer degree in chemistry or physics and prior collection development and reference experience in an academic library. Salary range for both positions $17,412–$30,648 (possible adjustment in 1984). Open May 1. **Application deadline Feb. 15.** Send resume and names of 3 references to: Katherine Beiers, Assistant University Librarian–Personnel, **University Library, University of California, Santa Cruz, CA 95064.** An equal-opportunity, affirmative-action employer.

University librarian and associate dean of information services. Salary range: $34,860–$42,120 (a 6-percent raise is anticipated on Jan. 1). Responsibilities: administers the operations and services of the university library. Reports to the dean of information services and acts as dean's associate for library matters. Plans and directs the implementation of the library budget. Administers the library personnel process. Provides leadership for planning and evaluating policies and procedures which support the university's educational goals. Qualifications: graduate degree from an ALA-accredited school of library/information science (candidates with academic attainment beyond the MLS will be given preference). Substantial (e.g., 10 yrs.'), varied, and increasingly responsible operational and managerial library-related experience is required; preferably in a university or 4-yr. college library. General familiarity with the use of automated systems in both public and technical services, and detailed involvement with automation planning and decision making in one of them. Demonstrated ability to lead and motivate people. Strong communication skills. Evidence of continuous professional growth and contributions (e.g., grants, publications). The university library, containing over 600,000 volumes, is an integral part of the information services unit at CSU, Chico. The library has a public-access online catalog and is the pilot site in the state university system for this automation activity. Information services includes the library, instructional media center, and computer center, and provides a unified academic support service for the university. Also, information services operates an integrated regional service network for an area of 33,000 sq. miles and has recently added a satellite earth station. The library serves a student body of 14,000 students. Chico is over 90 miles north of Sacramento and 165 miles northeast of San Francisco. It is in the Sacramento Valley at the edge of the Sierras. Nearby mountains, lakes, rivers, and a national park afford excellent opportunities for summer and winter recreation. **Closing date for applications: Jan. 15.** Send a letter of application, names; addresses, and telephone numbers of 3 current professional references, and complete record of education and experience to: William A. Jones, Chair, University Librarian Search Committee, **The Meriam Library, California State University, Chico, CA 95929-0290.** An affirmative-action, equal-opportunity employer.

MEDICAL LIBRARY

University of Minnesota Libraries–Twin Cities
Director of the Bio-Medical Library
Search Extended

The Bio-Medical Library supports the teaching, research, and service programs of the health sciences on the Minneapolis campus of the University of Minnesota. These programs span the full array of health sciences disciplines and include strong outreach and service activities. The Bio-Medical Library has a total operating budget of more than $1 million, approximately one-half of which is devoted to acquisition. It has a staff of 42 FTE, including 11 professionals. It has a collection of over 300,000 cataloged volumes and receives approximately 4,000 serials.

The Bio-Medical Library is located in the health sciences complex on the university's Minneapolis campus and is physically consolidated, with the exception of the Natural History Library. The Bio-Medical Library includes a learning resources center, a major history of medicine collection, and its own processing unit. It participates in the RLIN cataloging system and utilizes its own, locally developed serials and acquisition systems. It has extremely strong database searching and information delivery programs.

The Bio-Medical Library participates in a number of national, regional, and statewide cooperative medical library programs, including the Greater Midwest Regional Medical Library Network, the Minnesota Council of Health Science Libraries, and the RLG Medical and Health Sciences Program Committee. Recognized as one of the outstanding bio-medical libraries in the country, the University of Minnesota Bio-Medical Library has been a national leader in cooperative developments, information services, audiovisual applications, and interlibrary cooperation. It has one of the strongest collections among bio-medical libraries in the country. These emphases are expected to continue in the future, with particular priority on continued collection strengths, electronic information delivery, network participation, bibliographic instruction, and closer interaction with the health sciences academic programs.

The director of the Bio-Medical Library reports to the university librarian and participates in university-libraries-wide planning and program development together with the other directors of the major university libraries' departments: central administrative services, central technical services, Institute of Technology Libraries, St. Paul Campus Libraries, Walter Library, and Wilson Library. The Bio-Medical Library director is an ex-officio member of the Bio-Medical Library Committee, which meets regularly to advise regarding the programmatic directions of the Bio-Medical Library.

Applicants for this position must have a minimum of 5 yrs.' experience in one or more bio-medical libraries, demonstrated successful management experience, an MLS or appropriate equivalent academic preparation. In addition, applicants should have demonstrated skills in administration, planning, and interpersonal relations. They should have sophisticated knowledge of the library services requirements of the health sciences and be able to work effectively with faculty, students, academic administrators, library colleagues, and staff.

Highly desirable are: an academic background in a health-sciences-related field; Medical Library Association certification; leadership potential in the areas of library automation, networking, continuing education and outreach activities, and electronic information delivery; knowledge of and participation in research projects; scholarly publishing and presentations.

This is an academic administrative position. Salary is negotiable, with a minimum of $45,000.

Applications must be postmarked by March 31. Nominations must be received by March 1.

Please send letter of application, vita, and the names of 4 references to: **Robert Wright, University Libraries Personnel Officer, University of Minnesota–Twin Cities, 499 Wilson Library, 309 19th Ave. S., Minneapolis, MN 55455.**

The University of Minnesota is an equal-opportunity educator and employer and specifically invites and encourages applications from women and minorities.

gy of information; or provision of information services. Qualifications: doctorate in librarianship, information science, or collateral field. Strong commitment to research. Experience in library/information services, or information system design and analysis desirable. Employment details: 3-yr. appointment as an assistant professor on tenure track. Salary competitive (minimum $20,000 for academic year), excellent fringe benefits. **Applications accepted to March 15.** Inquiries and resumes should be sent to: Search Committee, **Graduate School of Library and Information Science, FM-30, University of Washington, Seattle, WA 98195.** University of Washington is an equal-employment-opportunity employer.

Assistant professor: tenure-track, full-time position at the assistant professor level beginning Aug. 1. Teaching responsibilities include competencies in 2 or more of the following areas: information science, science-technology bibliography, cataloging, networking. Preference will be given to applicants with a PhD and professional experience in library or information science or closely related areas; and a strong commitment to research and publication. Minimum salary: $21,000 for academic year. Excellent fringe benefits. **Deadline for applications: March 15.** Send letter of application, resume, and names of 3 persons from whom references can be secured to: M. Sangster Parrott, Associate Professor and Chair, Search Committee, **Department of Library Science and Educational Technology, School of Education, University of North Carolina at Greensboro, Greensboro, NC 27412.** UNC-G is an equal-opportunity, affirmative-action employer.

Assistant professor. To teach systems analysis, computer programming, computer applications in libraries and/or library technology. To direct and expand a regional clearinghouse for microcomputer applications. PhD is required. 9-mo. salary $20,000+, negotiable. **Deadline for applications is March 15.** Position available Aug. 27. Send resume and references (or write or call for additional information) to: Bonnie B. Thorne, **Sam Houston State University, School of Library Science, POB 2236, Huntsville, TX 77341; 409-294-1153.** AA, EEO.

Faculty position. Emporia State University announces a new tenure-track position to enable the School of Library and Information Management to fulfill successfully its mission to provide professional education and continuing education for library and information professionals in Kansas. Applications are invited from individuals willing and able to assume a leadership role in the new curriculum implemented in fall 1983. Required qualifications: evidence of published research and other scholarly activities, record of successful teaching experience, earned doctorate in library/information management or related field, pertinent experience in the library and information professions. Preferred qualifications: experience and ability to teach in 2 or more of the following areas—learning theory, communication theory, information needs analysis, sociology of knowledge, information transfer in the humanities, information transfer in science and technology; experience in the design, implementation, and evaluation of informational, educational, cultural, or research services in libraries or other information agencies. Salary: $22,000–$35,000, dependent upon candidate's educational background and experience. 12-mo. appointment available. Rank commensurate with qualifications of applicant. Position available: summer or fall, 1984. **Closing date for applications: Jan. 31.** Send letter of application, resume, and names of 3 references to: Robert Grover, Dean, **School of Library and Information Management, Emporia State University, Emporia, KS 66801; 316-343-1200 x203.** Emporia State is an affirmative-action, equal-opportunity employer.

Faculty position. The UCLA Graduate School of Library and Information Science is seeking to make one appointment of an individual with experience in one or more of the following areas: collection development, descriptive cataloging, preservation, publishing, or serials. Applications are desired from candidates with a doctorate (or, for appointment at the acting assistant professor level, from persons about to receive one) with demonstrated experience or very strong potential in teaching, with interest and competence in research, and with knowledge of professional practice. Opportunities exist for innovative course development. Rank and salary will depend upon record of experience and competence, with the following established ranges: assistant professor ($21,000–$24,700), associate professor ($26,300–$29,600), professor ($32,200–$43,000), all on a 9-mo. academic-yr. basis. The appointment will be as of fall quarter 1984. **Applications to close Jan. 31.** Send resume with a list of references or direct inquiries to: Robert M. Hayes, Dean, **Graduate School of Library and Information Science, University of California, Los Angeles, CA 90024.** UCLA faculty will be at ALISE/ALA Washington to discuss the position. The University of California is an equal-opportunity, affirmative-action employer.

MEDICAL LIBRARY

Assistant or associate director for public services. The Houston Academy of Medicine–Texas Medical Center Library is seeking applications for an assistant or associate director of public services to begin after June 1. The ADPS functions as a key member of the library's management team and is responsible to the executive director for the planning, development, and coordination of all the operations and services of the public services division. A strong emphasis is now being placed and will continue to be placed on the development and implementation of education programs, of services and programs for the Houston health care community, and on information services marketing or brokering as these concepts are preliminarily defined in the study, "Academic Information in the Academic Health Sciences Center: Roles for the Library in Information Management." The library's public services division includes the information services department, circulation services, photocopy and interlibrary loan services department, audiovisual services department, and public relations. Experienced, well-developed, and confident communication and human relations skills are crucial qualifications for successful performance in this position, which is responsible for at least 13 professionals and 12 support staff. A master's degree in library science from an ALA-accredited library school and a minimum of 5 yrs.' professional experience, demonstrating the candidate's administrative qualifications, are required. Other criteria that will be considered are health sciences or academic library experience, participation in professional associations, and contributions to the profession through publication, consultation, or public speaking. The HAM-TMC Library is cooperatively governed by 6 participating institutions, including the 2 medical school complexes in the Texas Medical Center, Baylor College of Medicine, and the University of Texas Health Science Center at Houston. It serves a total of 19 health care and educational institutions in the medical center and the Houston community. It has a budget of over $3 million and a professional staff of 26, and it strives to be a leader in the management and service of information. The salary is competitive, with a minimum of $35,000. The library offers excellent fringe benefits including TIAA/CREF; paid medical, dental, disability, and life insurance; 24 days' vacation; and relocation assistance. **Please send your resume, references, and salary requirements by Feb. 1** to: Janis Apted, Director of Organization Development, **Houston Academy of Medicine–Texas Medical Center Library, 1133 M.D. Anderson Blvd., Houston, TX 77030.**

NETWORK

OHIONET member services coordinator. Primary duties include training and communicating with OHIONET member and potential member libraries regarding computerized bibliographic and information systems, chiefly the services of OCLC. Qualifications: MLS degree or equivalent experience to prove excellence in written and oral communication, thorough understanding of library operations and their automated applications. Desirable: experience with writing technical memoranda, manuals, and training guides; and with BRS and/or DIALOG. Highly desirable: experience with training professionals and support staff on OCLC subsystems and with microcomputer applications to library processing and/or research. Essential: experience with OCLC cataloging (additional subsystems preferred). Position available immediately. Starting range: $16,328–$19,000 annually plus benefits. Send resume to: Joel S. Kent, Assistant Director for Member Services, **OHIONET, 1500 W. Lane Ave., Columbus, OH 43221-3975.** EOE, AA.

OTHER

Extension consultant. Salary range: from Grade 10, Step 1 (up to $18,512 annually) to Grade 10, Step 6 (up to $24,315 annually). Qualifications: minimum qualifications include a graduate degree in library science or its equivalent from an ALA-accredited program; 5 yrs.' professional library working experience; appropriate professional experience in extension services or a related area of library work; 2 yrs.' successful supervisory experience; driver's license and access to a car; willingness to travel within the region. Columbia University
Health Sciences Library

The Health Sciences Library serves the Schools of Medicine, Dentistry, Nursing, and Public Health, the Presbyterian Hospital, and other affiliated health care, instructional, and research programs in the Columbia-Presbyterian Medical Center. The library has a full-time staff of over 40, a collection of approximately 385,000 volumes, more than 3,200 current journal titles, a large media center, and a comprehensive special collections section.

Head of reference. The position reports to the assistant health sciences librarian for resources and reference services and manages all information services, database searching, formal and informal instruction, and interlibrary lending and borrowing. Responsibilities include promoting effective use of library resources through outreach programs; supervising 5 librarians, 2 support staff, and student assistants; coordinating reference activities with other operations both within the Health Sciences Library and with other Columbia libraries; and participating in overall library planning and collection development.

In addition to an accredited MLS, requirements are: at least 5 yrs. of previous relevant experience, as demonstrated by experience and competence in health sciences reference; excellent written and oral communication skills; ability to manage effectively and to plan for and implement change in a complex environment; evidence of organizational ability and imagination; knowledge of networking, bibliographic instruction, and computerized resources. An undergraduate degree in one of the biomedical sciences and knowledge of 2 modern Western European languages are desirable. Salary ranges: Librarian II, $23,500–$30,550; Librarian III, $26,500–$38,425. **Deadline for applications is March 1.**

Head of cataloging. This position reports to the assistant health sciences librarian for access and technical services and manages all cataloging activities. Responsibilities include planning and implementation of cataloging and other bibliographic control policies and procedures; supervision of one professional and 3 support staff; coordination of bibliographic control policies with the university libraries; participation in planning overall Health Sciences Library services and operations. Duties include performing some original cataloging and resolving difficult cataloging problems. The cataloging unit processes copy cataloging and provides original cataloging for books (including rare books), serials, and audiovisuals. Cataloging operations are automated through RLIN. In addition to an accredited MLS, requirements are: minimum of 4 yrs. of cataloging experience in an academic or research library; command of current cataloging principles and practices; experience with an online technical service system; evidence of initiative, problem-solving ability, and good oral and written communication skills. Experience in cataloging biomedical materials, knowledge of LC classification and MeSH, and a working knowledge of at least 2 modern foreign languages are desirable. Salary ranges: Librarian II, $21,500–$27,950; Librarian III, $24,500–$35,525. **Deadline for applications has been extended to Feb. 1.**

Excellent fringe benefits include tuition exemption and assistance with relocation expenses and housing. Submit resume, specifying position applied for and listing 3 references and salary requirements, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

working relationships with area libraries, community groups, and co-workers necessary. Skills in gathering, synthesizing, and interpreting community and user data, and ability to lead in a group planning process. Other information: successful candidate will administer a 10-person department providing bookmobile service to 6 counties and books-by-mail service to 10 counties in the Appalachian region of Ohio. Target populations include rural people, homebound, and handicapped area residents. Position is LSCA—Title I funded. Fringe benefits include fully paid coverage in OVAL group insurance program, 22 working days' vacation per year. **Application deadline 4:30 pm Friday, Jan. 20.** Apply by resume with names of 3 references to: Linda L. Harfst, Director, **Ohio Valley Area Libraries (OVAL), State Rt. 93 W., 252 W. 13th St., Wellston, OH 45692-2299.**

Member services librarian. The Bibliographical Center for Research (BCR) has an opening in its information retrieval services department (IRSD) for the member services librarian responsible for conducting basic training sessions, training on DIALOG, technical assistance, marketing IRSD services, promoting IRSD services at conventions, contributing to BCR's newsletter, and assisting in the creation of new workshops. Requirements include an MLS or equivalent, a minimum of 2 yrs.' experience in searching BRS and DIALOG, oral and written communication skills, experience in training and marketing, and the willingness to travel. Familiarity with the use of microcomputers and the OnTyme-II electronic mail desirable. Minimum salary $16,200 per year with annual merit and cost-of-living increases, full health coverage, staff development benefits. **Send resume and 3 references by Feb. 3** to: Joyce Coyne, **BCR, 1777 S. Bellaire, Suite G-150, Denver, CO 80222.**

PUBLIC LIBRARY

Adult services librarian for service-oriented public library. New building planned, automated circulation system anticipated. Qualifications: MLS, public library reference and readers' service experience required, DIALOG searching preferred. $16,352—$23,011 (Jan. salary increase expected). Interviews possible at ALA Midwinter. Send resume to: Katherine A. Golomb, Head of Adult Services, **Westport Public Library, 19 Post Rd. E., Westport, CT 06880.**

Assistant executive director in a 7-county cooperative library system with the headquarters in the Greater St. Louis Metropolitan area. Primary responsibility for the continued development of multitype library cooperation within the system. Serves as head of public service department (audiovisual, children's & young adult services, print shop, courier, circulation, talking books) and supervises prison library program. Requires the ability to develop and direct imaginative programs to enhance service to member libraries. Must have demonstrated administrative and leadership skills. Minimum requirements: ALA-accredited MLS; 5 yrs.' progressively responsible professional library experience, including 2 yrs. at an upper administrative level. Salary: mid-$20s. **Send resume and list of references prior to Jan. 30** to: J. Alexi Fosse, Executive Director, **Lewis & Clark Library System, POB 368, Edwardsville, IL 62025.** Interviews will also be conducted at ALA Midwinter.

Associate director for public service. Responsible for organizing, planning, directing, and coordinating library policies and procedures which govern the delivery of service to the public. Participates with other associate directors in the overall program and budget planning for the library; in planning for the library; in planning for effective utilization and development of staff; in the acquisition of materials necessary to maintain the standards established by library policy; and in recommending equipment or building changes which affect the quality and provision of service. ALA-accredited MLS degree, extensive and appropriate library experience at the managerial level, thorough knowledge of overall administrative procedure, experience in public service, and demonstrated ability to develop programs and community contacts. Library system consists of large main library, branch libraries plus bookmobiles, a vigorous service to shut-ins and retirees, and an aggressive information and referral service. Applicants should possess dynamic leadership abilities and must have a keen appreciation of, and commitment to, service to the library's public. Salary: $35,000—$36,000. Blue Cross—Blue Shield; liberal vacation, city pension, etc. Send letter of application and resume to: Jane Hale Morgan, Director, **Detroit Public Library, 5201 Woodward Ave., Detroit, MI 48202.** An equal-opportunity, affirmative-action employer.

Our competencies defined: A progress report and sampling

First developments in the eagerly awaited "New Directions" project

by Jose-Marie Griffiths

Ed. note: Beset by crises in education, hiring, and status, the library community desperately needs resources for defining—to both the profession and the public—the present and future competencies of its work force. One major resource in the making is the "New Directions" project being carried out by King Research, Inc., for the U.S. Dept. of Education. The resource will be available for use later this year. In the meantime, we asked Project Director Griffiths to provide AL readers with a glimpse of developments to date. Her cooperation, in the midst of a crowded schedule, is much appreciated. —A.P.

There appears to be an overall concern today with the problems of keeping education and training problems up to date in light of technological and other societal change. These concerns, which ripple through the entire education and training communities, are predicated not only by the occurrence of change, but by the acceleration of the rate of change our society is undergoing.

Nowhere is the problem of keeping pace more acute than in the information field. New information technologies are affecting all aspects of our lives in predictable as well as unpredictable ways. Accompanying this tidal wave of information technologies is the urgent need to produce a nucleus of well qualified, competent information professionals. Answering this need calls for an ongoing dialogue between the education and training community and information professionals and their employers.

The project "New Directions in Library and Information Science Education"[1] can be viewed as a first step in developing a mechanism to enhance timely feedback among all participants in the information community (researchers, educators, practitioners). Such a mechanism will help ensure that required competencies are identified, described, and validated, and taught on more of a real-time basis.

The objectives of the project are to set forth a planning framework for such a mechanism; describe how the mechanism can be implemented; conduct a first planning cycle (including identifying, defining, describing, and validating competencies); and describe how successive planning cycles can be carried out so that the development of future competencies reflects the dynamic nature of the information environment.

The components of "competencies"

The major focus of project activities to date has been the identification and description of competencies. Competencies

Jose-Marie Griffiths of King Research, Inc., is director of the project, "New Directions in Library and Information Science Education," commissioned by the U.S. Dept. of Education.

PLAIN AND SIMPLE

Our physical size and financial strength—necessary to make and honor commitments—indicate the successful working relationships we have with thousands of libraries worldwide.

But the plain truth is, simply, that it is our sensitivity to your unique requirements, and our flexibility in providing an exhaustive and relentless effort for total customer service that is our real strength.

We want to work with you—to help you provide exceptional patron service, which is your strength.

We can help. Write today—P.O. Box 1943, Birmingham, AL. 35201
or call (205) 991-6600.

EBSCO SUBSCRIPTION SERVICES
The Serials Professionals

EBSCO Industries, Inc.

have been defined in a variety of ways and at several different levels. For the purpose of this project, competencies were defined as comprising these major components: knowledges, skills, and attitudes. We felt that a framework for identifying competencies of information professionals needed to be developed so that the identification process could proceed in an orderly fashion, and so that any obvious gaps or overlaps could be identified. The framework (described in more detail in an upcoming project newsletter[2]) contains these primary dimensions:

- Type of work setting (e.g., library, clearinghouse, database publisher.)
- Functions performed (e.g., reference, cataloging, abstracting)
- Professional level (e.g., entry-level, mid-level, senior-level)
- Prevailing trends affecting the information profession

These major dimensions are supplemented by a set of subsidiary dimensions:

- Types of users served
- Tools and techniques used/applied
- Types of materials handled

Once this framework had been developed, the formal competency identification process began.

Two methods for identifying competencies were used. The first was through an extensive interview process with both individual information professionals and their managers/employers. These interviews also helped identify environments within

Sample Competency List: For a Senior Level Reference Librarian (over 10 years' experience) in a Special Library

Knowledges

Knowledge of:

- the overall structure and organization of libraries and information centers
- the various functions performed by libraries and information centers
- the range of services offered by libraries and information centers
- the expanding roles of the information community in meeting information needs
- alternative methods for organizing information and their implications for retrieval
- reference/referral services
- reference/referral tools
- how to use reference/referral sources and tools
- the basic principles of computer-assisted retrieval
- how to prepare, maintain and use special-pupose files (e.g., vertical files, picture files, etc.)
- how to use and instruct others in the use of library tools, including catalogs, bibliographies, indexes, directories, enyclopedias, almanacs, etc.
- various techniques to promote the library or information center and its services
- performance evaluation methods and techniques
- personnel management methods and techniques
- the mission, goals and objectives of the organization served
- the role of the library or information center within the organization
- users' information needs and requirements
- the collection and related collections
- the primary subject fields of the users

Skills

Ability to:

- establish rapport with users
- communicate well by written, verbal and non-verbal means
- negotiate a reference inverview
- analyze information requests
- formulate query, and collect, analyze, and interpret data
- use a variety of vocabulary devices
- select appropriate search strategy based on available resources, time constraints, costs, etc.
- search online databases effectively
- when appropriate, evaluate and advise patrons as to the currency, accuracy, and sufficiency of information retrieved or received so that patrons can evaluate usefulness of that information
- devise and publicize pathfinders, booklists, displays, etc., which will ease access to collections and will motivate use
- market the library and its services
- perceive the needs of the organization and not just the library
- anticipate long-range needs of reference service and accumulate materials accordingly
- analyze community information processes and translate findings into improved information services
- teach staff
- provide instruction as necessary to a wide variety of patrons, in a wide variety of topics, both formally and informally
- select methods for providing current awareness services
- develop and present library programs
- develop special tools which provide access to information not readily available, e.g., community resources, special collection
- determine method(s) for locating desired materials that could not be found in available lists of holdings
- make effective, timely, and well informed decisions
- isolate and define problems and develop the necessary criteria and action for their solution
- apply methods of measurement and evaluation
- manage time effectively
- apply quantitative skills in budgeting, projecting, supplying
- make recommendations on system improvement
- assign job responsibilities
- develop plans
- develop and implement policy and interpret policy both to parent organization and to staff
- assign staff to develop specific objectives and new programs from general objectives
- supervise staff
- evaluate adequacy of personnel utilization based on available positions, tasks to be performed, cost analysis, etc.

Attitudes

Practitioner should demonstrate:

- a positive attitude toward the profession, the organization served, the library, and its users
- a positive attitude toward working under various constraints, e.g., time, cost, staff
- a desire to satisfy the needs of user
- a desire to be cooperative
- a sense of responsibility
- a willingness to help people
- a willingness to keep up to date through professional reading, etc.
- a willingness to fail
- a willingness to learn
- tenacity/determination
- inquisitiveness/curiosity
- diplomacy
- patience
- resourcefulness
- flexibility
- confidence

which information professionals perform, and the extent to which these environments are changing. The interview process was based on the approach developed by McClelland,[3] and is described in more detail in the project newsletter.[4] This approach to competency identification was supplemented by an extensive literature review.

The competencies identified to date have been compiled into listings organized by three of the major dimensions of the framework mentioned above: work setting, function performed, and professional level. The lists (in their present form) represent the aggregation of competencies identified through the two methods.

A sample competency list

The example shown is a preliminary competency list for a senior-level (over 10 years of professional experience) reference librarian working in a special library. Each list is organized into knowledges, skills, and attitudes. The knowledges vary from generic knowledges that are likely to be required by all information professionals, to more function-specific knowledges, to organization-specific competencies (which have to be acquired on the job). Skills span a similarly broad spectrum. Attitudes range from attitudes toward the profession, to attitudes toward one's job, to attitudes that seem more like personality traits. The sample listing included here is a base listing derived from our data collection efforts. Our next step is to subject these lists to a validation process.

Validating by peer review

The validation process selected by us (in view of constraints of time and budget) is that of peer review. Competency listings of the type displayed in the boxed sample are being sent to professional groups and individuals for review and comment. The lists should be reviewed from several perspectives:

Competencies. Does the list cover all aspects of competence?

Relevance. Are all the competencies in the list appropriate?

Relative importance. Which competencies are essential, desirable, etc.?

Future. Which competencies are most likely to change, and how?

To make the results of this project as widely applicable as possible, we are soliciting input representing a variety of perspectives—that of the educator, employer, professionals, professional societies, placement officers, personnel officers, and so on. Once the base-level lists have been validated, we will undertake such higher-level analyses as identifying competencies that are generic across functions, or across work settings. The results of these analyses should provide potentially useful information for all the communities within the information field.

The list of competencies can be obtained from King Research, Inc., 6000 Executive Boulevard, Rockville, MD 20852. Since there are well over 100 different lists, please indicate your area of interest (in terms of work settings and/or functions). Comments and suggestions should be returned to us as close to the end of January as possible. □

Notes

1. The 18-month project was contracted to King Research, Inc., in 1982 by the U.S. Dept. of Education. Overall aims were to determine the present and future competencies needed by library and information science professionals and to examine the educational requirements necessary to achieve those competencies. Related stories appeared in the January 1983 *American Libraries*, p. 22–26, Sept., p. 519–525, and Dec., p. 706.

software showcase

The Personal Bibliographic System:

A "front end" to the online library

by Victor Rosenberg

Ed. note: "Software Showcase" is a new monthly service designed to alert readers to microcomputer programs of special interest to library professionals. Software designers and vendors are invited to submit, for the editor's consideration, brief factual descriptions of their programs, with the understanding that they will supply requestors with further information at no obligation. Inclusion of a product in this department does not constitute endorsement by ALA or any of its units.

Throughout its relatively brief history, information retrieval, and to a lesser extent library automation, has been more concerned with the identification of the required material than the form of the resulting output. It is considered sufficient for the computer to simply provide the "right" record. In library automation the emphasis has been on the improvement of library technical services, with the assumption that the librarian will then be able to provide better service to the user.

All of this leaves the user in the ironic situation of sitting before a computer terminal with access to the entire library catalog—possibly comprising more than 10 million catalog records—but with a pile of three-by-five slips next to the terminal to jot down the relevant bibliographic information as it appears on the screen. If the terminal has a printer, the user leaves the library with a long scroll containing the needed items.

The Personal Bibliographic System has been designed as a user's "front end" to the online library. It is a specialized word processing and database system for compiling and maintaining a bibliography. The programs allow input of bibliographic information manually or from bibliographic utilities, and they format the output according to the American National Standard For Bibliographic Citations (ANSI Z39.29 1977). If a suitable printer is used, the result is a correctly punctuated, alphabetized, formatted bibliography ready for appending to a paper or book, or for independent publication.

Two-part system

The system consists of two programs. The first is the bibliographic formatting program. This program allows a user with a microcomputer to create, edit, maintain, and format a bibliography. It contains the word processing, formatting and data base components of the system. The program accepts manual input by prompting the user for information according to document type, stores the material in the database, and formats the output according to the ANSI standard.

The second program, the Data Transfer System, consists of a terminal emulator to access the bibliographic utility (OCLC, etc.) and a conversion program that converts the catalog record into a bibliographic citation and enters it into the database. Using the two programs the user may merge manual input with the "downloaded" input.

Once the information is in the microcomputer database, the user may edit the material at will. The Data Transfer System is designed to extract all the information from the catalog record that might also appear in the bibliographic citation. Thus note fields from the catalog record are extracted in their entirety and put in the note field of the bibliographic record. If the note field is not desired for the citation it can be deleted with one keystroke. A manually entered sample citation and an unedited sample citation downloaded from OCLC are shown below.

Boolean retrieval provided

Access to the information is by first field (usually either author or title) and by assigned index terms. Boolean retrieval on index terms is also provided. The resulting bibliography may be printed in alphabetic order or in a user-defined ordering. It may be arranged by category using the index terms, or individual citations may be selected one at a time. Output may be indented, paginated, and numbered at the user's discretion. All fields and records are variable in length; thus the total capacity of the system varies according to the disk capacity of the microcomputer and the size of the records.

In addition to books and journal articles, the Personal Bibliographic System formats citations for maps, letters, manuscripts, reports, newspaper articles, dissertations, trade catalogs, conference proceedings, music scores, sound recordings, motion pictures,

One of the major problems facing the researcher is the different requirements of each journal for the formatting of bibliographies. . . . Since the system is designed as a tool for researchers, future versions of the program will provide for a wide variety of formats.

video recordings, audiovisual materials, art works, computer programs, and data files. The program handles all the formats that OCLC uses, and implements all of the ANSI standard except for legal documents.

Standard-bearer

One of the major problems facing the researcher is the different requirements of each journal for the formatting of bibliographies. The obvious answer to this is standardization, and the ANSI standard, prepared by a committee of librarians, publishers, and scholars, is perhaps the first comprehensively defined format. It is a format specifically designed to facilitate computer output. The other commonly used standards, e.g. the *Chicago Manual of Style* and the standards of the American Psychological Association and the Modern Language Association, do not adequately provide for the wide range of materials that can be cited. Since the Personal Bibliographic System is designed as a tool for researchers and library users, future versions of the program will provide for a wide variety of formats; but perhaps automating the ANSI standard first will show publishers the obvious advantages of a common format.

A useful computer program is an evolving technology. Special versions of the Personal Bibliographic System are available to support specific printers that can handle foreign language characters or drive typesetting devices.

Other features of the Personal Bibliographic System include a complete screen editor that allows the user to insert, delete, exchange, copy, and move characters anywhere on the screen; word "wrapping" at the end of a line; "soft" hyphenation; upper and lower case; variable-length abstracts and notes; keyword indexing; disk labeling; control of page format (lines per page, characters per line, line spacing, single sheet or continuous form paper feeding, beginning page number, etc.); help files; backup copying program; and record deletion with disk space recovery.

System requirements

The programs are written in Pascal and include the required operating system on the diskette. The programs are available for the IBM PC, the Apple II, IIe, and III; the Victor 900; and the TERAK microcomputers. They will soon be available for other microcomputers. Minimum requirements for the programs include two disk drives, 64K of memory, an 80-column display, and a printer. The Data Transfer Program also requires a serial port and modem.

The programs are available from Personal Bibliographic Software, Inc., P.O. Box 4250, Ann Arbor, MI 48106 (313-996-1580). The Personal Bibliographic System is $250 and the Data Transfer System $200. A manual and demonstration disk with a capacity of 10 citations is available for $75.

The development of the programs was supported in part by grants from OCLC, Inc.; The Alfred P. Sloan Foundation; the University of Michigan Center for Research in Learning and Teaching; and The Council on Library Resources. □

Players compete with reference skills

By playing a new board game, "Library Adventure," young people can learn what is stored on microfilm, why they would look in the *Readers' Guide*, and other research skills.

A colorful board pictures the inside of a library with checkout desk and eight areas: job skills, reference, periodicals, children's, media, fiction, nonfiction, and a reading room. The object of the competition is to be the first of up to six players to go through four rooms (described on an assignment card) and then advance to the check-out area. To proceed, players must answer story questions about the library and its contents.

Parts of the game include playing pieces, a die, a pad of library cards, an answer-wheel, a library stamper, and 88 story cards.

For a full round of play, each player takes a turn at being—guess what?—the librarian. The librarian is in charge of the library stamp and answer wheel.

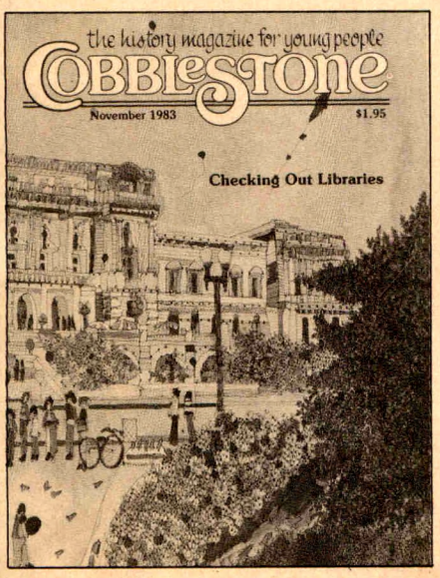
Story cards are written at different reading levels in the two versions available: primary, 2.0–3.4 reading level; and intermediate, 3.5–4.9 reading level.

To order, send a check for $14.95 directly to Learning Well, Dept. 21, 200 S. Service Rd., Roslyn Heights, NY 11577, or phone the company's hotline: 1-800-645-6564 (in New York, 516-621-1540).

Cobblestone looks at libraries

From an appreciative essay on Anne Carroll Moore's efforts to establish children's rooms in America's libraries to a comic strip about bookmobile librarians, the November issue of *Cobblestone* focuses on libraries.

Historical essays cover such subjects as the Library of Congress, Andrew Carnegie's contributions to free public library service, and the first libraries of clay tablets. Preservation of materials also receives attention.



Several games—including a treasure hunt for information contained in a library—spice up the issue and test young readers on what they've learned in this stimulating overview.

Single issues are available at $2.75 from Cobblestone, 28 Main St., Peterborough, NH 03458.

Library youngsters check out Arabian horse

Recently, Brenda Brock shared her affection for horses with a group of school-age youngsters and their parents at the Jeffersontown branch of the Louisville Public Library. Brock and her husband breed Arabian horses at their farm, B&F Arabians. Rasyndaa was the patient model for demonstrations on grooming and care. Inside the library Fred Brock showed films and explained how the Arabian horse evolved.

Pannell Award deadline set

Ann Heidbreder Eastman, committee chair for a new Lucile Micheels Pannell Award, hopes that "children's librarians might bring this honor to the attention of booksellers in their communities."

A cash prize of $2,500 and a piece of original art by an outstanding children's illustrator will be given to a bookseller in 1984 who has conducted an effective program to creatively bring children together with books. Other booksellers must be able to replicate the program. The award is administered by the Woman's National Book Association.

The deadline for application is Feb. 15. Announcement of the award and application forms appeared in the Oct. 1983 and Jan. 1984 issues of the American Bookseller's Association *Newswire*.

Eastman informs *AL* that in 1986–88, the committee plans to present the award to public and school librarians.

For more information, contact Eastman, Director of Public Affairs Programs, College of Arts and Sciences, Blacksburg, VA 24061 (or phone, 703-961-6390).

Fourth graders become sleuths

To put some fun into library skills classes, Arlington Heights Memorial Library staff has prepared a sound/slide show featuring a detective and his hound, Trooper and Snooper. In the presentation, they snoop around the library trying to learn a few things: e.g., the kind of stories detectives like most.

The "Super Snooper Troopers" program was developed by the Youth Services Department, headed by Ruth Griffith, and arranged through the schools.

Students have an opportunity to do some sleuthing on their own: they tour the library with individual detective notebooks and an assignment to "crack the case." The booklets are filled with clues that help the youngsters track down the books they need. □

NEEDED: great poems about matters librarial

by Ron Smith

Precious few great poems have been written about libraries. That is a shame, for libraries need their highs and lows recorded in poetry the way poets record life in general.

For instance, what if Robert Frost had been a librarian? His "Mending Wall" could well have been "Mending Bindings." (Not only does that title have a certain lilt to it, there have obviously been many more bindings mended than walls.) And surely Frost's poems would've been filled with "microfilm readers," "Dewey decimal numbers," and "copyright regulations" instead of bent-over birch trees, dead hired men, and apple picking. It's obvious he had flimsy stuff to work with, not being a librarian.

Emily Dickinson, who's no stranger to libraries, is another poet who may have found more subject matter in libraries than in ordinary life. Her "A Narrow Fellow in the Grass" might have ended up "A Scary Fellow in the Stacks." (Some Hollywood producer would no doubt have wanted the rights.) Her "Why Do They Shut Me Out of Heaven?" would surely have become "Why Do They Shut Me Out of Special Collections?" There's no question "The Things That Never Can Come Back Are Several" would better have stood the test of time as "The Books That Never Come Back Are Too Many." And how can we overlook "I Heard a Fly Buzz When I Died" —which, when you think about it, doesn't make much sense. It would have been more meaningful as "I Heard a Fly Buzz When I Left the Library, But While I Was in It I Couldn't Hear Myself Think."

On second thought, that title could be too long.

Other poems Emily Dickinson wrote sound as if she knew libraries pretty well. I'm certain I've heard one librarian say to another, "Midsummer Was It When They Died," as they looked out at the empty seats and filled stacks. Emily Dickinson also wrote "You'll Find It When You Try to Die," a poem that could well have been dedicated to all of us who have found a book in the card catalog but not in the library. And wasn't it a library director who said the same thing about the library that Ms. Dickinson said about life: "Size Circumscribes—It Has No Room"?

But enough wistful fidgeting. Strange as it may seem, some poems already have the stuff of libraries in them, although the poets never recognized the fact. Had Shakespeare been less concerned in his sonnets with loneliness, time, beauty, the absence of friends, and other overrated subjects, he might have tackled such monumental topics as the microfiche. His "Shall I Compare Thee to a Summer's Day?" would surely have been a hit among book lovers forever as:

Ron Smith is on the faculty of the Department of English, Utah State University, Logan, Utah.

Shall I compare thee to a microfiche?
Thou art more readable than microprint.
Real books do fill to bulging libr'y shelves,
And microcards are stored more compactly.

But staring at an ugly box to read a book
Is death to twenty-twenty (even thirty-thirty);
And rings beneath the eyes do soon appear
From squinting, peering at that loathesome screen.

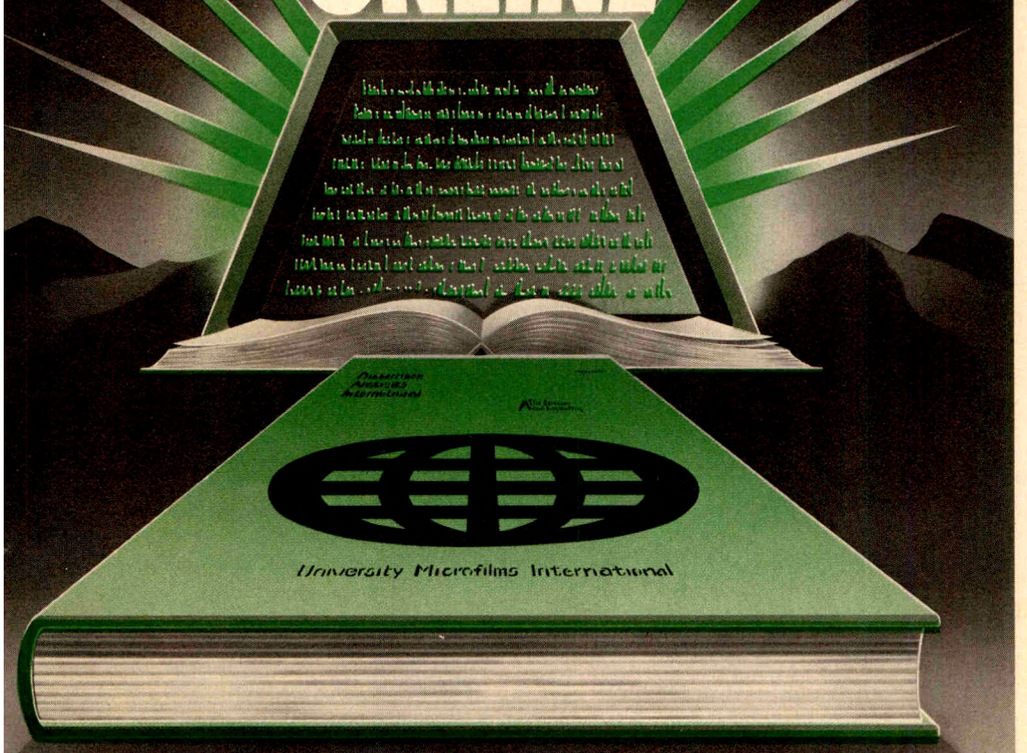
But those old books are worth a ton of 'fiche,
Their lovely, dog-earr'd pages with print so large,
Pure joy to look upon and leaf through leisurely.
Besides, who ever heard of going home at end
Of long day's work, all tir'd through labors long,
And curling up, near fireside, with a good microfiche?

Now showing at a terminal near you.

Thousands have read it!
Librarians and researchers have asked for it!

UNIVERSITY MICROFILMS INTERNATIONAL PRESENTS

DISSERTATION ABSTRACTS ONLINE



FIRST TIME ON THE SCREEN:

- Full-text search capability
- Over 2500 new abstracts added each month
- Up-to-date dissertation information covering all disciplines

The new way to improve a dissertation search strategy from the best-selling Dissertation Abstracts International

Available now on DIALOG and BRS

Dissertation Abstracts Online—just like the book... only faster.

UMI announces the "screen" debut of Dissertation Abstracts Online—the computerized version of Dissertation Abstracts International (DAI).

Abstracts Online brings every abstract in DAI to your terminal screen. *In its entirety.* This full-text feature enables you to conduct a more thorough keyword search of the reference work, scanning not only the citations, but the body of each abstract as well.

All in a *fraction* of the time it takes to perform the task manually.

DIALOG's Free File of the Month.

Just how valuable is this new service? Valuable enough to be featured as DIALOG's Free File of the Month for January, 1984.

This designation entitles all DIALOG subscribers to a free half-hour search to acquaint themselves with Abstracts Online. Contact your DIALOG representative at this toll-free number for details: 1-800-227-1927.

Abstracts Online is now available for use through both DIALOG and BRS. For more information, contact your representatives.

ALA Annual Conference
Dallas, June 23–28, 1984

1984 Annual Conference Highlights

Theme: *Paths to Power*
Opening of Exhibits: Saturday, June 23, 9 a.m.
Opening General Session: Saturday, June 23, 4–6 p.m.
All-Conference Reception: Saturday, June 23, 6–8 p.m.
President's Program: Sunday, June 24, 9:30 a.m.–12:30 p.m.
President's Dance: Sunday, June 24, 9:30 p.m.–1 a.m.
ALA Inaugural Banquet: Wednesday, June 27, 7 p.m.

Conference headquarters

The Hyatt Regency Hotel has been designated as headquarters for the ALA conference. Major conference services will be located in the Dallas Convention Center. These services include registration, local information and tours, message center, first aid room, meal tickets, placement, postal substation, and package-wrapping.

Major meetings and other events will take place in the Convention Center, supplemented by hotel meeting rooms in the downtown area and other locations.

Hotel reservations

Reservation requests for the preconference period and the conference week will be accepted from Jan. 2 to May 25. Requests are to be sent to:

ALA Housing Bureau
1507 Pacific Avenue
Dallas, TX 75201

After May 25 the ALA Housing Bureau will continue to make placements, but only on a space-available basis and not necessarily at the published rates.

A list of selected hotels and their rates appears on page 54. Rates are quoted for the room, not per person, and all rooms will be assigned on a first-come, first-served basis. All reservations must be made by mail using the form on page 55. Telephone calls will *not* be accepted for reservations.

All requests must indicate six choices. Be sure to give accurate dates and approximate arrival/departure hours for all persons who will occupy the rooms requested. Note that the ALA Housing Bureau does not assume the responsibility of pairing guests for double occupancy or in multiple housing units.

Hotel confirmations

All housing requests must be made through the ALA Housing Bureau. The Dallas Convention Housing Bureau will send you an acknowledgement of your hotel reservation and will specify the deposit required. *You must forward your deposit check directly to your assigned hotel after receipt of the acknowledgement.* When the hotel receives your deposit, they will send you a confirmation.

NOTE: It is important to get your reservations in early! Receipt of reservations will be acknowledged by the Housing Bureau and confirmed by the assigned hotel as soon as possible, but some longer-than-usual delay may be experienced due to simultaneous handling of housing for the 1984 Republican convention.

Cancelations and changes

All cancelations and changes of accommodations are to be made *in writing* to the ALA Housing Bureau up to two weeks before the opening of the conference. After that time the Bureau will accept telephone requests for last-minute changes and referrals only.

Dormitory housing

Texas Woman's University, Denton, TX has made 300 dormitory rooms (all air-conditioned) available for use by ALA conferees. Please use the housing form on page 55 and mail directly to the University in Denton. Housing is on a first-come, first-served basis and application must be received *no later than June 1*.

TWU is located in Denton, Tex., approximately one hour from the convention center in Dallas.

Placement Center information

The ALA Office for Library Personnel Resources is providing a placement service at the 1984 Annual Conference. It will be located in the Dallas Convention Center and hours of operation will be:

Saturday, June 23: noon–5 p.m.
Sunday, June 24: 9 a.m.–5 p.m.
Monday, June 25: 9 a.m.–5 p.m.
Tuesday, June 26: 9 a.m.–5 p.m.

The deadline for preregistration is June 4. Forms will be available after March 1. To request forms contact OLPR/ALA, 50 E. Huron St., Chicago, IL 60611 or call 312-944-6780, ext. 293. Indicate whether you are an employer or job-seeker. If requesting one copy, enclose self-addressed, stamped envelope (no. 10).

Advance Registration

Those who wish to register in advance for the conference will be able to do so by using the advance registration form to be included in the April issue of *AL* as well as in the preliminary program booklet to be mailed to all ALA members at the end of March. To take advantage of advance registration and to qualify for the ALA member's registration fee, you must have your 1984 personal membership card at the time of registration.

Registration at the conference will open on Thursday, June 21, at 10 a.m., in the Dallas Convention Center.

Registration fees

Full week–$75 (or $64 if registered in advance) for ALA personal members; $75 (or $60 if registered in advance) for ALA personal members who are also personal members of an ALA Division; $20 for full-time library school students with ALA personal student memberships and ALA divisional memberships; $125 (no discount) for nonmembers.

Daily fees (paid only at the conference) —$38 for ALA personal members who are also members of an ALA Division; $10 for full-time library school students; $63 for nonmembers.

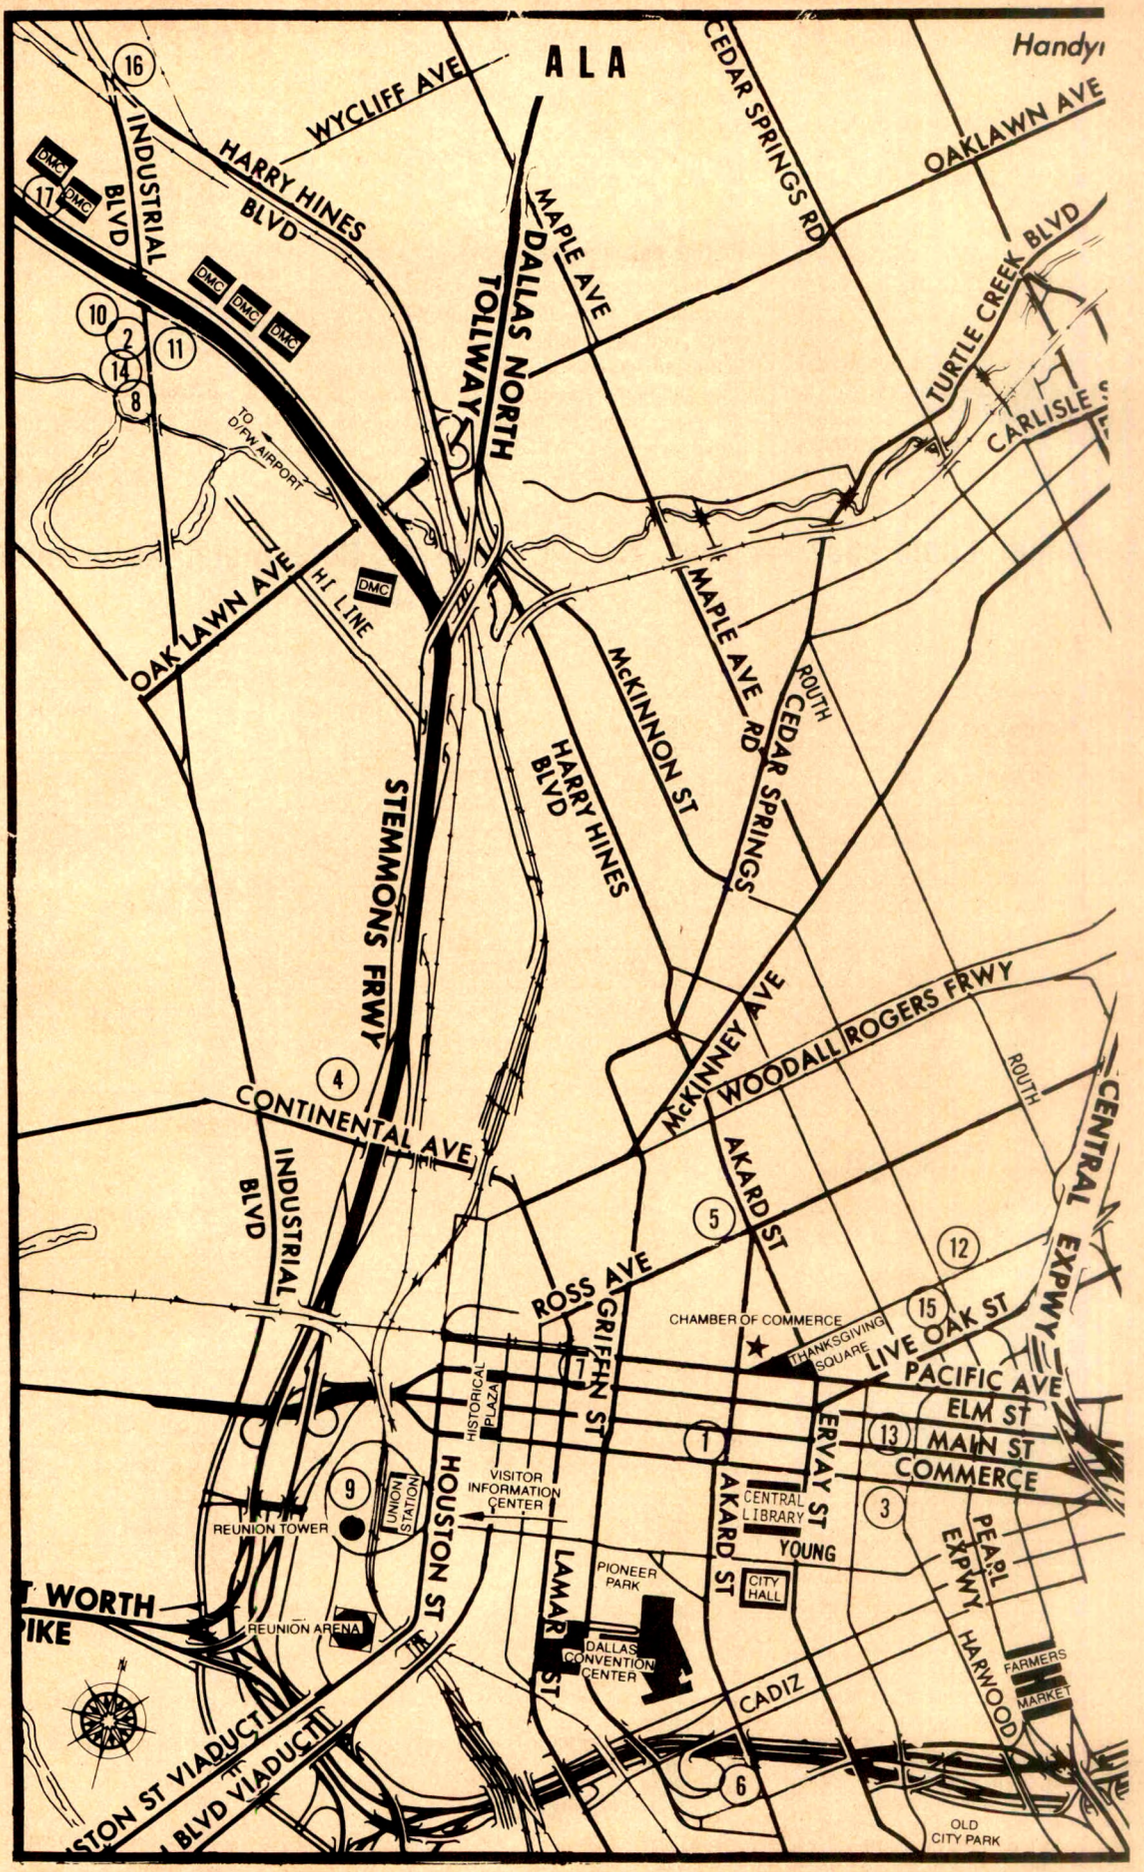
Note: The registration fee (in advance and at the conference) for ALA retired members is $38 for the week.

Exhibits

All exhibits, including table and "Futura" type displays, will be located in the Dallas Convention Center east and center exhibit halls.

After their official opening on Saturday, June 23, the exhibits will be open as follows: Saturday, June 23, 9 a.m.–4 p.m.; Sunday, June 24, and Monday, June 25, 9 a.m.–5 p.m.; Tuesday, June 26, the closing day, 9

(ALA Annual Conf. cont. on p. 54.)



Hotel/motel rates appear on page 54.

(Cont. from p. 52.)

a.m.–3 p.m. Registration for exhibitors will begin on Thursday, June 21, two days prior to the opening of the exhibits.

Full information and applications for exhibit space were mailed early in January. Exhibitors interested in taking part in the Dallas show who have not received the material by mid-January should write to the Exhibits Manager, ALA Conference Arrangements Office, 50 E. Huron Street, Chicago, IL 60611.

All exhibit visitors will be required to have a registration badge. Arrangements can be made for groups (library school students, teachers, etc.) to receive free exhibit badges in advance by writing, not later than June 1, to the ALA Exhibits Manager at ALA Headquarters in Chicago. Include a stamped, self-addressed envelope; be sure to affix an extra 20¢ stamp should the request be for 10 or more free badges.

Note: Free exhibit badges are not accepted for entry to meetings.

Shuttle bus service

A free shuttle bus service is planned for operation between *all* participating hotels/motels and the Dallas Convention Center. Shuttle bus service schedules showing pickup times and pickup points and destinations for each day of the conference week will be available later, as will information on bus arrangements for all-conference events.

Poster sessions

Poster sessions will be held during the Dallas meeting. An area in the Dallas exhibition hall will be provided where selected individuals can present their research findings and innovative programs for an assigned time block during the conference. Deadline for receipt of applications for poster session presentations is Jan. 30, 1984. Additional information is available from Ruth Person, Poster Session Committee, School of Library and Information Science, Catholic University of America, Washington, DC 20064.

T. V. Travel, Inc.

(ALA Report cont. from p. 54)

trip to Hawaii for two! The first 500 ALA conference attendees to book their American Airlines transportation through T. V. Travel will automatically be entered into a drawing for two roundtrip tickets to Hawaii. The winning name will be drawn by an ALA representative at the June conference in Dallas. In addition, all ALA conference attendees and families who purchase their tickets through T. V. Travel will receive $150,000 free flight insurance.

Discounts to Dallas. T. V. Travel is offering special negotiated discounts on American Airlines and Delta Airlines, plus the very lowest fares on alternate carriers. Attendees must book and purchase their tickets by May 4, 1984 to qualify for the discounts. Some sample discounts at this writing: New York–Dallas—coach $648, excursion $419, T.V. Travel $278; Chicago–Dallas—coach $496, excursion $349, T.V. Travel $298; Seattle–Dallas—coach $738, excursion $489, T.V. Travel $270.

For information and reservations, call Monday through Friday, CDT: In Illinois—(312) 943-7860 from 8:30 a.m. to 5 p.m.; T.V. Travel tollfree—(800) 543-9089 from 7 a.m. to 10 p.m. Mention the ALA special code name: ALADFW.

Library school reunions

Breakfast, luncheon, cocktail party/dinner time slots are available for library school reunions on Tuesday, June 26. Requests for ALA-contracted space are to be sent to the ALA Conference Arrangements Office.

Those who wish to participate in the Cooperative Library School Alumni Reunion cocktail party on Sunday, June 24, are also requested to make this known to the Conference Arrangements Office in Chicago.

Other events

ALA Council meetings: Sunday, June 24, 3–5:30 p.m.; Tuesday, June 26, 2–5:30 p.m.; Wednesday, June 27, 2–4 p.m. The Council meeting with the Executive Board is scheduled on Sunday, June 24, 2–3 p.m.

ALA Membership meetings: Monday, June 25, 8–10 p.m.; Wednesday, June 27, 9 a.m.–12:30 p.m.

ALA Executive Board meetings: Saturday, June 23, 11 a.m.–12:30 p.m.; Monday, June 25, 9–11 a.m.; Tuesday, June 26, 9–11 a.m.; Thursday, June 28, 9 a.m.–12:30 p.m. The Thursday session is the first formal meeting of the 1984–1985 Executive Board.

The *Program Evaluation and Support Committee* (COPES) evaluates the program of the Association and submits a recommended budget to the Executive Board for action. It is assisted by the members of the *Planning and Budget Assembly*. The COPES/PBA meeting is scheduled on Friday, June 22, 2–4 p.m.

The first meeting of the 1985 *Chicago Conference Program Committee* will be held on Sunday, June 24, 8–10 p.m.

ALA Opening General Session. The Opening General Session will be held on Saturday, June 23, 4–6 p.m. in the Arena of the Dallas Convention Center.

All-Conference Reception. The All-Conference Reception will take place immediately following the close of the Opening General Session on Saturday, June 23. It will be held in the new Dallas Public Library and outside on the Municipal Plaza.

ALA Inaugural Banquet. The Inaugural Banquet will be held on Wednesday, June 27, at 7 p.m., with cocktails beginning at 6 p.m.

President's Dance. The President's Dance is scheduled on Sunday, June 24, 9:30 p.m.–12 midnight, and is planned to be held in the Hyatt Regency Reunion Ballroom. Details will be announced in a later issue of *AL*.

President's Program. The President's Program (at this writing) is tentatively scheduled for Sunday, June 24, 9:30 a.m.–12:30 p.m., in the Hyatt Regency Reunion Ballroom. Program details will be announced in a later issue of *AL*.

The Dallas conference week's activities will include program and business meetings of divisions, sections, committees, round tables, and other groups. Major preconference and conference program information will be published in the preliminary program booklet to be mailed to ALA members at the end of March. Program highlights will also appear in forthcoming issues of *AL*.

Child care

ALA will reimburse to any *registered* parent the charges expended on child care for each day of the Dallas conference, June 23–28. This covers only child care in the parent's hotel room or other residence in the conference city and does not include charges for children's food or transportation, or transportation or gratuity for the sitter or service. Parents may contact their hotel child care center/baby sitting service where it is available, or select one from the classified telephone directory.

Reimbursement forms, which will be available at the ALA registration desk, must be signed by the individual performing the child care services and presented by the parent to the registration desk before noon on Wednesday, June 27.

—*Conference Arrangements Office* □

"Books for Everychild" now on *Booklist* bookmarks

In the Sept. 1 *Booklist,* editors Betsy Hearne and Barbara Elleman published two annotated lists of "Books for Everychild" selected for exceptional literary merit and lasting appeal. Now the separate lists of 50 picture books and 50 contemporary fiction classics, including title, author, publisher, and recommended age level, have been repackaged as colorful bookmarks.

The books, all published since 1950, were selected for the Children's Book Council Everychild Conference. Reflecting a wide range of interests, the lists serve as concise references for parents, teachers, and librarians to stimulate reading.

One free copy of each bookmark and of the annotated list are now available from *Booklist* for a 37-cent-stamped, self-addressed business envelope. Multiple copies may be ordered prepaid at $5 for 100 copies, $9 for 200, or $22 for 500. Please specify quantity of Picture Book Classics or Contemporary Fiction bookmarks requested and make check payable to *Booklist*. Order from *Booklist,* Everychild Bookmarks, ALA, 50 E. Huron St., Chicago, IL 60611.

Ruth Frame to retire

Ruth Frame, deputy director of the American Library Association since 1973, plans to retire Jan. 31, Executive Director Robert Wedgeworth has announced.

From 1967 until 1973, she served as executive secretary of the Library Administration Division, now the Library Administration and Management Association. For three years before 1967 she had been assistant state librarian in Michigan.

Frame, who was born in Oklahoma, will continue to live in Chicago.

New appointments

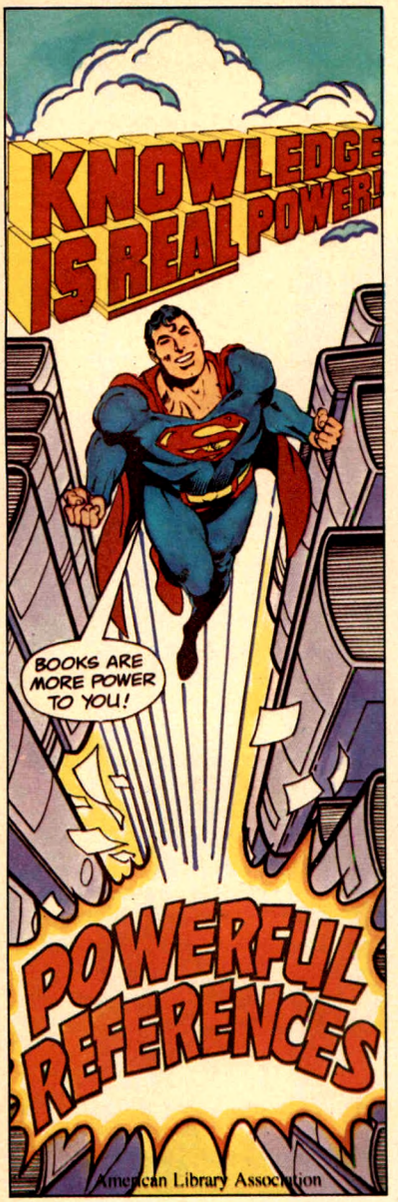
Sandy Lieb, a former assistant professor of English at the University of Illinois/Chicago, has been appointed public information officer. Lieb holds an M.A. and a Ph.D. in modern American literature from Stanford University and is the author of *Mother of the Blues: A Study of Ma Rainey,* published by the Univ. of Massachusetts Press (1981).

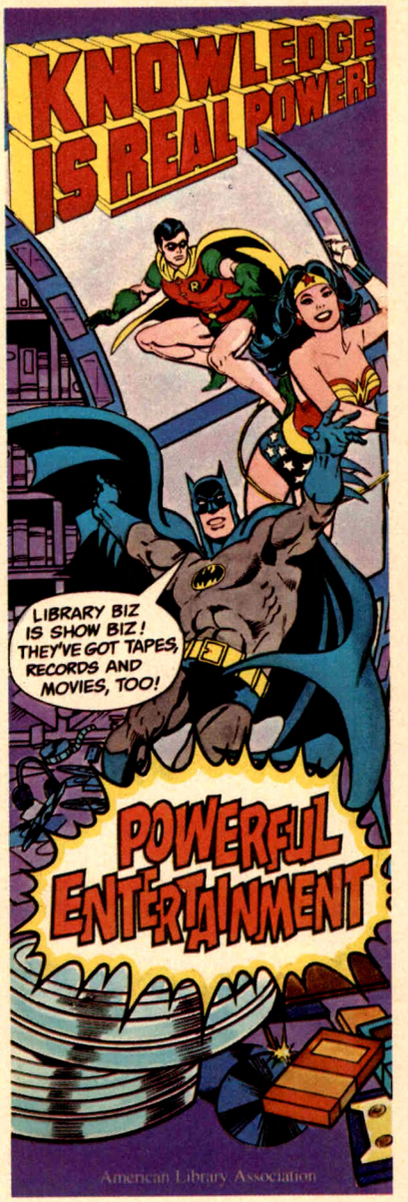
Helen M. MacLam began work as *Choice* assistant editor for social sciences Oct. 17. MacLam had been responsible for selection in several social science fields as collection development librarian at Dartmouth College for the past 16 years. She has served as vice president of the National Association for Interdisciplinary Ethnic Studies and as associate editor for its publications. Her MALS is from the University of Michigan.

Public Information Office to develop PBS materials

The ALA Public Information Office has received a $44,000 contract from WNET/13, the Public Broadcasting Service television station in New York City, to develop materials in connection with the 10-part series "Heritage: Civilization and the Jews." The series will be aired next fall.

Former Israeli Foreign Minister Abba Eban is chief consultant, host, and commentator for the series, which was filmed in more than 18 countries on four continents. The series deals with more than 5,000 years of Jewish history.





National Library Week April 8–14

Superhero banners, bookmarks, and posters deliver the ALA National Library Week message "Knowledge is *Real* Power" in 1984.

On this year's READ poster, Snoopy, the lovable beagle philosopher, is shown clutching a book, and an 18½-inch stuffed Snoopy wearing a red "I love my library" T-shirt is also available.

Promotional materials created by the ALA Public Information Office are described in the 14-page, four-color graphics catalog mailed to previous purchasers and organization members in late November. The free catalog and the $3 *1984 Power Tools Publicity Book* provide six separate campaigns to promote libraries during National Library Week and all year.

For a free copy of the catalog, send a mailing label to Power Tools, ALA, 50 East Huron St., Chicago, IL 60611 (312-944-6780, x246).

To extend the impact of the series, the National Endowment for the Humanities and the Revson Foundation have funded the library project and many other educational and outreach programs. Working with ALA divisions, the Public Information Office will develop materials for discussion groups, displays, and public library programs. The information will be distributed through inserts in *AL* and *Booklist* beginning next summer. Promotional materials will be mailed to more than 6,000 libraries.

Your input requested

● To compile a *Guide to U.S. Map Resources*, the Map & Geography Round Table is surveying academic, geoscience, historical, private, public, state, and federal map collections. A questionnaire will be mailed early this year to thousands of libraries. Address inquiries to David A. Cobb, Map & Geography Library, University of Illinois Library, 1408 W. Gregory Dr., Urbana, IL 61801 (217-333-0827).

● The Library Administration and Management Association (LAMA) seeks cosponsors for two-day institutes on online catalogs to be presented throughout the country beginning in 1984. The institute is being designed by Joseph R. Matthews of J. Matthews and Associates and Charles Hildreth of OCLC, Inc., to inform trustees and library administrators considering online catalogs.

"Management of the Online Catalogue" is the second LAMA regional institute available to cosponsors. For more information contact Roger H. Parent, Executive Director, LAMA, ALA, 50 E. Huron St., Chicago, IL 60611 (312-944-6780).

● The G.P. Putnam Publishing Group again offers four grants of $400 each to help children's librarians attend their first ALA Annual Conference this year. Members of the Association for Library Service to Children who have from one to 10 years' experience as a children's librarian in school or public libraries and have never attended Annual Conference are urged to apply. For applications write ALSC at Headquarters. The deadline for completed applications is March 1.

● The Publishing Committee seeks applications for two grant programs. ALA units are eligible for the Carnegie Reading List Awards and individuals may apply for the Carnegie-Whitney Awards for the preparation of bibliographic aids for research. Applications for both awards should designate the program applied for and contain: a description of the project and its intended audience, a statement of purpose, work plan, completion date, budget, and publication plans. Proposals should be submitted by Feb. 28 to the Chair, ALA Publishing Committee, 50 E. Huron St., Chicago, IL 60611.

ALSC and PLA to sponsor program on toddlers & parents

The ALA Annual Conference in Dallas will feature a "Toddlers and Parents in the Library" program cosponsored by the Association for Library Services to Children Preschool Services and Parent Education Committee and the Public Library Association Alternative Education Programs Section Parent Education Committee.

The committees have engaged Jim Trelease, author of the *Read-Aloud Handbook*, to keynote the program. Librarians are invited to demonstrate their services for toddlers.

Librarians interested in sharing their services should request an application form immediately from Frances A. Smardo, Early Childhood Services, Dallas Public Library, 1515 Young Street, Dallas, TX 75201. The information is needed before the Midwinter Meeting. *(Continued on p. 58.)*

Last chance for library stamp

The U.S. Postal Service withdrew the "Libraries of America" commemorative stamp from sale Dec. 30, but library advocates who want to preserve a copy may still order first covers from ALA.

The official ALA cover carries the cancelled America's Libraries stamp, a Philadelphia postmark dated July 13, 1982, and an engraved cachet of Benjamin Franklin. It costs $2. The identical cover autographed by Past President Betty Stone and Executive Director Robert Wedgeworth is $3. Inside both envelopes is a brief history of ALA. To order either, send a check or money order for the full amount plus 50 cents for handling to First Day Cover, ALA, 50 E. Huron St., Chicago, IL 60611.

The ALA Washington Office offers a similar cover bearing the cancelled stamp, the Philadelphia postmark, and aliberty bell with the legend "Libraries—Ring Out for Information Access." A card inside provides tips on dealing with legislators. The minimum order is two for $5, with a self-addressed stamped envelope; add 50 cents for orders over $10. Proceeds help pay expenses of ALA witnesses to testify in Congress. Order from the ALA Washington Office, 110 Maryland Ave. N.E., Box 54, Washington, DC 20002.

Beware of word "Olympic," ALA counsel warns librarians

The terms "Olympic, "Olympiad," and "Citius Altius Fortius," the five interlocking rings, the Olympic shield, and the Olympic torch are all federally registered trademarks and should not be used for promotion without permission from the U.S. Olympic Committee, says Mary Hutchings Reed, ALA legal counsel.

ALA asked Reed to prepare some guidelines for librarians after the Olympic Committee advised the Los Angeles County Library not to plan summer reading programs on the Olympic theme. The committee charges manufacturing firms an initial $25,000 fee plus 10 percent of all licensed product sales and aggressively pursues unauthorized users.

Librarians should not make the mistake of assuming that they can use the word or the symbols for nonprofit, educational, or charitable purposes, Reed advises. Last spring the Olympic Committee filed suit against the March of Dimes Birth Defects Foundation for promoting its fund-raising "Reading Olympics" project. Whatever the outcome of the suit, it is evident that the Olympic Committee intends to enforce its exclusive rights.

Reed recommends:

DO use indirect references to the Olympics when promoting the library. References to the "summer games" or "our athletes" are acceptable. Nonpromotional uses are permitted: you may tell patrons to read about the Olympics at the library or say that the history of the Olympics can be found at the library. "Olympic Books" may be used as the title of display.

DON'T use Olympic terms or symbols for promotion or commercial purposes. Do not invite people to visit the Olympic library or join an Olympic readathon there. Don't promote an Olympic week.

The 1984 ALA poster featuring a stylized runner and the slogan "Keep Going, Keep Growing—Use Your Library" carefully avoids duplication of Olympic symbols. Reed suggests libraries do likewise.

Charles Martell, Jr., to edit *College & Research Libraries*

Charles Martell, Jr., associate university librarian for public services at California State University/Sacramento will become editor of the Association of College and Research Libraries bimonthly *College & Research Libraries* with the July issue.

Author of *The Client-Centered Academic Library: An Organizational Model* (Greenwood Press, 1983) and many articles on library management, Martell holds an MLS from Syracuse University and a doctorate from the University of California/Berkeley. Before moving to Sacramento last May he served as acquisitions librarian at the University of Illinois/Chicago.

For the next seven months, Martell will work in an interim capacity with the retiring *C&RL* editor, C. James Schmidt.

OLPR and SCOLE list info on continuing ed courses

To answer questions on continuing education activities and resources in 1984, the Office for Library Personnel Resources and the Standing Committee on Library Education have prepared a new brochure, "ALA Is Continuing Education."

The 8-page pamphlet lists institutes and workshops within and outside ALA Annual Conference. It also cites publications on the subject such as speaker's kits, course syllabi, and grants.

For a single copy of the brochure, send a self-addressed, stamped envelope to OLPR/ALA, 50 E. Huron St., Chicago, IL 60611. Library groups wishing to distribute multiple copies should contact the OLPR office.

ALA Handbook distribution. The *ALA Handbook of Organization 1983–84* will be mailed (without request) to all personal members who hold an office or an appointment in ALA and its units.

The *ALA Handbook of Organization and Membership Directory 1983–84* will be mailed (without request) in November 1983 to all organization members.

If you are an ALA personal member who holds no office or appointment and you wish a copy of the 1983–84 handbook, send a note of request for your free copy (include your membership number) to Elaine Wingate, Executive Office, ALA, 50 E. Huron, Chicago IL 60611.

Hot off the presses

The following new publications may be purchased prepaid from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611. For details, write Robert Hershman.

American Library Laws, 5th ed., by Alex Ladenson. 2,010 pages, $110 (0-8389-0400-9, 83-21543).

Automated Circulation: An Examination of Choices, edited by Joseph R. Matthews and Kevin E. Hegarty. 140 pages. $15 (0-8389-0402-5, 83-22441).

The Mississippi Delta by Cora Matheny Dorsett (Reading for Young People series). 150 pages, $15 (0-8389-0395-9, 83-14375).

Unit offerings from 50 E. Huron

Administering Staff Cutbacks: Planning and Implementing a Reduction in Force, Office for Library Personnel Resources TIP Kit No. 5. $10 from OLPR.

ALA Standards Manual, Committee on Standards, 1983. 24 pages, free from the ALA Executive Office.

Library and Information Careers in the 1980s, Office for Library Personnel Resources. 4 pages, 50 cents for single copies, multiple-copy rates available from OLPR.

Microcomputers and Library Services to Children and Young Adults, Part I and Part II, edited by Marilyn Kaye, reprint from *Top of the News*, Spring 1983. 2 vols. unpaged, $5 each from the Young Adult Services Division.

On Death and Dying: A Booklist from the Young Adult Services Division. 4 pages, 50 cents from YASD. □

Save our symbol

A Federal Highway Administration advisory committee has rejected the ALA library symbol as a national road sign to be included in the *Manual on Uniform Traffic Control Devices*. The committee found the blue-and-white symbol confusing, ambiguous, and not intuitively obvious. Instead, it recommends the adoption of a sign using the word "library" in white letters on a green background.

The highway administration was expected to publish the recommendation in the *Federal Register* for comment late in December. To respond effectively, ALA needs photographs and other examples of the symbol being used on directional signs. Send materials and comments to Peggy Barber, Public Information Office, American Library Association, 50 E. Huron, Chicago, IL 60611.

the source

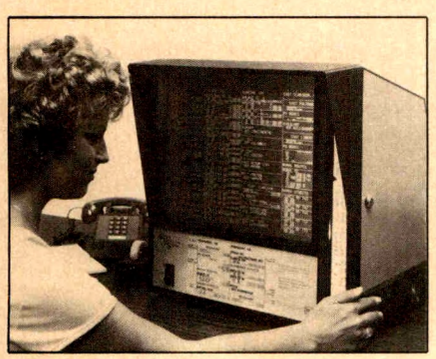
SELECTED RESOURCES FOR CURRENT AWARENESS

The Source highlights useful items in major areas of library/information activity. Send materials to department editor Gordon Flagg, American Libraries, 50 E. Huron St., Chicago, IL 60611.

resources

World Dictionaries in Print 1983 lists over 13,600 dictionaries and wordbooks in 238 languages from approximately 100 countries. The scope includes general language dictionaries; slang, pronunciation, and other special-purpose dictionaries; translating dictionaries in two or more languages; and subject dictionaries covering the specialized vocabulary of such fields as business, science, medicine, and law. The entries and arrangement duplicate those of *Books in Print*, with subject, title, and author listings, plus a language index and a list of publishers. 579 p., $99.50 from R.R. Bowker Co., POB 1807, Ann Arbor, MI 48106 (0-8352-1615-2).

Bibliophile file. The *International Book Collectors Directory* lists nearly 2,000 book collectors and over 1,700 booksellers worldwide, indexed by subject interest. The 544-page sourcebook also contains a directory of organizations and publications for collectors, a bibliography of books on collecting, a listing of 2,320 authors' pseudonyms, lists of collecting terms and abbreviations, and many other features. $35 cloth, $25 paper, with multiple-copy discounts available, from Pegasus Press, POB 1350, Vashon Island, WA 98070 (83-72310, 0-943268-06-0 cloth, 0-943268-05-2 paper).



ZIP + 4 on COM. The Address Verification System contains the U.S Postal Service's 21-million-address ZIP + 4 file on computer-output microfilm. The system allows users to individually identify businesses, farms, and professionals, which receive their own nine-digit codes. Subscriptions include four quarterly updates and a COM reader for $1,895. Information Design, Inc., 1300 Charleston Rd., Mountain View, CA 94043-1397.

Photography biographies. The lives and works of 2,000 leading photographers, photohistorians, curators, critics, and other figures are covered in the *Macmillan Biographical Encyclopedia of Photographic Artists and Innovators*, by Turner Browne and Elaine Partnow. The 722-page volume also features an insert of 144 black-and-white and color photographs, including this untitled New York City scene taken around the turn of the century by Alfred Stieglitz. $45 from Macmillan Publishing Co., 866 3rd Ave., New York, NY 10022 (82-4664, 0-02-517500-9).

Career planning. *Time Well Spent: Career Planning Research* is a 12-page booklet showing how to use the library to investigate career options. The guide suggests subject headings to search, as well as books on vocational guidance, indexes, directories, and other resources. $3 from Informed, POB 4028, Irvine, CA 92716-4028.

Cancer Update is a new monthly newsletter produced by physicians and researchers offering the general public current information on advances in the prevention and treatment of cancer. The articles will translate reports from leading medical and scientific journals into everyday language. One-year subscriptions are $27.50 from Cancer Update, POB 55007, Sherman Oaks, CA 91413.

Nuclear freeze resources. A resolution urging libraries to make information available on the nuclear arms race and the nuclear freeze movement was passed at the 1983 ALA Annual Conference. To fulfill this recommendation, a variety of freeze resources—brochures, information sheets, posters, organizing tools, and other items—are available from the National Nuclear Weapons Freeze Campaign Clearinghouse. For a list of the materials send 10¢ to the clearinghouse at 4144 Lindell Ave., Suite 404, St. Louis, MO 63108.

school media

School media annual launched. An annual publication covering major events and trends in the school library field is premiering this year. The 1983 *School Library Media Annual*, edited by Shirley L. Aaron and Pat R. Scales, features sections on intellectual freedom (including an analysis of the Island Trees case), federal and state legislation, professional associations, conference programs, notable materials, collection development, research studies, microcomputers, networking, and many other areas. 451 p., $35 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (ISBN 0-87287-353-6, ISSN 0739-7712).

Microcomputer "mini-cases" wanted. A researcher at Idaho State University is asking school media specialists to send him "mini-cases" showing ways they have used microcomputers to support instructional programs or administrative operations of the media center. The examples should be from two to six pages and include the objectives of the microcomputer function, a description of the application, and information on the software and hardware used. The collection of "mini-cases" will be shared with those participating in the survey. Send examples to George Sheppard, College of Education, Idaho State University, Pocatello, ID 83209.

U.S. is now land of *Free*. *Free! The Newsletter of Free Materials and Services*, previously available only in a Canadian edition, has launched an edition for American readers. Each issue will describe 50 to 60 free books, posters, magazines, and other materials of interest to librarians and teachers, all evaluated by professionals prior to inclusion. Five-issue subscriptions to the newsletter are $15 prepaid or $18 billed from Dyad Services, Dept. 284, POB C34069, Seattle, WA 98124-1069.

"Book Bingo," "Fairy Tale Telegram," "Decode the Title," and "Living Call Numbers" are among the games suggested in *Back to Books: 200 Library Activities to Encourage Reading*, by Karen K. Marshall. The handbook also describes exhibits, contests, bulletin boards, and other motivational

The Source

techniques. 138 p., paper, $12.95 from McFarland & Co., POB 611, Jefferson, NC 28640 (83-42903, 0-89950-092-7).

Study shows librarians' influence. A recent study of 11 Phoenix-area elementary school libraries conducted by the University of Arizona library science department demonstrates that school librarians can increase students' use of the library. Approximately 300 students were assigned to either an experimental or control group, with the experimental students getting a weekly 30-minute program of library activities, reading suggestions, or guest speakers. After 20 weeks the group showed a 101-percent increase in classroom-related use of the library and a 103-percent jump in recreational use.

The program had a beneficial effect on the librarians as well: Interviews indicated the improvement in students' attitudes toward the library boosted librarians' enthusiasm in their work and motivated them to provide new services and materials. The librarians also felt that the experimental program made them an integral part of the educational process, rather than an ancillary resource. For details on the study contact Isabel Schon, Arizona State University, College of Education, Dept. of Educational Technology and Library Science, Tempe, AZ 85287.

The Best Science Books *for Children,* edited by Kathryn Wolff, Joellen Fritsche, and others, lists and annotates over 1,200 selected titles. The annotations are based on longer, signed reviews that originally appeared in *Science Books and Films,* the review journal of the American Association for the Advancement of Science. Entries are arranged by general Dewey category, then alphabetically by author within each category. The 292-page volume includes subject/title and author indexes. $15.95 from AAAS, 10th floor, 1101 Vermont Ave., N.W., Washington, DC 20005 (83-8797, 0-87168-307-5).

special services

Donation to develop disability database. The National Office on Disability (NOD) has been awarded a $100,000 grant from CBS Inc. to establish an online I&R database on disability and related issues. NOD initially received two-thirds of the funds outright, with the remaining third pledged for this year, contingent on the group raising a matching amount elsewhere.

NOD is a private nonprofit organization devoted to promoting opportunities for the disabled. Accepting the grant, NOD President Alan A. Reich said, "Easy access to accurate information is the first requirement in enabling disabled persons to become full participants in all aspects of life. We are greatly pleased that CBS Inc. has taken this major initiative in behalf of this process." NOD's address is 1575 Eye St., N.W., Washington, DC 20005.

Cultural minorities. "Information Services to Cultural Minorities" is the theme of the November 1983 issue of *Catholic Library World.* Articles deal with library school recruitment of Spanish-speaking librarians, selecting children's books to meet multicultural needs, and developing Hispanic collections. Single copies are $3 from the Catholic Library Association, 461 W. Lancaster Ave., Haverford, PA 19041.

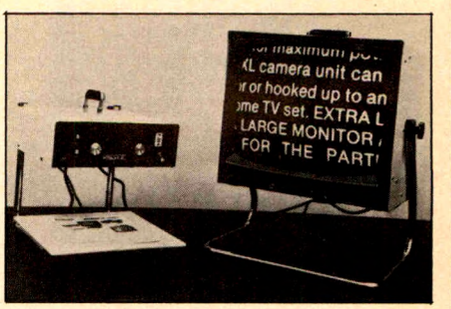
Gray and Growing describes 23 film and slide/tape programs for older adults. The programs cover educational topics such as crime prevention, health, and sexuality, as well as nostalgic reminiscences of train rides, county fairs, and the Depression era. The 150-page paperbound manual also lists distributors for the films and suggests other sources of materials for the aging. $10 from the Baltimore County Public Library, 320 York Rd., Towson, MD 21204.

Services to the handicapped. *Library and Information Services for Handicapped Individuals,* by Kieth C. Wright and Judith F. Davis, describes major types of disabilities, offers ideas for services and programs, and lists sources of further information. The new second edition reflects recent cutbacks in government funding and court reinterpretations of the legal rights of the handicapped, and adds chapters on speech-impaired individuals and library staff development to the 1979 first edition. 184 p., $20 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-13560, 0-87287-391-9).

NCLIS report on cultural minorities. The National Commission on Libraries and Information Science has issued the report of its Task Force on Library and Information Service to Cultural Minorities (the hearings leading up to the report were reviewed in *AL,* April, p. 206). The findings and 42 recommendations of the independent task force are grouped under the headings of library and information needs, library personnel, services and programs, materials and resources, and financing library programs for minorities. Single copies of the 106-page paperbound report are free from NCLIS, GSA Regional Office Bldg. #3, 7th and D Sts., S.W., Washington, DC 20024. Multiple copies are available from the Government Printing Office (83-17407, GPO stock no. 052-003-00927-7).

Chicano database planned. The California Spanish Language Data Base, a nonprofit group formed to meet the information needs of Hispanics, and the UCLA Chicano Studies Research Center have joined forces to develop a joint database. The proposed bibliographic database will include items dealing with Chicano education, folklore, labor and immigration, Chicanas, and U.S.-Mexico relations. The project also plans to compile a pilot online statistical database of information on Hispanics and to investigate the development of a nationwide, multi-institutional Chicano database consortium. For more information contact Juan Gómez-Quiñones, Director, Chicano Studies Research Center, University of California at Los Angeles, 405 Hilgard Ave., Los Angeles, CA 90024.

Visualtek manufactures a variety of electronic reading and writing aids for the visually impaired. The firm's line includes a Microviewer that enlarges microfiche up to 600 times, large enough for most partially sighted people to read easily. For more information write Visualtek, 1610 26th St., Santa Monica, CA 90404.



The Voyager XL from Visualtek features an extra-large monitor and up to 60x magnification.

Grant for service to "handicapped and needy." Britain's Ulverscroft Foundation will award its second Frederick A. Thorpe Travelling Fellowship in 1984. The award, named for a pioneer in the development of large-print books, is given in alternate years and may be up to £2,000.

The fellowship gives librarians and those in related fields the opportunity to expand their knowledge and commitment by—as the application states—"undertaking an approved piece of work, study, demonstration, innovation, research, or experiment in the supply of books and other reading material, or information and other media, to handicapped and needy people." The award normally supports activities likely to result in improvements in services, but work on advanced degrees or additional funding for projects already supported by other bodies will also be considered.

The first award was made in 1982 to Allan M.

Kleiman, chief of Services to the Aging/SAGE at the Brooklyn Public Library, who is investigating library services for older adults in the U.S., Canada, and the U.K.

Applications, which should be submitted by March 31, 1984, are available from the Ulverscroft Foundation, The Green, Bradgate Rd., Anstey, Leicestershire LE7 7FU, England.

tech services

East Asian materials now online. Some Research Libraries Group members now have online access in the vernacular to Chinese, Japanese, and Korean (CJK) materials, and OCLC is developing a CJK library support package.

RLG members that have collections in East Asian languages can enter records into RLIN, RLG's database, in the vernacular using a special, 179-key terminal and an online dictionary of 15,600 pictographic characters from the three languages. A modified printer provides hard copy in the vernacular.

Libraries having the special terminals can search in the vernacular for all East Asian materials in the database. RLG libraries with other terminals can display romanized portions of the records, such as collation and some subject headings. Six RLG members, the Library of Congress, and the Los Angeles County Public Library have CJK terminals; six more members and two associate members will get them this year.

OCLC and Asiagraphics, Mt. Sinai, N.Y., are negotiating for CJK support using transliterated Asian language records in the OCLC database. Users would retrieve transliterated records, but the records would be displayed on a VDT or printed on a dot matrix printer in Asian characters. Libraries will need no special keyboards, terminals, or printers to create vernacular records because Asiagraphics software would perform the necessary modification. Asiagraphics has already developed a CJK word processor that OCLC will market with the software.

The Online Catalog: *Improving Public Access to Library Materials* by Emily Gallup Fayen, director of library automation at Dartmouth College, is a basic text that describes how to determine the need for an online catalog, select a catalog, and evaluate it. The book also covers other necessities, such as creating the database, installing hardware and software, vendor contracts, and cost analysis, and includes a chapter on integrated systems.

Information from the Online Patron Access Project sponsored by the Council on Library Resources, which surveyed online catalog use in 29 libraries, is included in the chapter on evaluation.

Several appendices comprise a selected list of online public catalog installations, a list of vendors, case studies, and user questionnaires from the CLR project. Also includes glossary and bibliography.

148 p., $34.50 cloth, $27.50 paper, from Knowledge Industry Publications, 701 Westchester Ave., White Plains, N.Y. 10604 (83-12009, 0-86729-054-6 cloth, 0-86729-053-4 paper).

Smithsonian chooses Geac. The Smithsonian Institution has chosen the Geac Library Information System for automation of its 15 branch libraries located in the Washington, D.C., area, New York City, Cambridge, Mass., Arizona, and Panama. The three-year, $1.4-million project, to begin in April, will provide an online catalog, online circulation, acquisitions, and serials control, and a MARC record management system.

The Smithsonian collections include approximately 900,000 bound volumes, 250,000 microforms, 100,000 maps, and 2,000,000 slides and pictures. Among the libraries being automated are those at the National Museums of American History, Natural History, and American Art, and the National Air and Space Museum.

Evaluating online systems. A new series of guides from James E. Rush Associates, Inc., is designed to help libraries evaluate online systems that support library applications.

Eight volumes are now available covering serials control, circulation, public services, acquisitions, management, interlibrary loan, cataloging, and integrated systems.

Each volume contains a list of functions and features necessary for an application; an application description; methodology for evaluation; data element checklist keyed to MARC if applicable; data element definitions; inventory of available systems supporting the application; and bibliography and index.

$59.50 prepaid for each volume, $395 for the set from Publications Dept., James E. Rush Assoc., Inc., 2223 Carriage Rd., Powell, OH 43065.

reference

Documents reference study. *Improving the Quality of Reference Service for Government Publications* is a monograph based on a study of the quality of reference service at academic depository libraries conducted by Charles R. McClure and Peter Hernon. Library staff members were given 20 typical documents-related questions; the accuracy of the responses, the willingness to refer questions to other staff members, and the nature of the reference interview were recorded.

Findings show that the general public will have difficulty in gaining access to some depository collections, and that staff members answered a low number of test questions correctly and seldom referred questions. Users are more likely to receive a correct response to a telephone request than an in-person request, and the length of the search process does not indicate the likelihood of a correct answer. 270 p., $35 from ALA Publishing Services, 50 E. Huron St., Chicago, Il 60611 (83-3754, 0-8389-0388-6).

Guide to government information. *Locating United States Government Information: A Guide to Sources,* by Edward Herman, is a guide to finding information in federal documents. The 250-page volume covers general indexes such as the *Monthly Catalog* and *Publications Reference File,* Congressional publications and their indexes, statistical publications, technical reports, maps, audiovisual materials, and the use of the Freedom of Information and Privacy Acts. A 16-page tabular guide enables users to quickly compare major reference sources. $27.50 cloth, $20 paper from William S. Hein & Co., 1285 Main St., Buffalo, NY 14209 (82-83991, 0-89941-182-7 cloth, 0-89941-245-9 paper).

Recommended Reference Books *for Small and Medium-Sized Libraries and Media Centers 1983* reviews 506 titles selected by editor Bohdan S. Wynar from the 1983 edition of *American Reference Books Annual*. The critical reviews indicate whether the book is recommended for public, small college, or school libraries and give citations to other published reviews. The 296-page volume is divided into 42 subject areas and includes author/title and subject indexes. $23.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (0-87287-382-X).

video

Library's TV series wins Governor's Award. "Creative Crafts," Oklahoma's longest-running television series, received a "Special Recognition" award at the state's eighth annual Governor's Arts Award ceremony last fall. The program, now in its 33rd year, is jointly produced by the Oklahoma County Metropolitan Library System's Community Workshop and KTVY-TV in Oklahoma City.

Governor George Nigh honored "Creative Crafts" for "its splendid contribution to the cultural development of Oklahoma." The series depicts the studio techniques of award-winning artists from around the country.

Library Director Lee B. Brawner praised KTVY's role in the library's efforts. "To our knowledge, no other single television station in the nation has been as involved with its local library as has been KTVY," said Brawner, calling the station "most cooperative, effective, and instrumental in helping our library system bring books and people together."

Video art collection. The Video Art Data Bank, a project of the School of the Art Institute of Chicago, maintains a collection of video art and videotaped interviews with artists for rental or sale to libraries, schools, and museums.

The Video Tape Review collection includes 250 works of video art. Among the artists represented are Doris Chase, John Baldessari, Dara Birnbaum, Suzanne Lacy, and Linda

Montano.

The Art and Artists series consists of over 200 interviews with contemporary artists in all disciplines, including John Cage, Laurie Anderson, Christo, Chuck Close, and Lee Krasner.

A descriptive catalog of the Art and Artists collection costs $2; the Video Tape Review catalog is free. The works are available in all ¾-inch and ½-inch formats. Most 30-minute tapes rent for $50 to $100 and sell for $200 to $300.

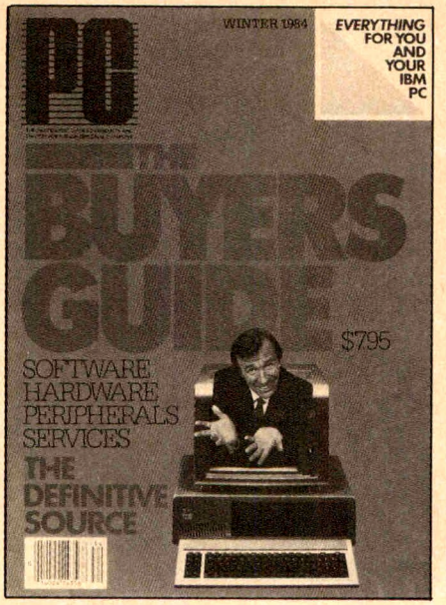
The Video Art Data Bank also publishes *Profile,* a periodical featuring transcripts of interview programs, bibliographies, and articles by artists and critics. 6-issue institutional subscriptions are $18. Video Art Data Bank, Library/School of the Art Institute of Chicago, Columbus Dr. and Jackson Blvd., Chicago, IL 60603.

Children's books on video. Weston Woods, a producer of films based on leading children's books, is now offering several of its titles on videocassette at substantial savings. The first 10 films to be released in the VHS and Beta formats include *The Snowy Day* by Ezra Jack Keats, *Harold and the Purple Crayon* by Crockett Johnson, and *Where the Wild Things Are* and *Really Rosie* by Maurice Sendak. The videocassettes are $50 each, a savings of up to $325 over the cost of the films. Weston Woods Studios, Weston, CT 06883.

Rental/copy video plan. Hawkhill Associates has made its 60 educational videotapes available on an innovative and economical rental/copy plan. For the standard seven-day rental fee of $48 or less, libraries and other users receive permission to make a copy of the program for permanent use. Hawkhill's videocassettes, adaptations of slide/tape programs, cover ecology, genetics, energy, and other scientific topics. For a free copy of the firm's catalog write Hawkhill Associates, Inc., 125 E. Gilman St., Madison, WI 53703.

microcomputing

The Librarian's Guide *to Microcomputer Terminology and Applications* is based on a nationwide survey of over 400 academic, public, school, and special libraries using micros. Authors Lawrence A. Woods and Nolan F. Pope describe such applications as searching local and remote databases; control of circulation, acquisitions, and serials; production of catalogs, bibliographies, and other offline products; and management activities. The 209-page volume also offers information about specific hardware and software used by libraries, an overview of microcomputer technology, and guidelines for selecting systems and programs. Appendixes include a glossary, a bibliography, and a directory of some 250 libraries with micros. $34.50 cloth, $27.50 paper, (ASIS members $27.60 cloth, $22 paper) from Knowledge Industry Publications, Inc., 701 Westchester Ave., White Plains, NY 10604 (83-13548, 0-86729-045-5 cloth, 0-86729-044-7 paper).



PC Buyers Guide, from the publishers of *PC* magazine, features thousands of entries describing software, hardware, peripherals, accessories, books, periodicals, and organizations for users of the IBM PC. The first edition of the semi-annual publication contains 408 pages of listings and ads, plus lengthy indexes by product name and vendor. Single copies are $7.95 from Ziff-Davis Publishing Co., One Park Ave., New York, NY 10016.

The Public Interest Computer Association is a membership organization bringing together microcomputer users concerned with computer-related social issues and working to develop appropriate applications of computer technology.

PICA membership includes a subscription to *Nexus,* the group's bimonthly journal, featuring articles on such issues as privacy and technology, the health hazards of VDTs, and the effect of computers on the workplace. Members can also attend seminars and user groups, and receive discounts on classes and workshops offered by PICA. The group is also developing handbooks and public domain computer programs designed for nonprofit organizations.

Individual yearly memberships are $15; institutional memberships (providing PICA benefits to all staff members) are $50. PICA, 122 Maryland Ave., N.E., Washington, DC 20002.

Microcomputer searching materials. A workshop on "Your Personal Computer for Literature Searching" has been developed by Janice Contini and Pamela M. Corley of the University of Southern California's Norris Medical Library. Aimed at health professionals, the four-hour workshop covers databases, vendors, software, telecommunications, hardware, and search strategies. A packet of materials prepared by the library's staff and a list of vendors offering handouts is available for $5 prepaid from the Reference Secretary, Norris Medical Library, USC Health Sciences Campus, 2025 Zonal Ave., Los Angeles, CA 90033. Make checks payable to Norris Medical Library.

Computer literacy newsletter. The EDUCOM Computer Literacy Project has started a newsletter for college and university educators to exchange information on computer literacy programs. EDUCOM is a nonprofit consortium of over 475 colleges and universities formed to promote the use of current information technology in higher education. Its Computer Literacy Project was developed as a clearinghouse for information on programs and materials and to offer workshops, consulting, and other support services. To receive the newsletter and other information on the project write Kristie Shipley, EDUCOM Computer Literacy Project, POB 364, Princeton, NJ 08540.

The Complete Buyer's Guide *to Personal Computers,* by Tim Hartnell and Steve Veit, is a 382-page mass market paperback containing descriptions of virtually every micro on the market at press time, plus a brief history of computing, chapters on games and programs, a directory of user groups, a bibliography of computer magazines, a glossary, and other features. $4.95 from Bantam Books, 666 5th Ave., New York, NY 10103 (0-553-23873-6).

bibliography

Presidents and the electorate. Two recent historical bibliographies seem appropriate to mention at the start of this presidential election year.

The American Presidency: A Guide to Information Sources annotates books, articles, documents, and other materials on American presidents and the presidency. Compiler Kenneth E. Davison includes works published since 1945 and focuses on works after 1960 in order to complement existing older bibliographies. The 467-page volume is divided into two parts, the first dealing with areas related to the presidency and the second covering each individual president. $48 from Gale Research Co., Book Tower, Detroit, MI 48226 (0-8103-1261-1).

The American Electorate abstracts 1,428 articles on voting and the electoral process published from 1973 to 1982. The opening section describes articles on voters and voting behavior, and the second part covers the electoral process and general studies of elections throughout U.S. history. The remaining four chapters are arranged chronologically, listing studies by historical period. Approx. 350 p., $28.50 from ABC-Clio Information Services, POB 4397, Santa Barbara, CA 93103 (0-87436-372-1).

Vietnam War Bibliography, compiled by Christopher L. Sugnet and John T. Hickey, describes some 4,000 items from Cornell University's Echols Collection. The books, pamphlets, documents, and other materials—most

in English or Vietnamese—cover U.S. involvement in Vietnam from the mid-1940s through 1975. Entries are arranged alphabetically by title and are indexed by subjects, personal or organizational authors, and alternative titles. 573 p., $39.95 from Lexington Books, D.C. Heath and Co., 125 Spring St., Lexington, MA 02173 (83-16172. 0-669-06680-X).

The Arabs in the United States: *A Selected List of Resources* identifies materials dealing with Arabs as immigrants, American citizens, visitors, and students. Compiled by George Dimitri Selim of the Library of Congress African and Middle Eastern Division, the 41-page bibliography lists 254 books, articles, periodicals, and dissertations from the library's collections. Free copies of the publication, the second in the library's Mideast Directions series, are available from the Library of Congress, Near East Section, Washington, DC 20540.

Religious bibliographies. The Church and Synagogue Library Association has issued two new titles in its bibliography series.

Know Your Neighbor's Faith: An Annotated Interfaith Bibliography lists some 150 books to help general readers understand differing faiths. Compiler Bernard Deitrick's annotations describe each title's contents, tone, and limitations. The entries are categorized by religions in general, Judaism, Christian religions, other religions, and interfaith dialogue, 16 p., paper, $3 prepaid, $3.50 if billed (0-915324-19-9).

Religious Books for Children: An Annotated Bibliography, compiled by Patricia Pearl, describes over 400 titles. Entries are listed by age groupings within such categories as Bible reference books, stories from the Bible, Christian theology, Judaism, and other religions. Annotations give the books' contents, the types of illustrations, and other information. 36 p., paper, $5 prepaid, $5.50 billed (0-915324-21-0). Both titles are available from CSLA, POB 1130, Bryn Mawr, PA 19010.

Salvadoran materials. A six-page annotated list of books, articles, and other materials about the conflict in El Salvador is available for 60¢ and a long, self-addressed, stamped envelope from John R. Likins, 332 Railroad Ave., Norwood, MA 02181.

info briefs

Computer periodicals bibliography. *ABI/SELECTS* contains detailed information on 533 computer magazines and newsletters. The 576-page paperback is divided into six sections covering publications on personal computing, specific systems and software, data processing, data communications and teletext, office automation, and specific applications or professions (including librarianship). Each entry describes the target audience and contents of the publication and gives information on format, circulation, number of advertising pages per issue, and subscriptions. The publication was previously announced as *Select (AL*, May 1983, p. 323). $50 from Data Courier, Inc., 620 S. 5th St., Louisville, KY 40202 (83-21026, 0-914604-25-2).

***Dissertation Abstracts* now online.** Beginning in January, searchers on Dialog and BRS can search and retrieve full abstracts of dissertations accepted since July 1980 on University Microfilms' new Dissertation Abstracts Online database. Previously, only the citations of dissertations were available from the firm's Comprehensive Dissertation Index. In addition to full-text keyword searching of the abstract, the new file can be searched by subject field, degree-granting institution, and the year the degree was awarded.

Dissertation Abstracts Online is Dialog's free file for January, with subscribers receiving a free half-hour of searching time.

Save on searches with Quik-Link. The Quik-Link 300 is a small, inexpensive terminal that, upon connection to a telephone jack and a television set, can be used to access consumer information database services. The terminal features a membrane keyboard and a 300-baud modem with autodial and automatic logon capabilities. The $249 price includes free registration or trial time in CompuServe, The Source, Dow Jones News/Retrieval, and other services. Quazon Corporation, 3330 Keller Springs Rd., Carrollton, TX 75006.

Data Base User Service. Knowledge Industry Publications, Inc., and the American Society for Information Science are together offering the Data Base User Service. Subscribers to the service will receive the annual *Data Base Directory*, featuring detailed descriptions of numeric, full text, bibliographic, and other databases; *Data Base Alert*, a monthly newsletter with information on new databases and changes in existing ones; one free hour of search time on *Data Base Online Access*, the online version of the directory, with additional search time billed separately; and access to the electronic mail *Data Base Hotline* to communicate with the editors of the service. Annual subscriptions are $185, with a discount available to ASIS members. For more information write Terry Mollo, Knowledge Industry Publications, Inc., 701 Westchester Ave., White Plains, NY 10604.

Telecommunications in ARL Libraries, SPEC Kit #98 from the Association of Research Libraries' Office of Management Studies, discusses the implications of telecommunications technology for large research and academic libraries. The 129-page report covers local systems, interconnection, gateways and links, and standards; suggests reasons for libraries' slowness to adopt videotex and teletext; and assesses the effect of the breakup of AT&T. $15 ($7.50 for ARL library members) from SPEC Center, ARL/OMS, 1527 New Hampshire Ave., N.W., Washington, DC 20036. Make checks payable to ARL Office of Management Studies. □

currents

ALA member **Carolyn Dearnaley**, former assistant university librarian at Colgate University, Hamilton, N.Y., is now director of the Eugenia Fuller Atwood Library at Beaver College, Glenside, Pa. . . . In the University of California System, UC/Berkeley has announced the retirements of **Bea Lukens** as head of its Earth Sciences Library and **Arthur Waugh** as head of the Environmental Design Library, which he cofounded in 1964; UCLA's director of mental health information services at its Neuropsychiatric Institute, ALA member **Sherry Terzian**, was awarded an honorary lifetime sustaining membership in the Association for Mental Health Affiliation with Israel in recognition of her work with students and scholars internationally; and UC/San Francisco has appointed **Richard S. Cooper** to the post of associate university librarian. . . . ALA member **John J. Sullivan** is now city librarian of Daly City (Calif.) Public Library, succeeding another ALA member, **Samuel C. Chandler**, who retired last July. . . . **Ana Maria Magaloni de Bustamante**, director of public library services for the nation of Mexico, is the 1983 recipient of the Distinguished Alumnus Award from the University of Denver Graduate School of Librarianship and Information Management. . . . ALA Councilor-At-Large **Mary Biblo** is now head librarian at the University of Chicago Laboratory Schools. . . . The Ohio Library Association recently presented its 1983 Librarian of the Year award to ALA member **Robert H. Donahugh**, director of the Public Library of Youngstown and Mahoning County. . . . ALA member **Lucille C. Thomas** recently retired as assistant director for elementary school libraries at the New York City Board of Education. . . . Recent appointments at the University of Michigan Libraries in Ann Arbor include: **Kathryn Beam** as manuscript librarian, rare books and special collections; **Jennifer R. Zukowski** as reference librarian and assistant for the Humanistic Scholar grant funded by the Council on Library Resources and the Andrew H. Mellon Foundation; and **Dorothy H. Shields** as assistant head of the Art and Architecture Library. . . . At the U.S. Information Agency ALA member **Donald C. Hausrath** is now library and books services officer for India, based in New Delhi, and **Susan M. Olson** is regional library consultant for the countries of Algeria, Egypt, Israel, Jordan, Lebanon, Mauritania, Morocco, Sudan, Syria, and Tunisia, based in Tunis. . . . Jan. 3 **Louella Wetherbee** became executive director of AMIGOS Bibliographical Council, Inc., in Dallas, Tex. An ALA member, Wetherbee was formerly director of libraries at George Mason University, Fairfax, Va. . . . . ALA member **Larry Black** recently became assistant executive director of the Public Library of Columbus and Franklin County (Ohio). He succeeded **Charles Brown**, who resigned last August to become director of the Solonas County Library System in California. . . . Recent additions to the University of Nevada/Reno Library staff are: **Robert T. King** and ALA members **Barbara Hutchinson** and **Paulette Bochnig**. King is now head of the Oral History Program; Hutchinson is public services librarian; and Bochnig is assistant government publications librarian. Another ALA member, **LaMar R. Smith**, recently retired as UNR's education and reference librarian. . . . ALA member **Daniel J. Bradbury**, former director of library and leisure services at Janesville (Wis.) Public Library, is now director of the Kansas City (Mo.) Public Library. . . . Nov. 1 **Peter Spyers-Duran** became director of Wayne State University Libraries in Detroit, Mich. An ALA member, Spyers-Duran last served as director of the Library and Learning Resources at California State University/Long Beach. . . . ALA member **Richard J. Talbot**, director of libraries at the University of Massachusetts, Amherst, is the new president-elect of the Association of Research Libraries. . . . **Neil Snider** is 1983/84 president-elect of the Alabama Library Association. . . . ALA member **Linda M. Wood** is 1984–86 president-elect of the California Library Association. . . . **Richard Urwiler**, coordinator of instructional resources at Wayne (Nebr.) State College since 1975, is the new president-elect of the Nebraska Educational Media Association. . . . ALA member **George Shipman**, director of the University of Oregon Library in Eugene, is now chair of the Inter-Institutional Library Council of the Oregon State System of Higher Education. . . . The new director of the Buffalo and Erie County Public Library, Buffalo, N.Y., is ALA member **Donald H. Cloudsley**. He succeeds another ALA member, **Paul M. Rooney**, who retired last September. . . . ALA member **Shirley Coulter**, coordinator of school libraries for the Department of Education in Halifax, Nova Scotia, is now North American director of the International Association of School Librarianship. . . . **Donna Dziedzic** is now New Jersey assistant state librarian. An ALA member, she last served as director of the Illinois Regional Library for the Blind and Physically Handicapped at Chicago (Ill.) Public Library. . . . In October, ALA member **Edward Michael O'Connor** became director of Southern Adirondack Library System in Saratoga Springs, N.Y. . . . At the School of Library and Informational Science at the University of Missouri-Columbia, **Robert Berk** is now associate professor and ALA member **Edward Miller** will retire as dean in January. . . . ALA member **Lucille C. Thomas** recently retired as assistant director for elementary school libraries at the New York City Board of Education. . . . **Ann Montgomery Smith** is now director of libraries and curator of special collections at the Wentworth Institute of Technology in Boston, Mass. An ALA member, she was formerly a consultant for the blind and physically handicapped for the Massachusetts Board of Library Commissioners. . . . At the Smithsonian Institution, **William E. Woolfenden** retired in June as director of the Archives of American Art, a bureau of the Smithsonian in New York, N.Y., and **Katharine Martinez** recently became chief librarian at the Cooper-Hewitt Museum Library branch of Smithsonian Libraries in New York. ALA member **Roslyn Beitler** joined Smithsonian's Washington, D.C., staff as program coordinator for young associate and family activities. . . . ALA member **Claud Glenn Sparks**, professor of library and information science at the University of Texas at Austin, is the Texas Library Association's 1983 Librarian of the Year. . . . From the South Carolina State Library, Columbia, comes news of two recent appointments and of the presentation of two Distinguished Service awards. The new staffers are ALA member **Barbara "Kay" Kasper**, now field service librarian, and **William A. Ellett**, cataloger in the Technical Services Department. The award recipients, both former presidents of the South Carolina Library Association, are: ALA member **Estellene P. Walker**, who served as executive secretary of the State Library Board and, later, as state librarian; and **J. Mitchell Reames**, who recently retired as the first director of the Francis Marion College Library in Florence. Reames was succeeded by **H. Paul Dove**.

Making Waves

Jan. 2 **Mary W. Ghikas** became the new executive director of the Universal Serials & Book Exchange, Inc., in Washington, D.C., following the distinguished leadership of USBE's first head, **Alice D. Ball**. Ball, who retired at the end of 1983, led USBE from its creation in 1948 as the United States Book Exchange to its present status as an international library clearinghouse with a core collection of more than 7,000 periodical titles. Ghikas, an ALA Councilor-At-Large, comes to USBE well prepared to continue its expansion into the online age. She last served as Chicago Public Library's assistant commissioner for research/reference services, where her duties included guiding plans for the adoption of automated systems and the direction of collection development. *—Beverly Goldberg*

Deaths

Philip A. Hazelton, 75, New Hampshire state law librarian from 1954 to 1972, died Nov. 9. . . . **Carl Milton White**, 80, former chief librarian and library school dean at Columbia University, died Nov. 8. From 1962 to 1967, White was program specialist in library administration at the Ford Foundation. . . . **Leslie W. Edwards**, associate director of libraries at the University of Arkansas at Fayetteville, died June 1. . . . **Doris K. Colby**, 68, former librarian of the Charles B. Phillips Library at Aurora (Ill.) College and cofounder of the Midwest Archives Conference, died Aug. 26. □

World Book is the most frequently used encyclopedia in print, according to librarians. In fact, according to two independent surveys* reported in the *Encyclopedia Buying Guide*, librarians throughout the U.S. and Canada chose *World Book* over 34 other references as the one that's most frequently used, easiest to use, and easiest to understand.

World Book's popularity isn't the result of just ease of use. The *Guide* awarded *World Book* excellent ratings in nine categories: scope, authority, reliability, recency, objectivity, clarity, accessibility, graphics, and physical format. The closest competitors scored excellent ratings in only six, four and one categories, respectively.

What the ratings don't explain is how *World Book* appeals to children, high school and college students, and adults as well. It's no accident. Articles in *World Book* are written *at the language level of the people most likely to read them.* No matter how difficult the subject matter, *World Book* makes it **understandable.** Selected articles provide readers with quick overviews called "Facts in Brief." And *World Book* brings information to life with more than 29,000 photographs and illustrations.

"*World Book* is, page for page, the best encyclopedia on the market today," reports the *Guide*. "*World Book* is far and away the first choice of professionals who deal with knowledge and information day in and day out."

What's the busiest reference in your library? Doesn't it make sense to have a *current* set on your shelves right now?

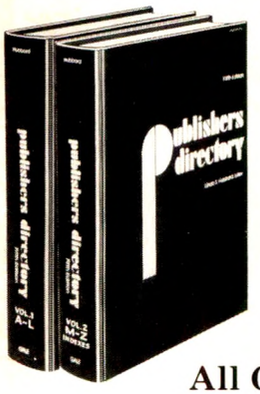
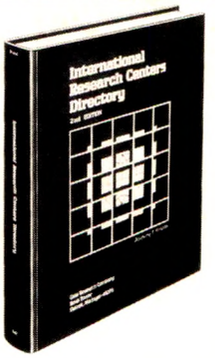
An Invitation to the ALA Archives

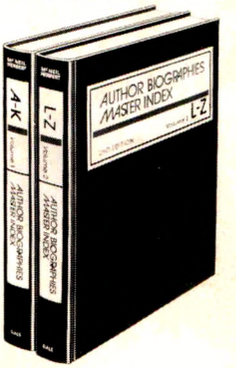
Highlights of "Midwinter Bowl '84"

Subject Access Course: Lesson One

NEW BOOKS FROM GALE







All Gale Reference Books Are Sent on 60-Day Approval

International Research Centers Directory

...A World Guide to Government, University, Independent Nonprofit, and Commercial Research and Development Centers, Institutes, Laboratories, Bureaus, Test Facilities, Experiment Stations, and Data Collection and Analysis Centers, as well as Foundations, Councils, and Other Organizations which Support Research. 2nd ed. Edited by Kay Gill and Anthony T. Kruzas. 739pp. Name and keyword index. Country index. Gale, 1984. ISBN 0-8103-0467-8. $250.00. **(SO)** Inter-edition supp., $140.00. **(SO)**

This useful reference tool identifies and describes 3,000 research and development facilities throughout the world (excluding the U.S., which is covered in Gale's *Research Centers Directory*). Entries give: full name, in both English and native language ... address and phone ... date established ... name and title of director ... parent agency and organization affiliation ... size and description of staff ... type of activity ... fields of research ... library holdings ... publication and seminar programs. All fields of knowledge are represented, including agriculture, business and commerce, conservation and animal resources, education, energy, environment, life sciences, medicine and health, military science, and science and technology.

Community Resources Directory

...A Guide to U.S. Volunteer Organizations and Other Resource Groups, Services, Training Events and Courses, and Local Program Models, Covering Such Management Areas as Funding, Public Relations, Information and Referral, Business and Industry Involvement, Leadership Development, Special Volunteer Groups, and Central Recruitment Operations, and Describing Programs in the Arts; Business Assistance; Civic Affairs; Consumer Services; Day Care; Drug Abuse and Alcoholism; Education; Employment; Family, Youth, and Children; the Handicapped; Health; Housing; Law Enforcement and Crime Prevention; Mental Health; Nutrition; the Older Person; Physical Environment; Recreation; and Transportation. 2nd ed. Edited by Harriet L. Kipps. (Formerly published as *411: Community Resource Tie Line.*) 928pp. Index. Gale, 1984. ISBN 0-8103-1794-X. $85.00. **(SO)**

Offering twice as many entries as the previous edition in a completely redesigned format, the second edition covers the volunteer organizations, services, training programs, and publications throughout the U.S. that provide human services in a wide range of areas. Three sections: 450 resource groups and their publications ... 200 volunteer training programs ... 400 profiles of volunteer programs.

Publishers Directory

...A Guide to New and Established, Commercial and Nonprofit, Private and Alternative, Corporate and Association, Government and Institution Publishing Programs and Their Distributors. 5th ed. Edited by Linda S. Hubbard. (Formerly *Book Publishers Directory* but now expanded to include selected publishers of classroom materials, reports, databases, software, maps, calendars, cards, prints, etc.) 1,630pp. in 2 vols. Index of publishers, imprints, and distributors. Subject index. Geographic index. Gale, 1984. ISBN 0-8103-0412-0. $225.00/set. **(SO)** Inter-edition supp., $135.00. **(SO)**

The new *Publishers Directory* provides complete information on some 9,300 U.S. and Canadian publishers: name, address, phone, year founded, principal officers and managers, number of titles per year, representative titles, description, discount schedules, returns policies, and much more. This edition also covers 122 distributors and wholesalers and identifies defunct publishers.

Author Biographies Master Index

...A Consolidated Index to More Than 658,000 Biographical Sketches Concerning Authors Living and Dead As They Appear in a Selection of the Principal Biographical Dictionaries Devoted to Authors, Poets, Journalists, and Other Literary Figures. 2nd ed. Edited by Barbara McNeil and Miranda C. Herbert. 1,597pp. in 2 vols. Gale, 1984. ISBN 0-8103-0662-X. $165.00/set. **(SO)** Inter-edition supp., $120.0. **(SO)**

The second edition contains over 658,000 citations of author biographies as listed in more than 420 volumes and editions of over 215 sources. Tens of thousands of citations are new to this edition, and many of the citations are not listed in Gale's *Biography and Genealogy Master Index*, 2nd ed. Covers both major and minor authors of every era and country, with emphasis on American and British writers.

Online Database Search Services Directory

...A Reference and Referral Guide to Libraries, Information Firms, and Other Sources Providing Computerized Information Retrieval and Associated Services Using Publicly Available Online Databases. 1st ed. Edited by John Schmittroth, Jr., and Doris Morris Maxfield. Over 1,000pp. in 2 softbound parts. Cumulative indexes to organizations, online systems, databases, subjects, searcher names, and geographic locations. Gale, 1984. ISBN 0-8103-1698-6. $75.00/sub. *(Part 1 in print.)* **(SO)**

Entries furnish such information as online systems accessed, subject and database specializations, amount of search activity, staff size and searchers' names, how to arrange a search, fee structure, etc., for each of the 1,500 organizations covered.

(SO) These titles are available at Gale's 5% Standing Order discount. Deduct 5% if you send check with order. Customers outside the U.S. and Canada add 10%.

EXTRA! EXTRA! UMI ANNOUNCES FREE MICROFILM READER OFFER! READ ALL ABOUT IT!

University Microfilms International now delivers newspapers in microform!

Great American newspapers like THE NEW YORK TIMES... THE CHICAGO TRIBUNE... THE LOS ANGELES TIMES... THE ATLANTA JOURNAL & CONSTITUTION... and THE MINNEAPOLIS STAR AND TRIBUNE.

They have more too! Literally dozens of award-winning newspapers from all over the world.

And, to help you and your patrons discover the many benefits of newspapers as a primary research tool, UMI is giving away microfilm readers FREE!

All you have to do is take certain newspapers in microform and their printed indexes. UMI will give you a new NMI 2020 roll microfilm reader worth $1,215.00!

Both current subscribers and new subscribers are eligible. It's easy to qualify, but some restrictions exist. For complete details, and a copy of UMI's 1984 Newspapers in Microform catalog, please complete and mail the coupon.

This offer expires March 31, 1984, so act today!

New NMI 2020 roll microfilm reader—with automatic opening glass flats.

Read all about it. For details about UMI's "Free Reader" Offer, and a copy of the 1984 Newspapers in Microform Catalog, please fill out and return this coupon.

Esse is *percipi*

TO BE IS TO BE PERCEIVED. If a librarian falls in the forest and no one hears, does it make a sound? Over the last few years librarians have been falling all over themselves to take what they perceive as their true place in education and the Information Society—only to find they are often unheard and therefore nonexistent. Zeroed out of budgets, omitted from white papers, overlooked in legislation, they have nevertheless held their self-perceptions to be self-evident. They have said, traditionally, deal with me as *I* see me, not as you see me.

At the ALA Midwinter Meeting last month, however, there were signs that librarians are coming out of the forest not only to be perceived, but to deal with—rather than deny—the perceptions of others.

For example, in some 21 educational reform documents to appear recently, including *A Nation at Risk*, the perceived value of librarians as part of the reform process is: *worthless*. We are barely mentioned. But now, an ALA task force appointed by President Brooke Sheldon is going to act on that perception—and change it. Accepting the premise that we must *prove* our educational role once and for all, the Task Force on Excellence in Education reported at Midwinter that it will show—by powerful, specific examples—exactly what libraries do and can do to tackle the problems cited in *Risk*. The task force will seek to make *our* perceptions those of the education community and its leaders. By dealing with our previous state of nonexistence here, we can achieve a state of being that counts for something.

Another ALA task force announced it has enlisted some 35 associations to help promote National Library Week, bringing our values and very existence to the attention of millions of new constituents. ALA President-elect E.J. Josey described his ambitious program for building new coalitions, to the same effect. In discussing their approaches to Association issues, both presidential candidates recognized perceived values as reality, if not necessarily truth.

Elsewhere, others were realizing that, whatever the "truth" of the matter: • if a book is perceived to be racist, you deal constructively with that feeling; • if an attempt to copyright a database is perceived as sinister, some alternatives had better be considered; • if an association is perceived to be waffling on the MLS-degree issue, it may be time for it to take a stand . . . and so on.

The alternative to facing the imperfect world of perceptions is to return to the forest and a state of flawless, soundless, nonbeing.

—*Art Plotnik*

Be VideoWise!

Display your growing Videocassette Collection in a new Gaylord Videocassette Displayer. Revolving 4-sided Towers are available in two tier sizes: 9" for VHS format and 8" for Beta format. Cassettes are held in molded clear plastic pockets with aluminum frames.

The ISLAND MODEL is ideal for large capacity, one unit display. Four towers suspended on aluminum pole and base provide multiple patron access at one time.

The WOOD PANEL MODEL holds towers in selected hardwood frames which bolt together in any configuration you wish. (Original purchase must be 2 panels for units to stand independently.) This high style model provides maximum flexibility for distinctive and useful display.

For more information, please call Toll Free 800-448-6160, in New York State 315-457-5070 for a full color brochure on Gaylord's Displaywise Line of Library Displayers.

Island Model

Gaylord also offers a full line of supplies and equipment to store, circulate and protect videocassettes.

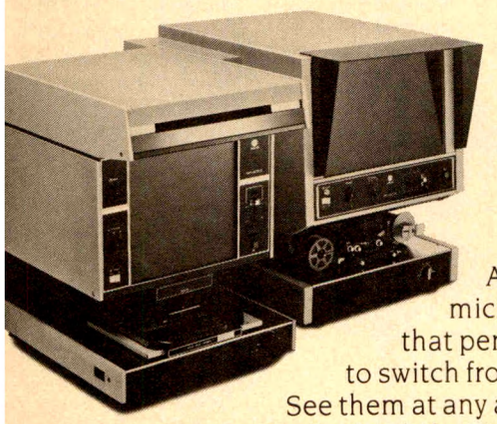
THEIR REFERENCES WOULD FILL A LIBRARY.



Libraries from A to Z have written us referencing the quality and reliability of Minolta RP 405E and RP 407E reader-printers.

We're pleased, but not surprised. Because both models have a lot to offer libraries. They give you sharp, positive, permanent prints from either positive or negative film. Prints you can write on with just about any writing instrument.

They feature Minolta's exclusive fully automatic exposure control for quality prints the first time. Saving time and reducing paper costs. And they accept virtually every microformat made. With carriers that permit even untrained operators to switch from roll film to fiche in seconds.

See them at any authorized Minolta dealer in our nationwide network. Check the Yellow Pages for the one nearest you. Or call toll free 800-221-3333. In N.Y., (212) 775-1395.

Minolta reader-printers. Because libraries are where classics belong.

IF YOU DON'T INSIST ON A MINOLTA THIS TIME, YOU WILL NEXT TIME.

ALA Council urges Reagan to stick with UNESCO

The Reagan Administration's decision to withdraw from the United Nations Educational, Scientific, and Cultural Organization next Dec. 31 will have an enormous and immediate impact on international library programs, ALA Past President Tom Galvin told *AL* Jan. 4. "We cannot allow the press to say that the U.S. loses nothing by withdrawing from UNESCO," he said.

For librarians, Galvin explained, the most vital UNESCO programs include international copyright and the Florence and Nairobi protocols, which encourage duty-free flow of library materials. UNESCO also helps fund the Universal Availability of Publications and the Universal Bibliographic Control programs sponsored by the International Federation of Library Associations and Institutions (IFLA). American librarians are also active in UNESCO's General Information Program (PGI), which focuses on scientific data and documentation.

UNESCO was set up in 1945 to foster literacy and education in the third world, protect humankind's cultural heritage, and promote the exchange of ideas. In giving the required year-in-advance notice to UNESCO late in December, the State Department charged that the Paris-based agency "has extraneously politicized virtually every subject it deals with, has exhibited hostility toward the basic institutions of a free society, especially a free market and a free press, and has demonstrated unrestrained budgetary expansion."

The United States is contributing 25 percent of UNESCO's $374 million biennial budget for 1984 and 1985 and has long complained of its extravagant mismanagement and misguided programs. Westerners are especially disturbed by UNESCO's efforts to set up a "New World Information Order" with international licensing for journalists.

However, Galvin pointed out, the U.S. Commission for UNESCO—an advisory body including 60 nongovernmental organizations such as ALA, the national League of Women Voters, and the National Wildlife Federation—recently voted 41-8 that "continued U.S. membership in UNESCO is in the national interest."

UNESCO debate at Midwinter

Galvin, who has represented ALA on the UNESCO commission for the last three years, introduced the issue to the International Relations Committee, which he chairs, at ALA Midwinter Meeting Jan. 8. He proposed a resolution asking the U.S. Secretary of State to negotiate with UNESCO's Director General to resolve their differences.

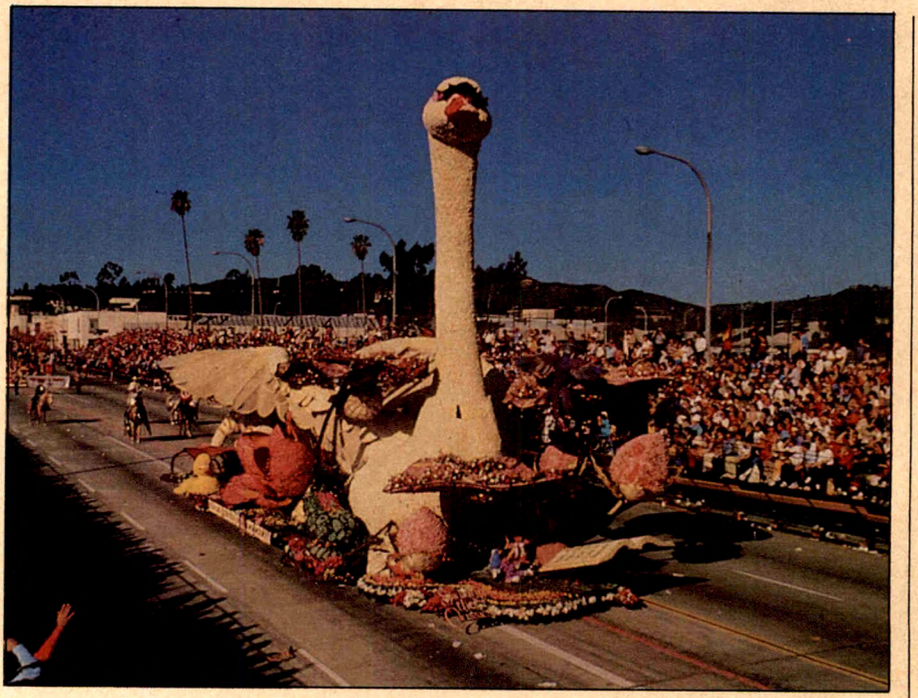
"Ain't tough enough," ALA Past President Russell Shank commented. Galvin pointed out the delicate nature of the matter. Richard de Gennaro said he was concerned about UNESCO antics.

Galvin agreed that some serious problems and severe shortcomings need to be corrected in many UNESCO programs, including library programs. "You don't correct by withdrawing," he argued, "you then have no voice."

Elinor Hashim, chair of the National Commission on Libraries and Information Science, which houses UNESCO's PGI office in Washington, D.C., strongly supported the international agency.

After some discussion and alterations, the International Relations Committee approved Galvin's resolution, with de Gennaro abstaining. The ALA Executive Board, the Public Library Association, and the Association for Library Service to Children also endorsed the statement, and the Intellectual Freedom Committee informally okayed it.

By a majority standing vote, Council resolved to inform President Reagan, Secretary of State George Shultz, UNESCO Director General Director Amadou Mahtar M'Bow, and other appropriate bodies that the American Library Association "deeply regrets the decision of the President of the United States . . . to issue notice of the intention of the U.S. to withdraw from membership in UNESCO." ALA also called on Shultz and M'Bow to "initiate prompt, serious, and productive negotiations leading to timely and satisfactory resolution of differences in order to preserve the many positive benefits of continuing U.S. participation in UNESCO."



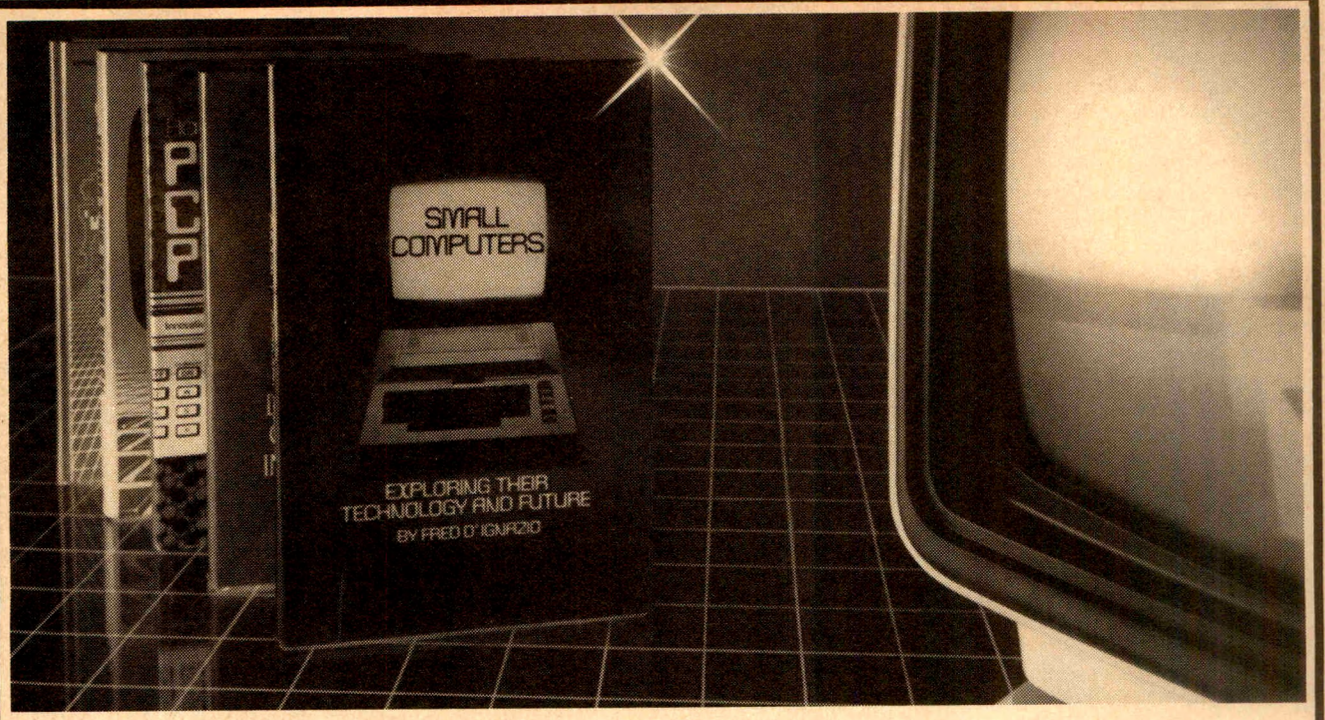
Friends of Libraries USA star in Rose Parade

Beneath the beak of a 28-foot-high floral swan in the 1984 Tournament of Roses Parade, Friends of Libraries USA founder Sandy Dolnick reads *The Ugly Duckling* to four young patrons from the Los Angeles Public Library. Baskin-Robbins Ice Cream selected FOLUSA,an American Library Association affiliate, to carry out the parade theme, "A salute to volunteers." The firm's "Sharing the Classics" swan float encompassed nearly 7,000 square feet of blossoms and won the tournament's special award in Pasadena Jan. 2.

Supreme Court Sony decision a "landmark" for libraries

When the Supreme Court ruled Jan. 17 that individuals may legally tape TV shows for home use, librarians could rejoice along with viewers, according to Nancy Marshall, chair of the American Library Association copyright subcommittee. "The Sony-Betamax decision is a great victory for fair use and ranks with *Williams & Wilkins* as a landmark decision in the protection of library and user rights," she told *AL*.

Last year ALA had joined 29 other library and educational associations in filing a



BIG AND GETTING BIGGER... COMPUTER BOOKS AND SOFTWARE.

The exceptional growth in the demand for computer books and software shows no sign of abatement. Together, they comprise the most rapidly expanding segment of publishing. At the forefront of the trend, Baker & Taylor has all the latest and best books about computers—and a full line of publishers' software packages.

a GRACE company

friend-of-the-court brief in the case of the Sony Corporation of America, which markets the Betamax video recorder, against Universal City Studios. The brief argued that the fair use provisions in the 1976 Copyright act would be eroded if the Supreme Court upheld the 1981 appeals court Sony decision outlawing home videotaping.

"Every time fair use is threatened in the home or the library world, users and librarians are endangered," Marshall said. The Supreme Court Sony ruling is important for the library community because it substantiates the concept of fair use, she said.

In writing the opinions and the dissent on the 5-4 decision, both Associate Justice John Paul Stevens and Justice Harry Blackmun suggested that Congress might modify the ruling. But Rep. Don Edwards (D-Calif.), a sponsor of legislation which would levy user fees on sales of video recorders and blank tapes, called the ruling "disappointing." He said it would be difficult to pass the royalty laws this year.

Rep. Robert Kastenmeier, the Wisconsin Democrat who chairs the subcommittee dealing with copyright, saw no need to rewrite the Copyright Act so that royalties could be charged.

Awards announced at Midwinter Meeting

The 1984 Newbery Medal for the most distinguished contribution to American children's literature has been awarded to Beverly Cleary, author of *Dear Mr. Henshaw* (Morrow). Illustrators Alice and Martin Provensen received the 1984 Caldecott Medal for the most distinguished American children's picture book for *The Glorious Flight: Across the Channel with Louis Blériot, July 25, 1909* (Viking). The awards were announced by the Association for Library Service to Children at the ALA Midwinter Meeting in Washington, D.C.

Among other awards announced at Midwinter: The ALSC Mildred L. Batchelder Award for publishing an outstanding children's book from abroad in translation was given to Viking Press for *Ronia, The Robber's Daughter* by Astrid Lindgren.

The Coretta Scott King Awards, given to a black author and illustrator by the Social Responsibilities Round Table to commemorate the life and works of Martin Luther King, Jr., went to Lucille Clifton, author of *Everett Anderson's Goodbye* (Holt), and Pat Cummings, illustrator of *My Mama Needs Me* (Lathrop, Lee & Shepard).

Cecil P. Beach, director of the Broward County Division of Libraries in Fort Lauderdale, Fla., received the Allie Beth Martin Award from the Public Library Association. The award, consisting of a citation and $2,000, is funded by the Baker and Taylor Co.

The North Carolina Association of School Librarians won a $1,000 Grolier National Library Week Grant to sponsor the first annual North Carolina School Library Media Day during National Library Week 1984. This is the first time the annual award, funded by the Grolier Educational Corp. and selected by ALA's NLW Committee, has been awarded to a state school librarians association.

Newbery Medal winner Beverly Cleary, left, and Caldecott Medal winners Alice and Martin Provensen.

3M/JMRT Professional Development Grants were given to: Diane Bisom, ORION User Services Librarian at UCLA; Dominique Coulombe, catalog librarian at Brown University; and James Mouw, acquisitions librarian at the University of Illinois at Chicago. The grants, sponsored by 3M's Safety and Security Systems Division, are presented by the Junior Members Round Table to help new librarians finance attendance at ALA annual conferences.

Judge reverses jury decision in Mississippi sex bias case; recognizes ALA-MLS degree

U.S. Magistrate Charles M. Powers has overruled the jury decision in the Glenda Merwine case against Mississippi State University (*AL*, Dec,. p. 744). The jury had ordered MSU Library Director George Lewis to pay Merwine $10,000 in damages for discriminating against her sex by hiring a male librarian.

Powers also ruled on Merwine's parallel claim that MSU violated the Civil Rights Act Title VII by requiring an ALA-accredited MLS for the library job. Merwine declared the degree had a disparate impact on women.

In his Dec. 29 memorandum decision, Powers wrote that Merwine, who has a master's in education, could be considered subjectively qualified for the job, but did not meet the established objective minimum educational requirement.

"The evidence clearly establishes that the [ALA-accredited MLS] degree is a standard widely recognized by academic and professional employers, including the United States Supreme Court," he declared.

Merwine's claim that the requirement has a disparate impact on women "flies in the face of logic and common sense," Powers said. He dismissed her statistical assumptions as illogical and unwarranted.

The court concluded that Merwine had failed to establish a prima facie case of discrimination in hiring on the basis of sex.

Librarians cheer court ruling

A local reporter informed Lewis of the decision. "It was the best Christmas present I ever received," he told *AL*.

Dean Edward Holley of the University of North Carolina/Chapel Hill library school had testified for MSU during the trial. He told Council at the ALA Midwinter Meeting that he was delighted with the decision.

"In every instance, the judge ruled with Mississippi State University," Holley said. "Many of us feel the MLS requirement is appropriate in the light of our library education policy statement. I encourage ALA to hold fast to that point of view."

Librarian wins eight-year fight for academic rights

The West Virginia Supreme Court of Appeals has upheld $26,400 in damages awarded to a librarian who lost her job after she complained about a design for a new library building.

E. Jean Orr was also ordered reinstated as director of the West Virginia Northern Community College library in Wheeling.

The case began in fall 1975, when Orr was shown plans to convert an old B&O Railroad station into a campus building housing administrative offices, classrooms, and a learning resource center. Orr had a number of objections to the design, including security problems caused by the existence of at least five entrances to the library, and the fact that students would have to walk through the library stacks to reach their classrooms.

Orr told *AL* she made these objections to her immediate superior, Academic Affairs Dean Gregory Adkins, who said he would pass them along to Daniel Crowder, president of the college. Orr said she wanted to raise the issue with the Learning Resources Faculty Committee, but was told that the plans had to be kept secret.

When the plans were later revealed and faculty expressed dissatisfaction with the design, Crowder stated that Orr had missed her chance to offer suggestions, and Adkins called her lax for not having done so.

Eventually the Learning Resources committee developed a floor plan incorporating Orr's recommendations, which was accepted by the administration with no changes.

After she complained about the plans, Orr was not given her tenure review or other faculty evaluations, even though her position had faculty status. Adkins also demoted her to reference librarian and took over as director of the library. At that time, no grievance procedure existed at the college. In June 1976

Orr received a letter stating that her contract would not be renewed for the following year.

Orr lost an appeal to the state Board of Regents, but pursued the matter through the courts even after she obtained a new position as director of the Miracle Valley Regional Library System in Moundsville in December 1978. In August 1980 a Kanawha County Circuit Court jury found that the administrators had acted maliciously in firing Orr, ordered her reinstated to her job, and awarded her $23,760 in personal damages from Adkins and $2,640 from Crowder.

The state Supreme Court heard an appeal from Adkins and Crowder in September 1982 and ruled in favor of the administrators. However, in an unusual ruling the court allowed Orr to make another appeal in September 1983.

On Dec. 21 of last year, Orr learned that the state Supreme Court had upheld the jury's original verdict when members of her staff showed her a newspaper article announcing her victory. The court ruled that Orr's right to due process had not been violated, but upheld her academic freedom argument.

"I think the ruling helps to clarify what a librarian's academic rights are," Orr told *AL*. "We think of academic rights for teachers in regard to what they teach. For a librarian this could be in the selection of books, but it also says that you have a right to free speech."

"It's been a long, hard struggle," Orr concluded, "but I think it's worth it to know that your feelings have been supported." □

QUICK-BIBS: New & recent books on a timely topic

Bill Ott, compiler

THE MOVIES

Soon Hollywood will be performing its annual rite of self-congratulation—the Academy Awards. As a warm-up for the familiar Oscar hoopla, this edition of Quick-Bibs identifies a handful of memorable movie books. Unlike the Academy, however, we have made no effort to distinguish levels of accomplishment. Our selections—as someone is sure to say about their fellow actors on Oscar night—are all good in their own ways. The books included are either 1983 or spring 1984 imprints. And now, the envelope please:

Cagin, Seth and Dray, Philip. *Hollywood Films of the Seventies.* Harper, 1984, $9.95. (0-06-091117-4)

Too often, film critics seem determined to prove they can write as pompously as their literary brethren; but this perceptive yet commonsensical analysis of 1970s movies (*The Godfather, Chinatown,* et al.) is a notable exception.

Goldman, William. *Adventures in the Screen Trade: A Personal View of Hollywood and Screenwriting.* Warner, 1983, $17.50. (0-446-51273-7, 82-77602)

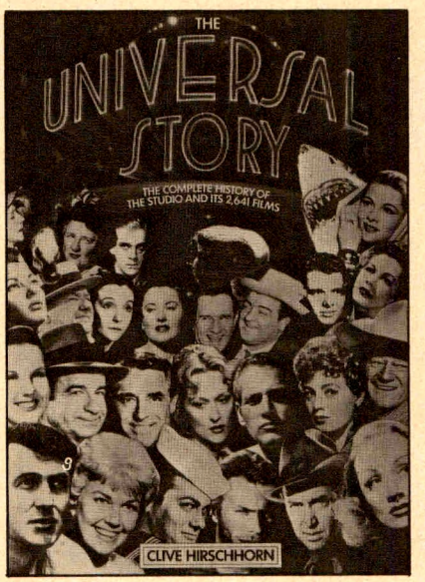
Veteran novelist/screenwriter Goldman explains in jaunty, entertaining prose the tangled web of moviemaking—from producers "taking meetings" to writers squabbling over percentages and credits.

Hirshhorn, Clive. *The Universal Story.* Crown, 1983, $35. (0-517-55001-6, 83-7840)

A sumptuous coffee-table survey of Universal Studios' 2,641 feature films (through 1982). Hundreds of evocative black-and-white stills will have "midnight-movie" buffs reminiscing for hours.

Kael, Pauline. *Taking It All In.* Holt, 1984, $24.50. (0-03-069362-4, 83-8445)

This collection, Kael's seventh, features pieces written from June 1980 to May 1983 and, like its predecessors, affirms the intrepid *New Yorker* critic's ability to write resonantly and intelligently about all aspects of filmmaking.



A sumptuous survey from Crown.

Medved, Michael and Medved, Harry. *The Hollywood Hall of Shame: The Most Expensive Flops in Movie History.* Perigee, 1984, $8.95. (0-399-50714-0)

An album of Hollywood's all-time losers—not necessarily the worst movies, but those that lost the most money. The Medveds air all the dirty linen behind the production of these films, including a play-by-play of the Taylor-Burton romance on the set of *Cleopatra*.

Morley, Sheridan. *Tales from the Hollywood Raj: The British, the Movies, and Tinseltown.* Viking, 1984, $17.95. (0-670-69192-3)

This lively anecdotal history looks at the colonization of Hollywood by such British film stars as Charlie Chaplin, Basil Rathbone, and David Niven. It hasn't been easy, Morley wryly notes, for the English to survive so far away from civilization.

Schickel, Richard. *Cary Grant: A Celebration.* Little, 1983, $19.95. (0-316-77308-5, 83-81440)

Hollywood's symbol of imperturbable charm turned 80 recently, and this delightful pictorial essay celebrates the enduring appeal of his 72 films. Grace Kelly said it best: "Everyone grows older except Cary Grant."

Selznick, Irene Mayer. *A Private View.* Knopf, 1983, $16.95. (0-394-40192-1, 82-49192)

Although this autobiography of the daughter of Louis B. Mayer and the wife of David O. Selznick deals as much with theater as with films, its wealth of juicy anecdotes about Brando, Olivier, et al. will keep movie fans turning the pages.

Sennett, Ted. *Great Hollywood Movies.* Abrams, 1983, $49.50. (0-81909-0980-4, 83-2683)

From the full-color close-up of Rhett and Scarlett on the cover through the double-page spread of General Patton in full cry, this lavish, oversize tribute to Hollywood's crown jewels is the luxury movie book of the season.

Weldon, Michael and others. *The Psychotronic Encyclopedia of Film.* Ballantine, 1983, $14.95. (0-345-50381-4, 82-90841)

Horror flicks, low-budget sci-fi, beach party epics, exploitation films of every stripe—this encyclopedia of very strange movies has no redeeming social value whatsoever. On the other hand, you never know when someone might ask for a plot summary of *Blood Orgy of the She-Devils* (by the director of *The Astro-Zombies*). □

action exchange

Loan policies for circulating microcomputers

Q. What libraries have a loan policy for circulating microcomputers to patrons? ***Ilene Rockman, Reference Librarian, California Polytechnic State University Library, San Luis Obispo, CA 93407*** **(*AL*, Oct., p. 590).**

A. Dansville Public Library circulates a Commodore VIC 20 to patrons who must show a driver's license and deposit a returnable $20. We offer a printed information sheet and a release form. The computer and a manual are circulated together in a sturdy box, but no software is available. Circulation is now for only one week because of the high interest. As a pattern of repeaters develops, we will probably institute a two-week loan period. *Terri Canuti, Director, Dansville Public Library, 200 Main St., Dansville, NY 14437.*

A. Our Timex Sinclair 1000 computers circulate for one week, with an overdue fine of $1 a day. Patrons are asked to report any malfunctions, and they are responsible for repair or replacement costs if the equipment is lost or damaged through abuse or negligence. Because of this financial responsibility, patrons under 14 must have the signature of a parent or guardian to check out a computer. *Nancy Brown, Literature and Audiovisual Services Librarian, Downers Grove Public Library, 1050 Curtiss, Downers Grove, IL 60515.*

A. We lend four VIC 20s for two-week periods with a $25 cash deposit. $10 is the user fee, and $15 is refunded if the computer is returned on time with all items included and all parts in good working order.

The borrower must be 21 or older, provide two IDs plus a library card, and sign a contract agreeing to pay for damage or loss. The overdue charge is $10 the first day and $5 for each additional day. The loan package includes the computer and cassette player, manuals, a sheet on how to hook the computer to the TV, and four or five programs, including games and business, home, and word processing applications.

We've had some problems with people who resist the $10 fee, forget to bring their money or IDs, or are late in picking up the computers, but most patron comments are favorable. I'll be happy to send a copy of our procedures, contract, evaluation form, etc., to anyone who is interested. *Sue McCann, Assistant Director, Portsmouth Public Library, 8 Islington St., Portsmouth, NH 03801.*

Q. Have any reference departments installed bakery-style "take-a-number" machines for patrons? ***Clare Beck, Government Documents Librarian, Eastern Michigan University Library, Ypsilanti, MI 48197*** **(*AL*, Sept. p. 512).**

A. Although the "take-a-number" system is used in a wide variety of other establishments, I've never heard of its use in a library. The system is fair and certainly worth consideration by librarians trying to serve a large number of people effectively under hectic conditions.

Librarians might also look into the method used by my barbershop: Two chairs serve people first who have made appointments and two others are available for drop-in customers who wait their turns.

Other approaches to effective service should also be considered: Do the library's signage, layout, and displays facilitate the handling of directional transactions and frequently asked reference questions? Does the library publicity encourage people to seek reference service at off-hours? *Andrew M. Hansen, Executive Director, Reference and Adult Services Division, ALA Headquarters.*

Q. What libraries have participated in their city's sister city program? What successes and problems did they have? ***Martha R. Ruff, Edmondson Ave. Branch, Enoch Pratt Free Library, 400 Cathedral St., Baltimore, MD 21201*** **(*AL*, Sept., p. 512).**

A. Last summer the Evansville-Vanderburgh County Library established a "sister city-library" relationship with the Stadtbibliothek of Osnabrück in Lower Saxony, West Germany. Our initial exchange of letters contained basic information about the two systems, some pertinent statistics, and an expressed desire to continue exchanging information.

The only problem is the language barrier, with translators required on both sides of the Atlantic. A cooperative university professor helps out on this side. *Margaret J. Kyle, Assistant Director, Evansville-Vanderburgh County Public Library, 22 S.E. Fifth St., Evansville, IN 47708.*

Q. What libraries require or request patrons' social security numbers to register? ***Robert Kinchen, Director, Onondaga County Public Library, 335 Montgomery St., Syracuse, NY 13202*** **(*AL*, July/Aug., p. 448).**

A. The Niles (Mich.) Community Library requires a social security number on the library application form. The SS number is one of the few constants and is used for identification or clarification when questions of responsibility arise (fines, damages, overdues). Sometimes patrons don't notify us when they change names, and there are confusing junior-senior names and common combinations like Henry Smith.

Few people have complained. We assure everyone that our files are private and we never give out information from application forms. *Anne Frese, Head Librarian, Niles Community Library, 620 E. Main St., Niles, MI 49120.*

Over to you

1. Have any public libraries developed software for an IBM 5110 Model 3 computer or purchased programs for it? What experiences have you had? (Fla.)

2. What academic libraries have tested students for library competency? What tests were used and what were students' reactions and suggestions to improve the tests? (Wis.)

Administrative tasks for directors only

BALLARD DID IT AGAIN (Dec., 734–36). He takes a few valid observations (such as, an administrator doesn't have to revise most of the work of competent professionals) and derives unwarranted conclusions from them (such as, an administrator should be out on the floor instead of in his/her office). Ballard also makes a questionable distinction between manager and administrator, which he gets from Peter Drucker.

As I see it, the library director of a medium or large-sized library is not getting paid good money to check out books, do retrospective cataloging, sit at the reference desk, etc. He/she should be performing the following functions:

- Planning—How is my library going to look next year? Five years from now?
- Public information—Taxpayers need to know what's happening before they will support you.
- Budgeting—A more time-consuming task than the week or two often allotted to it.
- Personnel—Is staff motivated? Does staff know what it is supposed to do? Are goals and objectives backed up by specific action plans which can be monitored? Does it know where it stands via performance appraisals and the like?
- Public relations and funding—Are various potential funding sources being tapped? Is the Council or Board of Finance, or Mayor or Selectman truly on the library's side, and if not, what can be done about it?

There are plenty of other administrative tasks to keep him or her busy if the above doesn't. Is the building in good shape (attractive, clean, inviting)? Are policies clear, written up, sensible? Are there special "headaches" which need to be taken care of? Are new services needed? Should old ones be evaluated?

I suspect the reason some directors are not decently paid is because instead of tackling these difficult questions with care and yes, love, they are spending their time performing the kind of tasks which Ballard is advocating!

JOSEPH A. RUEF, Windsor (Conn.) Public Library

New director praises Ballard style

AS A NEW DIRECTOR OF A SMALL public library, I found Thomas H. Ballard's "Delegating Away the Peter Principle" (Dec., p.734–36) good food for thought.

One of the more significant advantages of my job is that I am gaining administrative experience in librarianship as well as maintaining and further developing my professional and public service skills. As Ballard points out, a small library has no choice. Ballard has proposed an effective administrative style to the library director that will benefit both the individual and the organization he/she serves.

GWENN NEVILLE, Mt. Zion, (Ill.) Township Library

Actual publisher clarified

AS DIRECTOR OF THE PROJECT THAT resulted in the rehabilitation, preservation, and publication of the 800-volume *Dictionary Catalog of The Research Libraries of the New York Public Library, 1911–1971*, I appreciated seeing the news item "Rebirth of 9.5 million beat-up cards" in the November issue (p.651) announcing the completion of this project.

I do not know the source of your information, but some correction perhaps ought to be made. The statement that the project "claimed to be the most massive bibliographic publishing venture ever" seems to be attributed to me. Certainly the project was one of the most massive projects of its kind ever undertaken, but this extravagant wording is not mine. Then, there are two references to G.K. Hall and Co. of Boston as publisher of the catalog. As the imprint on the title page of each volume indicates, the publisher of the catalog was the New York Public Library, Astor, Lenox and Tilden Foundations. The imprint also carries the name of G. K. Hall and Co. as printer and distributor.

JAMES W. HENDERSON, ALA member, New York, N.Y.

ALA straddles fence

THE OFFICE FOR LIBRARY PERSONnel Resources statement (Dec., p. 743) helps to explain but certainly not to justify ALA's silence on the Merwine case in particular and professional degree requirements in general. At some point ALA will have to get off the fence it has been straddling, and come out first in favor of quality assurance in education and then an insistence on that achievement. If it fails to take such a stance as other professional societies have done, ALA could become rapidly irrelevant to the process of determining what it takes to be a librarian.

What I find most disturbing in the OLPR statement is the suggestion, quoting Eleanor Holmes Norton at the 1982 ALA Annual Conference, that there is a need to reconcile high professional standards with those of equality. I see no such conflict, and I believe that to argue there is one is to argue that some groups need special ground rules because they can't meet regular ground rules. That smacks of racism and sexism, and I don't think we can accept either. What is needed for minority candidates seeking professional status is the chance to succeed. If we argue that the accredited MLS is the most direct route to professional success, then what we need to provide is the opportunity to achieve that MLS.

Libraries which desire to advance worthy minority candidates should provide these individuals the opportunity, through a range of options from release time to subsidized tuition, to obtain the educational experiences which we deem appropriate. I cannot evade the feeling that some institutions prefer to waive requirements because that course is more attractive to the candidate, and faster and cheaper for the library.

The reliance on job-relatedness as an exclusive determinant of needed skills may work for certain narrowly defined tasks, but it has little relevance if there is a need to measure conceptual understanding—the very thing almost never taught on the job. It is sad to note that at the very time when educators are being applauded for insisting on greater educational rigor for those who seek to teach, OLPR appears to be participating in the search for loopholes.

It is, of course, true that ultimately the determination of educational qualifications becomes a legal issue, but I find it unthinkable that we have not insisted on both our right and obligation to advise both employers and judges in the areas of our own expertise.

HERBERT S. WHITE, ALA member, Indiana University library school, Bloomington

ALA's role positive and active

"ALA, THE MLS, AND PROFESSIONal Employment" (Dec., p. 743) was not intended to explain why ALA did not testify in the Merwine vs. Mississippi State University case, *only* to illuminate employee selection considerations in general. The Merwine case (July/Aug., p. 442, 444; and this issue, p. 72) is but one of the circumstances that is intensifying the discussions involving the use of the MLS as a hiring requirement.

The quotation from Eleanor Holmes Norton was also not intended to imply that some groups need special ground rules. We agree with Herb White that the profession needs to assist worthy minority candidates in achieving success rather than waive requirements for those who do not meet the minimum qualifications.

ALA is not now, nor will it be, irrelevant to the process of determining what it takes to be a librarian. Council Document No. 10, "ALA, the MLS and Professional Employment," presented at the Midwinter Meeting in January by Keith M. Cottam for OLPR, points out ALA's positive and active role in the process of accreditation and support of

the MLS. It also elaborates further on specific steps employers can take to determine real job requirements and applicant qualifications. A copy of this document can be obtained by sending a no. 10 SASE to OLPR/ALA, 50 E. Huron St., Chicago, IL 60611.

MARGARET MYERS, ALA member, Office for Library Personnel Resources

Filing rules defy numerical order

WHENEVER THE AMERICAN LIbrary Association publishes a book of rules, these rules tend to become the standard in the library world. That is why it is important to make such rules as nonequivocal as possible.

A recent book of this nature is *ALA Filing Rules* of 1980 *(ALAFR)*.

The problem is that *ALAFR*, instead of applying one rule to all numeric strings, allows for two different rules. A string such as 0.25, for example, is filed before 1; but the string 1/4, although equivalent in numerical value, is filed between 1 and 2. In fact, *ALAFR* would have us file

.25 liter
1 o'clock
1/4 liter
2 phase flow

and call the result "numerical order."

Since this order conflicts with what the rest of the world considers numerical, the ALA ought to publish a rule change correcting the conflict. Or else explain publicly that the questionable arrangement of numbers resulting from the application of *ALAFR* was intended.

HERBERT HOFFMAN, Santa Ana (Calif.) College

Factious fractions not seen yet

Ed. note: AL editors shared Herbert Hoffman's letter with William A. Gosling, who was president of the Resources and Technical Services Division when the ALA Filing Rules *were published. His response follows.*

DUKE UNIVERSITY LIBRARY USES these rules in their catalogs and finds them easy to apply. They were designed to file as a computer files, based on characters and spaces that are present with no interpretation or intellectual reorganization. Perhaps this is why they may be causing some confusion in Mr. Hoffman's library.

We have over 7,000 numerical cards filed in our public catalog, but have yet to encounter the fractional numbering in question.

We have encountered no problems with using these rules; in fact the departmental librarians have refiled their entire catalogs by the 1980 *ALA Filing Rules*. We have also refiled our serials catalog and serials microfiche records by this new system. It is the system we anticipate using in our online catalog as well, so it is helping to educate the public to the structure that will be encountered in the computerized catalog. Thus far, user acceptance is favorable and sometimes enthusiastic.

One solution for Mr. Hoffman may be to adopt a local rule-exception for numerals, arranging them in the order which he feels would be most understandable to his patrons. This would be parallel to the numerous rule interpretations that libraries have adopted for the application of *AACR2*. While such rules are considered national standards, local systems do allow for these local practices.

I hope this information may enable Mr. Hoffman to handle locally the problem which he perceives with these rules. From our experience, we see no need to change the rules as published.

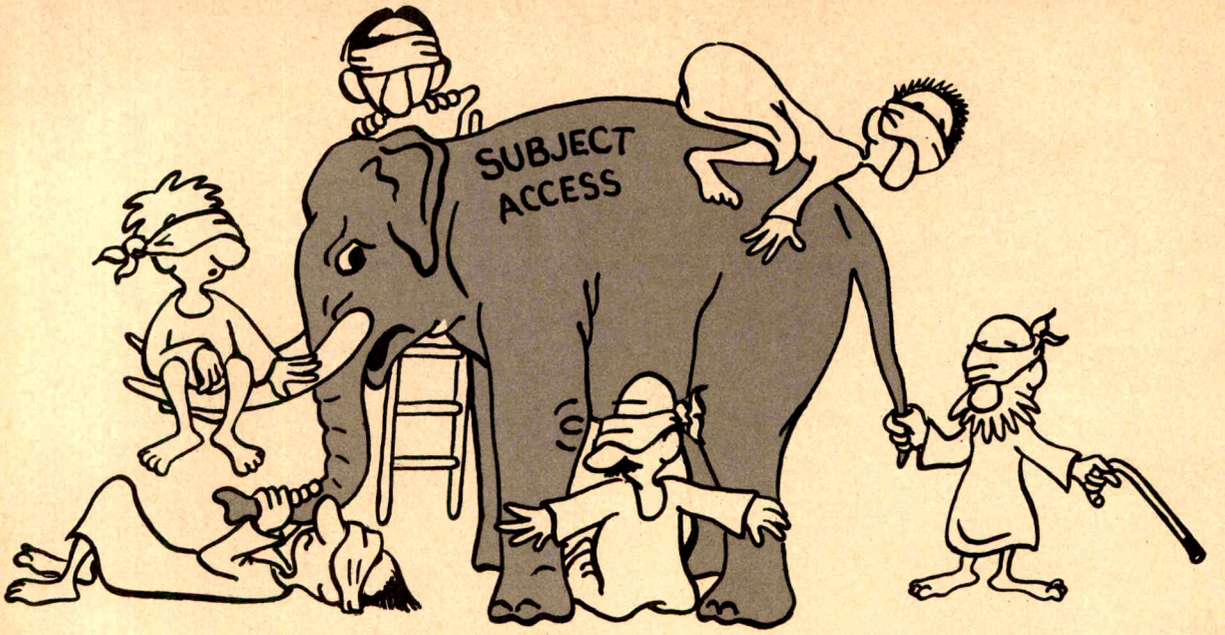
American Libraries' *first continuing education course:*



Bion Smalley

A fable of mixed perceptions illustrates the challenge before us.

MODERN SUBJECT ACCESS in the Online Age

by Pauline Atherton Cochrane

Editor's note. Providing subject access to information is one of the most important professional services of librarians; yet, it has been overshadowed in recent years by AACR2, MARC, and other developments in the bibliographic organization of information resources. Subject access deserves more attention, especially now that results are pouring in from studies of online catalog use in libraries.

We learn from these studies that a great majority of online catalog users—in all types of libraries—are doing subject searching; but often they cannot find related subject terms and cannot easily reduce or increase their search results.

To help professionals understand the present state of subject access and identify and address its problems—especially in the online environment—*American Libraries* asked Pauline Cochrane, professor in the School of Information Studies at Syracuse University and noted author, researcher, and teacher in the area of subject access, to develop a continuing-education series, or "course," on the topic.

In last month's *AL*, Prof. Cochrane offered these objectives:

"Given the impetus to change a library's catalog from card to online, and given the recent findings that most users of online catalogs are searching by subject, this course is designed to help any and all professionals: 1) understand the effects that online systems may have on traditional processes and services in libraries; 2) prepare to aid in the design, use, and teaching of online public-access information services; 3) understand and influence some of the political and professional issues surrounding these services; and 4) grasp the range of opinions and theories about subject access."

In this first of five course installments, Cochrane describes various perceptions of subject access and how they affect our mission. —*S.E.B*

* * *

ATTEMPTING TO DEFINE "SUBJECT ACCESS" brings to mind the well-known fable of the blind men and the elephant. In the fable, each blind man touches a different part of the elephant and comes away with a limited notion of it. Only when the men compare and discuss their perceptions do they begin to understand the "whole animal."

So it is with subject access. At a 1978 conference on the topic[1] it was obvious that several participants who offered definitions of subject access (see box at bottom of p. 81) were not talking about the same parts of the "animal." Each definition may have presented only a portion of the complex set of operations that comprise subject access.

In this five-part continuing education course on modern subject access, we will attempt to keep the whole animal in view. However, the complexity and changing boundaries of the topic make it difficult to begin with a comprehensive approach. It may be more helpful to present several points of view, open discussion, and summarize the results. Therefore, the order of presentation in the course will be: focus on different views of subject access, discussion, illustration, background readings, and summary.

FOCUS: Different views of subject access

1. The systems analyst's view

Those who view subject access in terms of end products (such as catalogs or indexes) or inputs (such as documents or other items containing information) usually focus on cataloging or indexing as primary system operations. Such a view presents searching as something the system does for users, as we see in Figure 1 (right) from F. Wilfrid Lancaster's book on information retrieval.[2] In this view, catalogers, indexers, and systems analysts can pinpoint areas needing improvement in the system they control.

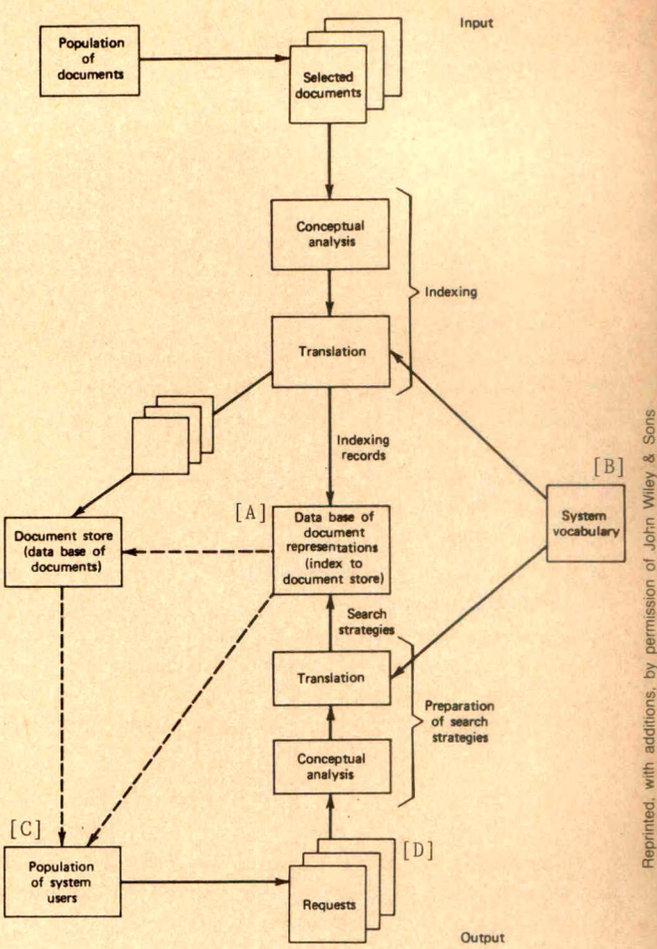
The systems analyst's view of subject access considers as very important such factors as the depth of indexing (the number of subject headings assigned to a document); the size of the document collection; the nature of the vocabulary required to access the system (subject authority files such as the *Library of Congress List of Subject Headings* or the *ERIC Thesaurus*); and the rules and procedures required for indexing and searching a particular database.

The systems analyst's view dominates writing on subject access in library journals aimed at catalogers, indexers, systems analysts, and other technical services personnel, e.g., *Library Resources & Technical Services*, *The Indexer*, and *Information Technology and Libraries*. However, this view ignores complex issues involved in the interaction of the user with the system when an intermediary is not involved in the subject access process.

2. The user-oriented view

Those who focus on the user of the system in discussing subject access emphasize characteristics of human information processing, the user's response to stimuli provided by the index or catalog, search results, the relationship between user and machine (user-machine interface), and often the role of the librarian intermediary in subject searching.

(Continued on p. 82.)



Reprinted, with additions, by permission of John Wiley & Sons

Figure 1. A systems analyst's view of subject access

The production of the *database* [A] is the central focus in this view. *Indexing* and *searching* are portrayed as mirror-image operations controlled by the *system vocabulary* [B]. The users [C] are served, but are viewed as outside the system, only submitting requests to [D] and receiving output from the system.

Some definitions of subject access from a 1978 conference

1. The *ability to find out about* pink elephants, magenta pachyderms, or light red mammoths, i.e., to *find information*, or *references to information*, by topic, at varying levels of specificity, no matter what the form of the material: book, article, conference paper, patent, report, tables, drawings, photographs, bibliographies, etc.

2. *Access to topical information/material by means of* descriptors or numerical or letter/number notations in an index or catalog.

3. *Access to a document by means of its actual content* as contrasted to access by means of its title, author names, and routine identifying citations. Subject content is usually referenced within the document title but often in a very narrow sense. Subject access provides many additional routes to the document not available via the title alone. Subject access places the content of a given document *in a relationship to other documents* with the same or similar content. Unlike a formal title, subject access is amenable to vocabulary control. Such control results in more ordered, more efficient, and less costly searching.

4. Subject access means the *use of words, phrases, or symbols to represent the intellectual content of recorded knowledge for purposes of organization and retrieval.*

5. *The means by which any given collection* of information *may be searched by subject,* topic, theme, key word(s), or element within a bibliographic entry other than author, title, etc.

6. The *approaches to subject matter in a collection.* The approach may be *systematic* (as in the classified arrangement of books on a library shelf) or *topical* (as in the subject headings in the catalog) *or* the approach may be *natural* or *free* (as in the title words or words in an abstract or subject description if they are used for matching query words).

Some terms used in discussing subject access

controlled-vocabulary indexing system—A system in which the indexer, in assigning subject terms to works, is limited to a list of terms called the index vocabulary.

free-text retrieval system—An online system that stores and searches the complete text of documents. Logical combinations of words appearing in the text can be used in subject searches.

index—a systematic guide to the contents of a document or group of documents consisting of an ordered arrangement of terms and symbols that allow access to the contents of the documents.

input—The data to be entered or transferred into a data processing or computer system for processing.

keyword—A significant word in the abstract, title, or text of a work that is used for retrieval of information from the document by subject.

output—The results of processing done by a data processing or computer system. A printer terminal is one type of output device.

subject authority file—A set of records indicating the authorized forms of, and references to and from, terms used as subject headings in a particular set of bibliographic records.

systems analysis—Process of studying an activity to determine its goals and objectives and the best way to accomplish them.

—From the *ALA Glossary of Library and Information Science,* ALA, 1983.

(Continued from p. 81)

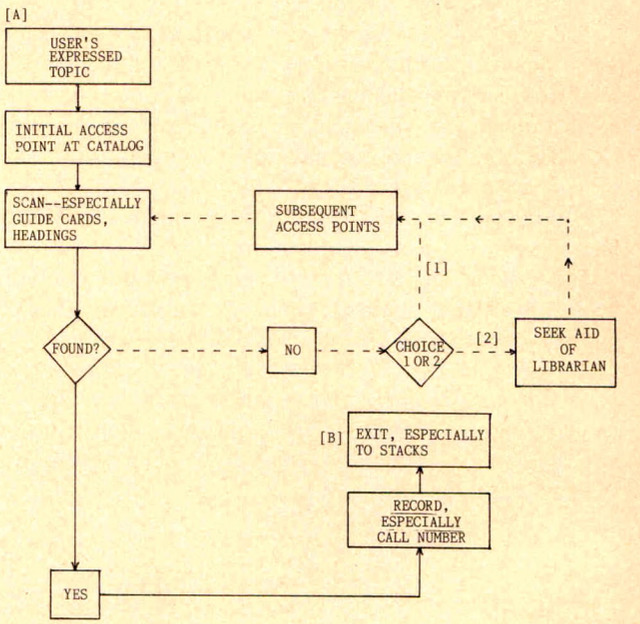
The user-oriented view tends to overlook the influence of product design on subject searching, i.e., the possible interaction between the database, the vocabulary required to access the database, and the user's question.

The "world view" of this group is never neat and tidy, is barely chartable, and usually ignores such factors as the complexity of the system, the format of the database, and the nature of materials in the database. The group focuses on what the searcher does before, during, and after a search. Figure 2 is a model of the subject access process with the focus on the user from a recent report by Karen Markey.[3] Models like this are often found in such journals as *RQ, Online,* and the *Journal of the American Society for Information Science*. Models vary greatly.

3. A consolidation

In this course, we will consider all views that define subject access as a process of finding information through a formal information tool such as a catalog or index, regardless of the technology used. We will emphasize the changes that occur in the subject access process as users move from card catalogs and printed indexes to online catalogs and bibliographic retrieval systems, where subject access is possible through controlled vocabulary as well as "free text" keyword searching and users can access a single database or several databases at one time, with or without the help of intermediaries.

To illustrate this complex subject access environment, I have modified a chart from Charles Hildreth's recent book on online public access catalogs.[4] In Figure 3, as in Figure 2, the focus is the user, but the number of background operations that provide subject access has increased. The concurrent production of catalogs and indexes, abstracts and online databases, in



Adapted with permission of OCLC, Inc. from *The Process of Subject Searching in the*

Figure 2. A user-oriented view of subject access

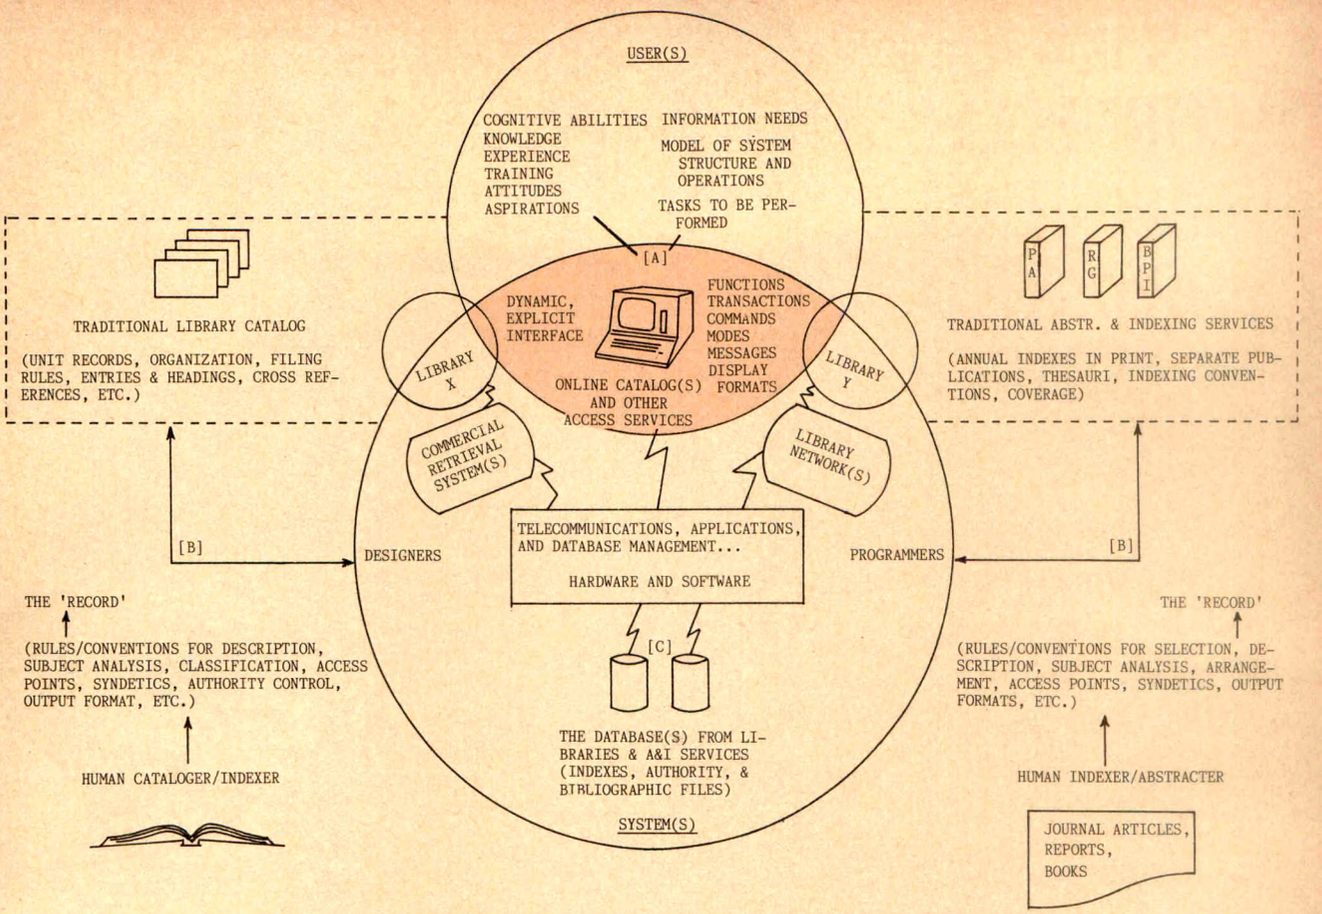
This view shows that subject access is not the straightforward operation depicted in Figure 1. Between *"request"* [A] and *"exit"* [B], the user must make decisions to scan, refine, seek aid, and choose additional access points. Even if there is a match between the user's initial access point and terms in the catalog, there may be many repetitions of the scanning process until a certain (undefined) number of information items are found. Most of these *user* operations had been outside the systems view until online catalogs allowed perusal of user/system transaction logs, and librarian/intermediaries began conducting online searches for requestors.

Subject access in the online environment

Many researchers have already examined and written about online catalogs and their development. However, online subject access has not received the attention it deserves in light of results of online catalog use studies. These studies show that subject searching in the online catalog is the most frequent user activity and the area of most user problems.

By discussing online subject access in a continuing education context, we hope to address problems users have with online subject access. We also hope to make the library community aware of possible improvements to online subject searching by covering the following topics in this course:

1. Subject access before and after online systems
2. Catalog features that influence subject access, with some discussion of online information retrieval
3. Catalog redesign for improved subject access; the use of authority files as aids to the searcher; the role of individual online catalog designers, the Library of Congress, Committee Z39 of the American National Standards Institute, vendors, researchers, etc. in catalog design
4. New technologies and their impact on subject access; the variety of users and uses of online systems
5. Issues, trends, proposals—converging or diverging goals for integrated library systems and online subject access



Adapted with permission of OCLC, Inc. from *Online Public Access Catalogs: The User Interface* by Charles R. Hildreth.

Figure 3. The environment in which subject access takes place today

The focus of this figure is the user/system interface at the online catalog(s) [A]. In the background are the traditional operations of cataloging and indexing, the creation of "records" [B] which are put into traditional catalogs and printed indexes, as well as into the databases [C] of computer-based systems. All of these parts make up the subject access apparatus we use today. The challenge before us is to put the parts together so as to make the apparatus easier to use.

networks and in individual libraries, is the complexity of operations that is modern subject access. These components are interrelated, thus changes in any one may affect many others.

It is my hope that the consolidated view will point up the consequences of the lack of standardization in loading cataloging records into various online catalogs, of maintaining subject authority files as if they were used only in card catalogs or printed indexes, and of failing to standardize user commands for online catalogs. The lack of standard user commands may be endangering the entire subject access process, because users attempting subject access may use different online catalogs at different times.

These same users may switch from a printed index to an online index, with or without a librarian's help. In their attempt to find information, to search a collection, to relate items retrieved in various searches, they are engaged in subject access as we will view it in this course.

The spectrum of activities represented in Figure 3 deserves our attention now. Figure 3 shows subject access in transition, with users of information services as the focus, rather than the cataloging record, the authority file, or the item of information. I like to think that Figure 3 represents the view of the seventh man in the tale of the six blind men and the elephant—someone who can see the whole and place the parts in perspective.

* * *

This first part of our course reflects my own approach to modern subject access,[5] but I have drawn upon the thinking of other writers in the field. In subsequent parts of the course I will cover the topics listed earlier and include other people in the discussion. I welcome your comments. □

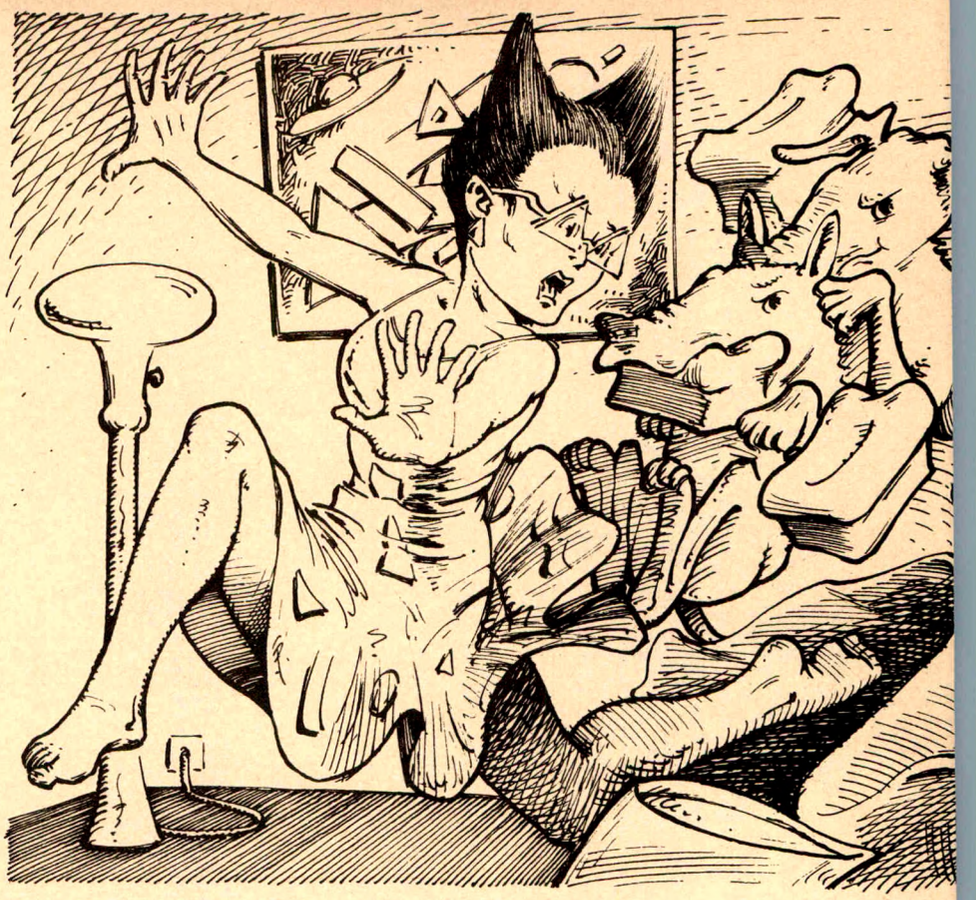
CORNELIA'S LAST INFORMATION SEARCH



she couldn't tear her eyes away from the bookscreen—could it truly be that she had caused what came to be known as . . . The Last Information Explosion?

By NORMAN STEVENS

IT WAS TRULY REMARKable, thought Cornelia Henry, to note how far society had come in the past 200 years in dealing with information. She was thinking about the speech that she, as president of the Universal Libinfosci Association, was scheduled to make as her inaugural address. That address would mark the 200th anniversary of the Association, which traced its origins back to the founding of the American Library Association in 1876.

Her theme, she had long since decided, should indicate that the elusive goal of making every piece of information ever generated instantaneously available had at last been achieved. That had been set as a long-term objective at the White House Conference on Information held in 2020, shortly after the realization of the paperless information society. Many more difficulties had been encountered than anyone had foreseen in those halcyon days, but at last, with the completion of the amerinfosystem in 2075, that goal had become reality.

Her speech, Cornelia reflected, should have a homey touch, demonstrating that full and free access to every conceivable piece of information affected everyday life. She concluded that the best way to give her speech would be to state briefly how, in her own life as an ordinary citizen, total access to information impacted on a single day's routines.

As she thought back on the things she had done last Saturday, Cornelia jotted down notes on her portable telescreen. She selected four activities to demonstrate her point.

The first thing she had done that day was to sit down at her home office box to register with the local authorities the dog, tentatively named Prince, given to her earlier that week. Accessing the local authorities enabled her to do just that. It simultaneously gave her access to the Universal Dog Registry that contained information about all dogs ever registered in the United States. Deciding first to review her choice of a name, Cornelia had found herself working through a maze of information about dogs named Prince. She had spent a blissful 15 minutes manipulating the data. She had, she recalled, been on the verge of abandoning the name Prince, because of the innumerable times it had been used, when she discovered that one of her distant maternal ancestors, one Augustus Henry, had owned a dog named Prince in Boston in the late 1890s. Pleased with the association, she had retained the name and registered the dog as Prince. She marvelled at how even the most trivial information was, indeed, useful.

Next on that day Cornelia had prepared her preliminary grocery list. She was still old-fashioned enough to prefer going to the store rather than simply entering her order into her home office box and having it delivered. Still, the preliminary list was of considerable help. First, naturally, she had recalled her home products inventory file and reviewed it to see whether or not the preselected items on the preliminary list were ones she actually wanted. Next, she matched the edited list against her weekly menu file; she had to be certain the right ingredients would be available. Finally, she reviewed the files of new products, market specials, and family preferences to see what else she needed.

Entering one of the daily market specials, Sunrise Bread, Cornelia was startled to learn that when she had last purchased Sunrise Bread, two years ago on a similar special, it had been stale.

Norman Stevens is chief librarian of the University of Connecticut Library in Storrs.

Jim Flynn

She decided not to purchase that bread after all. As she worked that into her speech, Cornelia noted how total access to information, even of the most personal nature, assisted in making choices.

She had better include at least one example of how information guided the citizen in her professional life. She thought back to the Saturday she had voted, via her satellite telescreen, on questions before the ULA Executive Board. Taking, as a simple example, the question of whether or not to endorse the latest equal rights amendment, Cornelia recalled how the telescreen had given her instant access, before she voted, to all previous votes in the Association on that and similar issues going back to the late 1900s. She had spent an entertaining half hour manipulating the data before deciding to endorse the amendment—largely on the basis of how previous presidents of the Association, or at least those whom she respected, had voted.

Cornelia decided that for her last example she would deal with information and leisure. What would be more natural, given her audience, than reading? She remembered with pleasure the current bestseller she had started to read in bed that Saturday night on her portable bookscreen. *Death Comes to All* was a complex novel, but the universal literary information file had automatically provided detailed notes on all aspects of the book explaining even the most obscure references. Cornelia marvelled at how total access to information made complex works understandable to the average person and enabled authors to challenge the reader.

•

It was, Cornelia observed, the best of all possible information worlds. The goal of total access to information had been well worth waiting for. Its positive impact on everyday life could be clearly demonstrated. She and the ULA could be justly proud of the role they had played in achieving such a wonderful goal. "Total access to information has liberated our minds," she thought aloud. Yes, that statement would be an excellent opening for her speech.

Pleased with the progress she had made in preparing her speech, Cornelia indicated to the telescreen that she wanted her notes stored, then set the device aside. There's just time enough before lunch to finally finish reading *Death Comes to All,* she thought, and she picked up her portable bookscreen.

•

Alas, the entry of thousands of grocery lists that morning had once and for all overtaxed the capacity of the amerinfosystem's central controllers, causing what came to be known as The Last Information Explosion. The filters in those controllers, patterned after the complex mechanisms in the human brain that enable people to sort out just the information they wish to recall, had simply collapsed. The result was a massive unsorted jumble of information.

Unaware of this failure, Cornelia picked up her bookscreen and prompted it to return to the exact point in *Death Comes to All* where she had dozed off the night before. The bookscreen did so; but what followed was a nightmare.

The first word of the next sentence was, unfortunately, Prince. The information system switched her to the Universal Dog Registry and began a series of complex prompts to dogs named Prince from all parts of the United States since 1865.

It took Cornelia, even as an expert, more than 10 minutes to work her way through the information. What had been entertaining when she was mildly interested in dog names became frustrating when she was trying to read a book. She managed to return to the novel's text and complete that first sentence.

The next sentence contained a reference to an obscure twentieth-century novel, *The Sun Also Rises*. The system transferred Cornelia to the ill-fated world of Sunrise Bread, as well as to a variety of dogs named Sun, complete tables of sunrises, and other astronomical data about the sun. The history of her purchases of a loaf of Sunrise Bread, the financial status of the company, its sales record, and a vast array of other information overwhelmed her. To dispose of this nonsense took her 20 minutes.

Cornelia noted with dismay that the next sentence began with the words, "The Association . . ." She hurriedly turned off the bookscreen fearful of the terrors that lay down that path. Did anyone care about all those voting records likely to have inundated her?

•

Contemporary society ground to a halt with The Last Information Explosion. Americans found themselves flooded with information at every turn. They were unable, or unwilling, to make simple decisions, or to pursue simple pleasures, because the amerinfosystem insisted on demonstrating the most minute interrelationships of information. Every word, it seemed, conjured up a wealth of associations that had to be recalled, displayed, analyzed, and worked through.

Cornelia found herself summoned to the hastily called Fifth White House Conference on Information designed to deal with this crisis. Preparing to address the delegates, she found herself recalling the sentence she had selected as the introduction to her inaugural address: "Total access to information has liberated our minds." Now that sentence would never be delivered. Instead she found herself articulating a new information goal. How long, she speculated, would it take the distinguished libinfoscientists, who had labored so long to achieve total access to information, to achieve a new goal: freedom from information? □

On Microfilm...from Research Publications

Free 1983 backfile with your 1984 newspaper subscription.

Research Publications brings the world's news to you as reported in 27 international newspapers including the following newspapers with their 1984 subscription prices:

The Washington Post	$740.00		
The Times	640.00	Neue Zürcher Zeitung	540.00
The Sunday Times	285.00	Le Monde	400.00
Der Spiegel	140.00	Financial Times	550.00
Far Eastern Economic Review	105.00		

Free Backfile Offer. Order your 1984 newspaper subscription before March 31, 1984 and we will include the entire 1983 backfile for that newspaper at no extra charge. This offer is limited to customers who have not been subscribers for the last two years to the particular newspaper ordered. Shipping and handling charges will be added.

library life

Library staff try to concentrate on their cards, and not annual report statistics, as they play a round of gin rummy at the Tulsa-City County Library System. Pictured are, from l. to rt., Joan Richardson, head of reference; Craig Zapatos, East Regional librarian; and Susan Baird, head of circulation.

An annual report not to be discarded

Winning the deserved attention of librarians and patrons throughout the Tulsa City-County area is that library system's 82–83 annual report: a deck of playing cards.

An attractive open-book design, in red and black, decorates the back of the cards. Each face pictures a different branch or department at Central Library and reports its 1982–83 highlights or achievements. Cards also include statistics, photographs, and names of key library supporters.

Traditional card suits have been changed to depict library patrons and materials: red suits represent a film and America's library symbol, black suits show open books and records.

So far staff members have used the decks to decorate the library Christmas tree or to play cards during break. Some get special pleasure out of declaring, "Jokers wild," for Assistant Director Richard Parker, in full clown make-up, posed as the Joker.

Cathy Audley, head of public relations, reports: "We've had dozens of letters in response, including one from the president of a local company who read about our public-access computer center on one of the cards. He was so enthusiastic that he offered the library another microcomputer."

Audley told *AL* the cards were produced at a cost of $1.50 per deck and 2,000 were printed. To order, send a SASE, with 40 cents postage, to Cathy Audley, TCCLS, 400 Civic Center, Tulsa, OK 74103.

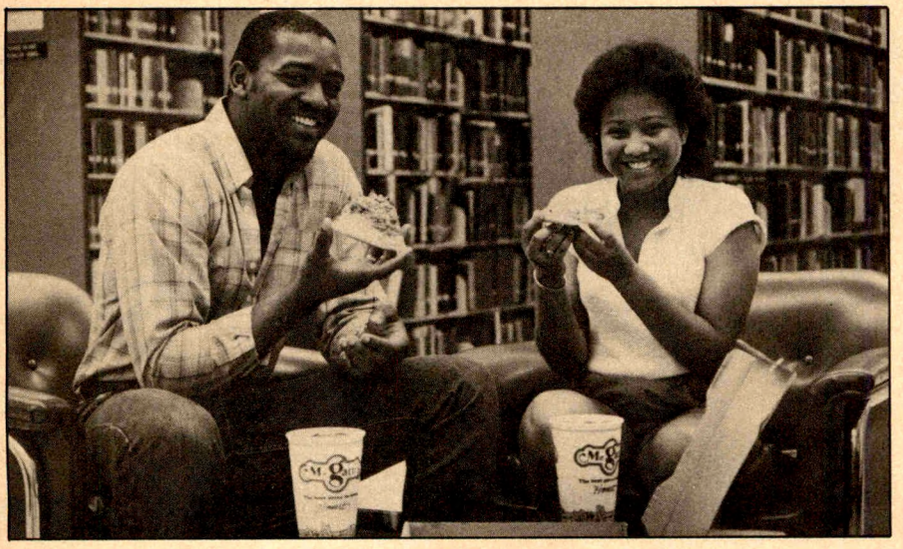
Blue Bee buzzes about books

It had a round, fuzzy, blue-striped body, stood about five feet tall, buzzed around libraries, and could only be seen by children who liked to read.

It was the Big Blue Bee, a new live mascot developed for Children's Book Week at the Bucks County Free Library in Doylestown, Pa.

"We wanted to have a tangible character, who would combine fun, creative presentations for children with an emphasis on the importance of reading," says Marianne Gilmour, children's coordinator. The Big Blue Bee has long been the symbol used for children's activities in the Bucks County Free Library branches.

The new mascot is scheduled for another round of appearances during National Library Week. Meanwhile, children have been alerted to watch for the Blue Bee in parades.



Samantha Guidry treats her date, Dennis Derouen, to a pizza and a coke that she won during a library contest at McNeese State University in Louisiana.

Pizza contest teaches students library use

Nearly 500 students at McNeese State University in Lake Charles, La., participated in a pizza give-away contest recently that helped them learn how to use the library.

Sponsored by the Friends of the Library and a local pizza restaurant, the contest required students to answer a written quiz of 10 questions about entertaining trivia and location of library materials. The contest ran from the beginning of the autumn 1983 semester until Nov. 18.

Richard Reid, Frazar Memorial Library director, commented: "Not only did the contest benefit the students, but it was also great PR for the library." The athletic department announced winners during football game halftimes. More than 50 pizzas were awarded.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries,* 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line, **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries,* 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

POSITIONS OPEN

ACADEMIC LIBRARY

Administrative services librarian. Position to be filled between May 15 and Aug. 15. Manages circulation, reserve, microforms, and shelving. Responsible for supervision of public areas of the building and space utilization, a full-time staff of 8 and 40 student assistants, and an online circulation system. Qualifications: MLS from ALA-accredited library school. An additional graduate degree is desired and is one of the expectations for tenure. This position demands a strong management and public service orientation. The incumbent must be able to work effectively with students, faculty, and the general public, and to articulate circulation policies to these groups. Desirable qualifications include supervisory experience, work in academic libraries, and knowledge of data processing. Salary and benefits: appointment range $22,000—$26,000 for 12 mos., depending on qualifications and experience. TIAA, Blue Cross—Blue Shield. **Send letter of application and resume by March 15** to: James C. Eller, Associate Dean for Library Services, **Wichita State University, #68, Wichita, KS 67208.** Finalists will be invited for expense-paid interview. Wichita State University is an affirmative-action, equal-opportunity employer.

Assistant director for public services. Northern Illinois University is seeking a qualified individual to fill the position of assistant director for public services. MLS from an accredited library school, a second master's or doctorate, and a minimum of 5 yrs. of successful professional experience of increasing responsibility in an academic or research library required. Applicants must have a record of publication and professional involvement supporting a senior-level appointment in a tenure track. Experience in supervising more than one public services area and with public relations and with computer applications in public service preferred. Applicants must demonstrate administrative ability, strong leadership qualities, and communication skills. Responsibilities include: administration of general reference service, computer reference service, circulation, reserve, interlibrary loan, bibliographic instruction, and government publications for a university library of more than 1 million volumes, serving 25,000 students and 1,200 faculty; direction of staff of 11.5 librarians and 21 support staff; consultation with administrative staff to engage in long-range planning and to establish and carry out policies and procedures for all public services. $32,000 minimum for a 12-mo. contract; Illinois retirement system; 24 vacation days. **Send resume, placement file, official transcripts, and 3 current letters of recommendation by April 1** to: Theodore F. Welch, Director, **Northern Illinois University Libraries, DeKalb, IL 60115.**

Assistant director for technical services. Northern Illinois University is seeking a qualified individual to fill the position of assistant director for technical services. MLS from an accredited library school, a second master's or doctorate, and a minimum of 5 yrs. of successful professional experience of increasing responsibility in an academic or research library required. Applicants must have a record of publication and professional involvement supporting a senior-level appointment in a tenure track. Experience in supervising more than one technical services area preferred. Experience with computer applications in technical services and collection development experience required. Applicants must demonstrate administrative ability, strong leadership qualities, interpersonal and communication skills. Responsibilities include: administration of acquisitions, cataloging, and serials for a university library of over 1 million volumes, serving 25,000 students and 1,200 faculty; direction of staff of 11 librarians and 45 support staff; consultation with administrative staff to establish and carry out policies and procedures for all technical services. $32,000 minimum for a 12-mo. contract; Illinois retirement system; 24 vacation days. **Send resume, placement file, official transcripts, and 3 current letters of recommendation by March 15** to: Theodore F. Welch, Director, **Northern Illinois University Libraries, DeKalb, IL 60115.**

Assistant humanities bibliographer. Works under humanities bibliographer in collection development with emphasis on fine arts. Participates with members of the reference department in providing reference and information services. Some evening and weekend work required. MLS from ALA-accredited school or equivalent required. Strong general humanities background, including languages, with advanced degree in fine arts highly desirable. Appointment at Librarian I or Librarian II level, depending on experience. Minimum salary $16,000. Liberal benefits including tuition exemption and 22 days' vacation. 12-mo. academic appointment. Position available immediately. **Closing date for applications Feb. 15.** Please forward resume and 3 letters of recommendation to: Kate Maniscalco, Administrative Assistant, **Tulane University Libraries, New Orleans, LA 70118.** An equal-opportunity, affirmative-action employer.

Bibliographic instruction librarian. The University of Evansville is seeking a librarian to coordinate and participate in an active bibliographic instruction program. Responsibilities include planning and developing the instruction program, presenting classroom and workshop lectures, conducting and coordinating online searches, and providing reference service (nights and weekends included). Good communication skills, the ability to work effectively with faculty and colleagues, and teaching and administrative talent are essential. A background in science and experience in online searching are highly desirable. The position requires the MLS from an ALA-accredited library school and an energetic commitment to service. The University of Evansville is an independent, coeducational, Methodist-affiliated institution located in a metropolitan area of southwestern Ind. Enrollment numbers 5,000 full- and part-time students. The library's collections total over 300,000 items. Faculty rank will be based upon qualifications. Salary is $14,000—$16,000. **The application deadline is March 31,** with the position available June 1. Send application, resume, and 3 current letters of reference to: Grady Morein, University Librarian, **POB 329, University of Evansville, Evansville, IN 47702; 812-479-2376.** The University of Evansville is an equal-opportunity, affirmative-action employer.

Cataloger. Responsibilities include: cataloging of music scores and sound recordings; original cataloging of monographs; supervision one night per week of student assistants doing retrospective conversion on OCLC. Qualifications: ALA-accredited MLS; working knowledge of OCLC, AACR2, and LC cataloging practices; academic training in music preferred; foreign language desirable. Salary $14,500 minimum depending on qualifications and experience. 12-mo., tenure-track, TIAA/CREF, many other fringe benefits. Available immediately. Located in the northwest corner of the state in the heart of the Arkansas Ozarks, the Fayetteville-Springdale-Rogers area (80,000 population) offers clean air and outdoor recreation (river-float trips, camping, water skiing, etc.). Send application and resume with names, addresses, and phone numbers of 3 references to: John A. Harrison, Director of Libraries, **University of Arkansas, Fayetteville, AR 72701.** An equal-opportunity, affirmative-action employer, welcomes applications from all qualified individuals.

Catalog librarian. Bucknell University is recruiting for a one-yr. (or 9 mos.) temporary position to replace librarian on leave starting Aug. 1. Required: MLS from ALA-accredited school, one yr.'s experience minimum. Responsibilities: cataloging with OCLC/LC/AACR2, assisting in retrospective conversion. Minimum salary $15,000. **Send resume and arrange for 3 letters of reference to be sent before March 15** to: Ann de Klerk, University Librarian, **Bucknell University, Lewisburg, PA 17837.** An equal-opportunity, affirmative-action employer.

Catalog librarian for Middle Eastern and South Asian languages. The University of Arizona Library is seeking an experienced professional catalog librarian to be responsible for the original cataloging of monographs and serials in Near Eastern and South

Asian languages (primarily Arabic, Hindi, Urdu, and Persian). The majority of the South Asian language materials are cataloged on OCLC. The Near Eastern language materials are cataloged manually using both printed cards and original cataloging. Other cataloging responsibilities include supervising the copy cataloging by student assistants for these languages; serving on a catalog information desk; active participation in establishing policies and procedures for the catalog department; participation in planning for an online catalog. Requirements include: ALA-accredited library degree; working experience with AACR2, LC classification and LCSH; experience with OCLC or a similar utility; ability to transliterate using LC romanization tables. Primary language skills should be Arabic, Hindi, and Urdu. Ability to catalog materials in Persian and Pushto is also desired. Professional librarians at the University of Arizona Library are academic professionals with voting faculty status, have 12-mo. appointments, earn 22 vacation days a year, 12 days of sick leave, and have a standard package of holidays and other fringe benefits. The salary range is $16,500–$22,000, depending on qualifications. **Send letter of application, resume, and names of 3 references by March 30** to: W. David Laird, University Librarian, **University of Arizona Library, Tucson, AZ 85721.** The University of Arizona is an EEO, AA employer.

Catalog librarian: search extended. Responsible for original cataloging of monographic materials, including specialized and nonbook materials. Descriptive and subject cataloging and Library of Congress classification, using most current AACR rules. Formatting and MARC tagging copy for input into the Washington Library Network. Required: ALA-accredited MLS. Desirable: experience in working with LC classification and subject headings, MARC tagging, AACR2, Western and Cyrillic languages, nonprint and specialized materials, and experience with library networking and bibliographic utilities (preferably WLN). Position currently vacant. Rank: Librarian II, faculty status. Salary: beginning professional salary is $17,200. TIAA/CREF, broad insurance program, 22 days' annual leave, and 12 days' sick leave per year. **Deadline for receipt of applications is March 30.** Send letter of application, resume, and 3 original letters of reference to: Allene F. Schnaitter, Director of Libraries, **Washington State University, Pullman, WA 99164-5610.** Washington State University is an equal-opportunity, affirmative-action employer.

Collection development librarian: University of Arkansas at Little Rock. Responsible for selection of all formats of materials to support curricula; coordination of selector activity; coordination of planning and analysis of collection development and collection management policies and procedures. Participates in budget allocation; collection evaluation; use and user studies; policies and decisions regarding storage, weeding, conservation, and serials management. Some night and weekend work should be expected. Prefer strong academic background in history; archival experience; serials management; demonstrated skill at oral and written communications; and ability to work effectively with all levels of library employees, donors, patrons, and faculty members. Requirements include ALA-MLS and 3 yrs. of post-MLS reference or collection development experience with upper-level academic materials and services. Minimum salary $20,000. The position is open now. Position is faculty-rank, tenure-track, 12-mo., full-time with good fringe benefits including up to 6-percent-matched TIAA/CREF. Send resume and names of 3 references (with their current titles, addresses, and phone numbers) who have observed human relationships and professional abilities to: Library Search Committee, c/o Kathy Essary, Chair of Recruitment Committee, **University of Arkansas at Little Rock, 33rd and University Ave., Little Rock, AR 72204.** An EEO, AA employer.

Coordinator, library technical services. Requirements: master's degree in library science from a library school accredited by the American Library Association. Minimum 2–4 yrs.' library experience of which one yr. shall have been in cataloging or technical services. Thorough knowledge of *Anglo-American Cataloguing Rules*, 2nd edition, with accompanying ability to interpret and apply the rules to all types of library material; knowledge of Library of Congress classification scheme, with the accompanying ability to interpret and apply all schedules; knowledge of *Library of Congress Subject Headings*, 9th edition, with the accompanying ability to interpret and apply all subject areas; knowledge of all MARC formats with the accompanying ability to interpret all tags and indicators for input purposes. Good communications skills, both verbal and written. Salary $17,842. **Submit a letter of intent and resume by Feb. 29** to: **Maricopa Community Colleges, Personnel Office, Dept. M, 3910 E. Washington St., Phoenix, AZ 85034.** Equal-opportunity employer, M/F.

Coordinator of instructional resources center. Management of graphics, graphic art, and photographic production, self-production lab, and curriculum development in university serving 11,000 students; support of instructional television production. Required: master's or specialist degree in educational media, instructional technology, audiovisual communications, or related field; design and production experience in photography and/or graphics; experience in management of media services; communication and human relations skills. Desirable: minimum 3 yrs.' experience in media management; instructional development experience. Academic staff. Annual appointment. Reports to associate director for media services. Salary (minimum $25,000) dependent on qualifications. **Closing date: Feb. 15.** Starting date: July 1 or earlier. Send letter, resume, and names of 3 references to: Ronald H. Reid, Associate Director, **Libraries and Learning Resources, University of Wisconsin-Oshkosh, Oshkosh, WI 54901.**

Assistant Director for Public Services

Senior administrative position responsible for all public services activities in Lockwood Memorial Library, the graduate research library for the humanities and social sciences which also serves Schools of Management, Information and Library Studies, and Architecture and Environmental Design. Included are reference and information services in several locations within the library and branches, computer search, bibliographic instruction, interlibrary and intercampus loan and borrowing, government documents, and circulation and stack maintenance activities. Responsibility may extend in the future to cover public service areas in the Science & Engineering and Undergraduate libraries.

Qualifications: ALA-accredited MLS degree, 5 yrs.' professional library experience in a large academic/research library, at least half of such experience in a supervisory or administrative position in public services, and knowledge of educational and research needs at both the graduate and undergraduate levels and of the latest developments in academic library service are required. Experience coordinating large staff will be given special consideration. Familiarity with library/faculty liaison, library orientation and training programs, computer-assisted reference service, and collection development work is desirable.

Salary: $34,000 plus, depending on qualifications; faculty status at the rank of associate librarian/librarian. Send letter of application and resume including the names of at least 3 references to: **M. E. State, Assistant to Director for Personnel, University Libraries, SUNY/Buffalo, 432 Capen Hall, Buffalo, NY 14260.**

Experience with automated systems and additional academic preparation are desirable. Tenure-track, 12-mo. appointment. Salary minimums: instructor $17,787; assistant professor $22,485; dependent on qualifications. Available July 1. **Apply by March 15** to: Darrel M. Meinke, Dean of Instructional Resources, **Moorhead State University, Moorhead, MN 56560.** An equal-opportunity employer.

Head, library systems (reposting). Plans and coordinates utilization of new technologies to enhance Duke's present acquisitions and serials systems, while working toward online, integrated library system being developed by Triangle Research Libraries Network (TRLN), a joint project of Duke University, UNC at Chapel Hill, and N.C. State at Raleigh. Recommends automation policies, prepares cost analyses and feasibility studies, and evaluates computer hardware and software. Directs 4 staff members in planning, analysis, and programming activities to improve current systems and implement new ones. Reports to AUL for administrative services. Requires 3–5 yrs.' experience in analysis and programming, preferably in library environment; ability to recommend policy and develop applications for online integrated library system, to plan and develop interfaces between library systems and university systems, and to develop cost analyses and budgets for automation activities; demonstrated working knowledge of major computer programming language (COBOL experience with IBM and/or Tandem computers preferred); knowledge of computer hardware, library automation, and suitable applications for research libraries; supervisory experience highly desirable; demonstrated ability to work well with others and communicate effectively orally and in writing; MLS from ALA-accredited program preferred. Available spring 1984. Expected salary range: $25,000–$32,000. **Send letter of application, resume, and names of 3 references by March 15** to: Ann F. Stone, Personnel Librarian, **Duke University Library, Durham, NC 27706.** Affirmative-action, equal-opportunity employer.

Head of technical services: University of Arkansas at Little Rock. Administers overall operations of collection development, cataloging, and physical processing. Responsible for coordination of bibliographic files throughout the library. Some night and weekend work should be expected. Qualifications include understanding of automated library systems; thorough knowledge of cataloging policies and procedures; demonstrated ability to plan and implement improved programs; demonstrated abilities in management; ability and willingness to communicate effectively and work well with all levels of employees; stable employment background. An innovative librarian with analytical skills is highly desirable. Requirements include ALA-MLS and 5 yrs. of relevant post-MLS experience. Minimum salary $25,000. The position is open now. Position is faculty-rank, tenure-track, 12-mo., full-time with good fringe benefits including up to 6-percent-matched TIAA/CREF. Send resume and names of 3 references (with their current titles, addresses, and phone numbers) who have observed applicant's human relationships and professional abilities to: Library Search Committee, c/o Kathy Essary, Chair of Recruitment Committee, **University of Arkansas at Little Rock, 33rd and University Ave., Little Rock, AR 72204.** An EEO, AA employer.

Head, processing control section, serials division (search reopened). Under the direction of the head of the serials division, plans, organizes, and directs the work of the processing control section, which consists of current receipts, binding processes, and card central-serials record maintenance; is responsible for the development and implementation of programs and plans for the section and for supervising, hiring, training, and evaluating personnel; catalogs and classifies serials; contributes to the planning and management for the division. Qualifications: master's degree from an ALA-accredited school of librarianship required. A minimum of 4 yrs. of post-MLS experience in serials work in an academic library, including at least 2 yrs. of serials cataloging, required. Knowledge of current and past cataloging rules and Library of Congress cataloging and classification required. A successful record of supervision is required. Experience in serials records maintenance is desirable. Experience with an automated system desirable; experience with binding desirable. Ability to function well in a changing environment, to work effectively with library staff, and to contribute constructively to division planning. Salary: $23,000 minimum. 24 days' vacation, TIAA/CREF, premium fully paid for medical, dental, and life insurance plan. **Applications must be received no later**

Positions Open continued from p. 91.

than 5:00 pm, Wednesday, Feb. 29. Send letter of application, resume, salary requirements, and names of 3 references to: Charles E. Chamberlin, Head, Personnel and Administrative Services, **University of Washington Libraries, FM-25, Seattle, WA 98195.** AA, EOE.

Head, reference department, Hagerty Library at Drexel University. Position is available immediately. The requirements for this position are a master's in library science and several yrs. of professional experience in reference work including database searching, with at least 2 yrs. of administrative/supervisory responsibilities. The reference department consists of 6 other professional librarians, 8 clerical assistants, 2 library assistants, plus part-time staff. The responsibilities of the job include supervision and leadership of professional staff (4 subject specialists in the fields of humanities and social sciences, home economics, business administration, library and information science, plus 2 general reference librarians); selection of reference materials; and supervisory general reference desk duties, interlibrary loan, and other pertinent routines. The department head is a member of the Library Administrative Council and reports directly to the director's office. The starting salary is $21,000/yr. with academic status, retirement and illness benefits. A higher salary may be available dependent on qualifications. **Deadline for applications: Feb. 28.** Interested persons should address their correspondence to: Lucille R. Jones, Head of Administrative Services, **Drexel University Library, Philadelphia, PA 19104.** An equal-opportunity, affirmative-action employer.

Librarian, cataloger. Position available at Cleveland State University for experienced librarian. Responsibilities: original cataloging and classifying of monographs, primarily in science and technology; assigning of classification and numbers and subject headings; tagging cataloging data for input to OCLC; verifying and preparing authority records and some catalog maintenance; some possible supervisory responsibilities. Minimum qualifications: ALA-accredited MLS; 3 yrs. of professional cataloging experience in an academic or research library; experience with AACR2, LC classification, LC or NLM subject headings, original cataloging, MARC tagging, and the OCLC or other cataloging systems. Preferred: 2 foreign languages of bibliographic importance, academic background or cataloging experience in science and technology. Salary: $17,500+, dependent upon qualifications. **Submit resumes and names and addresses of 3 references by March 7** to: Billie Joy Reinhart, Chair of Search Committee, **University Libraries, Cleveland State University, 1983 E. 24th St., Cleveland, OH 44115.** Equal-opportunity employer, M/F/H.

Librarian, external degree program. Search extended. Reference position entails the coordination of the delivery of library services to off-campus students and faculty in several Midwest states including: Mich., Ohio, N.D., and Mo., as well as Canada, from the campus library in Mt. Pleasant, Mich.; bibliographic instruction; and the marketing of the library program and library resources generally. Librarian selected will collaborate with 3 other regional librarians and will report to the asst. to the director of libraries. Required: ALA-accred. MLS degree, one yr. of professional experience of a qualifying nature including bibliographic instruction, willingness to work a flexible schedule and to travel. Pref.: bibliographic experience with business and/or administration sources, knowledge of database searching, interest in microcomputers (TRS80/II installed), and a team orientation. This is a 12-mo. professional position. Range of the starting salary (AP4) is $17,800–$23,150, appointment salary commensurate with experience. Excellent fringe benefits. Detailed description of the off-campus library program and the fringe benefits of this position available upon request—**write or call toll-free 800-248-9271. Submit written application, resume, and the names and addresses of 3 references by March 15 to assure consideration.** Mail to: Barton M. Lessin, **206 Park Library, Central Michigan University, Mt. Pleasant, MI 48859.** CMU is an affirmative-action and equal-opportunity institution.

Librarian, reference/instruction (12-mo. sabbatical replacement). Instructor or assistant professor rank. Berea College seeks MLS graduate with experience in reference and instruction and undergraduate degree in the humanities. Berea is a 4-yr., liberal arts college with a strong commitment to an active reference/instruction program integral to the teaching effort. Responsibilities will include participation in 1) reference service including weekend and evening hrs.; 2) course-related bibliographic instruction program with responsibilities for general education and humanities courses; 3) other departmental activities. Salary: $16,000, beginning Aug. **Letter of application, resume, example of applicant's bibliographic instruction materials, and names of 3 references by March 5** to: Thomas Kirk, College Librarian, **Berea College, Berea, KY 40404.**

Librarian/technical services, Stockton State College Library. Duties include bibliographic control of books and periodicals and maintenance of catalogs. Familiarity with OCLC, AACR2, LC classification and subject headings necessary. Ability to work in a progressive, automated environment. An ALA-accredited library science degree required. Professional experience in cataloging desired. The minimum salary is $18,260 (12 mos.), may be higher depending on qualifications and experience, plus state-mandated benefits. **Resume and 3 letters of reference should be sent by Feb. 15** to: Geraldine Malone, Assistant Director for Technical Services, **Library, Stockton State College, Pomona, NJ 08240.** Women and minorities are encouraged to apply. Stockton State College is an affirmative-action, equal-opportunity employer. Recruitment and selection is done without regard to race, color, sex, creed, age, handicap, or national origin.

Librarian I/head, government documents/maps unit. Responsible for unit's collection, organization, and user services, which includes responsibility for meeting the library's obligations as a U.S. government documents regional depository. Supervises 2 librarians and 4 library technicians. Qualifications (required): master's degree in library science from ALA-accredited program. Minimum of 3 yrs.' professional experience as a government documents librarian, preferably in a large depository collection. Demonstrated ability to effectively supervise and communicate; evidence of a strong commitment to public services; demonstrated familiarity with current trends in technology (including automated retrieval) affecting documents. Preferred: demonstrated familiarity with organization of international documents and map collections; teaching or library instruction experience. Salary: $18,700 minimum; excellent fringe benefits. **For full consideration, submit resume and names of 3 references by Feb. 29** to: Virginia Sojdehei, Personnel Librarian, **McKeldin Library, University of Maryland, College Park, MD 20742.** AA, EOE.

Librarian II/public services, Stockton State College Library. Duties include: coordinating the library's user instruction program, interlibrary loan activities, and online services; providing reference service; participating in group reference practice; and other duties as assigned. Minimum requirements: an ALA-accredited library degree; minimum of 3 yrs.' experience in public services; prior experience with bibliographic instruction; thorough knowledge of and experience in online computer searching; supervisory skills. The minimum starting salary is $20,133.38 (12 mos.), may be higher depending on qualifications and experience, plus state-mandated benefits. **Resume and 3 letters of reference should be sent by Feb. 15** to: Marjorie F. Wallace, Assistant Director for Public Services, **Library, Stockton State College, Pomona, NJ 08240.** Women and minorities are encouraged to apply. Stockton State College is an affirmative-action, equal-opportunity employer. Recruitment and selection is done without regard to race, color, sex, creed, age, handicap, or national origin.

Monograph original cataloger: University of Georgia. **Entry-level** position (salary minimum $14,800). Search reopened. Duties: responsible to the head of the monograph original cataloging section of the cataloging department for performing original cataloging of monographic materials in all subjects and languages including the sciences. The cataloging department, comprised of 30 staff members, catalogs over 47,000 books, serials, microforms, and nonprint materials yearly. Qualifications: MLS from ALA-accredited library school; strong interest in academic librarianship; knowledge of AACR, AACR2, and LC classification and subject headings; ability to work with broad range of subjects and languages; good oral and written communication skills; ability to establish and maintain effective working relationships; knowledge of OCLC cataloging preferred; knowledge of other automated systems applicable to libraries desired; background in sciences desired. **Application procedure: send letter of application by March 16,** including resume and names of 3 references, to: Bonnie Jackson Clemens, Assistant Director for Administrative Services, **University of Georgia Libraries, Athens, GA 30602.** This position will be filled only if suitable applicants are found. An equal-opportunity, affirmative-action institution.

Nesbitt and evening colleges librarian in the Hagerty Library of Drexel University. The requirements for this position are master's degree in library science, at least 2 yrs.' professional experience in reference work including database searching, and an acceptable subject background or interest. The Nesbitt and evening colleges librarian works closely with the faculty and students of the colleges. Reference work, bibliographic assistance, and book selection in the field of art, architecture, education, design, psychology, and human behavior and development form the principle responsibilities of the position. The starting salary is $15,000 per year with academic status, retirement and illness benefits. A higher salary may be available depending on qualifications. **Deadline for applications is March 15.** Interested persons should address their correspondence to: Lucille R. Jones, Head of Administrative Services, **Drexel University Library, Philadelphia, PA 19104.** An equal-opportunity, affirmative-action employer.

Reference department head: University of Georgia, Main Library (salary: minimum $25,000). Duties: responsible to the assistant director for public services for administering the main library reference department (social sciences and humanities) and coordinating its activities with other departments. The department provides reference, instructional, and referral services on an individual basis; conducts formal library instruction through general tours and specialized presentations; prepares bibliographies and guides; performs computerized database searches; and develops a strong, viable reference collection (currently approximately 20,000 volumes). The head supervises the assistant head, coordinator of bibliographic instruction, coordinator of online services, 8 reference librarians, 3 support staff, and student assistants. Qualifications: master's degree from ALA-accredited library school; minimum 3 yrs. of relevant experience in a large academic or research library; extensive working knowledge of reference and bibliographic sources in social sciences and humanities; demonstrated supervisory ability; bibliographic instruction experience; knowledge of computerized database searching; effective oral and written communication skills; ability to work effectively with colleagues, students, and faculty. **Application procedure: send letter of application by March 16,** including resume and names of 3 references to: Bonnie Jackson Clemens, Assistant Director for Administrative Services, **University of Georgia Libraries, Athens, GA 30602.** This position will be filled only if suitable applicants are found. An equal-opportunity, affirmative-action institution.

Reference/instruction librarian. Provides reference service, online searching, instruction, and assists in collection development. MLS from ALA-accredited library school. Second master's degree desired (progress toward a second master's required for tenure). Academic background or library experience in social sciences (especially business), sciences, health sciences, or engineering preferred. Minimum of 3 yrs.' experience in academic library reference services including bibliographic searching and instruction. Collection development experience desired. Ability to communicate effectively in oral and written presentations and planning and supervisory skills essential. Tenure-track position. Candidate will be expected to meet library and university criteria in research,

2 positions. The Pennsylvania State University Libraries have 3 faculty positions with academic rank available immediately. These include: 1) **documents librarian/social sciences cataloger;** 2) **engineering librarian/science cataloger;** and 3) **physical sciences librarian/science cataloger.** These positions provide opportunities for creative and flexible librarians to work with both public and technical service aspects of an integrated automated system (LIAS) which allows decentralization and distribution of original cataloging to public service units. The positions will involve a full-time training assignment in the cataloging department at the outset; they will have, after several months, a physical and administrative home in a public service unit, where they will have reference and collection development responsibilities while maintaining formal ties with the original cataloging unit and an original cataloging assignment. Duties in the respective areas include reference and instructional services, database searching, collection development; original cataloging in respective subject areas, including authority work, classification, subject headings; surveillance of database quality; and establishment of bibliographic policy and priorities for assigned subject field. The documents position will also include responsibility for analysis to develop plans to include the documents collection in the library database. Specific requirements for the documents position: reference experience with government documents; facility in one Western European language; academic background in political science or history preferred. Specific requirements for the engineering and physical science positions: academic background in the sciences; facility with German or Russian. General requirements for all positions: ALA-accredited MLS or equivalent; subject master's degree preferred; knowledge of AACR2 and MARC tagging; experience working with a national utility or local automated system in the cataloging of library materials preferred. Potential for promotion and tenure considered. Salary and rank dependent upon qualifications; minimum $18,000. Excellent benefits. **Deadline: Feb. 15, or until suitable candidates found.** To apply, send letter of application, current complete resume, and names of 3 references to: Anne Minshall, **Box LDS, The Pennsylvania State University, E505 Pattee Library, University Park, PA 16802.** An equal-opportunity, affirmative-action employer.

---

2 professional openings, Hollins College. 1) **Circulation librarian.** Responsible for circulation activities, including closed reserve, stack maintenance, supervision of student assistants. Requirements: MLS from accredited school or equivalent experience; some knowledge of online bibliographic retrieval (DIALOG) desirable. Nonautomated circulation system. Minimum salary $13,500; fringe benefits competitive. 2) **Reference librarian.** Duties include general reference service, bibliographic instruction, interlibrary loan, supervision of government documents collection. Requirements: MLS from accredited school or equivalent experience; evidence of broad range of interests and reading; reading knowledge of at least one foreign language. Some knowledge of online bibliographic retrieval highly desirable. Minimum salary $13,500; fringe benefits competitive. Hollins College is a liberal arts college for women

ALA

Editor/Publisher
CHOICE

Editor and publisher for the *CHOICE* magazine and related products. Has overall responsibility for editorial, production, financial, marketing, advertising, promotion, and distribution activities for *CHOICE*, *Reviews-on-cards*, and other publications and services produced by *CHOICE*. Manages a staff of 20 and a budget of $1 million.

CHOICE is a book and nonprint reviewing journal targeted at college and university libraries, and is located in Middletown, Conn. The editor/publisher is responsible to the executive director of ACRL, a division of the American Library Association, located in Chicago.

Position qualifications: demonstrated competence in management and administration; knowledge of higher education in North America—developments and trends in academic programs—and the role of the academic library in the college and university; knowledge of publishing, particularly journal publishing—editorial aspects, production, marketing, advertising, distribution, and copyright; knowledge of academic librarianship and collection management issues and challenges; a high level of energy and stamina; knowledge of data processing and computers, and how this technology can be used in publishing; ability to meet deadlines and a budget.

Evidence of qualifications may consist in part of a degree in librarianship and business administration, degrees in other disciplines, and relevant experience.

Position available late July 1984.

Salary range: $30,400–$45,600; 22 days' vacation; TIAA/CREF.

Send resume and the names and addresses of 3 references by March 15 to:

Executive Director—*CHOICE* Search
ACRL/ALA
50 E. Huron St.
Chicago, IL 60611

An equal-opportunity, affirmative-action employer

with an undergraduate enrollment of 870, and 100 graduate students. The library has a collection of some 225,000 volumes and a staff of 13, including 6 professionals. Send resumes with at least 3 references to: Richard E. Kirkwood, Librarian, **Fishburn Library, Hollins College, Hollins College, VA 24020.** An equal-opportunity employer.

---

Help for the dun-in library

With one library success story to its credit, a new collection service believes it can dramatically improve any library's performance in getting back missing and overdue materials or cash debts.

Transworld Systems, Inc. (TSI), headquartered in California, has performed collection services for some 20,000 firms and organizations, collecting about $250 million worth of debts annually. Now an independent TSI contractor has developed a special Library Collection Service (LCS) and put it to the test at San Bernardino County Library (SBCL), a big 30-branch system in the Golden State.

From Jan. 2 through Dec. 31, 1983, the service collected successfully from 1,555 out of 2,642 accounts, retrieving 40 percent of the materials and cash due the library. The cash collections virtually covered the service's fee, so the library netted some $38,000 worth of items at no direct cost. According to Al DeCaprio, SBCL assistant librarian, the new service collected about four times as much as a former service, whose net proceeds to the library amounted to just $5,900.

Debtor dignity

What's the secret weapon? Contractor Wanda H. Weldon, who developed the library service and markets it, says it's "a unique philosophy to protect debtor dignity," one that recognizes the debtor as a constituent of the library. A five-stage series of dunning letters allows the debtor room to respond and thanks the delinquent patron who finally comes through.

The success of Weldon's system, however, seems more a result of completeness than of unique philosophy. Its letters —or "demands," as the service calls them—are sent by the service at 14-day intervals, and the service gives the library a monthly progress report on the accounts. The library can choose from various options within the five-stage series of letters. For example, the first letter can be "diplomatic" or "intensive"—meaning, the difference between such language as "please" and "strongly suggest." Also offered is an "attorney demand" at no extra charge. This is a notice on an attorney's letterhead indicating an "intention to pursue this claim as far as it is economically feasible" but not to "threaten or alarm you about this matter." Legally, it means little, but it seems to stop response from dropping off midway in the series.

Some interesting facts and asides have come out of the San Bernardino experience, among them:

- The return of long-lost books by patrons returning recent overdues;
- The sudden appearance of books on the library shelves, many not checked out, some belonging to other libraries;
- Patrons finding money stuffed in the pockets of books they've examined in the library;
- Response coming from patrons now living far away.

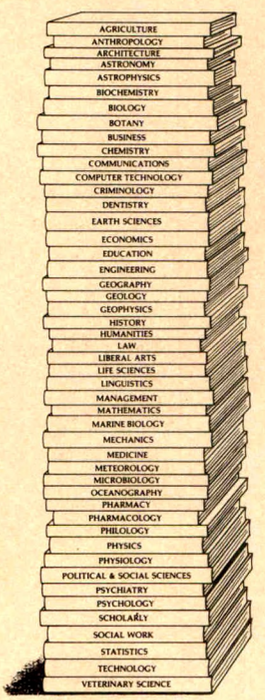
Unlike many collection services, which take a percentage of amounts recovered, Weldon offers a per-account fee, ranging from $4.25 to $6.75. The larger the number of accounts, the lower the unit cost. Branch accounts may be grouped. San Bernardino paid $5.50 per account. Weldon suggests that libraries surcharge a collection fee to the debtor. San Bernardino surcharged a $5 fee with no ill effects.

County Librarian Barbara Anderson told *AL* she was pleased with the service after one year, and would continue using it. "They try to keep the accounts current," she said, "and the better the currency, the higher the percentage of collections." Now that older accounts have been processed, the collection-success rate is approaching 50 percent.

Anderson noted that services charging a percentage of collections aren't eager to go after small library accounts, often in the $25 range or under. With a per-account fee system, however, it makes sense.

Weldon's service also helped the library redesign its card-application/registration form to gather information that would be useful later should collections be necessary. Although SBCL has not yet taken delinquents to small-claims court, it is now better set up to do so as a result of the service.

Weldon, who recently addressed the California Library Association, is introducing LCS at a second library, Newport Beach. For information, contact Wanda H. Weldon, POB 2000, Corona Del Mar, CA 92625 (714-675-7297). —*A.P.*



The odds are stacked in your favor that we have the back issues you need.

Midwinter Bowl!

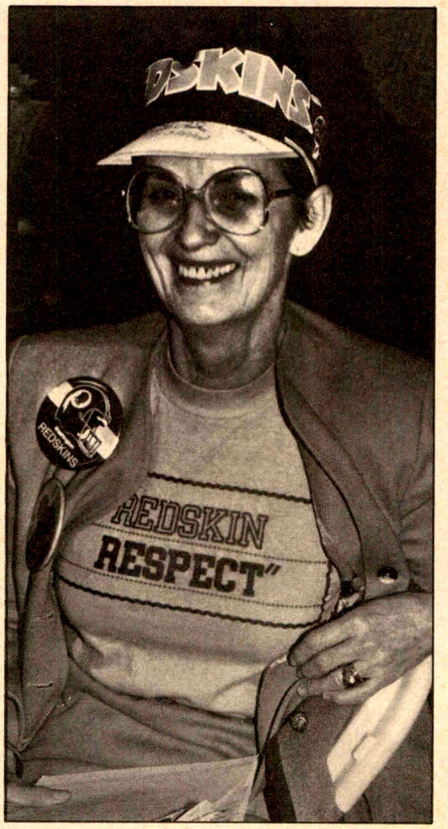
The biggest! The greatest! The highest stakes ever! The most fiercely contested!

The Super Bowl? Nah. The Super Bowl playoffs? Nah. But while the Redskins battled the 49ers Jan. 8 in Washington, D.C., for a Super Bowl berth, the biggest ALA business meeting of all time was shaping up on the other side of town.

It was Midwinter Bowl '84, Jan. 7–12, with three days of preliminary meetings, record numbers of registrations (5,210) and exhibit booths (276), reports on ALA's $11.9 million in '82–'83 revenues and $11.6 million in expenditures (both records), a massive reception in the Library of Congress Great Hall, a three-hour, celebrity-studded president's program, and, by rough estimate, some 20,000 items of business in about 2,000 meetings.

Included in that business was an ALA stand on UNESCO, a new dues schedule, almost a million in grants being made available to ALA and its units, a major reconsideration by school librarians of their role in ALA, new cataloging tools, a seeding of new public library "standards," a flying start toward coalition-building with other associations, and some good old-fashioned internal squabbling and name calling.

The top news of the Midwinter gathering is presented in the following four pages and in this issue's "In the News" department. Next month's issue will carry more, featuring executive reports, unit activities, and action photos of some of Midwinter Bowl's greatest stars.



D.C. native Patricia Berger brings Redskins fever to ALA's "Winter Bowl." Berger, chief of information resources and services at the National Bureau of Standards, is president of the ALA Federal Librarians Round Table. Among ALAers in San Francisco 49ers garb was Councilor-at-Large Elizabeth Talbot.

Members to vote on dues hike

ALA members will be asked to vote on an increase in their personal dues when they elect new officers this spring. The proposed dues schedule raises the current $50 regular annual dues by $5 each year for the next five years to reach a total of $75 in 1988. Other membership categories would be adjusted accordingly.

The schedule, proposed by the Committee on Program Evaluation and Support (COPES), was approved by the Executive Board at its fall meeting (*AL*, Dec., p. 477). COPES Chair Jan Keene presented it to Council Jan. 10.

Councilor Marilyn Goodrich said that the American Association of School Librarians opposes the proposed increases because AASL members must pay some $200 a year to belong to local and state groups of the National Education Association. Other councilors called the increases destructive and unfair.

Allen Veaner considered the new dues schedule reasonable and modest compared with dues of other library organizations. Bill Chait declared, "If we don't want ALA to end up with a deficit, we must vote a dues increase." Council approved the schedule for placement on the election ballot.

Risk task force wants examples

Joseph Shubert, chair of the task force studying *A Nation at Risk* in relation to ALA goals and objectives, asks all ALA members for persuasive examples of how librarians can play a more vital role in educational reform.

Shubert told Council that his nine-member task force had analyzed the National Commission on Excellence in Education report and five similar surveys before writing *Realities*, a four-page interim statement.

The final task force report will be delivered at the Dallas Annual Conference. Shubert said it will point out ALA's concern that *Risk* and the other surveys give little attention to the library role in education and fail to relate what libraries are doing and can do to contribute to learning.

Shubert asked for responses to be sent to the ALA Washington Office or to Joseph Shubert, New York State Library, Albany, NY 12208, by Feb. 15.

Wedgeworth reports $ surplus

"As a direct result of the hard work, wisdom, and business acumen of the Association's officers, staff, and membership," Executive Director Robert Wedgeworth told the Council, ALA showed a positive balance of $167,548 in general funds on Aug. 31, 1983. The balance marked a "dramatic recovery" from the $205,702 deficit of August 1982, he said.

Wedgeworth's State of the Association remarks will be highlighted in the March issue of *American Libraries*. A summary report of the Association's finances will appear later this spring.

Treasurer Herbert Biblo presented a summary of the audit report recording total Association assets at $9,492,650, an increase of about a million dollars over 1981 and some $284,000 over 1982. Total liabilities as of Aug. 31, 1983, were $5,513,958, a decrease of some $528,000 from the 1982 figure. ALA revenues for fiscal year 1982–83 totaled $11,918,800; expenditures were $11,637,396.

Other actions of Council

Council also:

- elected Elizabeth Futas and Margaret Chisholm to the ALA Executive Board for the 1984–1988 term.
- established the ALA Continuing Library Education Network and Exchange (CLENE) Round Table.
- urged President Reagan to declare a National Deaf Heritage Week Dec. 2–9, 1984.
- reaffirmed an earlier call for libraries to make information available about the arms race.
- requested negotiations on U.S. membership in UNESCO (see "In the News," this issue).
- named Lester Asheim and Rep. William Ford (D-Mich.) honorary members of ALA.

Further actions will be reported next month.

ALA joins ACLU in NSA dispute

At the first meeting of the Executive Board,* members unanimously agreed that ALA should join the American Civil Liberties Union in developing a suit against the National Security Agency.

Last year, NSA ordered the Virginia Military Institute George C. Marshall Research Library to halt public access to personal letters written by cryptologist William Friedman. The letters had been used by James Bamford in *The Puzzle Palace,* a critical history of the agency.

ACLU questions whether NSA can order a library to remove items from its public collection and if such action violates the First Amendment.

The Freedom to Read Foundation has agreed to underwrite any expenses incurred by ALA, the District of Columbia Library Association, or the Virginia Library Association as plaintiffs and voted an initial $2,500 grant to the ACLU Foundation.

ALA Publishing to speed service

To replace ALA Publishing Services' outdated order and subscription system, the Executive Board approved purchase of an STC Systems, Inc., turnkey package. The new order fulfilment system of software will handle all book, pamphlet, subscription, Public Information Office (including graphics), and divisional items.

The complete package costs $144,225. Publishing Services Director Gary Facente told the board the new system will pay for itself in 18 months.

The board unanimously authorized management to borrow $144,225 from the American National Bank to acquire the system.

Start-up group to plan to plan

Enthusiastic participants of a Divisional Leadership Enhancement preconference urged the Exec Board to let them help develop a long-range plan for ALA by Midwinter Meeting 1986.

Public Library Association President Nancy Bolt said the first thing was to plan to plan. PLA Vice-President Charles Robinson favored hiring an outside consultant. Bonnie Juergens, Library and Information Technology Association councilor, suggested the board appoint a small committee of its members, preconference attendees, and staff to hash out preliminaries.

Immediate Past President Nemeyer proposed a start-up group including her Directions and Program Review Subcommittee (Summers, Lynch and Minudri), Gerald Shields and William de John of the ALA Planning Committee, and Bolt and Juergens.

The board approved the expansion of Nemeyer's committee "for the purpose of designing and recommending a long-range planning process for the Association." It is to report at the spring board meeting May 2–3.

Josey to build coalitions

"Forging Coalitions for the Public Good" is ALA President-elect E. J. Josey's theme for the ALA year 1984–85 and the 1985 Annual Conference in Chicago. Josey intends to reemphasize the unity of ALA goals with those of other leading organizations concerned with public interests, he told the Executive Board.

In a five-page planning document, he presented 12 methods for implementing the theme and announced he will establish a commission of ALA unit representatives to dramatize contributions libraries make to the economic health of their communities and the nation.

AASL weighs split from ALA

At an open meeting for all committees of the American Association of School Librarians, AASL President Judith King outlined three options under consideration by the division in response to what it calls "serious fiscal constraints" within the present structure of ALA.

An ALA division since 1951, AASL has some 5,300 members, an active publications program, and two successful national conferences to its credit; but it considers certain elements of ALA's finance, staffing, and governance practices to be problematic in terms of the division's influence and growth.

To address the problems, AASL set up a Future Structures Committee (Carol Cain, Glen Estes, and Karen Whitney), which prepared a draft report describing the difficulties and suggesting three "solutions" for consideration.

The working draft was not available for publication; but King named the three options as: 1) improving AASL's ability to work within the present ALA structure; 2) moving ALA toward a federated type of organization; and 3) separating from ALA and/or establishing a new, independent organization.

School librarians, King noted, constitute some 50 percent of the nation's librarians; yet only about 10 percent of ALA's personal members represent school library interests. (An AASL representative later opposed a new personal dues increase before Council; but the increase passed solidly. AASL has long argued that school librarians pay dues to

numerous other educational associations, and are therefore hard-put to join ALA as an entree to AASL.)

The Future Structures draft is being studied by the AASL Board and other ALA units. An edited version will be published in the spring *School Media Quarterly*, and AASL members will be surveyed on their preferences. The AASL Board will then decide on the next action.

At Midwinter, the ALA Executive Board authorized a Board subcommittee to study the issues with AASL and, in effect, keep the lines of communication open.

Candidates for treasurer catch fire

The three candidates for 1984–88 ALA treasurer got into the thick of politics during Midwinter as they joined the presidential candidates in presenting views on ALA finances—and many other matters.

Running for treasurer are Patricia Schuman, Robert Rohlf, and incumbent treasurer Herbert Biblo. Their biographical backgrounds and official platform statements will appear in the election ballots distributed to all personal members this spring. At Midwinter, however, all revealed that their concerns did not end at the bottom line of the budget.

In a Social Responsibilities Round Table forum, Schuman was asked if she would propose changes in how financial information is disseminated to ALA groups. "Do you have three weeks?" she replied. In her subsequent remarks she called for Council to ride herd on COPES, for attention to priorities, for a modern accounting system, and for more equity in funding. "I used to fight for pennies when I was on SRRT," she said, "but when I needed a sudden $40,000 extra as a local arrangements chair in New York. I was told it was no problem."

Treasurer Biblo, pointing out that he was twice nominated by petition, said "I come from the people, and I'll work for the people." He charged that ALA "management doesn't feel we need to be privy to all the financial information. For example, every year I have to *ask* for a year-end printout of the budget."

At a conclave of chapter representatives, Biblo noted that the office of treasurer "does not bring automatic power and influence"; however, he noted that the treasurer serves as a membership elected member of the board and its finance committee, and thus is in a position to appeal to the membership for support.

Robert Rohlf told chapter reps that the treasurer must be "the financial conscience of the Executive Board and Council." He remarked that ALA's financial system had not kept up with the association's complexity. "ALA is a large holding company," he said, "and frankly, nobody knows what's going on."

Like the other candidates, Rohlf emphasized the treasurer's four-year term on the Executive Board—a year longer than the president's—and how that position called for decisions on all types of library issues.

Highlights of the presidential candidates' remarks will appear in a forthcoming issue.

ALA gains 50 million NLW allies

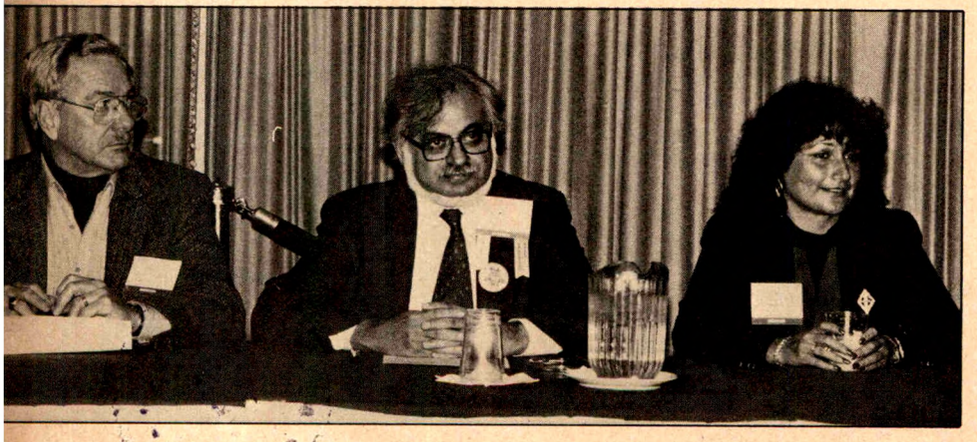
Some 35 national associations with close to 50 million constituents will join ALA this year in promoting National Library Week and its year-round goals.

Representatives from many of the associations came to a Midwinter NLW workshop sponsored by ALA's NLW Committee and its National Perspectives Task Force.

The NLW Committee, chaired by Elizabeth Stone, has developed a Partnership Program encouraging related associations to carry out national and local activities tying in with libraries and Library Week (April 8–14).

Among the 35 organizations signed up by Jan. 15 were the American Association of Retired Persons, with 13 million members, and the AFL/CIO, with 14.7 million. The Lions Clubs have already planned an NLW feature on literacy for the association's magazine, which reaches 600,000.

The National Perspectives Task Force, which contacted and enlisted the associations, is chaired by Susan M. Flowers of the National Rehabilitation Information Center.



Candidates for treasurer Robert Rohlf, Herbert Biblo (incumbent), and Patricia Schuman.

Micro software guidelines okayed

Guidelines for cataloging microcomputer software using AACR2 were made final at Midwinter and will be available soon from ALA.

Pat Thomas, chair of the Committee on Cataloging: Description and Access of RTSD's Cataloging and Classification Section, told *AL* that the group endorsed the term "machine readable data file" as the AACR2 general material designation (GMD). The guidelines call for a statement in Area 6 (the physical description area) that describes both the file and the physical carrier, such as a cassette or disk.

The final version of the guidelines will also include a glossary.

OCLC copyright debate takes toll

While the library community awaits a decision on OCLC's application to copyright its database, speakers at a discussion on "copyrighting bibliographic records" expressed dismay at the toll of time and energy the situation has taken on libraries.

Al Trezza, professor in the Florida State University library school, urged libraries and OCLC to set a deadline for negotiating contract terms and "get this thing settled once and for all." Contracts are the easiest way out of the dilemma, Trezza said. "If OCLC would spell things out [in contracts], they wouldn't need copyright."

The wide-ranging discussion took place at a networking assembly sponsored by the Association of Specialized and Cooperative Library Agencies' Multitype Library Cooperation Section.

Frank Grisham, director of SOLINET, said agreements between OCLC and the regional networks—not copyright—are the solution to OCLC's need to protect against unauthorized use of its database. The utility's copyright action "was contrary to the spirit of cooperation that has been part of library relations for so many years," Grisham said. It has resulted in unfavorable reaction in the library community, although that was not OCLC's intent.

Some libraries have considered filing copyright claims for their OCLC archive tapes as separate database compilations. However, Elliot Shelkrot, Pennsylvania state librarian, said the state library's attorney has advised against the library filing an adverse copyright claim to OCLC records created by Pennsylvania libraries. Such a claim would result in a sort of "joint authorship" of the database that would create many liabilities for libraries.

In contrast to the tortuous debate over OCLC copyright, C. James Schmidt, executive vice-president of the Research Libraries Group, said "building fences around the [RLG] database is not the way to deal with" concerns about RLG's economic viability. Indeed, RLG announced last year that member libraries may use records they contribute

The Only "How-To" Periodical Designed Just For MIS/DP Managers

NEW!

The Journal of INFORMATION SYSTEMS MANAGEMENT

The Journal of Information Systems Management is designed just for MIS/DP managers. Each quarterly issue effectively combines MIS technology, sound management practices and effective MIS management techniques and tailors it to the unique needs of the MIS Director.

This one-of-a-kind source of new ideas and practical know-how for today's information systems and data processing managers belongs in your library. Readers will find over 90-pages of articles written by experts in the field; practical, in-depth, how-to information; regular columns devoted to today's issues and timely articles that analyze and solve problems.

The Journal of Information Systems Management will help readers:

- find proven, practical solutions to management problems
- learn how to save time and run a cost-effective organization
- solve high turnover rates among their technical staff
- select the right software packages
- increase management productivity and control
- and much more!

Information Systems Management has assembled top experts from those specific areas in which MIS/DP managers need more information. Dr. Lawrence F. Young, Associate Professor of Information Systems and Management Science at Drexel University, serves as Consulting Editor.

He along with an outstanding board of practitioners from the corporate world will provide the most comprehensive information available.

A must for any library.

Coalition for Literacy wins $50,000 federal grant award

U.S. Secretary of Education Terrel H. Bell presents $50,000 to Jean Coleman and Robert Wedgeworth, American Library Association coordinators of the Coalition for Literacy, at ALA President Brooke Sheldon's Midwinter Meeting Program Jan. 9.

Bell said the 11-member group had earned the grant by attracting matching funds for its literacy awareness campaign. He also lauded libraries and librarians.

to the database as they wish. "Our position is that bibliographic records should flow freely among institutions," Schmidt said.

The question of whether an assemblage of machine-readable records into particular arrangements is copyrightable is still unanswered. Schmidt said the weight of legal opinion indicates "yes," but some lawyers still say "no."

Whether OCLC obtains copyright or not, negotiations must occur between OCLC and state libraries regarding the way the database is used in resource sharing, Shelkrot said.

Centers for career help proposed

ALA has submitted a proposal to the W.K. Kellogg Foundation for funds to create five regional career development and assessment centers for librarians in the U.S. and Canada. The centers would be linked to accredited library school programs and phased in over the five years of the project.

The proposal grew out of a successful, three-year assessment center project funded by the Kellogg Foundation and cosponsored by the University of Washington library school and the Washington State Library with help from the Pacific Northwest Library Association. Charlotte Wood, co-director of the Washington project, described its results to the Library Administration and Management Association Women Administrators' Discussion Group.

Wood and co-director Ruth Hamilton had observed that the number of women applying for library management positions in the Northwest did not reflect their numbers in the profession as a whole, nor did many applicants have the minimum qualifications for management. A search for methods of helping librarians, especially women, to assess their skills and plan careers more effectively led to creation of a pilot Career Development and Assessment Center for Librarians (CDACL), located at the University of Washington, Seattle.

In 1979–82, the CDACL helped 89 librarians evaluate their skills in 14 "management dimensions," i.e., competencies needed for success in management. The center also guided the librarians in defining career goals and planning for career-related self-improvement. In addition, the project trained 53 librarian assessors to objectively observe and rate assessees' management skills in the center setting.

Outside evaluation of the project by the Battelle Northwest Human Affairs Research Center showed the assessment process can significantly affect career progression, especially for women; prepare participants to compete for high-level management positions; and improve performance in job searches.

The five regional centers proposed in the new project are modeled on the CDACL. However, Wood outlined further goals of the project: the Washington State Library will develop a method of incorporating assessment techniques into the personnel processes of libraries as well as devise a "fiscally self-sufficient" assessment model for libraries.

A copy of the pilot CDACL final report was sent to all accredited library schools.

PLA ponders new "standards"

Public libraries need broad-based "standards"—or something like them—to set goals, measure performance, fight for budgets, and make long-range decisions—all the while accounting for unique local factors. No single tool now fits the bill, according to one Public Library Association unit; but a package of tools might be developed that provides national measures *and* allows for local needs.

Planning for such a package is the PLA New Standards Task Force, chaired by Karen Krueger. The task force, which met December 15 and throughout Midwinter, has roughed out four elements that would make up a "boxed set of interrelating tools" for public library development. Included would be: a planning component, possibly a revised *Planning Process for Public Librarians;* guidelines for variable roles (missions), with measurable success factors; an input/output measurement component in the nature of PLA's *Output Measures for Public Libraries;* and a new National Database of Library Measures. Ideally, the Database would be coordinated by PLA, compiled annually, and made available in online and print versions.

The Task Force, working with many other PLA and ALA units, will identify the research required for this project, which it calls the Public Library Development Program. It will also prepare grant-proposal background for consideration by the PLA Board in June.

SCOLE requests more data from competencies project

Noting the "enormous amount of work" that has gone into King Research Associates' "New Directions" project to identify competencies required for library and information professionals (*AL,* Jan., p. 43–45), ALA's Standing Committee on Library Education has asked King Research for "the clearest of statements" about methodology used in the project.

SCOLE's Library Education Research Task Force prepared a letter to King Research stating the committee's concern that "New Directions" receive a hearing under the most favorable conditions. Toward that end, the letter requests that King explain to SCOLE how project sites were selected; how the "self-selection" process works; and how King will validate the competencies identified.

Other requests were for an explanation of methodology for changing and updating competency identification; precise definitions for some words and phrases used in the project report; and a clearer presentation of lists of competencies.

(End of Midwinter Report I)

RASD seeks cooperation with retired persons' groups

Kay Cassell, president of the Reference and Adult Services Division, has asked librarians to cooperate with a book-purchase project sponsored by the American Association of Retired Persons (AARP), the nonprofit group of 15 million members aged 50 and over.

The 3,200 local chapters of AARP and the 2,500 local Retired Teachers Association units are forming planning committees of librarians and others to compile lists of books conveying positive, realistic views of aging. The lists may include novels and biographies highlighting older people as well as books describing relations between old and young.

The AARP and teachers groups will then purchase and donate selected books to local and public high school libraries. The planning committees will also disseminate the booklists and encourage people to read the titles. A project kit including publicity materials, a booklist, and a poster on the theme, "Books About Aging Are Time Machines: Travel the Generations," has been prepared by AARP.

For further information about the project, contact Andrew Hansen, Reference and Adult Services Division, ALA, 50 E. Huron St., Chicago, IL 60611.

Public libraries to receive Elderhostel materials

Under a new ALA/Elderhostel project, 14,000 public libraries across America are receiving a special library edition of the Elderhostel catalog listing educational programs for older adults.

The low-cost, short-term residential programs on college and university campuses are geared for individuals of 60 or over and require no particular level of formal education. Average cost of tuition, room, and board for a one-week program is $190.

The international Elderhostel organization has been sending its catalog to many public libraries on request, but now will mail it three times a year to all 14,000 libraries. The catalog is supplemented with a program brochure, poster, and promotion kit.

Public libraries that have not received the first mailing by March 1 should contact Elderhostel Library Desk, 100 Boylston St., Boston, MA 02116.

ALA election schedule

ALA personal members whose 1984 membership dues have arrived at ALA Headquarters by March 31 will receive ballots for the spring elections for officers and councilors. Ballots will be mailed third class between April 2 and 16. Members not receiving ballots by May 29 can obtain them by calling the 24-hour ALA hotline, 312-944-2117. June 8 is the last day ballots will be accepted for tabulation. An election results report will be distributed June 13.

ALA will request address changes with ballots and will guarantee forwarding and return postage.

In accordance with the bylaws, Feb. 23 is the last day nominating petitions will be accepted to add candidates to the Council and division ballots.

Honorary ALA Member Johnny Carson recognized

"Tonight Show" host Johnny Carson received his ALA Honorary Life Membership citation from Executive Board members David Snider and Regina Minudri Dec. 8. The presentation was made in Carson's office at the NBC studios in Burbank, Calif. Snider and Minudri were off-the-air guests at a "Tonight Show" taping.

The citation recognizes Carson's financial contribution to the rebuilding of the Hollywood Library, his role in encouraging viewers to call their libraries, his help to 12-year-old library founder Jason Hardman of Utah, and his continuing commitment to libraries.

"Challenge '84: Mission Possible" AASL conference theme for Atlanta

To help school library media specialists strive for excellence in their personal, professional, and organizational roles, the American Association of School Librarians has selected "Challenge '84: Mission Possible" as the theme of its third national meeting. The conference will meet Oct. 31–Nov. 4 in the Georgia World Congress Center, Atlanta.

The Atlanta general conference committee is headed by Chair Theresa Fredericka, state supervisor of school media programs for the Ohio Department of Education. Other members of the conference committee include: Donald Adcock of Glen Ellyn, Ill., Rebecca Bingham of Louisville, Ky., Mary Jo Boyd of Marietta, Ga., Michael Lawson of Rockville, Md., Joanne Lincoln of Atlanta, and Helen Lloyd Snoke of Ann Arbor, Mich. The committee is planning a program featuring national speakers, workshops, school tours, and sessions with specialists.

All AASL members will automatically receive a registration packet including a housing reservation form next month. Nonmembers may request packets and membership information from Challenge '84: Mission Possible, AASL, at Headquarters.

PLA to meet in St. Louis in 1986

The Public Library Association will hold its second national conference in St. Louis, Mo., April 2–5, 1986. The ALA Executive Board approved the conference at the fall board meeting.

Pat Woodrum, Tulsa City-County Library System director, chairs the PLA National Conference Committee. Subcommittee chairs are, for program, Charles M. Brown of Fairfield, Calif.; public relations, Frank J. Dempsey of Arlington Heights, Ill.; evaluation, Jane Robbins-Carter of the University of Wisconsin/Madison; exhibits, Claudya B. Muller of the State Library of Iowa; local arrangements, Joan Collett and Donell Gaertner of St. Louis.

For more information contact PLA at ALA Headquarters.

Eichenberg to deliver Arbuthnot

Fritz Eichenberg, Caldecott Honor Book illustrator, will deliver the 15th annual May Hill Arbuthnot Lecture at 4 p.m. April 6 at the Minneapolis Public Library and Information Center. Admission is free, and a reception will follow the lecture.

Eichenberg, whose works include *Ape in a*

ALA seeks nominees

The 1984–85 Nominating Committee requests Membership's help in identifying qualified candidates for the ALA vice president/president-elect 1985–86 and for Council 1985–89. Please send names and biographical data by April 1 to the chair, Thomas E. Alford, Assistant City Librarian, Los Angeles Public Library, Los Angeles, CA 90071.

Other Nominating Committee members are Sul H. Lee, Dean, University Libraries, University of Oklahoma, Norman, OK 73019; Patricia H. Mautino, Director, Curriculum Resources Center, Oswego County BOCES, Mexico, NY 13114; Suzanne J. LeBarron, Director, Kentucky Department of Libraries & Archives, Box 537, Frankfort, KY 40602; and Ilse B. Moon, 2811 Palm Aire Dr., Sarasota, FL 33580.

Cape and *Dancing in the Moon*, was selected by the Association for Library Service to Children to make a contribution to the field of children's literature by giving the address.

The host institutions include the Minnesota Office of Public Libraries, the Minnesota Library Association, the Minnesota Educational Media Organization, Metronet, the University of Minnesota Children's Literature Research Center, and the Minneapolis Public Library. Tickets may be requested after Feb. 15 from the Minnesota Office of Public Libraries and Interlibrary Cooperation, 440 Capitol Sq. Bldg., 550 Cedar St., St. Paul, MN 55101.

Booklist publishes reviewers' choice titles for 1983

From the books and films published in 1983, *Booklist* reviewers have selected outstanding titles in adult, children's, young adult, and nonprint works. The twice-monthly journal recently published the annotated lists in four separate broadsheets.

Booklist Adult Reviewers' Choice 1983 and *Booklist Children's Reviewers' Choice 1983* are each four pages. *Booklist Young Adult Reviewers' Choice* and *Booklist Nonprint Reviewers' Choice 1983* are two pages each.

Each list is available for 25 cents and a self-addressed, no. 10 envelope with 37 cents postage from *Booklist*, 50 E. Huron St., Chicago, IL 60611. Discounts are available for quantity purchases.

Your input requested

● If your library is developing or using a software package designed to provide instruction in library skills, the Library Instruction Round Table Research Committee would like to send you a brief questionnaire. Please send name, address, and type of library to Robert Huhner, 792 Columbus Ave., 15-T, New York, NY 10025.

● If you are involved with or interested in integrating computers into bibliographic instruction, the Association of College and Research Libraries Bibliographic Instruction Section Computer Concerns Committee would like to hear from you. The committee is preparing a directory of librarians who are active in that field. Please contact Joann H. Lee, Chair, ACRL/BIS Computer Concerns Committee, Lake Forest College Library, Lake Forest, IL 60045 by March 1.

Heatless Headquarters Heroes

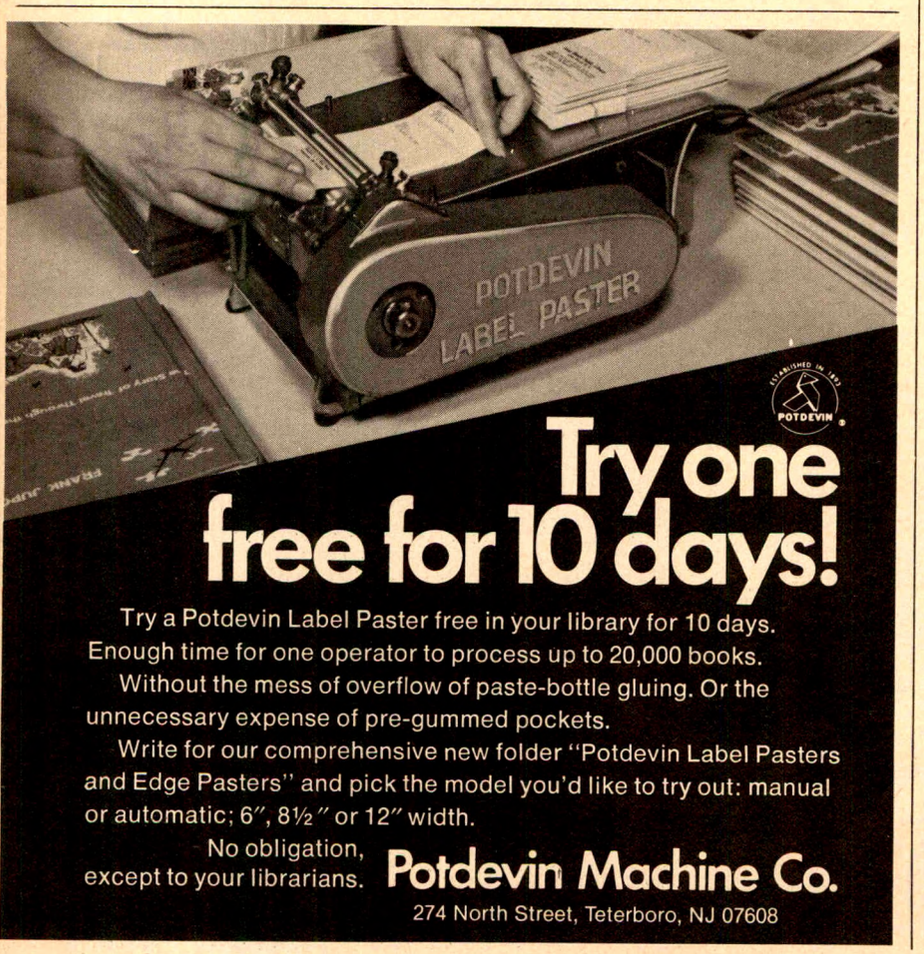
After a five-day ordeal, ALA Building Engineer Jim McClellan (rt.) is congratulated by his assistant, David Valentin, on repairing the boiler at 50 E. Huron St. Dec. 30.

The ailing boiler had put about half the ALA staff on ice during Chicago's sub-zero spell and was unable to keep some pipes from freezing and bursting on Christmas day. To prevent further damage while awaiting a part, McClellan ordered round-the-clock surveillance of the heating system. ALA staff coped with frigid offices by day; but McClellan—aided by Valentin and Tom Chasteen of the Accounting Dept.—kept watch for five days and nights. McClellan catnapped on the floor, survived on carry-outs, and bathed in a sink.

With the boiler fixed, McClellan and Valentin were able to enjoy the New Year's holiday—when not catching up on sleep.

Time change at Annual Conference

President Brooke Sheldon's Local Arrangements Committee for the Annual Conference announces that the All-Conference Reception hosted by the Dallas Public Library will be held at 8–10 p.m., not 6–8 p.m. (*AL*, Jan., p. 52). □



Try one free for 10 days!

Try a Potdevin Label Paster free in your library for 10 days. Enough time for one operator to process up to 20,000 books.

Without the mess of overflow of paste-bottle gluing. Or the unnecessary expense of pre-gummed pockets.

Write for our comprehensive new folder "Potdevin Label Pasters and Edge Pasters" and pick the model you'd like to try out: manual or automatic; 6″, 8½″ or 12″ width.

No obligation, except to your librarians.

Potdevin Machine Co.
274 North Street, Teterboro, NJ 07608

HIGH-DENSITY MOBILE STORAGE SYSTEMS

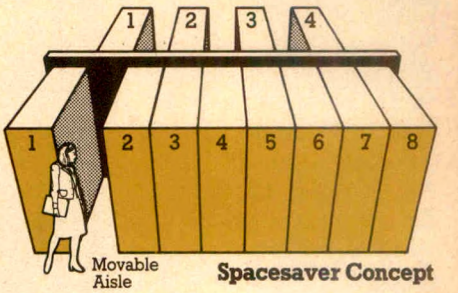
LIBRARIES SPACESAVER

University of Michigan, Ann Arbor, Michigan.

It Just Makes Sense...

Double Your Storage Capacity Without Doubling Your Space

Conventional Layout



Spacesaver Concept

Library floor space is expensive. And cramped storage facilities with growing collections and more & more volumes can only add up to a continual space "crunch", year after year.

Now, Spacesaver offers an alternative to conventional storage methods ...high-density mobile storage systems. By eliminating multiple *non-productive aisles* and their wasted space, you can condense your present library stacks into *50% less space* or *double your stack capacity.* And with the price of library construction today, Spacesaver doesn't cost money, it saves money! Send today for full details and copies of other library installations that have discovered the benefits of a Spacesaver system. Spacesaver. The better way that just makes common sense...for you.

The Spacesaver Group.

Space efficiency is our business.

An invitation to the ALA Archives

Available to all, ALA's "model archives" hold many surprises

by Deborah Beckel and Maynard Brichford

In the past 10 years, the ALA Archives has taken shape at the University of Illinois Archives in Urbana-Champaign. Begun with a semi-trailer full of records from a Chicago warehouse, the American Library Association Archives (ALAA) has developed into a model for the archives of a professional association. Last year 455 uses of the 1,069 cubic feet of records marked the first substantial increase in use since ALA's 1976 centennial year.

Faculty and graduate students research topics such as the history of well known librarians, library schools, and the ALA's role in national and international events. ALA Headquarters staff and ALA members rely on the archival resources to document policy decisions and trace the origins and development of units and activities. They also find the archives a treasure of old photographs to enhance promotional and historical articles. The first-time researcher invariably winds up sidetracked by an enticing array of materials. Time flies as one thumbs through old photographs, brochures, and personal papers found nowhere else. People around the world phone or write the ALA Archives with research questions: for example, a Japanese researcher wants the 1916 proceedings of the American Library Institute; another seeks a photo showing Mr. and Mrs. Melvil Dewey together. To give an idea of the diversity in the ALAA, we recently strolled down the aisles and pulled some materials you might find interesting.

A rare photo of Melvil Dewey and his wife, Annie, at the Saratoga Springs, N.Y., conference in 1918. To their left: R.R. Bowker.

Eating, drinking, sleeping, and talking library work

In a February 9, 1905, letter, Librarian of Congress Herbert Putnam wrote Whitelaw Reid of the New York Board of Regents defending Melvil Dewey. Some people were out to "get" Dewey. They had filed a petition with the Board of Regents asking for his dismissal as New York State Librarian. Putnam didn't elaborate on the whos or whys of the issue, mysteriously referred to in his letter only as "incidents with which, in themselves, we other librarians have no concern."

But Putnam rose to counter charges of laziness and allegations that Dewey "spends a considerable part of each year away from his office." Putnam wrote: "Now to those of us who know Mr. Dewey professionally and who have seen him more or less intimately, and to those of us who know what are his methods of work, such a charge is as ridiculous as its motive appears to be contemptible. Mr. Dewey eats, drinks, sleeps and talks library and library work throughout the twenty-four hours, the week, the month, and the year. His physical whereabouts at any one time is immaterial. He carries his business with him to his home; he brings it back with him in the evening and in the morning to his office. He is, in effect, as much engaged with it at Lake Placid as he is at Albany; it is as much his play as it is his work. He is the clearest example in our profession of a man who cannot shake off his business."

And besides! "Everyone who knows Dr. Dewey," Putnam continued, "knows that he is an actual and a keen sufferer from hay fever and that during certain months, existence in Albany is intolerable to him. During these months he moves his desk to Lake Placid. But is he serving the city of Albany or the state of New York?"

How many of you knew Melvil Dui had 616.202?

Shooting the Saguenay

To start our tour, we have an example of what we have lost in this day of jet travel. The highly touted "Post-Conference Trip" lured thrill-seeking librarians in the "good old days." In this photo (next page), following the Montreal meeting, a group of librarians and R.R. Bowker are about to embark on what could have been a hair-raising adventure: the 1900 Saguenay River Trip. An accompanying program illustration shows a big paddle-wheeled steamer running some rough-looking Canadian rapids. When it was all over, the ladies brought back practical souvenirs.

Maynard Brichford is university archivist at the University of Illinois/Urbana-Champaign. **Deborah Beckel** is instructional services librarian and archivist of the Lynchburg (Va.) College Library.

These conically shaped bonnets, brought back as souvenirs of the 1900 post-conference trip, must have inspired beekeepers everywhere.

"One wheel of the library wagon"

The Archives also contain an old photograph of some one hundred children (not shown) lined up in the snow outside the Carnegie Public Library in Bradford, Pa. So many children, but where were the children's librarians?

This concern prompted a September 12, 1924, letter from Louise Latimer, director of work with children at the Washington, D.C., Public Library. Writing to Sarah Bogle, then assistant secretary to ALA in Chicago, Latimer expressed her fear that a real children's librarian may become an extinct animal. Latimer explained some of the reasons why: "All librarians seem to consider it a promotion to put her in adult work, especially to make her a branch librarian. This weakens the standing of work with children. . . . "

For "what do we offer her, in the library world, of a clearly defined position and suitable salary? She is called a children's librarian. What is a children's librarian? Anything from a little girl, of limited education, assigned for a few hours for work in a children's room to a Miss Power or a Mrs. Walker ripely prepared for work. Isn't the blanket term, children's librarian, which was suitable in the early days of the work, at the bottom of our cloudy thinking on the subject? With the tremendous growth in it and the heavy responsibility put on those carrying this work, can we not back them up with a revised thought on the subject?

"If we are to get anywhere in children's work, we must think clearly about the training of our workers with children. If we do not progress in children's work we will not get far in adult work since one is the feeder of the other. . . . Children's work is only one wheel of the library wagon but if that wheel breaks down so does the wagon."

Latimer proposed ". . . training for children's work carefully planned out in grades by which a person can be promoted from grade to grade. I want to see these grades given names for there is much in a name. I want to see that blanket appellation, children's librarian, reconsidered."

> I am afraid a reel children's librarian may become an extinct animal. There are many reasons for this; all librarians seem to consider it a promotion to put her in adult work, especially to make her a branch librarian. This weakens the standing of work with children. I feel so strongly that a person devoting her life to children's work and books knows little enough just as a doctor working with children knows little enough of children's diseases after a life devoted to this study.

Louise Latimer asks for a clearly defined position for the children's librarian of 1924.

Other general classes of books with which we are as yet almost entirely unsupplied and which are much needed are: Soldiers' French books, military manuals not published by the Government, aviation, physical training, military sanitation, bookkeeping, simple text-books of English, maps and atlases, and histories of the United States and European countries. Also books of plays.

Camp Beauregard, La., library (above) was "almost entirely unsupplied" with such general classes of books as military manuals not published by the Government . . . and maps and atlases, according to a letter from the librarian (left).

A $110 typewriter

Out of World War I came this October 20, 1917, letter from librarian George Strong at Camp Beauregard, Louisiana. ALA had begun providing library service to the American armed forces that same year. Writing to Matthew Dudgeon, director of camp libraries in Washington D.C., Strong urgently requested more books for enlisted men. Musts for reading, according to Strong, included "Soldiers' French books, military manuals not published by the Government, aviation, physical training, military sanitation, bookkeeping. . . ." As an afterthought, Strong wrote on page three: "Fiction will always be acceptable."

He had other reasons for writing and went on to hint at a few problems he had encountered in his role as a wartime camp librarian: "You will doubtless send me soon instructions as to the best method of ordering and requesting books and supplies and of handling bills. Until such instructions come I shall continue to find it necessary to purchase supplies necessary to keep the Camp Library running. I hope that all the expenses I have incurred will seem reasonable to the ALA, but I am prepared to pay out of my own slender pocket any that are judged unwise."

No doubt George Strong sacrificed much for the war effort. But there was a limit. Strong's six-page handwritten letter proved his point: "I very much need a typewriter, as you realize.

"I wired you two weeks ago that I was going to order one, but on second thought decided to wait about it, and after hearing from you about [the] need for economy, have been trying to do without one. . . . If the Association cannot provide one, I may think it necessary to buy one for myself though I can hardly afford to . . ."

But no cheap typewriter, please. "An agent for the L.C. Smith typewriter was in here today," Strong reported. "Their latest model, with an extra card platen, is priced at $110, and he thinks the government discount could be secured."

"Whipping the devil 'round the stump"

The professional status of the occupants of Mr. Carnegie's buildings was also dependent upon the development of library education. In 1925, Director James I. Wyer of the New York State Library School wrote Sarah Bogle about his visit to the Carnegie Corporation to seek support for library schools. The views of the corporation, as represented by Frederic Keppel and Elihu Root, opposing grants to "state supported . . . teaching institutions" prompted Wyer to suggest that a grant be given to ALA for its "administration and allotment."

While this "will be only whipping the devil 'round the stump, yet it might meet the case." Mr. Wyer is pictured with members of the 1922–23 New York State Library School class.

Visiting Mr. Coolidge

In 1926, the ALA hosted visiting foreign librarians after its 50th annual meeting in Atlantic City. Herbert Putnam reported to ALA secretary Carl Milam that a visit to President Coolidge in the White House "may be safely counted upon."

Among those who visited "Silent Cal" were (below) Susan Neukircher of Frankfurt, Germany; Mary Parsons of the American Library in Paris; and Mrs. Isak Collijn, wife of the National Librarian of Sweden.

Hiding their eyes from "Silent Cal?"

Notes from a field agent

If federal aid to libraries was controversial, aid from foundations was a deeply appreciated tradition. We turn to the November 1933 field notes of Tommie Dora Barker, ALA regional field agent. From 1930 to 1935, regional field work in the South was financed by the Carnegie Corporation through a grant to ALA. Perhaps Ms. Barker met people such as the ones pictured enjoying a quiet oak-shaded afternoon outside the Couchwood Library.

Her pace was normally more hectic, as in Webster Parish, La. The agent's notes read: "It seemed desirable to make use of the extension of aid [from the Rosenwald Fund] to get over to the parish the fact that the parish would be expected to continue the library on an adequate level of support after the Fund withdrew and, if additional aid was given, it would be on the understanding that the parish intended to work out a means of financing the library . . .

"Talks on the library were made before Book Club of Minden, the Lion's Club, a rural PTA, and Minden PTA, to a community meeting at Heflin and to a Negro assembly at a community fair. Visited two other rural communities and interviewed school principals, also rural library board member and mayor of Minden." Here we have a dynamo to rival Dewey.

Classifying by age and sex

While ALA was setting up a library in Mexico, the United States was engaged in World War II. We turn to a Charlotte (N.C.) Public Library leaflet entitled, "Wartime Activities—1942: Training Through Books." Suggested "preparedness" reading materials are arranged in categories according to age and sex.

The "Man of Draft Age" should read books and pamphlets on topics such as auto mechanics, radio and telegraph, and camouflage methods, while the "Young Woman" would do better to study nursing, nutrition, and playground direction. In case she's needed to "replace men in industry," she should also read about auto mechanics, radio, and "many other subjects." The women pictured at the WPA library in Hinesville, Ga. (next page), often chose "many other subjects."

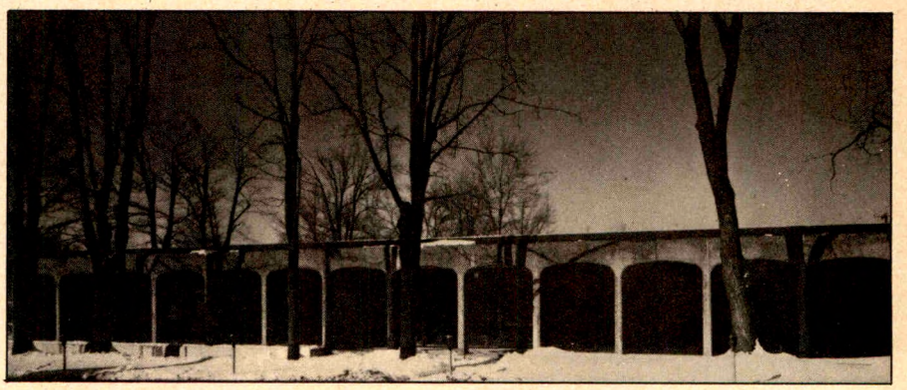
Readings suggested for the "young woman" (left) and the "mature woman" (rt.).

The American spirit in action

Perhaps less well known than the American Library in Paris of the 1920s is the American Library in Mexico. Dedicated in 1942, the Biblioteca Benjamin Franklin was located in a beautifully ornate building. In an August 14, 1941, confidential memorandum prepared by Carl Milam and Marion Milczewski, the ALA justified its plans for the proposed American Library in Mexico.

"Books and other publications of the United States are not now adequately represented in the libraries of Mexico," the two explained. "This does not appear to be because of lack of interest, but because of the high cost of American books and methods of distribution different from those prevailing in Latin America . . . . It is proposed, therefore, that an American Library be established in Mexico City, with funds from the United States (and possibly from the American residents in Mexico); to be stocked mainly with American books, periodicals, pamphlets and other educational and informative materials; for the use of all who are interested in the cultural, social, industrial and governmental activities of the United States." In building good relations with our southern neighbors, we hoped that the library, and some English lessons, would enable Mexican children to read those American books, periodicals, and pamphlets.

During WWII, women at a WPA library concentrate on "preparedness" reading (see p. 111).



"Closer to the people"

The Federal government did get more involved in libraries, and we couldn't end our tour of the ALA Archives without looking at a library that the Library Services and Construction Act (LSCA) helped build. Pictured is the library in Kendallville, Ind., a contestant in the 1968 Library Buildings Award Program. Featuring "precast concrete wall panels" and a "prestressed concrete floor and roof system," this building was designed to hold 60,000 vols., serve a pop. of 15,000, and employ a minimum staff of four. □

On using the Archives

Now that you have an idea of the range of materials found in the ALA Archives, we invite you to visit the Archives from 8 a.m. to 5 p.m., Monday through Friday, or call or write to:

Maynard Brichford, University Archivist
University of Illinois at
Urbana-Champaign
19 Library, 1408 West Gregory Drive
Urbana, IL 61801. Tel.: (217) 333-0798

Before beginning research you may wish to consult the following publications:

For a detailed inventory of archival holdings, you may order the *Guide to the American Library Association Archives* (Chicago: ALA, 1979); $2.50 paper (8p. plus 2 microfiche).

For library source material in other repositories, you may order the *National Catalog of Sources for the History of Librarianship* (Chicago: ALA, 1982); $10 paper (7p. plus 3 microfiche).

For a study of the Association, you may order Dennis Thomison's *A History of the American Library Association 1876–1972* (Chicago: ALA, 1978); $15 paper (318p.).

For a bibliography, see Michael Harris and Donald Davis, Jr., *American Library History: A Bibliography* (Austin: University of Texas, 1978); xix, 260p.

For biographies, see Bohdan Wynar, George Bobinski and Jesse Shera, *Dictionary of American Library Biography* (Littleton, Colo.: Libraries Unlimited, 1978); xxxix, 596p.

For contemporary journal accounts, see *Library Journal* vols. 1-31, September 1876–1906; *ALA Bulletin* vols. 1-63, January 1907–December 1969; *American Libraries* vols. 1-14, January 1970–December 1983.

MITINET:

A system for retrospective conversion

by Hank Epstein

Ed. note: This is the second installment of a new monthly service designed to alert readers to microcomputer programs of special interest to library professionals.

THE MAJOR PREREQUISITE TO implementing most library automation systems is the generation of a computer-readable database containing the library's bibliographic information, plus local-holdings data such as call number, copy, and location. Circulation systems, online catalogs, and microfiche COM catalogs require the database to be in the MARC tape format.

The Apple-based MITINET (pronounced mighty-net) system uses several forms of technology—including a special microfiche edition of the Library of Congress MARC file and microcomputers—and a COM vendor (Brodart) to assist the library in generating a MARC database. MITINET minimizes the amount of information the library staff must provide about the collection, improves the accuracy of the library staff input, and converts library data to a form required by the COM vendor to generate the library's database and COM catalog.

Four steps

The system produces a library database and COM catalog in four steps. The first step, performed by the library staff, is to match the library's titles with a set of microfiche containing all LC MARC English-language titles for books and audiovisual materials. When a title is matched, the LC Card Number (LCCN) and check digit are recorded on the catalog card. Libraries average 60 titles per hour for this step. As part of a Science Resource Sharing project funded by an ECIA Chapter 2 grant, the Board of Cooperative Educational Services (BOCES) of Nassau County at its NERC Resource Center in Carle Place, N.Y., generated a union catalog of science titles held at eight local high schools. As an example from this project, Figure 1 shows a record from the LC MARC fiche. The check digit, used to eliminate LCCN keying errors, appears in brackets next to the LCCN.

In the second step, the complete information required to convert this title is entered on the Apple screen, shown in Figure 2. The library has entered only the information shown in bold: the LCCN and check digit, the library's call number, and copy and location data for all copies—a total of 18 characters in this example. This information is all that is required by the COM vendor to generate one title in the library's database and COM catalogs. Libraries average 121 titles per hour for this step. All the remaining data on the Apple screen is automatically presented by the system, including the custom locations (BOOK, VIDEOTP, etc.) created by the library during the first use of MITINET. Each library creates its own locations, which appear on all future screens.

Vendor produces COM catalog

In step three, the library sends the completed floppy disks, each containing data for 400 titles, to the COM vendor. The COM vendor then copies bibliographic data from the LC MARC file (and sometimes other files), adding the library's holdings data collected from the Apple screen in Figure 2, and adds this record to the library's database using the LC MARC tape format. This process is continued until the library has completed the

conversion. The same procedures can be used to update the database and generate new COM catalogs periodically. The hit rate for the Nassau BOCES-NERC project was 99 percent, and the conversion was completed in a few weeks.

Finally, if the library or school district requires a COM catalog, the library's database tape is used by the COM vendor to generate a local (or union) COM catalog. Figure 3 (on previous page) shows the entries generated in the COM catalog from the data entered by the library (the 18 keystrokes in Figure 2). In this example, one author entry, one title entry, and two subject entries were generated. Cross references were also automatically generated by the COM vendor for this converted title (Figure 4), since one of the subject terms was "Medicine." All the data in Figures 3 and 4 appear in the proper filing locations in the library's COM catalog, under authors, titles, and subjects. Since the Nassau BOCES-NERC project was a union catalog project, Figure 5 shows a title converted by three different high schools, each with its own call number.

Cost and system requirements

The cost for the MITINET software is based on the number of branches or buildings performing conversion, and varies from $250 to $85 per building or branch. MITINET runs on a 40-column, 48K Apple IIe or II+ with DOS 3.3 and one or two disk drives. A step-by-step user manual is provided. The IBM PC and PCjr versions will be available later in 1984. The LC MARC fiche, containing over 1.1 million unique titles, costs $95 per set. The cost of the database tapes from the COM vendor varies from 10 cents per unique title if tapes and COM catalogs are required to 23 cents if no COM catalogs are required.

COM catalog costs depend on the number of unique titles in the catalog and copies required.

This year, 42 Wisconsin libraries are using MITINET to convert 750,000 titles, representing about half the total statewide conversion. For more information, contact Information Transform, Inc., 502 Leonard Street, Madison, WI 53711, 608-255-4800. Requests for cost estimates should state the type of library, the initial purpose of conversion (COM catalog, circulation, online catalog), the number of branches or buildings, and the approximate number of titles. Information and cost estimates will be provided without obligation. □

Yes, we have a less expensive way to access information. We charge for connect time only.

At VU/TEXT we're aware of how searching costs can add up. So we charge you for connect time only. No search unit charges. No telecommunications charges. No additional charge for 1200 baud. And, in most cases, no display or print costs.

And that goes for such full-text databases as The Washington Post, The Philadelphia Inquirer, The Wall Street Transcript, and more.

For complete information write or call nationwide 800-258-8080. In PA 215-854-8297.

resources

Noting that February is Black History Month, AL offers a special roundup of recently received items pertaining to black people and culture and Africana—Ed.

The Words of Martin Luther King, Jr. features over 130 quotations excerpted by Coretta Scott King from her husband's sermons, speeches, and writings. The 112-page work also contains 16 black-and-white photographs and a detailed chronology of King's life. $9.95 from Newmarket Press, 3 E. 48th St., New York, NY 10017 (83-17306, 0-937858-28-5).

Runaway Slave Advertisements is a valuable aid to the study of slavery from the 1730s to 1790. The four volumes, compiled by Lathan A. Windley, collect advertisements placed in newspapers by slaveowners to reclaim their escaped slaves. The advertisements contain such information on the slave population as sex, age, birthplace, physical characteristics, deportment, literacy, how and why they ran away, and possible destinations.

Each volume covers separate states and is available individually: Maryland, approx. 440 p., $47.50; Virginia/North Carolina, approx. 470 p., $47.50; South Carolina, approx. 780 p., $65; and Georgia, approx. 200 p., $35. The entire set is $150. Greenwood Press, 88 Post Rd. West, POB 5007, Westport, CT 06881 (83-1486, 0-313-23025-0).

Black Women Against the Odds is an 88-page 1984-86 desk calendar featuring portraits and biographies of over 100 women prominent in education, civil rights, religion, government, the arts, and other fields. $7.95 plus $1.50 shipping from GMG Publishing, 25 W. 43rd St., New York, NY 10036.

African maps. *Africa Today: An Atlas of Reproducable Maps* contains an assortment of African maps, with duplication rights granted for in-library or in-school use. 100 pages of maps, tables, and graphs depict the continent's population, resources, commodities, languages, demographics, and other characteristics; an additional 53 pages feature individual country maps produced by the CIA and the State Department. The volume is available in either perfect-bound paperback or loose-leaf editions for $23.50 plus $1.50 shipping from World Eagle, 64 Washburn Ave., Wellesley, MA 02181 (83-50580, 0-9608014-2-1).

The Black Resource Guide is a national directory of over 1,500 black organizations, businesses, publishers, radio and television stations, colleges, advertising agencies, elected officials, judges, and other sources of assistance or information. The 123-page paperback also contains black population totals for states and cities, and other statistical data. $15 from Black Resource Guide, Inc., 501 Oneida Pl., Washington, DC 20011 (82-83692, 0-9608374-0-X).

Bibliographies for young people. Charlynn Spencer Pyne of Howard University's Moorland-Spingarn Research Center has compiled two free black studies bibliographies for young people.

March on Washington: A Guide to Resources, prepared to commemorate the 20th anniversary of the 1963 March on Washington for Jobs and Freedom, contains 11 pages of books, articles, and audiovisual materials.

Frederick Douglass: A Resource Guide for Young People lists books for elementary school students and high school students, as well as resources for teachers and librarians. The 13-page guide also includes a chronology of the abolitionist leader's life.

Requests for the free bibliographies, available in a limited quantity, should be sent to the Reference Dept., Moorland-Spingarn Research Center, Howard University, Washington, DC 20059.

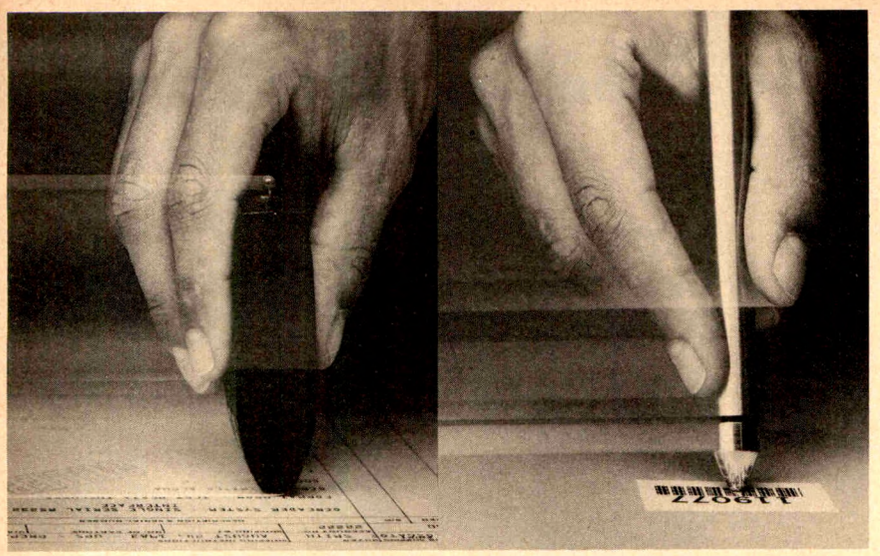
Black-heritage colleges. *The Morton Guide to American Colleges with a Black Heritage* contains information on majors, costs, location, and historical background of over 100 colleges and universities. $10 plus $1.75 shipping from the Robert R. Morton Memorial Institute, Inc., POB 1070, Gloucester, VA 23061.

special libraries

Newspaper library guidelines. After 10 years the American Newspaper Publishers Association Foundation has revised its primer for newspaper librarians. *Guidelines for Newspaper Librarians* is a 134-page looseleaf manual written by members of the Special Libraries Association Newspaper Division. Among the topics covered are setting up the library, manuals, in-house training, filing systems, clipping collections, photographs, microfilming, and library automation. $20 with binder, $15 without from ANPA Foundation, The Newspaper Center, POB 17407, Dulles International Airport, Washington, DC 20041.

Introduction to special libraries. *Special Libraries and Information Centers* is an introductory text on the operation and management of special libraries. Author Ellis Mount has aimed his book at library science students and those in related fields who need to deal with the special library. The 200-page volume discusses planning, budgeting, staffing, marketing, technical services, facilities and equipment, collection development, and other areas. Appendices offer descriptions of special libraries in various subject areas and a selected bibliography. $25, paper, from the Special Libraries Association, 235 Park Ave. South, New York, NY 10003 (83-571, 0-87111-282-5).

Hospital administration collections. *Collection Development Policy of the Library of the American Hospital Association* publishes the guidelines on selection, acquisition, and withdrawal used in the nation's leading hospital and health services administration collection. The policy gives the criteria for scope, depth,



HOW TO COMPUTEREYES™ YOUR COMPUTER.

Now you can give your computer eyes. Eyes that read OCR-A or MICR or bar code.

Computereyes. The cost-saving alternative to expensive manual data entry by keyboard.

Faster. And far more accurate.

Computereyes come as hand held wand readers and desk top slot readers, complete with standard parallel or RS-232C serial interfaces. We're the only company that offers all these keyboard interfaces: IBM 3178, 3277, 3278 and 5251. Memorex 2078. Telex 178 and 278. Mohawk 2192 and ITT-Courrier 2700.

A single board addition to your IBM* PC or XT,* along with a wand or slot reader, allows your personal computer to read OCR-A or MICR or bar code. We also offer the software to let you print OCR-A and bar code media with your Epson series 80 printer.

Whether you use Computereyes for remittance processing, file folder tracking, document control, factory data collection, point-of-sale or any of thousands of applications, Caere products can decrease paper handling and increase productivity.

So if you're looking for keyless, automatic data entry, you've spotted the solution. To see even more, just fill out and return the coupon below:

language, format, geography, and date of imprint for materials in major subject categories based on the National Library of Medicine's Medical Subject Headings. The publication can serve both as a basis for hospital libraries developing their own policies and as a guide to the American Hospital Association's collection. 127 p., paper, $26.50 ($21 for AHA institutional and personal members) from the American Hospital Association, POB 96003, Chicago, IL 60693 (83-11893, 0-87258-414-3).

academia

The Electronic Library: *The Impact of Automation on Academic Libraries* reports on a series of comparative case studies examining the effects of computer-based systems and services on the structure and functioning of the libraries of Northwestern University, Stanford University, and the universities of Chicago and Washington. Authors Hugh F. Cline and Loraine T. Sinnott designed their study to provide perspective on policy issues of current concern to academic librarians and to contribute to the social-scientific study of complex organizations. 186 p., $19.95 from Lexington Books, D.C. Heath and Co., 125 Spring St., Lexington, MA 02173 (81-47871, 0-669-05113-6).

Subject collections. *The Landscape of Literatures: Use of Subject Collections in a University Library* is based on a study conducted by Paul Metz of the use of subject literatures at the libraries of Virginia Polytechnic Institute and State University. The results identify the subject areas of interest to faculty and students in various academic disciplines, as well as showing ways in which reading patterns may be a result of basic library policies. No. 43 in the Association of College and Research Libraries Publications in Librarianship series, the 143-page paperback is $30 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-15511, 0-8389-3286-X).

CAS Online offers flat academic fee. Chemical Abstracts Service is offering academic libraries unlimited use of its CAS Online database between 2 p.m. and 8 a.m. EST for a flat monthly fee. $500 covers all billable charges except offline prints, which are billed at normal rates. Academic subscribers can also purchase manuals and user aids and send staff to workshops at half price. Chemical Abstracts Service, POB 3012, Columbus, OH 43210-0012.

Academic online searching. *Online Bibliographic Database Searching in College Libraries* publishes the results of a survey of 252 libraries conducted by David Carlson and P. Grady Morein. Among their findings: 65 percent of the libraries responding presently offer online searches, with an additional 13 percent planning to begin the service within a year; among libraries not conducting searches, the

three most frequently cited reasons were expense, insufficient use anticipated, and lack of staff; and 73 percent of the respondents either charge for the service or intend to begin charging within the year.

The 132-page paperbound report, no. 4-83 in the Association of College and Research Libraries' CLIP Note series, also reproduces policy statements, promotional literature, search request forms, and other documents from over 40 academic libraries. $19 ($15 to ACRL members) from ACRL/ALA, 50 E. Huron St., Chicago, IL 60611 (0-8389-6624-1).

microform

Introducing IBM PCjr is perhaps the first in what promises to be a flood of forthcoming titles devoted to the newest product from "Big Blue." The 160-page paperback, by Douglas Cobb and Chris DeVoney, contains a detailed look at the PCjr's hardware components and its 39 software packages, a discussion of the machine's history and background, and comparisons between the PCjr and other microcomputers. $9.95 from Que Corporation, 7999 Knue Rd., Suite 202, Indianapolis, IN 46250 (83-63252, 0-88022-065-1).

Datapro Reports on Microcomputers is a looseleaf service providing information on 30 business-oriented microcomputers; 40 expansion cards, monitors, printers, and other peripherals; and 40 major software products. Subscribers to the service will receive monthly updates covering changes in the original material and other new information, as well as having access to a telephone hotline providing up-to-the-minute information.

Subscribers will also receive the results of a survey of nearly 6,000 microcomputer users conducted by Datapro, rating 126 models, 19 primary operating systems, 13 software packages, and 90 peripherals.

Annual subscriptions are $600 from Datapro Research Corp., 1805 Underwood Blvd., Delran, NJ 08075. For more information write Datapro or phone 800-257-9406.

Titles for computer illiterates. Sybex, Inc., which already publishes an extensive line of computer books, has launched the Sybex Popular Series of titles aimed at readers who do not yet own or use a microcomputer. The first two mass market paperbacks in the series are *Family Computers Under $200,* by Doug Mosher, comparing the six most popular low-priced microcomputers (83-50715, 0-89588-149-7); and *Overcoming Computer Fear,* by Jeff Berner, described as an entertaining and informative "pep talk" to help novices deal with computer anxiety (83-50714, 0-89588-145-4). $3.95 each from Sybex, Inc., 2344 6th St., Berkeley, CA 94710.

The Specialware Directory lists companies that produce over 200 microcomputer programs designed for or suitable for special education. The 97-page paperback gives information on each firm and describes its software products, giving curriculum areas, grade levels, hardware requirements, and other details. The companies are indexed by handicap, hardware, educational level, professional group (administration, teacher training, guidance counselors, etc.), instructional approach, and curriculum area, and the software titles are also indexed. $13.95 from LINC, 1875 Morse Rd., Suite 215, Columbus, OH 43229.

Complete microcomputer sourcebook. The *Bowker/Bantam 1984 Complete Sourcebook of Personal Computing* serves as an introduction to home uses of microcomputers and a comprehensive product directory. The manual opens with a basic guide to selecting and learning about micros, but the major portion of the 660-page volume is devoted to extensive listings of hardware, software, peripherals, publications, consumer databases, user groups, and companies. Other features include a glossary and checklists to use in choosing hardware and software. $24.95 cloth from R.R. Bowker Co., 205 E. 42nd St., New York, NY 10017 (0-553-05055-9); $18.95 paper from Bantam Books, 666 5th Ave., New York, NY 10103 (0-553-34086-7).

"Micros in Libraries" proceedings. The proceedings of the International Conference on the Application of Mini- and Micro-Computers in Information, Documentation, and Libraries have been published by the North-Holland Publishing Co. Papers presented at the conference, held last March in Tel-Aviv, cover such topics as characteristics of future information systems; applications in chemistry and agricultural libraries; technical processing applications; applications in numerical and factual information; and the communications revolution. *The Application of Mini- and Micro-Computers in Information, Documentation, and Libraries,* approx. 810 p., $85 from the American distributor, Elsevier Science Publishing Co., POB 1663, Grand Central Station, New York, NY 10163 (0-444-86767-8).

Personal Software is a new magazine covering the consumer software scene. Each monthly issue features detailed software reviews, listings of new releases, and three "Buyer's Guides" giving an overview of available programs in such areas as preschool education, portfolio management, and board games, all examined in the premier issue. Annual subscriptions are $24 from Hayden Publishing Co., 50 Essex St., Rochelle Park, NJ 07662. *(Continued on p. 118.)*

RISE OF THE FIGHTER AIRCRAFT: 1914-18

By Richard P. Hallion

How tactics and technology accelerated at the beginning of the modern arms race. 208 pages, 50 photos, drawings, map. $18.95 Spring 1984.

AIRCRAFT DESIGN

By Ed Heinemann, K. van Every, and R. Rausa

What it takes to design and build a modern combat aircraft, for the non-technical reader. 288 pages, 48 charts, 40 drawings, $19.95 Available Spring 1984.

management

Management Techniques for Librarians, designed as a textbook for library management courses, emphasizes the basic issues and concepts of management. Author G. Edward Evans has added expanded coverage of collective bargaining, merit systems, more library documents and cases, and updated reading lists to his 1976 first edition. Chapters are devoted to management history and styles, delegation, decision-making, planning, motivation, leadership, fiscal management, and other areas. 330 p., $21 from Academic Press, Inc., 111 5th Ave., New York, NY 10003 (82-6875, 0-12-243856-6).

Health science libraries. Tantalus, Inc., a library management consulting firm, and Case Western Reserve University recently conducted a study of costs, services, and usages at 95 health science libraries. Two reports on costs and usages, *Principal Findings and Patterns of Burden* and *Economic Aspects* are available for $9 for the pair, prepaid, from Tantalus, Inc., 2140 Lee Rd., Suite 218, Cleveland, OH 44118.

Volunteer program. The Berkeley (Calif.) Public Library has developed a 28-page booklet describing its volunteer program, which consists of both in-house and outreach volunteers. The booklet, including the program's policies and procedures, sample forms, and flyers, is available for $4 from Janet Turman, Volunteer Coordinator, Berkeley Public Library, 2090 Kittredge St., Berkeley, CA 94704. Make checks payable to the Berkeley Public Library Gift Fund.

info briefs

Number of databases shows record jump. Figures released by Cuadra Associates, publisher of the *Directory of Online Databases,* show a record increase in the number of new databases over the past six months. The latest issue of the quarterly directory lists 1,878 databases, up from 1,596 six months earlier.

The number of database vendors and producers is also increasing, although at a slower rate. The current directory lists 272 different vendors, up from 244 six months ago, and 927 database producers, up from 820.

Publisher Carlos A. Cuadra pointed out a notable trend in the industry: the emergence of databases from Japan containing Japanese industry and corporate data. "However, interested users will need to brush up on their Japanese," he added, "since many of these databases are available only in a Japanese/Chinese character set."

Single copies or subscriptions to the directory are available from Cuadra Associates, Inc., 2000 Wilshire Blvd., Suite 305, Santa Monica, CA 90403.

Videotex Project Reviews II, by Robert E. Widing and W. Wayne Talarzyk, examines 26 North American consumer and business viewdata and teletext projects. The information, which reflects the state of the fast-changing industry through the second quarter of 1983, was obtained through interviews with participants in the projects, published reports, and materials supplied by respondents.

The 115-page paperbound report updates a 1982 paper by the authors published in the Ohio State University College of Administrative Science Working Paper Series. $6 prepaid from OCLC, Dept. Box ONB, Columbus, OH 43265. OCLC members only may be billed by sending their orders, indicating symbol and network, to OCLC Documentation Dept., 6565 Frantz Rd., Dublin, OH 43017-0702.

Computer crime prevention. *Assets Protection* magazine recently changed its name to *Data Processing and Communications Security* to reflect its increased coverage of computer crime and information protection. The bimonthly journal features articles on security, fire, and environmental controls for computer facilities; security hardware and software for data processing systems and communications networks; contingency/disaster planning and recovery; legal aspects of protecting information; and related topics. The January/February issue is a buyers' directory of security products and services in over 100 categories. Six issue subscriptions are $24 to individuals and $28 to libraries, with sample copies available from Assets Protection Publishing, POB 5323, Madison, WI 53705 (0098-9169).

Programming text for librarians. *Introduction to Computer Programming for Information Services* teaches librarians and library school students basic programming concepts used in designing programs for information storage and retrieval systems. Written by Roger C. Palmer of the UCLA Graduate School of Library and Information Science, the text is used with the inexpensive Timex-Sinclair 1000 or 1500 microcomputer to create a complete computer laboratory to perform programming assignments at home for under $100.

The text comes in a trade edition with three-ring binder for $24.95 (0-913203-02-5) or in a student edition without the binder for $20 (0-913203-01-7). Cibbarelli and Associates, Inc., 11684 Ventura Blvd., Suite 295, Studio City, CA 91604.

Modem Notes is a new newsletter "for everything you can access by computer and telephone," as the subtitle proclaims. Editor and publisher Katherine Ackerman promises news from the online industry, tips for saving money online, search strategy ideas, reviews of new databases, and other features. 12 monthly issues for $24 from Modem Notes, POB 408472, Chicago, IL 60640.

i&r

NCLIS report on I&R. The National Commission on Libraries and Information Science has issued the final report of its Community Information and Referral Services Task Force. The task force was established in 1980 to define the role of libraries in providing community I&R services and to identify ways libraries can fulfill that role more effectively.

The 30-page paperbound report offers 13 recommendations for improving community I&R services through education, policy and legislation, promotion, and experimentation and study. Single copies are free from NCLIS, GSA Regional Office Bldg. #3, 7th and D Sts., N.W., Washington, DC 20024. Multiple copies are available from the Government Printing Office (83-12191, GPO stock no. 052-0003-00928-5).

Nontraditional education directory. *The Complete Guide to Nontraditional Education,* by William J. Halterman, provides information on institutions that give academic credit for experiential learning, offer self-paced correspondence study, and award academic credit simply by examination. The 172-page paperback, aimed at mid-career adults facing the need for a degree for career advancement, also offers tips on assessing the credibility of a school, Department of Defense and Veterans Administration Programs, testing and financial aid, and places to go for information on Bible colleges and nontraditional law and medical schools, which fall outside the scope of the book. $7.95 from Facts on File, Inc., 460 Park Ave. South, New York, NY 10016 (82-12105, 0-87196-798-7).

I&R project manuals. The Information and Referral Project of California's Serra Cooperative Library System has created a technical mechanism for integrating community services listings and bibliographic data in a single computer-generated library catalog.

Documents produced by the project, which was funded by an LSCA grant, include: a pro-

cedure manual explaining how to develop and maintain a community I&R service; a training manual showing how to use the combined catalog of community services and bibliographic data as a reference tool; an operator's manual covering technical aspects of data entry; an authority file containing the Table of Human Services Classification System and the equivalent LC subject headings; and an authority list of terms, a cataloging reference document for use with community service data.

For information on obtaining the documents, contact the San Diego County Library, Technical Services, 5555 Overland Ave., Bldg. 15, San Diego, CA 92123.

Mental health information service. The Carnegie Library of Pittsburgh now has a volunteer psychologist available two hours a week to answer patrons' questions over the phone and in person. The psychologist recommends when to seek professional help, gives advice on the most appropriate type of help, and directs patrons to information on library materials, but does not offer direct counseling or therapy.

The library says that this addition to its Health Education Library Program (HELP) makes Carnegie the first public library in the nation to offer both a psychologist and a nurse as part of a health care information program.

women

Women's History Week. The National Women's History Project has issued a free catalog of books, posters, curriculum guides, recordings, and other resources in connection with National Women's History Week, March 4–10.

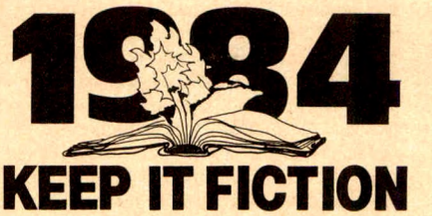
This year's full-color, 19-by-25-inch commemorative poster, featuring seven important women from American history, is available for $4 plus $1.20 shipping. The 1984 poster and posters from the two previous years are $9 plus $1.95 shipping. National Women's History Project, POB 3716, Santa Rosa, CA 95402.

Reagan's budget. *Inequity of Sacrifice: The Impact of the Reagan Budget on Women* details ways that the administration's 1984 budget disproportionately affects women in families, girls and young women, women in the workforce, and older women. Prepared by the Coalition on Women and the Budget, an ad hoc coalition of 38 organizations, the 82-page paperbound report is $2 from the National Women's Law Center, 1751 N St., N.W., Washington, DC 20036.

The Women's Review of Books is a new monthly tabloid publication, similar in format to *The New York Review of Books*, offering in-depth book reviews, listings of new titles, and news of feminist and alternative presses, periodicals, and bookstores. Institutional subscriptions are $25, personal subscriptions $12 from The Women's Review of Books, Wellesley College Center for Research on Women, Wellesley, MA 02181 (0738-1433).

EveryWoman's Legal Guide contains 28 chapters by lawyers and rights experts telling women how to protect their rights. Editor Barbara A. Burnett has divided the manual into sections on women as consumers and homemakers, women as family members, women as workers, women and crime, and how to use the legal system. Topics covered include displaced homemakers, child custody, discrimination and sexual harassment on the job, and family violence. The 576-page volume also includes a glossary of legal terms and a list of national hotlines. $19.95 from Doubleday & Co., 245 Park Ave., New York, NY 10167 (82-45476, 0-385-18523-5).

intellectual freedom



Be (Or)well-dressed in a "1984" T-shirt or sweatshirt. The burning-book design is in red and black letters with red and orange flames. T-shirts cost $10 and come in cream, light blue, or lilac. The crew pullover sweatshirts are $20 in white, jade, and grey. Washington State Coalition Against Censorship, 2101 Smith Tower, Seattle, WA 98104.

School censorship cases. The National Coalition Against Censorship, an association of 37 national nonprofit organizations joined to educate the public on intellectual freedom matters, has issued a *Report on Book Censorship Litigation in Public Schools*. The 18-page report summarizes current and recent cases in federal and state courts and includes a bibliography of reference materials, a list of titles involved in court cases, and sources to contact for legal papers.

Copies of the report are $5. Contributors of $25 to the NCAC become Friends of the Coalition and receive the report and *Censorship News*, a quarterly newsletter covering a broad range of First Amendment issues. NCAC's address is 132 W. 43rd St., New York, NY 10036.

Protecting the Freedom to Learn, by Barbara Parker and Stefanie Weiss, is an action guide to help citizens prevent library and school censorship in their communities. The handbook is divided into three sections: an overview of the growing censorship movement; suggestions on organizing to prevent censorship; and a lengthy appendix reproducing censors' materials, model book selection and library confidentiality policies, sample letters to officials and the media, and other documents. 125 p., paper, $9.50 from People for the American Way, 1424 16th St., N.W., Suite 601, Washington, DC 20036.

People for the American Way has also published a new study, "Attacks on the Freedom to Learn: Lessons of Fear (1982–1983)," documenting censorship attempts during that period. The 20-page summary describes attacks on classics, textbooks, and other materials for "secular humanism" and other charges, as well as efforts to pass state legislation requiring the teaching of creationism and permitting government-mandated school prayer. $2 from the above address.

Defending challenged books. The fall 1983 *Connecticut English Journal* is devoted to "Rationales for commonly challenged and commonly taught books." English teachers supplied rationales for *Go Ask Alice*, *Catcher in the Rye*, *Of Mice and Men*, and 22 other titles showing how the works fit curricular objectives, explaining ways they meet students' needs, and describing their literary value. The issue also features articles on challenged books in England and teaching challenged books in psychiatric schools. Single copies of the issue are $5.25 plus 50¢ postage from the Connecticut Council of Teachers of English, POB 2211, Enfield, CT 06082. □

currents

Betty Jo Marling

Don L. Tolliver

William H. Ptacek

Suzine Nicolescu

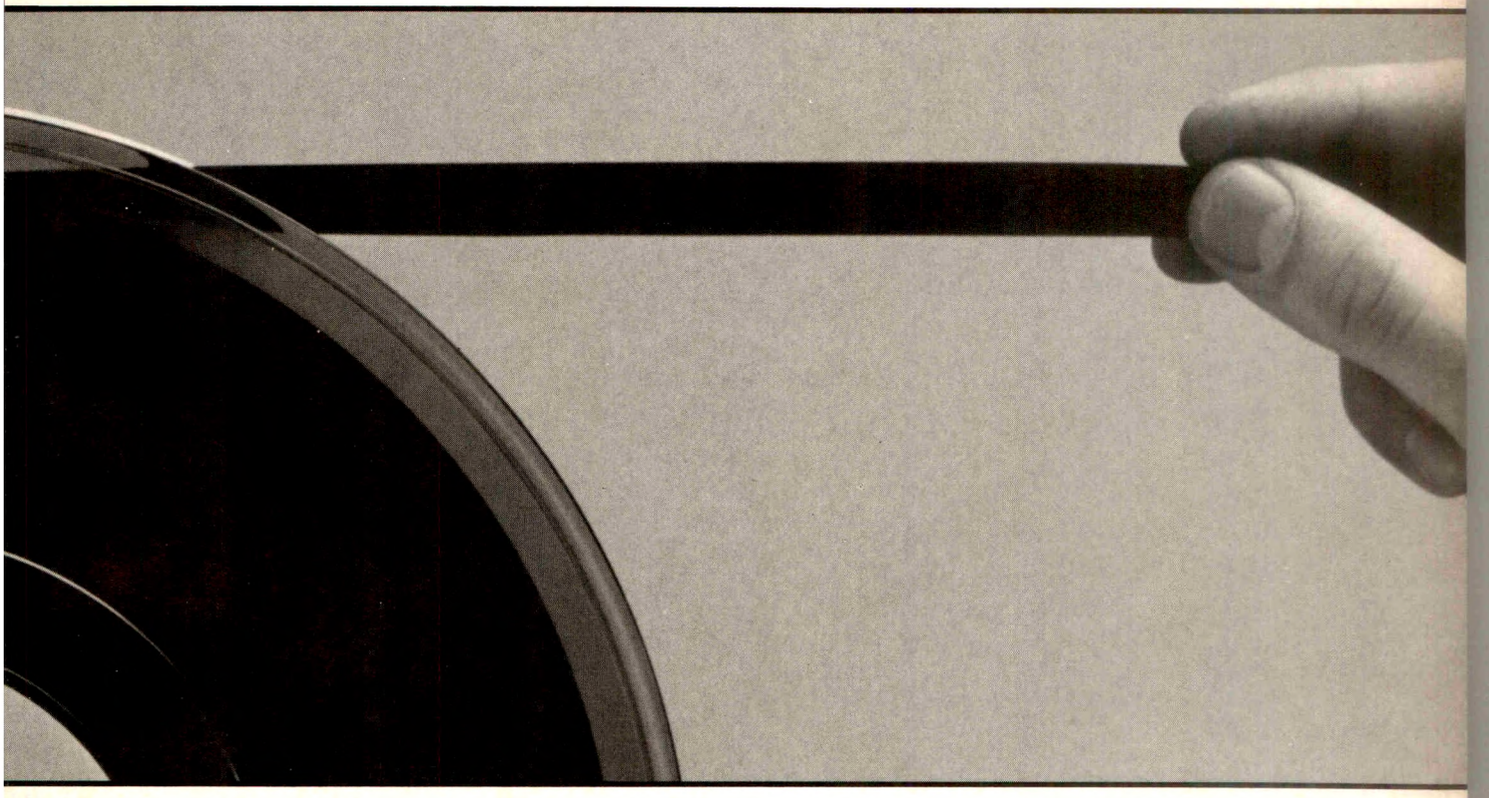
ALA member **Betty Jo Marling** is now library director/division chair for instructional resources at Maryville College in St. Louis, Mo. . . . In June ALA member **Don L. Tolliver** will become director of university libraries and professor of library administration at Kent (Ohio) State University. Currently serving as assistant director, planning and budget, of the University Libraries at the University of Michigan, Ann Arbor, Tolliver will succeed another ALA member, **Hyman W. Kritzer**, who retired Dec. 30 after 17 years of service. . . . Feb. 1 ALA member **William H. Ptacek** became director of the Louisville (Ky.) Free Public Library system. . . . Two ALA members recently received 1983/84 Fulbright grants: **Suzine Har Nicolescu**, director of information systems and services and associate professor in the Library Division at CUNY's Medgar Evers College, and **Judith A. Hoffberg**, editor and publisher of *Umbrella* magazine, a review medium for artists' publications based in Glendale, Calif. Nicolescu will conduct research on the cataloging/classification systems of library materials at the Ewha, Yonsei, and Sogang universities in Korea; Hoffberg will organize the records of Len Lye, a New Zealand kinetic sculptor and animated filmmaker. . . . The State Library of Iowa recently announced the appointment of **Martha Richardson**, former marketing representative for OCLC, Inc., as networking director. Two other staffers recently resigned to pursue personal interests: **Eileen Devine** as director of the Audiovisual Services Department, and ALA member **Jane Gray** as director of the Office of Library Development. . . . **William M. Roberts** is now university archivist of the University of California at Berkeley. . . . Five ALA members recently took office as presidents-elect of regional library associations: **Carl Stone** (S.C.); **Cheryl Bailey** (N.D.); **Evelyn P. Fancher** (Tenn.); **Barbara Tolliver** (Pacific Northwest); and **Roy D. Miller, Jr.** (N.Y.). . . . At Vanderbilt University, Nashville, Tenn., **Malcolm Getz** is now director of the library and **Mary Anne Kernan** retired as reference librarian and English bibliographer on Dec. 31. . . . In November **Guy Sylvestre** retired as national librarian of Canada. . . . ALA member **Pamela S. Vance** recently became assistant director for administrative services in the University Library System at the University of Pittsburgh (Pa.). . . . At OCLC in Dublin, Ohio, **W. David Penniman** recently resigned as vice president, planning and research, to become director of libraries and information systems at AT&T Bell Laboratories in New Jersey; **Phyllis Bova Spies** is now director of the Local Systems Division; and **Michael J. McGill** is director of the Technical Planning Department. . . . In December **Thomas Mann, Jr.**, resigned as director of administrative services of the University Library and Learning Resources at California State University in Long Beach to become an affiliate consultant with a Los Angeles-based library consulting firm. . . . Two ALA members recently joined the staff of Carnegie-Mellon University in Pittsburgh, Pa.: **Patricia A. FitzGerald** as head of the Engineering and Science Libraries and **Rachael Naismith** as reference librarian and publications coordinator of the Hunt Library. . . . Among the New York Library Association members cited for professional achievements at the recent NYLA conference were **Bill Sloan**, of the Circulating Film Library at the Museum of Modern Art in New York City, and two ALA members: **Richard S. Halsey**, dean of SUNY/Buffalo's library school, and **Ruth A. Velleman**, library director of the Human Resources Center in Albertson. Sloan received the Film/Video Round Table's Joan Clark award; Halsey was 1983 recipient of the Outstanding Services to Libraries award; and Velleman won the Library Services to the Disabled Round Table award. . . . Recent appointments at the Columbia University Libraries, New York, N.Y., include: **Roberta Blitz** as reference librarian and bibliographer, fine arts; ALA member **Mel Isaacson** as head of the Cataloging Department; **Tai-Er Ooi** as cataloger in the Law Library; and ALA member **Kenji Niki** as Japanese-language cataloger in the East Asian Library. . . . **Donald J. Sager**, former director of the Elmhurst (Ill.) Public Library, is now city librarian of the Milwaukee (Wis.) Public Library and director of the Milwaukee County Federated Library System. Sager is a past president of ALA's Public Library Association. . . . From the Graduate School of Library and Information Science of Simmons College in Boston, Mass., comes word that **Pamela Reekes McKirdy** has joined the library school faculty and **Ching-chih Chen**, GSLIS professor and associate dean, was recently honored by the American Society for Information Science with its 1983 Outstanding Information Science Teacher award. Both are ALA members. . . . **John Emerson** is now Persian specialist in the Harvard College Library, Cambridge, Mass. . . . The Georgia Library Association recently presented its biennial Nix-Jones award to **Mary Louise Rheay**, director of the Cobb County Public Library System in Marietta. An ALA member, Rheay was 1973–75 president of GLA and was 1980 recipient of the Allie Beth Martin award given by ALA's Public Library Association. . . . **Diana Woodward** and **Wayne W. Zachary** recently joined the faculty of the School of Library and Information Science at Drexel University, Philadelphia, Pa., as assistant professors. They will teach courses in computers, information retrieval, and systems analysis. . . . At the Library of Congress **Robert Saudek** is now chief of the Motion Picture, Broadcasting, and Recorded Sound Division and **Stephen Edward Ostrow** will become chief of the Prints and Photographs Division in June. Saudek, founding president of the Museum of Broadcasting, New York, N.Y., has also served as a broadcasting official for NBC, ABC, and the Ford Foundation. Ostrow, currently executive director of the Portland (Ore.) Art Association, was chief curator (later director) of the Rhode Island School of Design art museum. . . . At Indiana State University Libraries in Terre Haute **Edward A. Stockey** is now head of library systems and research; **J. Thomas Brown** is university archivist; ALA member **Patricia Ensor** is coordinator of database searching; and **Harold E. Baker** has retired as head of systems development. . . . ALA member **Vince Schmidt** is the new deputy director of the Illinois State Library in Springfield. . . . **Barbara Brittain** is now director of the Learning Resources Center at Horry-Georgetown Technical College, Conway, S.C. . . . In December ALA member **Jerry B. Post**, who had served as map collection librarian at the Free Library of Philadelphia (Pa.) for 19 years, was appointed library coordinator in the system's Office of Work with Adults and Young Adults. . . . Dec. 31 **Rodney K. Waldron** retired as director of the William Jasper Kerr Library at Oregon State University, Corvallis. He is a past president of the Pacific Northwest Library Association, and received the Oregon Library Association's Outstanding Service award in 1981. . . . ALA member **Bessie B. Moore**, vice-chair of the National Commission on Libraries and Information Science, recently became the first woman as well as the first educator to receive the Distinguished Service award of the National Association of Economists and Educators. . . . **Dennis K. Strasser** recently became instructional services librarian at Sangamon State University, Springfield, Ill.

Correction: **Herman H. Fussler** became Martin A. Ryerson Distinguished Service Professor at the University of Chicago (Ill.) library school in 1974; on his retirement in 1983, he became professor emeritus (*AL*, Jan., p. 64).

Deaths

John William Cronin, director of the Processing Department at the Library of Congress from 1952 to 1968, died Nov. 24. Cronin was the recipient of ALA's Margaret Mann Citation and Melvil Dewey Medal, and also received LC's Distinguished Service award. . . . **Lura Gibbons Currier**, director of the Mississippi Library Commission from 1955 to 1967 and two-time recipient of ALA's John Cotton Dana award, died Nov. 20. She was 1959 president of ALA's Public Library Division (now Public Library Association). . . . **Layton B. Murphy**, associate professor of library and information science at the University of Texas at Austin, died Dec. 19. . . . **Sadie Lee Walton Yette**, former media specialist at Rolling Terrace Elementary School in Montgomery County, Md., died Dec. 12. □

THE ONLY REAL DIFFERENCE BETWEEN DATA PHASE AND THE COMPETITION.



All library companies boast their service, training and fancy new hardware (we think ours is better than theirs).

But once a system is operational, there's only one thing that counts.

The software.

And, when you talk about software capability, Data Phase has no equal. Not CLSI. Not GEAC. Not any software developed by any independent software development team.

- No other vendor offers so much full integration of the modules.
- No other vendor has detailed the functions so thoroughly.
- No other vendor has built its software around complete library flexibility through parameterization.
- And no other vendor designed its entire product around the support of the full MARC record.

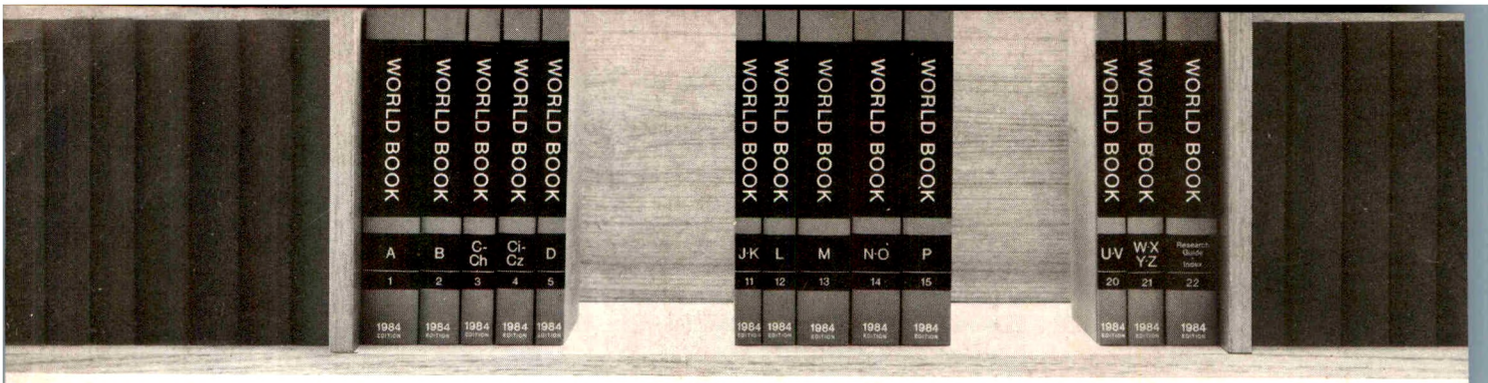
When it comes right down to it, the only real difference between library computer systems costing hundreds of thousands of dollars is found on a $40 reel of tape.

We invite you to compare the software capabilities offered to your library by the Automated Library Information System. ALIS' integrated modules include Circulation, Bibliographic Control (MARC), Acquisitions and Booking.

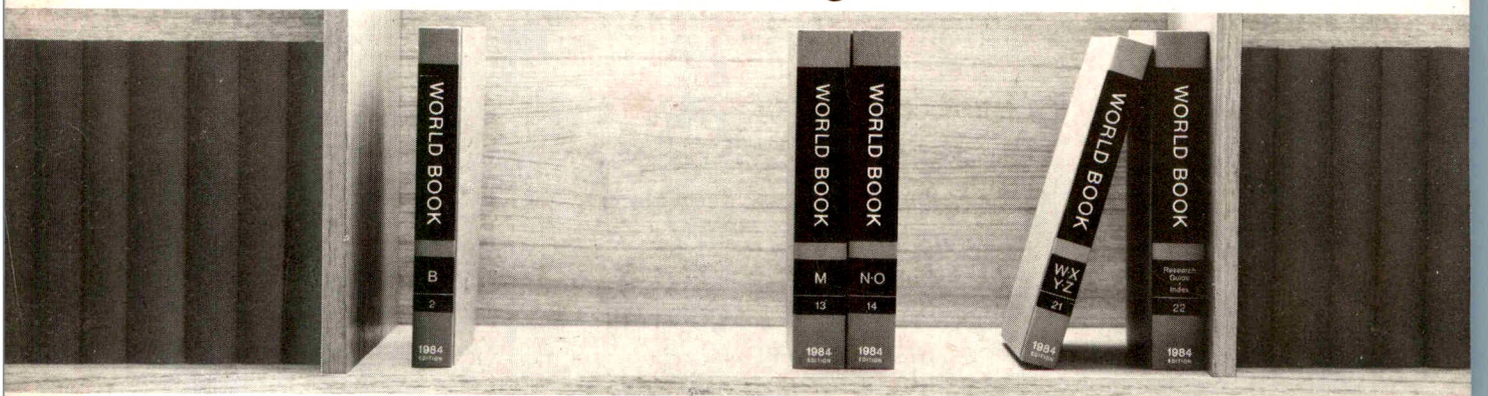
For more information, you can reach a sales representative at 913-262-5100.

YOU NEED TO KNOW THE DIFFERENCE.

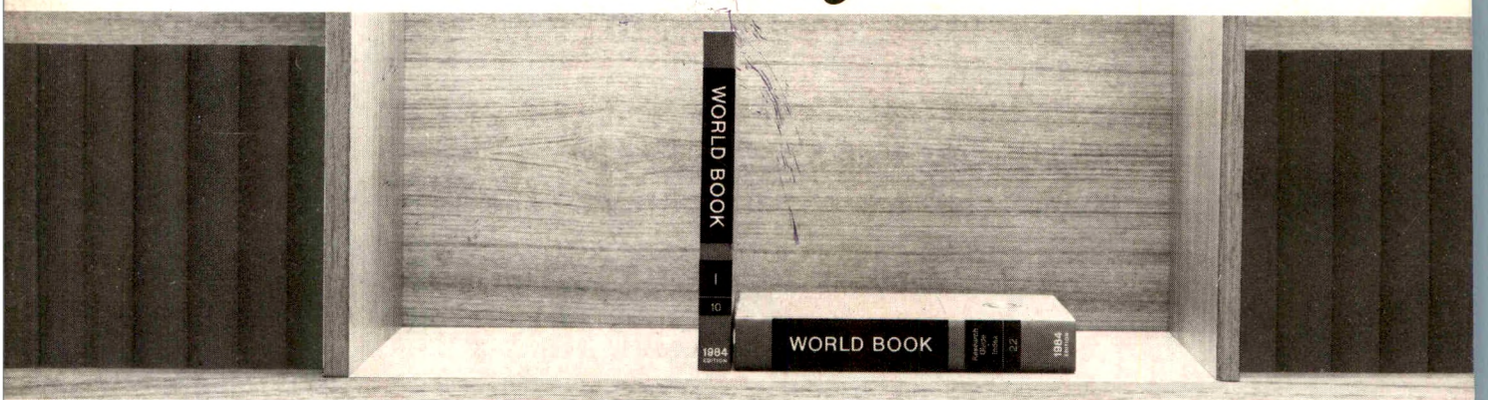
Data Phase



Busy



Busy



Busy

World Book is the most frequently used encyclopedia in print, according to librarians. In fact, according to two independent surveys* reported in the *Encyclopedia Buying Guide*, librarians throughout the U.S. and Canada chose *World Book* over 34 other references as the one that's most frequently used, easiest to use, and easiest to understand.

World Book's popularity isn't the result of just ease of use. The *Guide* awarded *World Book* excellent ratings in nine categories: scope, authority, reliability, recency, objectivity, clarity, accessibility, graphics, and physical format. The closest competitors scored excellent ratings in only six, four and one categories, respectively.

What the ratings don't explain is how *World Book* appeals to children, high school and college students, and adults as well. It's no accident. Articles in *World Book* are written *at the language level of the people most likely to read them.* No matter how difficult the subject matter, *World Book* makes it **understandable.** Selected articles provide readers with quick overviews called "Facts in Brief." And *World Book* brings information to life with more than 29,000 photographs and illustrations.

"*World Book* is, page for page, the best encyclopedia on the market today," reports the *Guide.* "*World Book* is far and away the first choice of professionals who deal with knowledge and information day in and day out."

What's the busiest reference in your library? Doesn't it make sense to have a *current* set on your shelves right now?

World Book, Inc.

New Reference Books Published and Distributed by

Gale Research Co.

African Book World and Press. 3rd ed. Comprehensive directory furnishes details on a wide variety of institutions and enterprises concerned with the book trade and press in Africa. Arranged by country, detailed entries cover libraries, booksellers, publishers, research institutions, major periodicals and magazines, newspapers, and much more. Other features include information about book fairs, government and commercial printers, literary prizes and awards, and book clubs. $95.00. **(SO)**

American Newspaper Journalists, 1873-1900. (Vol. 23 in the Dictionary of Literary Biography Series.) Covers 42 American journalists, including some who are better known for their literary endeavors. Among the notable figures treated in biographical-critical essays are Joseph Pulitzer, Samuel Langhorne Clemens, Richard Harding Davis, Joel Chandler Harris, William Rockhill Nelson, and Carl Schurz. $80.00.

American Writers for Children, 1900-1960. (Vol. 22 in the Dictionary of Literary Biography Series.) Heavily illustrated, biocritical essays cover 43 writers and writer-artists of "Childhood's Golden Era," a period in which interest in children's literature became more widespread. Covers major figures most often mentioned in historical and critical studies, including L. Frank Baum, E.B. White, Laura Ingalls Wilder, Thornton R. Burgess, Margaret Wise Brown, and Robert McClusky. $80.00.

Author Biographies Master Index. 2nd ed. Covering all eras and countries, *ABMI* indexes biographies of major literary figures plus many minor authors about whom it is difficult to find information. Contains over 650,000 references to biographies of 300,000 different authors found in about 225 English-language biographical dictionaries. $165.00. **(SO)**

Children's Literature Review. Vol. 6. This continuing series provides excerpts from current criticism on past and present authors of children's books. Typical sections give a note on the author, excerpts from general commentaries, excerpts from criticism of specific books, and full citations of additional book reviews and criticism. Included in Vol. 6 are Hans Christian Andersen, Vera and Bill Cleaver, Kate Greenaway, Mary Norton, and Yoshiko Uchida. $66.00. **(SO)**

Contemporary Authors. Vol. 109, with its more than 1,500 entries, brings the total coverage of authors to over 74,000. *CA* is a convenient source of personal, career, and biographical data on authors of all kinds, as well as individuals prominent in publishing, journalism, the media, and the lively arts. *CA* also provides extensive bibliographies, work in progress and sidelights sections for typical entries. Included in Vol. 109 are full-length sketches for Barbara P. Conklin, Milos Forman, Lorraine Hansberry, Sam Peckinpah, Ruth Rendell, John Chancellor, and many others. $80.00. **(SO)**

Contemporary Literary Criticism. Vol. 27. Continuing series provides excerpts from current criticism of major authors and playwrights now living or deceased since 1960. Lengthy excerpts from one to a dozen or more appraisals from major and minor reviewing media may be presented for each author covered. Vol. 27 includes William Golding, C.S. Lewis, Bernard Malamud, Katherine Anne Porter, and Evelyn Waugh. $80.00. **(SO)**

Countries of the World and Their Leaders Yearbook 1984. The new edition presents the most recent versions of the "Background Notes on Countries of the World" for each of the 168 nations covered. The work also provides data on U.S. embassies and consulates, overseas business services from Departments of State and Commerce, world health information, and a report on world climate. $75.00. **(SO)**

Dictionary of Literary Biography: Documentary Series. Vol. 4. Focuses exclusively on the life and works of Tennessee Williams. This illustrated volume presents in chronological order documents that introduce and explain specific events in the author's literary and personal life. Includes full texts and excerpts from reviews of the plays, interviews given by Tennessee Williams, essays written by and about Tennessee Williams, magazine and journal articles, book reviews, and obituaries. $88.00. **(SO)**

European Markets. 1st ed. Covering 24 Western European countries, the work guides researchers to sources of business information in the U.S. and Europe on such topics as markets, companies, economic situations, political situations, statistics, and much more. Three major sections cover: information services; databases, directories, and indexes; and sources of information on a country-by-country basis. $150.00. **(SO)**

Nineteenth-Century Literature Criticism. Vol. 5 in this continuing series presents definitive overviews of about 25 authors, including the great novelists, poets, and playwrights of the century. Each author listing includes critical excerpts, biographical and background information, list of principal works, and an annotated checklist of criticism on the author. $82.00. **(SO)**

Online Database Search Services Directory. 1st ed. Contains detailed information on libraries, information firms, and other organizations that provide computerized information retrieval and associated services. Provides such information as online systems accessed, subject and database specialization, amount of search activity, staff size and searchers' names, fee structure, and much more. $75.00. **(SO)**

Prefixes; and Other Word-Initial Elements of English. Covers more than 3,000 common and technical prefixes and similar elements. For each prefix, the dictionary furnishes examples of use; a description of its origin, meaning, and use; variant forms; and related forms. A detailed index contains all sample words, variants, and etymological source words and roots described in the text. $55.00.

Something about the Author. Vol. 33. Heavily illustrated child-oriented reference tool. Each volume contains articles on 150-200 juvenile and young adult authors and illustrators. Entries include personal and career data, literary sidelights, complete bibliographies, critical comments, and author portraits and book illustrations. Included in Vol. 33 are Tomi Ungerer, Shel Silverstein, Ernest Howard Shepard, Langston Hughes, and Joan W. Blos. $58.00. **(SO)**

Twentieth-Century Literary Criticism. Vol. 11. Each volume in this series furnishes long excerpts from representative criticism on the great poets, playwrights, and novelists of the period, 1900-1960. Vol. 11 provides comprehensive critical overviews on 22 authors including Willa Cather, Stephen Crane, Margaret Mitchell, Leo Tolstoy, and William Butler Yeats. $80.00. **(SO)**

EXTRA! EXTRA! UMI ANNOUNCES FREE MICROFILM READER OFFER! READ ALL ABOUT IT!

University Microfilms International now delivers newspapers in microform!

Great American newspapers like THE NEW YORK TIMES... THE CHICAGO TRIBUNE... THE LOS ANGELES TIMES... THE ATLANTA JOURNAL & CONSTITUTION... and THE MINNEAPOLIS STAR AND TRIBUNE.

They have more too! Literally dozens of award-winning newspapers from all over the world.

And, to help you and your patrons discover the many benefits of newspapers as a primary research tool, UMI is giving away microfilm readers FREE!

All you have to do is take certain newspapers in microform and their printed indexes. UMI will give you a new NMI 2020 roll microfilm reader worth $1,215.00!

Both current subscribers and new subscribers are eligible. It's easy to qualify, but some restrictions exist. For complete details, and a copy of UMI's 1984 Newspapers in Microform catalog, please complete and mail the coupon.

This offer expires March 31, 1984, so act today!

New NMI 2020 roll microfilm reader—with automatic opening glass flats.

Read all about it. For details about UMI's "Free Reader" Offer, and a copy of the 1984 Newspapers in Microform Catalog, please fill out and return this coupon.

Information madness

SOON SOME INFO ZEALOT will see to it that the Library of Congress is renamed the Information Center of Congress, and Daniel Boorstin's successor will be the Congressional Informationalist, a wet mouthful. The magazine you're reading will be called *American Infoplaces,* and the Library Company of Philadelphia will change its name and join the Information Industry Association.

Why will it all happen? Because people are being led to believe that "information" encompasses libraries and what they do. In fact, the info zealots are selling information as the new cosmic ether, permeating all matter and explaining all phenomena. If an apple falls from a tree onto someone's head, it's no longer gravity—it's an *information transaction.* When a child borrows a record from the library, a scholar pores over illuminated manuscripts, a class practices yoga, or a prisoner studies law books, that's not life, liberty, and the pursuit of happiness—that's *information seeking.*

Forget intellectualized distinctions. Walk through any library and see if the range of human cultural and spiritual activity there fits within your gut definition of information. If it does, try the same experiment in an art museum or a supermarket and see if *that* all seems to be information. Yes? Then you've got the madness.

Though no one can fault information in its place, I can barely stomach the word anymore. I share the Boorstin bias, as he expressed it not long ago:

> . . . flimsy bits of information inundate and confuse us. This flood of messages from the instant-everywhere fills every niche in our consciousness, crowding out knowledge and understanding. For while knowledge is orderly and cumulative, information is random and miscellaneous. Information industries flourish, but our knowledge industries—schools and libraries—go begging.*

That information tends to crowd out everything else becomes more worrisome as one library organization after another adds "information" to its name, then drops the "library" altogether. Language shapes attitudes, and when people stop saying "library" they will stop thinking about it—except in terms of one of its narrower functions, such as information. The Folger Shakespeare Information Center? Yuch!

Exstinkt bird

Some will argue that the library term is an albatross, stinking of old stereotypes and driving away would-be constituents. That may be so; but the best remedies would be to find a more descriptive term, or campaign for new understanding of the old term. The worst is to substitute for "library" a term that neither defines us fully nor distinguishes us from AT&T.

Consider the justification offered in December for a proposed name change—from "American National Standards Committee Z39, Library and Information Sciences and Related Publishing Practices," to "National Information Standards Organization (Z39)," with the same subtitle:

> The reason we are all jumping on the informational bandwagon may have less to do with its being a bandwagon and more to do with the fact that the publication, abstracting, indexing, and cataloging of thoughts expressed as words; the conversion of the words themselves and these guides to the words into machine-readable form; and the locating of these words for patrons make many of us consider ourselves more as professionals in an information-based environment than as any other title we have held. (Committee Chair Sandra K. Paul, in *Voice of Z39.*)

Twenty-one of the 46 member organizations in Z39 have the word "library" or "libraries" in their names. If their environments have truly beome information-*based,* then perhaps these library groups should go along with the change—and change their own names while they're at it. But I believe libraries are based on something more, and to give up on what that precious something might be is information madness.

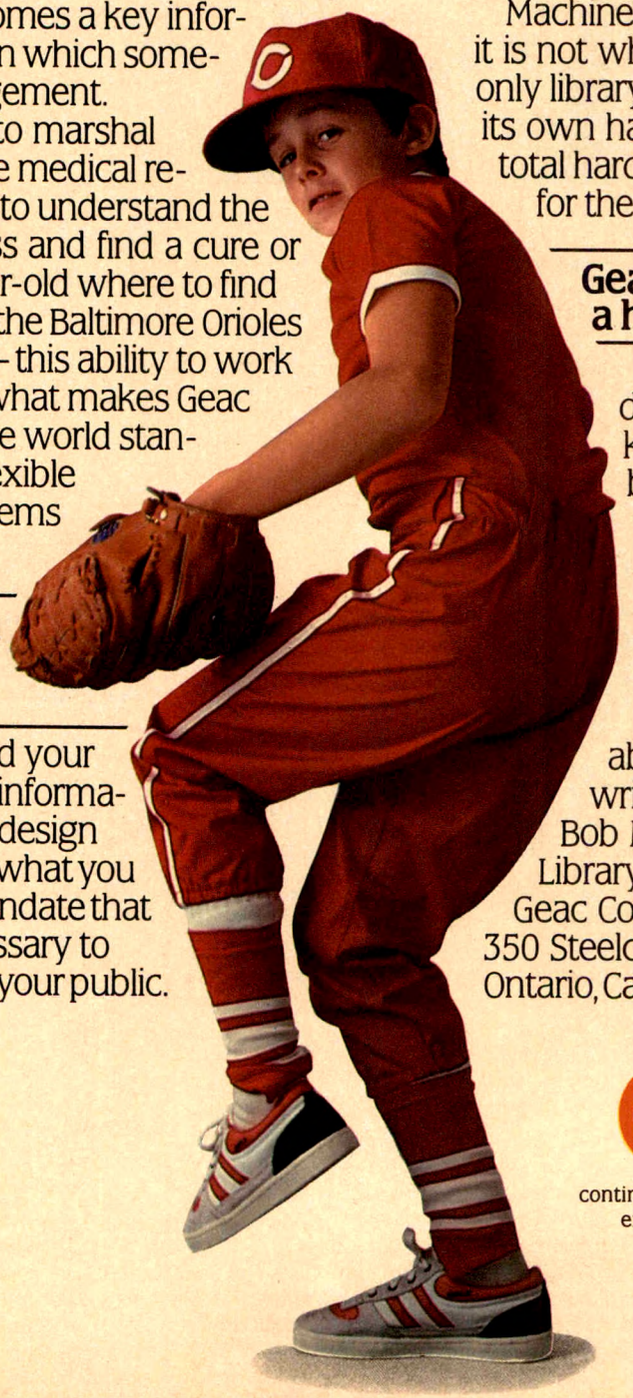
"Obviously, a man's judgement cannot be better than the information on which he has based it..."

Arthur Hays Sulzberger–The New York Times

And equally as obviously, it's the skilled librarian, supported by an efficient library system, who becomes a key information provider on which someone can base judgement.

Whether it is to marshal information for the medical researcher working to understand the nature of an illness and find a cure or to show a ten-year-old where to find how many times the Baltimore Orioles won the pennant–this ability to work with librarians is what makes Geac library systems the world standard–the most flexible and powerful systems you can use.



Geac–A system designed by librarians.

We understand your importance as an information resource and design our systems to do what you want; fulfill the mandate that you tell us is necessary to meet the needs of your public.

Geac–Total systems support.

Machinery without people to support it is not what you need. Geac is the only library vendor which manufactures its own hardware and provides you total hardware and software support for the life of the system.

Geac–Leadership that fills a human need.

Geac leads in library system design simply because we know how to help you get the best out of today while working to take you where you want to be tomorrow. Progress and Geac–a partnership.

Children's librarian leads town campaign to turn off TVs

Nancy DeSalvo, children's librarian at the Village Library in Farmington, Conn. had the idea in October: why not ask townspeople to turn off their television sets for a month?

DeSalvo is a 1949 graduate of Simmons library school who took time out to raise six children before launching her library career in Farmington in 1969. An ALA member, she chairs the forward-thinking Farmington Library Council, made up of 15 local librarians and educators.

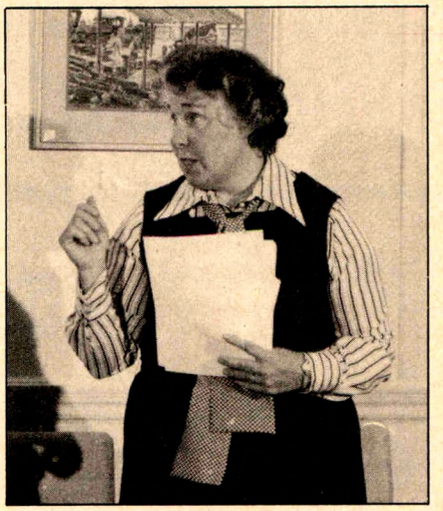
The council had been discussing the disturbing effect of TV on children's learning habits and enthusiastically supported DeSalvo's proposal. So did the superintendent of schools.

"We had tremendous cooperation," DeSalvo told *AL* in February. Librarians and teachers launched the Farmington campaign Jan. 3. Instructors led discussions on the pros and cons of TV, asked students to keep logs of their viewing habits, and passed out turn-off-the-TV pledge cards.

A total of 1,047 youngsters and adults pledged to go "cold turkey" all month, and some 4,000 others pledged to drastically reduce their viewing hours.

The library council distributed 1,000 bumper stickers with the message "Farmington Turns Off" and the logo of a TV set slashed through the middle. The library rented the film version of Jim Trelease's *Read Aloud Handbook* and invited parents to three filmings. Radio stations broadcast synopses of *Dallas* and popular soap operas.

"We had no budget," DeSalvo said. "Fools rush in. . ." But a local merchant contributed 1,000 children's paperbacks as prizes for essay contest winners who best described how they spent their time, and funds were found to provide gift books for the brave who kept their month-long pledge.



Nancy DeSalvo

The media descended to detail the campaign in the picturesque old New England village, which is now an affluent Hartford suburb of 17,000. DeSalvo said she and the school superintendent were "clobbered with interviewers." Newspaper clippings from all over the world went up on the library bulletin board.

When the results began coming in, DeSalvo expressed delight. A kindergarten teacher told her the youngsters were more attentive in class and less violent in the playground. Many preschool children cut down on TV by at least 75 percent. An elementary school principal said 58 percent of his students reduced their watching from 30 to 5 hours a week. But in junior high, only one-tenth of the students participated in the experiment, DeSalvo noted.

DeSalvo intends to monitor the TV-watching habits of about 30 families for the next four months to see if any permanent changes occur in their viewing habits. □

Reagan 1985 budget dumps LSCA & HEA library programs

President Ronald Reagan's election-year budget for FY 1985 presented to Congress Feb. 1 contains few surprises for libraries. His budgets for 1983 and 1984 proposed zero funds for Department of Education categorical library programs and the same zeros reappeared Feb. 1.

The Library Services and Construction Act (LSCA) and Higher Education Act (HEA) library programs are to terminate in 1985, according to the Reagan Administration, because they have been so successful. The 1985 budget briefing papers assert that the programs have established the highest practical levels of access to library services across the country and developed models of interlibrary cooperation to stimulate further expansion.

Public library services, interlibrary cooperation, and the training of professional librarians, should now be the responsibility of state and local authorities, the Education Department says.

Responding to the National Commission on Excellence in Education report, *A Nation at Risk,* the Reagan budget proposes to increase the Education Consolidation & Improvement Act Chapter 2 state block grant from the 1984 appropriation of $479,420,000 to $728,879,999. The extra $250 million would be divided into an additional $14 million for the Secretary of Education's discretionary fund and an additional $235 million for the state block grant, which includes school library resources and instructional equipment programs.

The National Commission on Libraries and Information Science (NCLIS) current budget of $674,000 would be increased to $690,000 in 1985, the budget proposes.

The Administration proposes to trim spending on the National Endowment for the Humanities by $14.2 million, to $125.4 million. Special attention would be given to projects celebrating the U.S. Constitution bicentennial and projects that assess the condition of scholarly disciplines.

Although the House and Senate show little inclination to eliminate federal aid to libraries, the ALA Washington Office urges library supporters to protest the proposed termination of LSCA and HEA. Copies of letters to legislators should be sent to ALA-Washington for reference use.

House votes 357–39 to extend and expand LSCA

President Reagan may want to terminate the Library Services and Construction Act, but the House of Representatives has other ideas. On Jan. 31 by a vote of 357–39, representatives endorsed HR 2878, the LSCA amendments act proposed by Rep. Paul Simon (D-Ill.) last May (*AL,* June, p. 342).

HR 2878 extends LSCA through FY 1988 and adds three new titles. It increases the authorization level for Title I, public library services, from $80 million in FY 1985 to $95 million in FY 1988 and sets the authorization for Title II, public library construction, at an annual $50 million. For Title III, interlibrary cooperation, funding could go from $20 million in 1985 to $35 million in 1988.

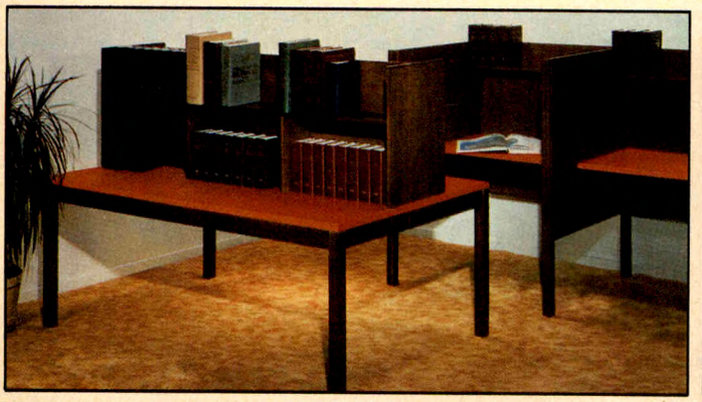
A new Title IV, services for Indian tribes, authorizes an annual two percent of the appropriations for Titles I, II, and III set aside as funding directly to Indians for library services. A new Title V, foreign language materials, sets funding at a constant $1 million for acquisition of these materials. Title VI, library literacy programs, has an authorization level of an annual $5 million.

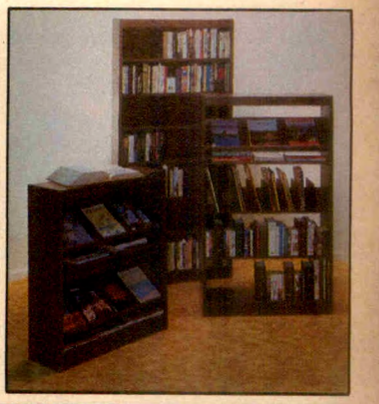
The new initiatives, Rep. Simon wrote in his introduction to the bill, "will allow public library services to be extended to citizens who thus far have been denied these services. They also set the stage for libraries to enter the expanding areas of information transfer."

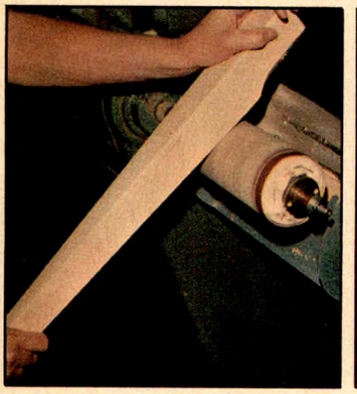
Crippling amendment defeated

Before the final vote, Rep. Newt Gingrich (R-Ga.) offered an amendment authorizing the president to eliminate or reduce any LSCA authorization whenever it would aid in balancing the budget, reducing the debt, or serving the public interest, unless Congress

Made by Gaylord, Furniturewise.







Remove the Middle Man. Do Business Directly With the Source—Gaylord. Manufacturer and Marketer of Library Equipment and Supplies Since 1896.

We surpass dealers, catalog houses and other middle men in three ways:

Full Selection

If libraries use it, Gaylord manufactures it.

Expanding, Remodeling, Retrofitting, New construction. With hundreds of special and technical products to choose from, Gaylord Furniture will harmonize with your interior and your intent.

Choices. From Wood shelving to reading, reference and index tables. From magazine and newspaper racks, atlas cases and dictionary stands. To browsers, book trucks and charging desks. And, you have a variety of select hardwoods to choose from—quality oaks or maples in nine stains and finishes. Middle men offer limited choices.

Ship from Stock

DELIVERYwise, we ship orders fast directly from our factory.

With our exclusive "Ship from Stock" program we keep a large central inventory. So your order is shipped in *three to four weeks* because items come from stock, not production runs—that start with your order.

Local Source

With Gaylord, the personal touch still remains. You get more than a catalog.

You're helped by our—your—local Gaylord sales person who values your library's business. And, they understand libraries; in fact, our sales force averages twenty years of service to the library field.

Trusted Source

Depend on a Furniturewise manufacturer . . . Gaylord, your trusted source.

To order, call your local Gaylord representative at: 800/448-6160. In NY call 315/457-5070.

☐ Please send a Gaylord catalog containing wood furniture

rescinded the action within 60 days.

Such an amendment would give the president the right to wipe the entire act out of existence, argued Rep. Carl Perkins (D-Ky.). Rep. Major Owens (D-N.Y.) declared that libraries have already suffered repeatedly from veto by neglect. The House defeated the Gingrich proposal 248–144.

Floor managers Simon and Thomas Coleman (R-Mo.) accepted two other amendments: Rep. Leon Panetta (D-Calif.) asked that the bill direct attention to "the needs of small and rural community libraries and information centers because these facilities are often underfunded and understaffed and as a consequence cannot adequately serve the needs of the community." Rep. Dan Glickman (D-Kans.) proposed that library construction projects "shall give priority, when economically feasible, to the acquisition and conversion of unused public school facilities."

For the full debate on the bill, see the *Congressional Record*, Jan. 30, p. H227–31 and Jan. 31, p. H244–61. House Report 89–165, issued in May, reproduces the entire statute with proposed changes and opposing views.

The Senate is expected to schedule LSCA reauthorization hearings in March.

Parish library to rise above flood level at last

When heavy rains deposited eight inches of water on the floor of the Allen Parish Library in southern Louisiana in 1979, the library board declared an emergency need for a new headquarters. The library, founded in 1957 in an old building below street level in the town of Oberlin, needed more, as well as drier, space.

The Allen Parish headquarters, with a staff of 10½, has three branches and a bookmobile to serve 20,500 people in a sparsely settled area.

Aided by board vice president Minnie-Lou Lynch, a past president of the American Library Trustee Association, library director Mary Ellen Janowsky began a concerted effort to find the necessary funds for a new headquarters. Local officials supported the project, but little response came from state officials.

In 1981 the library lost its lease and was moved to another old structure, still below street level and subject to floods.

Fresh hope came last spring when the U.S. Congress passed the emergency jobs bill. New library director Linda Bennett completed the federal grant forms just after her appointment in March. Thanks to its unemployment rate of almost 30 percent, Allen Parish was awarded $237,357 in Library Services and Construction Act funds.

Library employees, board members, and friends worked hard to garner an additional $158,238 in local funds. A challenge fund raised $2,925. The parish contributed $13,000 in profits from the sale of a 1976 cook book featuring local recipes. The office of public works granted $20,000 to the library, and the Town of Oberlin donated land adjoining a park.

Early in April construction will begin on the new $400,000 Allen Parish Library Headquarters. The 5,000-sq.-ft. building will have more than twice as much space and seating as the present structure, and will include a public meeting room. Its single story will be well above the ground.

Library education leader Susan Grey Akers dies

Susan Grey Akers, former dean of the University of North Carolina/Chapel Hill library school, died Jan. 30 at Hillhaven Convalescent Center of Chapel Hill.

Born in 1889 in Richmond, Ky., she earned a bachelor's degree at the University of Kentucky, a library certificate at the University of Wisconsin, and a doctorate in library science at the University of Chicago.

Louis Round Wilson appointed Akers to his first faculty when the library school was founded in 1931, and she succeeded him as its director a year later. In 1942, the title was changed to dean, making her the first woman to hold an academic deanship at UNC.

Akers served as dean until 1954 and continued to teach until 1959. In 1956, she was awarded the Margaret Mann Citation by the American Library Association for her work in cataloging.

"She was gracious, friendly and scholarly," said university President William Friday. Dean Edward G. Holley said: "We shall always remember her high standards, her professional commitment, and her contributions to the library profession and this school."

The *Chapel Hill Newspaper* editorialized: "[Akers] pioneered the cause for women on this campus and she brought the university many honors. A lady with these credentials should not soon be forgotten."

Landmark network law signed in New Jersey

On Jan. 17 New Jersey Gov. Thomas Kean signed into law S. 1329, permitting the establishment of regional multitype library networks and resource sharing of all types of libraries—academic, institutional, public, school, and special.

State Librarian Barbara Weaver called the law "the most significant library legislation adopted by New Jersey in 20 years."

The law carried with it an initial appropriation of $125,000 for FY 1984, which will be used to set up planning grants for six regional cooperatives and provide start-up funds for two of the cooperatives. Weaver scheduled nine meetings throughout the state to explain the new law and discuss proposed regions.

New Jersey's long-awaited act is the most comprehensive and thorough state law governing multitypes, commented Joan Neumann, executive director of METRO. Neumann chairs the Association of Specialized and Cooperative Library Agencies (ASCLA) Multitype Library Cooperation Section Legislation Committee.

Neumann pointed out that the New Jersey act, unlike the Illinois multitype law passed last year, includes the all-important funding. The New Jersey legislation is one of 11 state bills analyzed in *Multitype Library Cooperation State Laws and Regulations: An Annotated Checklist* recently compiled by Neumann's committee. The 100-page work is $22.50 for ASCLA members, $25 to nonmembers from ASCLA Publications, ALA, 50 E. Huron St., Chicago, IL 60611 (0-8389-6602-0).

Senator spotlights libraries as phone-tariff victims

Library "services are radically endangered by the unprecedented rate increases pending at the [Federal Communications] Commission," a senator told his colleagues recently.

Sen. Larry Pressler (R-S.D.) spoke shortly after an FCC decision in January to delay until June 1985 the telephone access charges for residential and single business lines.

That decision was a mixed blessing for librarians. Home phone bills and those of very small libraries will benefit, but larger libraries still face an access charge of $6 per month per line beginning April 3.

One FCC change would affect libraries. The proposed $25 surcharge on private lines would not be imposed on private-line customers who can certify that their line cannot interconnect with the local exchange. OCLC, RLIN, and WLN believe that they can verify that they do not break into the regular phone lines and thus avoid the surcharge. The amount of probable increase in telecommunications charges varies with the circumstances, but CAPCON, the library network in the District of Columbia area, figures that its estimated increase of 138 percent would drop to 108 percent.

South Dakotan examples

As a result of the FCC decision on home phone bills, the Senate voted 44–40 Jan. 26 to table S.1660, the Universal Telephone Service Preservation Act. Just before the vote, however, Sen. Pressler had presented an amendment focusing congressional attention on the impact of the pending increases on libraries.

"Libraries provide invaluable resources to all Americans, regardless of social background or economic status," Pressler told the Senate. "These services are radically endangered . . ." He cited examples of the expected cost hikes at specific South Dakota libraries.

Pressler's amendment provided that the FCC could not impose new charges on libraries until it found that the libraries had adequate telecommunications at reasonable

rates. The required FCC procedure would in itself have delayed any increases. Sen. Robert Packwood (R-Ore.) and Sen. Ernest Hollings (D-S.C.) supported the amendment.

After the Senate tabled S. 1660, Pressler declared: "I remain committed to pursuing this issue and intend to ask the Senate to debate my amendment when I offer it to any other relevant legislation."

The senator requested that letters from 12 South Dakota librarians, ALA Washington Office Director Eileen Cooke, and Association of Research Libraries Executive Director Shirley Echelman expressing library concern be published in the *Congressional Record* (Jan. 26, p. S200–204).

The ALA Washington Office reports it is continuing to work with other members of the library community in pressing the Senate, House of Representatives, and FCC to mitigate the impact of the AT&T breakup on libraries.

To obtain a videocassette of the ALA Legislation Committee's legislative update on "Telecommunications Developments" at the Midwinter Meeting, call Paul Kobasa of ALA Publishing Services at 312-944-6780.

NEH announces deadlines for grant applications

Springtime is grant application time for a number of National Endowment for the Humanities programs. Three upcoming dates are listed with specific addresses; the general NEH address is Mail Stop 350, Old Post Office, 1100 Pennsylvania Ave., N.W., Washington, DC 20506.

- April 20 is the final date to submit a preliminary proposal for the NEH Youth Projects Program to begin next year. For information, write NEH Youth Projects Guidelines '85, Room 420.
- May 1 is the deadline for Challenge Grant applications for institutions or organizations performing high quality work in the humanities. Discuss applications plans with staff by calling 202-786-0361 or write for the new Challenge Grant Guidelines, Room 409.
- June 1 is the last day for applications for the Research Resources program, which welcomes proposals making significant research materials in the humanities available to scholars. For information call 202-786-0204 or write the Research Resources Program.

news in brief

Anti-Nestlé boycott ends. The International Nestlé Boycott Committee suspended its six-and-a-half year action Jan. 25 after the Swiss-based company agreed to take the last major steps in meeting World Health Organization and UNICEF codes on marketing infant formula.

INFACT, the U.S. Infant Formula Action Committee, reported that Nestlé conceded after three weeks of difficult, almost round-the-clock negotiations. "Nestlé has been moved forward by our efforts and pressure to become a model for the whole industry . . . This will protect the health and lives of infants all over the world," INFACT said.

In 1980 the Membership of the American Library Association resolved to support the boycott of Nestlé products. The Committee on the Status of Women has monitored the effort.

Symbol deadline April 9. Library Symbol Implementation Group Chair Bob Garen appeals to all supporters of the blue-and-white library symbol to write the Federal Highway Administration by April 9.

An administration advisory commission has recommended adoption of a green and white sign using the word "library" (*AL*, Jan., p. 58). In the Jan. 10 *Federal Register*, p. 1213–14, the administration claims the ALA symbol "does not convey the intended specific meaning," and should not be included in the *Manual on Uniform Traffic Devices*.

Garen urges supporters to refer to "Request II-78 (Chng.)—Library Symbol Sign" in their letters and send them in triplicate to FHWA Docket No. 83–28, Federal High-

Woodland™ Library Accessories

Style, Quality and Function in One Furniture Line from Highsmith

- **Handsome Design, Solid Oak Construction**
- **Choice of Light, Medium, or Dark Finish**
- **Plus the 45-day Highsmith Guarantee**

Highsmith's beautiful Woodland Series™ offers more than 30 items of furniture. Designed and built with such features as high pressure laminate work surfaces and protective beveled edges, this furniture will provide years of service in your library. You'll find this unique A-Frame Book Rack, plus tables, chairs, shelving, card catalogs, trucks and displays.

See the Woodland line starting on page 201 of the 1983/84 Highsmith Catalog. To order, or to receive your free catalog, write or call:

Number one in Canada. Circulation at the Edmonton, Alta., Public Library topped the 6.6 million mark in 1983, making the 12-branch library the busiest in Canada. For the first time EPL outranked the Toronto Public Library, the traditional number one, which had a circulation of 5.6 million last year.

The Edmonton library, serving a population of 550,000, has doubled its circulation in the past four years. Director Vincent Richards attributes the increase to an automated circ system, which he claims is Canada's largest, and an extra-hard-working staff.

"A depressed economy added a boost to our circulation, leading to an unexpected high," Richards said. "Our increase in 1983 was 23.7 percent compared to 1982 figures. Similar increases have been experienced by most public libraries in Alberta.

"Comparative figures compiled in eastern Canada show our staff to be the most productive in Canada, and our costs for the work done, the lowest. They're a great staff," Richards said.

Warner cuts back on QUBE. When QUBE, Warner Communications' two-way television system, was tested by OCLC in 1978 in collaboration with the Public Library of Columbus and Franklin County, Warner predicted QUBE would revolutionize television. The *New York Times* Jan. 19 reported that Warner, hurt by Atari losses, is cutting back on QUBE projects.

Warner has suspended a nightly 90-minute QUBE program reaching 325,000 households in six cities. The firm also halted a new Warner Electronic Home Services project that was to be tested in Pittsburgh. The information service would have been the first to offer users actual news clips or other video segments on demand. A Warner spokesman said the company is not disenchanted with two-way TV.

Marvin Scilken, director of the Free Public Library of the City of Orange (N.J.), commented: "In our 'Information Society,' the need for information is great, the demand small."

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

THE BUSINESS WAR: JAPAN VS. THE U.S.

As business executives have become the glamour figures of the 1980s, so their problems have become big news. No subject provides more tense drama around the board room than the Japanese challenge to American business supremacy. It's High Noon in the Executive Suite, and our pin-striped Gary Coopers appear to be outgunned by their management-savvy, computer-wise Japanese counterparts. Some of the books listed below provide all the particulars on what we're doing wrong and they're doing right, while others treat the broader subjects of Japanese history and culture.

Courdy, Jean Claude. *The Japanese: Everyday Life in the Empire of the Rising Sun.* Harper, 1984, $19.95. (0-06-038010-1, 80-5775)

This perceptive social analysis looks at contemporary Japan through a wide-angle lens, assessing how modern Japanese technology and business methods coexist with the country's centuries-old cultural and ethical traditions.

Davidson, William H. *The Amazing Race: Japan and the United States in the Information Age.* Wiley, 1983, $17.95. (0-471-88711-0, 83-12353)

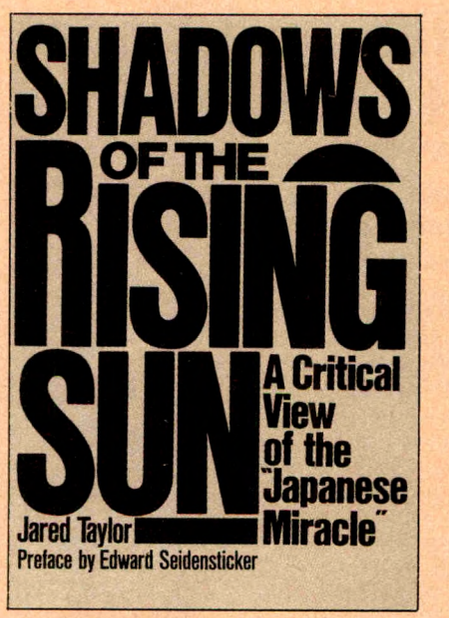
Japan vs. the United States—the Super Bowl of the business world. Davidson offers a thorough review of the Japanese game plan: management techniques, market strategy, use of computers, and overall philosophy.

Feigenbaum, Edward and McCorduck, Pamela. *The Fifth Generation: Artificial Intelligence and Japan's Computer Challenge to the World.* Addison-Wesley, 1983, $15.95. (0-201-11519-0, 83-3765)

The authors detail Japan's $450-million plan to dominate the computer industry within 10 years. The projections focus on a computer that is 1,000 times more powerful than today's machines and is capable of understanding the human voice.

Ouchi, William. *The M-Form Society: How American Teamwork Can Recapture the Competitive Edge.* Addison-Wesley, 1984, $19.95. (0-201-05533-3)

Expanding on his 1981 book, *Theory Z,* Ouchi analyzes the relationship between government and business in Japan: specifically, how each profits from a multidivisional ("M-Form") philosophy emphasizing managerial teamwork. (Executives who do calisthenics together aren't likely to stab each other in the back.)



Taylor says the U.S. can't copy Japan's "miracle" and shouldn't try.

Richmond, Frederick W. and Kahan, Michael. *How to Beat the Japanese at Their Own Game.* Prentice-Hall, 1983, $24.95. (0-13-402123-1, 83-3374).

Economists project that trade deficits with Japan will hit $50 billion in 1990; Richmond and Kahan argue that it's time to act. They recommend passage of a new Fair Trade Act as well as American adoption of Japanese management techniques.

Schlossstein, Steven. *Kinsei.* Congdon & Weed, 1983, $14.95. (0-86553-089-0, 89-10093)

This novel of international espionage dramatizes the high-tech competition between America and Japan. It seems a Japanese executive has stolen top-secret optical chips from an American company.

Schlossstein, Steven. *Trade War: Greed, Power, and Industrial Policy on Opposite Sides of the Pacific.* Congdon & Weed, 1984, $17.95. (0-86553-104-8)

Turning to nonfiction, Schlossstein first salutes the ingenuity of Japanese business leaders and then outlines a plan whereby the United States can win the current "trade war." More pre-battle strategy.

Seidensticker, Edward G. *Low City, High City.* Knopf, 1983, $20. (0-394-50730-4, 82-10093)

Daily life in the Japanese city of Edo (later renamed Tokyo) from the 1860s through 1923, when a massive earthquake destroyed much of the city. History at its most vivid.

Taylor, Jared. *Shadows of the Rising Sun: A Critical View of the "Japanese Miracle."* Morrow, 1983, $14.95. (0-688-02455-6, 83-3374)

Taylor plays the devil's advocate here, contending that Japanese business management techniques won't work all that well in the United States. The Japanese have succeeded by basing their managerial philosophy on their own traditions, not by copying others. Taylor is convinced we should do the same. □

***Bill Ott**, who writes this column freelance for* American Libraries, *is books-for-adults editor of ALA's* Booklist *magazine.*

The new computer-produced Library of Congress National Union Catalogs on Advanced Library Systems microfiche offer expanded coverage, more flexibility, more convenience and more effective searching capability than has ever been possible before. Yet the low cost makes them accessible to libraries of all types and sizes.

State-Of-The-Art Efficiency For Your Library.

The new NUC Books is in index/register format. Now you can search the comprehensive collection of current catalog records produced by the Library of Congress and some 1500 North American libraries not only by name, but by title, subject and series as well. The indexes are cumulated each month. A single look-up will complete a search in most cases. The full bibliographic record can then be located in the register in seconds.

The new NUC microfiche can be used alone as a primary bibliographic source, or to complement your other bibliographic tools for cataloging, acquisitions, interlibrary loans, bibliographic verification, reference and research.

Current LC Subscriptions/ Free Trial.

ALS can also provide current subscriptions to the LC NUC U.S. Books; Audiovisual Materials; Music, Books on Music and Sound Recordings; Cartographic Materials; Register of Additional Locations; LC Subject Headings; and Name Authorities. ALS offers a free 30-day trial to introduce you to the benefits of a current subscription.

Retrospective LC Catalogs.

ALS is the only source for the complete microfiche retrospective collection of the LC NUC from 1898; Subject Catalog from 1950; Audiovisual Materials from 1953; and Music, Books on Music and Sound Recordings from 1953. Our *new, low* prices make it possible for more librarians to acquire the complete collection or individual segments.

This year, take a giant step toward better bibliographic control. Keep your National Union Catalogs on ALS microfiche. They're surprisingly affordable. They reduce shelf space over paper catalogs by 94%. And they offer more efficiency than ever before.

Librarians discuss pay equity and microcomputer users

Q. I'm trying to upgrade library staff salaries to match those of other city employees. How can I answer the city manager's question, "What is a cataloger (or children's librarian or whatever) worth?" What municipal government jobs compare to library jobs? *Nann Blaine Hilyard, Library Director, Auburn Public Library, 49 Spring St., Auburn, ME 04210.*

A. Job comparisons vary depending on the local jurisdiction and the type of evaluation system used to rank positions with respect to their value in the workplace. Comparable-worth or pay-equity efforts attempt to arrive at comparable salaries for dissimilar jobs requiring comparable overall effort, skill, responsibility, and working conditions. When you discuss components such as supervision, judgment, independence, error impact, and stress factors, you can compare positions.

Helen Josephine discusses "Pay Parity for Library Workers" in the 1982 *ALA Yearbook* and the Office for Library Personnel Resources has published a packet of information, *Pay Equity: Comparable Worth Action Guide,* Topics in Personnel no. 2, $10 from OLPR. *Margaret Myers, OLPR director, ALA Headquarters.*

Q. Not enough women, including children, seem to be taking advantage of library offerings of computers for public use. How are libraries striving for balance among male and female? *Marion Bennett, Director, Marshall Public Library, 111 E. Mansion St., Marshall, MI 49068* (*AL*, Nov., p. 641).

A. Last July when the Wright Public Library in Dayton installed a public access computer, we offered free introductory two-hour sessions called "Adult Computer Camps" taught by a college senior majoring in computer science. The object was to take the mystery out of computer use. Emphasis was placed on software available at the library and the simplicity of use. The sessions encouraged many women to use the computer. In July, 58 percent of our computer users were female, but the number declined to 17 percent by November.

In December our instructor returned from college and taught another series of adult camps, adding a three-night course in BASIC programming. The library also offered "Computer Klatches" aimed at homemakers, concentrating on software that can simplify daily routines. Many women signed up for the various courses, and we hope they will use our computer. *Carmel L. Morse, Audiovisual Librarian, Wright Memorial Public Library, 1776 Far Hills Ave., Dayton (Oakwood), OH 45419.*

A. The Towanda Public Library, serving 10,000 people in rural northeastern Pennsylvania, has a ratio of approximately 2 to 1 women to men validated to use our Apple IIe. Over a recent four-week period, 55 percent of the total hours of public use was by women. We have also had more women's clubs than men's taking advantage of our offer to give computer demonstrations as a meeting program.

The fact that our project coordinator is a woman, well known in the community, has been reassuring to many women. The informative, friendly, and nontechnical demonstrations have stimulated many women to sign up for the validation classes, which are a requirement for using our system. The coordinator stresses a pragmatic approach by making suggestions of simple but useful applications of our software collections. News of positive computer experience has traveled fast, especially among women, in our small town. *Lee O'Brien, Project Director, Towanda Public Library, Towanda, PA 18848.*

Q. Who uses an electric eye to count patrons entering the library? Have you compared the electronic count to actual number of entrances? *Rick Richmond, Director, Sublette County Library, Pinedale, WY 82941* (*AL*, Sept., p. 512).

A. The Chester County (Pa.) Library 3M Security System counts patrons as they exit. The count is recorded daily and used in monthly and yearly reports. The statistics help determine "heavy usage" days, when we need extra staff.

We have not compared the electronic count to an actual one. We feel confident the 3M system is accurate within 3 per cent and follows in direct ratio the number of circulations. In vacation months, we average five circulations per five patrons; in winter, four circulations per five patrons. *Robert O. Sondrol, County Librarian, Chester County Library and District Center, 400 Exton Sq. Pkwy., Exton, PA 19341.*

Q. Has anyone had practical experience with a blind or severely visually impaired librarian on their staff? Or, are you a blind librarian willing to share your experience? We have a blind patron with an MLS who would like to get back into the library field. *Joan Laskaris, Librarian, Services to the Blind and Physically Handicapped, Shawnee Library System, Greenbriar Road, Carterville, IL 62918* (*AL*, Nov., p. 641).

A. We have a blind librarian who has been with us since her graduation from the Faculty of Library and Information Science at the University of Toronto in 1980. She was hired to work directly with the chief librarian to upgrade our services and facilities for the handicapped during the International Year of the Disabled Person. The project was completed with considerable success and the objectives are updated annually.

Now this librarian has been added to our Special Community Services section with particular responsibility for the volunteer program for our shut-in service. She also serves as our representative on the materials selection committee of our local

Over to you

1. What regional libraries have developed collections of microcomputer software to lend to other libraries? What are your selection criteria and problems? (Conn.)

2. Have any medium-sized public libraries purchased another library's database in converting their holdings to machine-readable form? What was the basis for its selection? Was an accurate hit rate established? What unanticipated problems were encountered? (Fla.)

Please send replies to Action Exchange

Canadian National Institute for the Blind. She has provided some programs to make our staff sensitive to the library problems of the disabled. In 1982 she directed a student project on the possibilities of sound access to our public catalog.

Initially she wanted to develop reference service skills, but experience has demonstrated this is not possible. Her present interests and self-development program are now in the field of adult education, which seems to be an area where her particular talents can be used. *Jean Orpwood, Director, North York Public Library, 35 Fairview Mall Dr., North York, ON M2J 4S4.*

Q. We are planning to use a microcomputer to index our local history and genealogy records and would like to know what hardware and software other libraries use. Is there any attempt at standardization so that we can eventually share data on cemetery, military, and newspaper records? ***Bridgie Brelsford, Reference Librarian, Crawfordsville District Public Library, 222 S. Washington St., Crawfordsville, IN 47933.***

A. I am aware of no specialized computer applications to genealogical cataloging other than our own. Software for personal computers exists for such things as home files, but there are no separate or cooperative projects aimed at cataloging local history and genealogy collections.

Many public libraries with substantial monograph collections in this field are currently using OCLC, which standardizes their common cataloging including local history and genealogy.

Our library has substantial programming invested in a stand-alone cataloging system for local history and genealogy. We adapted MARC to fit our needs. Perhaps our system could become the prototype for a cooperative cataloging venture in this field—an OCLC for local history and genealogy. *Charles R. Clement, Manager, Technical Services, The Church of the Latter-Day Saints Genealogical Department Library, 50 E. North Temple St., Salt Lake City, UT 84150.*

A. The Miami-Dade Public Library Florida Collection produces a computer-generated index to six local newspapers. The same basic software program can also be used to index obituaries, photographs, and maps. The Miami project is fully described in the tape recording of "Indexing the News," presented by the Reference and Adult Services Division Local History Section at the 1983 Annual Conference in Los Angeles (No. 83107 – 411/412, $29.90 from ALA Cassettes, Eastern Audio Association, Inc., Oakland Center, 8980 Route 108, Columbia, MD 20145).

My main warning is don't try to do too much with a home computer. You will find the memory capacity too small on many models. I suggest you try to interest a nearby college or university computer science department in taking on your project as part of its curriculum "practical applications" section. *S. J. (Sam) Boldrick, Florida Collection, Miami-Dade Public Library System, One Biscayne Blvd., Miami, FL 33132.*

Q. Do any libraries accept credit cards in payment for overdues and lost materials? ***Audrey K. Anderson, Data Processing Supervisor, St. Paul Public Library, 90 W. Fourth St., St. Paul, MN 55102 (AL,* Nov., p. 641).**

A. We have used VISA for nearly two years. Surprisingly, few patrons have used it, but VISA gives us an added service and has never cost us a cent. *Alice Gene Lewis, Librarian, Owensboro-Daviess County Public Library, 450 Griffith Ave., Owensboro, KY 42301.*

View of China libraries a "half-story"

I AGREE WITH YOUR EDITORIAL (Jan., p. 4) that one should not feed the press with "half-stories: out-of-context, spiteful, distorted, or short-sighted bits and pieces." However, this time you did not seem to practice what you preach, for in the same issue you printed John N. Miller's "The Chinese Disconnection" (p. 22–26), which seems to fit your description of the "half-story."

In a professional journal, we do not expect to see emotional indictments of any particular libraries, but "the whole story" of, as you said in the editorial, "*all* that we are and *try* to be" (italics mine). I am sure what Miller described in his article is true, and such incidents, unfortunately, are not even isolated. But he did not tell "the whole story," and what he told was not presented in proper context. I feel that his "indignation" is misdirected, and I cannot agree with his conclusion, which can be very misleading.

After the unprecedented destruction of books and libraries in China during the rabidly anti-intellectual Cultural Revolution, dedicated Chinese librarians have only recently had the chance to pick up the pieces and forge ahead. As I wrote in the *Library Quarterly* (April 1983), Chinese libraries are faced with problems in almost every aspect of library operation.

So many books were destroyed or misplaced during the Cultural Revolution that library catalogs do not always represent the holdings in the library. Many libraries do not have books in Western languages even now. There are so few professional librarians that the absolute majority are young, untrained, and inexperienced. In fact, many of them do not have more than a junior high school education and cannot read English. (Could this be one of the reasons for the poor service Miller experienced?) Chinese leaders in the field readily admit all those shortcomings, and they are working hard to improve the situation. Rome was not built in one day, however. Compared with what they were five or six years ago, Chinese libraries have already made spectacular progress. Using American standards to judge Chinese libraries, or libraries in any poor, developing countries for that matter, is unfair and unrealistic.

Besides, what was the purpose of his article? I believe in a free press, and I do not believe in sweeping the unpleasantness under the rug. However, if Miller really meant well, as professed in the author note, why did he not send the article to the China Society of Library Science or the Chinese Ministry of Education, but publish it in an American Journal which few, if any, Chinese authorities would have a chance to read? Sarcastic criticism of this kind, such as asserting that "libraries can be expected to be little else than what they are in China" (p. 24), could only discourage Americans from donating books to Chinese libraries and hinder other library cooperative projects. It could also further exacerbate Chinese feelings toward American teachers in China, some of whom are suspected of going there just to find enough bad things to write about China so that they can get into print at home.

A fair presentation of things as they are in a historical context with careful analysis of problems and constructive suggestions for improvement can be good for the profession in both China and the U.S.

LEE-HSIA TING, ALA Member,
Learning Resources, College
of Education, Western
Illinois University, Macomb

Lee-hsia Ting's comments are well taken. It should be noted, however, that before the article was accepted, we asked its writer for extensive written comment on his authority and justification for the statements. We were satisfied that the article was a legitimate point of view, but asked the writer to provide an introduction putting his remarks in a clear context. This he did, noting, "I expect that many Chinese library officials strive to open their libraries to every authorized user. Indeed, conditions in Chinese libraries are likely to improve over the years to come, just as many other services are improving."—Ed.

10-millionth-record winner strikes back

CONCERNING BEVERLEY GEER'S letter in the Jan. issue (p. 16) on the 10,000,000th record entered in the OCLC database:

1) The name of our institution is California State College, San Bernardino. 2) We catalog our own theses as if they were published monographs, per a policy decision made by my superiors some years past; we also use a different thesis note than that preferred by OCLC or by LC. I regard both practices as local options; since no other library or librarian would normally see or use these records, which are designed solely for our in-house requirements, I am utterly unrepentant. 3) Mechanisms exist to correct whatever Geer or others may perceive as errors in OCLC-contributed cataloging, and I support any such efforts to "clean up" the database. OCLC is and probably always will be a user-supported network, with 80 percent of the bibliographical entries contributed by member institutions. It should be recognized, however, that many so-called "mistakes" represent differences in cataloging philosophy. . . . We should not thus be so hasty to cast aspersions on our fellow professionals. 4) I dispute the suggestion that one-third of the OCLC database consists of duplicated records. My own experience with the system would lead me to the conclusion that less than one record out of 20 or 30 is an exact bibliographical duplicate of any other—and more than half of these are "dead" entries, either created for the Acquisitions Subsystem or labeled with see references to other, better records.

In any event, Geer misses the point. Whether or not record number 10,000,000 is actually *the* 10 millionth bibliographical entry in the OCLC database is as irrelevant as the question of whether Harlan Ellison's *Deathbird Stories* was actually *the* 250,000th volume to be added to the CSCSB Library collection in 1977. We celebrate such occasions because they represent psychological milestones in the advancement of human knowledge and experience. Whatever defects OCLC possesses . . . . it is what we make it.

Yes, I really did try to get the 10,000,000th

If they'd been librarians by B.B. Rile

ALA member B.B. Rile here launches her revisionist series on "how much nicer history could have been had there been more opportunity for gifted people to be usefully employed in the library profession." A winner of AL's celebrated "100-Uses-for-a-Dead-Catalog Contest," Rile is catalog librarian at the Wichita State University Library.

OCLC record, and I'm proud that I did—for myself, for the institution, for the OCLC Pacific Network. *But*—and this is a very large *caveat* indeed—I do not regard this event as anything more than a happy accident, one of those fortuitous bolts of chance, good or bad, that sometimes strike us all.

MICHAEL BURGESS, Pfau Library, California State College, San Bernardino

"Brain drain" and recent history

IT COULD ONLY HAPPEN IN CHICAgo. Yellow journalists on the prowl in a slow week run front-page stories about the library commisioner spending thousands on chauffeur and car. Members of the City Council, ready to embarrass the newly elected reform mayor (and protect their clout-heavy departments) cross examine the library commissioner on abuse of taxpayer dollars by convention-crazy librarians. The news stories are picked up by national wire services, and the American library community finds itself dragged into sleazy Chicago politics.

Art Plotnik's January editorial (p. 4) on the situation at the Chicago Public Library unfortunately does not give the library community any more facts than the yellow journalists he delights in savaging. In fact, it could well have been co-authored by our commissioner, who praised it in her latest newsletter. Conspicuously missing from his account is any understanding of this library's recent history and an alarming disdain for the morale and professional reputation of the employees.

It was logical for Plotnik to assume that a disgruntled employee was the source of the news leaks. Logical, but incorrect. To my knowledge, every news story on the library was published as a result of the reporters' requests for internal library budget documents under the city's new Freedom of Information executive order, or of interviews with library administrators. To give the impression that CPL employees are irresponsibly ranting and raving to the press about conditions at CPL is to denigrate the legitimate efforts of many of us to make reasoned, intelligent arguments to the appropriate authorities for redress of our many grievances.

The one item concerning me in the editorial is incorrect. I did not *plant* the "brain drain" article; I *printed* it in the December 1983 newsletter of our union. After writing it, I asked Plotnik if he would like to make "brain drain" the subject of an in-depth article. He apparently prefers speculation to serious consideration of a serious problem.

To better understand our situation here, it is useful to look to our recent history. The Chicago press has done a good job of publicizing the shameful lack of a central library in Chicago. There have been well over two dozen editorials on the issue, all calling for immediate action by the mayor and the City Council. At the same time, the press recognizes (as did the City Club, in a 1982 report) that the library staff and board have become increasingly politicized.

Due to the sponsorship of our previous mayor, the library board at this writing counts among its members several whose competence and interest in library affairs could be seriously questioned.

Under the reign of our current commissioner, positions are regularly filled without competitive examinations and promotions awarded to favorites. Meanwhile, employees with years of experience wait for promotions while watching the number of their coworkers and size of their book budgets shrink.

No, Art, it was not illogical to assume that an employee was the tipster, just incorrect.

What I would really like to know is why you waited until the commissioner was muddied-up before you chose to cover the Chicago Public Library's problems in a major editorial. Or are the pay equity charges that the union filed last year too boring for your readers? Could it be that the position paper that our union submitted to the mayor's transition team was not sexy enough for the pages of *AL*? How about our testimony before the City Council every year for the past five years on the deteriorating conditions at CPL?

You're right, Art, the daily press *does* only cover half the story—and it's a damn shame that the professional press can't do better.

KATHLEEN PRENDERGAST, ALA member and president, Chicago Public Library Employees Union AFSCME Local 1215, Chicago, Ill.

Regarding the "leak," I'll stick by the reliability of my sources, which include the CPL commissioner. The "plant" of the "brain-drain" story became apparent to me when a Chicago CBS newscaster called to confirm "a brain-drain at CPL"—though perhaps a fairer phrase than "plant" might be "putting words in the mouth of the press." My quarrel is with those staff who play at being public information officers in a game that has become too perilous for ardent amateurs. I regret I lacked space to laud the union and other staff members for their massive fact-gathering efforts to support library and professional progress. As for balance in our CPL coverage overall, we try, but we'll try harder. —*A.P.*

Don't tout programs uncritically!

I AM WRITING CONCERNING THE "Software Showcase" that *AL* initiated in January (p. 46).

As a computer user in our library, I am troubled by your decision to give prominent space to what amounted to a promotion for the "Personal Bibliographic System." *AL* would not send a book to the author of that book for review and then feature it on several pages, nor would it do the same for any other product. Yet by allowing the writer of a program to describe his work without mentioning any faults or problems seems to me to be doing just that. You are allowing him to endorse his own product and giving validity to that endorsement by featuring it on your pages without a critical appreciation or even a few words of explanation from a dispassionate reviewer. Just because a program has been developed at a reputable school and has had important funding does not necessarily make it the best choice for libraries to adopt. There are several reasons, some of which are mentioned briefly below, why this system may be unsuitable for many library applications.

The program seems needlessly cumbersome and time-consuming for the user. For example, after entering each item the program returns to main menu for the user to select again the type of document being entered. There is no provision for continuing in the same format without returning to main menu or going through other time-consuming routines.

Nor is the provision for saving each item convenient. To save a bibliographic entry, which is, of course, a must to have it in the future, the operator must save each on the disk individually. There is no provision for temporarily storing the items in the computer's RAM and then saving them on the disk as a group. While this is a secure system in that it guards against inadvertent erasures, it also means that the system's user must wait for the disk to spin and the saving to be completed after each entry.

Even when the entry is saved, it needs to be reformatted before printing. As the bibliography is being printed, a help notice on the screen informs the operator that there may be up to a 90-second wait while each entry is being formatted.

While the idea of adhering to an agreed-upon bibliographic format seems ideal, it is not one that is currently used by publishers with whom I am familiar.

I am not in the habit of writing angry letters to journals and hope this one has not been too intemperate. And I have used only the demonstration program and may surely be wrong about some of my assertions. But touting expensive programs without adequate analysis or investigation does not seem a wise course for *AL* to pursue.

ERWIN K. WELSCH, University of Wisconsin/Madison Memorial Library

We wanted to alert our readers to some of the better-looking programs coming along and thought that a "showcase" would at least provide a fairly detailed view. One thing we see we must do immediately is to make the context clearer. "Showcase" does not endorse the programs included, and encourages consumers simply to acquire additional information. —Ed. □

Doctor of Arts in INFORMATION SCIENCE

A COMPUTER-BASED PROGRAM FOR INFORMATION AND MEDIA PROFESSIONALS

The Program—*"Study while you work"*
Nova University now makes it possible for you to earn a doctoral degree while you continue to work. The field-based Doctor of Arts in Information Science **(D.A.I.S.)** program brings Nova University to you. Most of the **D.A.I.S.** program can be completed at your place of employment or in your home in as little as three years.

Courses—
"Computer instruction"
The **D.A.I.S.** curriculum consists of six "core courses" completed through a computer-based learning system. You will use the computer to study in such areas as computer science, systems analysis and design, networking, telecommunications, and strategic management techniques for libraries, media and information centers.

Practicums—*"Research that counts"*
Practicums are applied research projects related to the core courses undertaken to address significant problems in institutions and organizations. At any time during the program you encounter problems or have questions that need immediate attention. Nova "on-campus" faculty are available through electronic mail or telephone for guidance and answers.

Regional Seminars—
"Bringing it all together"
Each year you will attend four weekend seminars. These meetings give you the opportunity to share your progress and experiences with other **D.A.I.S.** students. Recognized authorities in information science conduct the sessions. These experts share the latest developments in digital computers, telecommunications, and information science. Seminars help integrate what you have learned in the core courses, in practicums, and in the field project.

Tuition—*"Partial payment plan available"*
Tuition is $3200 per year. A partial payment plan is available to help make tuition manageable.

Enrollment—*"Targeted admission"*
An important condition for entering the program and earning a degree is that you be currently employed in a library, media, or information center. A master's degree in library, media, or information science is also required.

Applications are now being accepted for the **D.A.I.S.** program.

Information—*"Immediate answers"*
Call us today at **(305) 475-7047** or in Florida call toll free **1-800-432-5021** or for a brochure and application materials write to:

Nova University is accredited by the Southern Association of Colleges and Schools and admits students of any race, color, and national or ethnic origin.

Advanced library obfuscation

or

The modifiable ergonomic dimensions of the English language

by James C. Thompson

It's a paradise of tools, where instead of buying books, librarians press buttons. All you have to do is locate one stupid librarian who is interested in buying a book, and everyone can have it.

Frederick A. Praeger
President and Publisher, Westview Press

Mr. Praeger, as reported in the *Chronicle of Higher Education*,[1] offered the above analysis of library operations not long ago at a meeting sponsored by the University of Chicago. If his statements were quoted accurately—and he has said they were, though sometimes "out of context"—he will be well advised to go armed into the next library he visits.

The explanation which suggested itself to me when I read his remarks might occur to any librarian faced with such an attitude: that the speaker knows nothing about libraries and how they are run. This would not be a surprise; for after a decade of purchasing from, corresponding with, and consulting for scholarly publishers, I am convinced that library operations are a complete mystery to them, and they have abandoned all hope of unraveling it.

Under normal circumstances, they accept the unfathomable workings of the library as they do the rotation of the earth—they know it affects them, but there's not much they can do about it. But a danger arises when publishers and librarians are at odds, as they are increasingly during these hard times. When libraries stop buying as many books, the obscurity of their methods provides an attractive opportunity to construct facile but erroneous explanations suggestive of conspiracy.

The library tongue

After much consideration, however, I am forced to conclude that the fault lies more with librarians and the ways we talk and write about our work than with the publishers. No two libraries operate in quite the same way, and no two librarians use the same words to describe what they do, even within one library. It would be hard to get even a small group of librarians to agree on the usage of such common terms as serial, series, periodical, continuation, or analytic. Perhaps because such words are used inconsistently, library staffs often develop unique local vocabularies and come to rely on them until they can no longer refer to things any other way.

Here are the names of some files I encountered in one library—and what they really turned out to be:

The Departed File: A slip for every book that ever departed from Technical Services, filed by year and then by call number. It proved that a missing book was someone else's problem.

The Source: A hard card for every book ever ordered, whether or not received, filed by decade and then by main entry (not to be confused with the completed-order file). It was filed first, was thus the only current file, and so became essential.

Harry's Slips: A slip for each book sent to the bindery, filed by call number. It helped Harry expose errors on the part of the bindery.

Bruce's Papers: Left by Bruce in ages past.

The Tub: The on-order file.

The Box: Slips to be matched with incoming OCLC cards.

Lucy's Looking: Someday, Lucy will solve these cataloging problems.

Give to J. A. Cabeen: This file could not be identified, so it was given to J. A. Cabeen.

Series Decisions: Every series title ever rejected as a subscription, with reasons for the decision. Used to suppress any subsequent interest in the material.

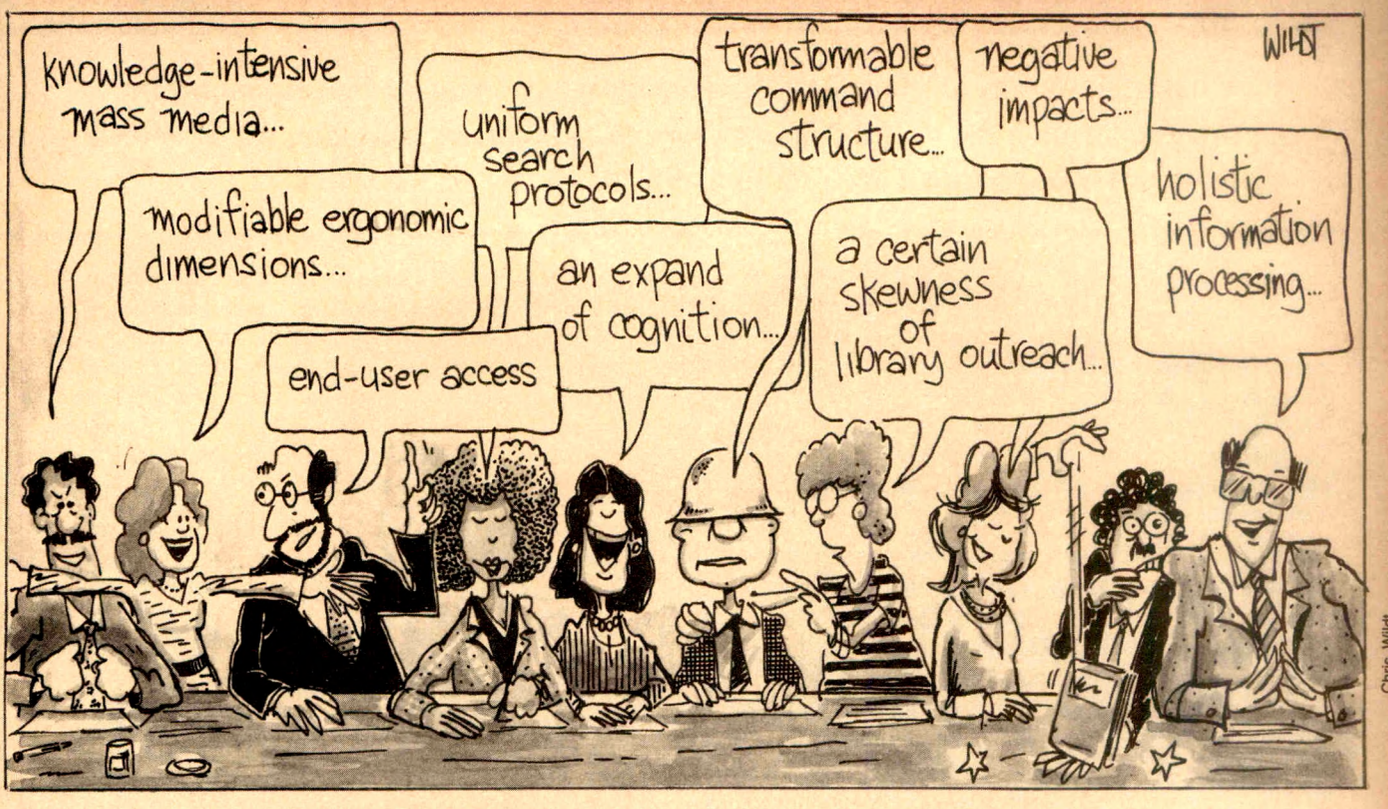
Seeding our clouds

Since the limitations of such terminology are more obvious in print than in conversation, library writing is comparatively free of it. But our literature has other means at hand by which to cloud an issue. One subspecies is based on the art of saying nothing at great length.

A common technique for avoiding content calls for filling the first half of the article with questions, and the latter with admonitions to answer them. This is found particularly in the literature of automation, and in the editorials of certain journals. Readers who expect to find information simply handed to them can avoid disappointment by steering clear of

"The professor who wants a new book and is told 'we could firm-order that as a do-not-duplicate under our approval profile, but if it's a continuation it should come on standing order' is liable to give up on the library as well as the book."

James Thompson is associate university librarian at the Fondren Library, Rice University, Houston, Tex.



articles in which question marks and the word "must" appear prominently.

Sometimes a valid point is hidden in an overabundance of words. For example, the authors of an otherwise excellent article could probably have found a more succinct way than this to suggest that research is important to the faculty:

> The potential for conducting research forms the next component of analysis. It is beneficial to reiterate that research is usually by far the pivotal criterion in evaluations of faculty or faculty-like personnel. Excellence in job performance being simply assumed, research competence continues to grow in importance, greatly influencing the possibilities for both institutional success and marketplace flexibility.[2]

A sufficiently stretched metaphor can stop readers dead in their tracks at the opening sentence, as with this comment on citation analysis:

> An area of science can be viewed as an Euclidean space with documents or authors located at the points.[3]

Librarianship is sometimes considered a soft science, akin to sociology or psychology. Perhaps that is why we imitate those disciplines in relying heavily on impressive, but essentially meaningless, pseudoscientific jargon. We seem to lack confidence in our professional status, as indicated by the number of articles we produce on that question—one that does not arise in the literatures of the more established professions. It is also evident in the amount of journal space devoted to issues of a suspiciously nonprofessional nature, such as a running debate in *College & Research Libraries News* on the best method of loading booktrucks.[4] Possibly tenure requirements contribute to the proliferation of unneeded treatises in uncountable and unaffordable journals; if so, library literature stands as a *prima facie* case against faculty status for librarians.

Overheard at ALA

But my aim is not to speculate on why library expression is so uncommunicative—merely to give a few illustrations of the havoc it can cause. Here are some quotations copied down during presentations at the most recent ALA Annual Conference:

modifiable ergonomic dimensions
extrinsic modification strategies
cognitive ergonomics
sophisticated search strategies
powerful retrieval capabilities
improved retrieval technologies
negative impacts
viable terminal operator
holistic information processing
uniform search protocols
differential experiences
an expand of cognition
locally relevant information processing
end-user access
classical ergonomic solution
information equalizers
a certain skewness of library outreach
information transition
proportionate system modifiability
conceptual structures
spatial conceptualizers
cognitive frameworks
transformable command structures
small-process rewards
intermediate motivators
adaptation decisions
systemic relationships
knowledge-intensive mass media

All of the above represent concepts that would be recognizable if described in plain English. For example, "modifiable ergonomic dimensions," a phrase destined to become notorious and which was cited within 48 hours,[5] was used in reference to an adjustable terminal.

If the catchwords of "information science" are insufficiently convincing, they can be fleshed out with those of some other field:

> Just as "yin" and "yang" do not form a dualism that splits the universe in two, the apparent "yin yang" aspects of Penn

"In the past, a library or one of its departments could safeguard its autonomy by suggesting, through the use of cryptic descriptions, that any intrusion would interfere with a complex operation better left to itself."

> State's authority control system cannot be considered as two separate systems linked together. At the core of the "yin yang" facets of the universe is "Tao," the Way, which is the unifying principle of the universe that maintains it and gives it motion and order. In the same way, the Universal Entry Control (UEC) system forms the "Tao" of Penn State's catalog access system and activates the relationships of the bibliographic records according to the interaction between user search requests and the universal entries.[6]

Even the names with which we label our jobs seem intended to confuse rather than clarify. Recent journals contain at least seven different synonyms for Head of OCLC Cataloging and five for Book Selector, not to mention such intriguing occupational titles as Preparatory Studies Librarian, Multitype Coordinator, Assistant Dean of Instruction, Assistant Librarian/Technical Services/Generalist, and a diminutive Microform Librarian. Since this is how we solicit applications, we would have no right to balk at a resume beginning in this fashion:

> **RESUME OF APPLICANT**
>
> **DIMENSION MODIFIER.** Resourcefully wrought end-user access while functionable piloting information transition. Halved negative impacts of differential experiences and trebled viable terminal operators. Soundfully prompted an expand of cognition and avidly contrived adaptation decisions. Clarified and keynoted cognitive framework.

This may be more than a bad dream: all the verbs and adverbs in that paragraph are suggested in a handout entitled "Power VERBS and ADVERBS which are active and/or descriptive,"[7] distributed at the ALA placement center during the Annual Conference.

Abstract expressionism

Where then should we look for writing on librarianship that is lucid and concise, once we have exhausted the small core of great writers in the field (the De Gennaros, Gores, and Fasanas, for example)? Surely it is to the abstracts that we must look first. An abstract conveys the gist of the article; it lets the expert reader know whether the whole is worth reading, and gives the browser the main points without further exploration. Being brief, it would seem to be simple to compose; being important, it is presumably composed carefully.

Unfortunately, even in our more prominent professional journals, the abstracts often are fully as obfuscatory as the articles:

> ABSTRACT
>
> A methodology is developed and applied to a data collection consisting of questions in order to discern the nature of the cognitive need "to know": the information need. . . . Two experimental hypotheses guided this methodology for a "closed" problem situation: H_1 where the number of questions generated varies directly as the information need varies, and H_2 where the number of questions generated varies inversely as the data input varies. The results of the statistical analysis supported the indicated trend to decreasing questioning activity as the data input rose. The results of the linguistic analysis revealed a consistent question formulation pattern between the two "closed" problems. Thus it follows in theory that the nature of information need can be discerned indirectly through question generation and formulation.[8]

Which is to say: if they don't know, they'll ask. Thus overly elaborate language can disguise the truistic nature of the point being made, as in the following:

> The application of Kantor's demand-adjusted shelf availability model to a medium-sized academic library is described. The model can be applied in a working library environment with relative ease. The data indicate that there are significant differences in shelf availability when the data are sorted, adjusted, and analyzed by last circulation date, acquisition date, and imprint date. There is also a significant difference between the results of data gathered during periods of low and high use.[9]

In other words, popular and recent books have been popular recently; books are used more when they're more in use. When the abstract contains the whole substance of the article, it is as reliable an indication of a problem as, in the previous example, when one must read the article to make sense of the abstract.

ALA has its own ways of contributing to the verbiage. A novice conferee faced with a program listing two thousand meetings will feel little sympathy for whoever named the Association for Library Service to Children, Priority Group II—Evaluation of Media: Toys, Games, and Realia Evaluation Committee; or the Resources and Technical Services Division, Serials Section, Ad Hoc Committee to Study the Feasibility of Creating Dynamic Lists of Core Serials.

It doesn't always help to abbreviate these unwieldy appellations; one industrious researcher has discovered that there are least 37 legitimate library initialisms made up from the letters A, C, R, and L.[10] This is not amusing to one university library director whose president won't let him drop out of CRL (Center for Research Libraries) because he has it confused with ARL (Association of Research Libraries). "It's worth $10,000 a year," this director has been heard to say, "not to have to point out the president's mistake to him."

Tools for bibliographic befuddlement

In addition to those already cited, there are other genera of double-talk that can profitably be used to reduce comprehension:

- *Euphemisms* help keep the skeletons in the closet and are much favored in references to processing backlogs. My library had backlogs known as "on location," "the N.P.'s," and the ominous "B-52 books" until the catalogers, with commendable courage, collected them all into one sequence called "the backlog" and proceeded to catalog the books in it.

• *Obsolete terms* are passed down from one library generation to the next, the original meanings lost in history. "P slip" has become a shibboleth for detecting pre-OCLC catalogers, "s.n.m." appears widely in serials authority files, but few remember its etymology (it does not stand for "series not made"). Some of our "N.P.'s" were also "s.s.o.'s," but opinion varies as to the meaning of that.

• *Implications* are conveyed by loaded terms such as "authority control," the very name of which implies a stern correctness and a right to exist. It hints at masochism; seen in that light, "interactive authority control" becomes vaguely perverse, while "fully automated interactive authority control" takes on a whole new aura.

• *Code words* look like common English terms but have different meanings. This is not like the use of technical terms in other professions. When the doctor refers to a hemostat, or the lawyer to a *subpoena duces tecum*, these are understood to be meant for a select group. But library designations which are second nature to librarians may be composed of words deceptively familiar to others—terms like "blanket order," "main entry," or "shelflist." The professor who wants a new book and is told "we could firm-order that as a do-not-duplicate under our approval profile, but if it's a continuation it should come on standing order" is liable to give up on the library as well as the book.

Biblish

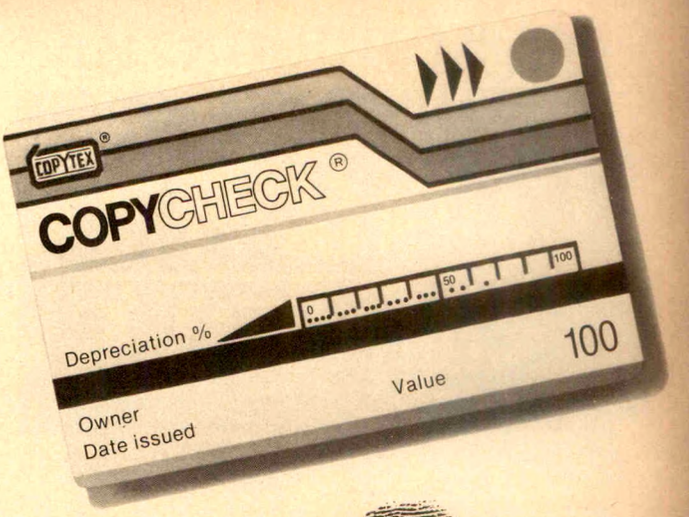
All these categories together constitute what H.H. Neville has termed "Biblish," the language of librarians.[11] But has it always been so? The journals of fifty or a hundred years ago are, if anything, more readable now than today's publications. The professional vocabulary before the age of automation was comparatively stable: the 1943 *A.L.A. Glossary of Library Terms*,[12] begun in 1926, was still in print in 1973 (and not superseded until 1983). But it does contain some entries which would give pause to a modern holistic information processor, such as "Gouge Index," "Divinity Calf," "American Russia," "Fatface," and "V Slip" (a competitor of the "P Slip," which is also included, though with a dubious etymology).

Of course, for all the confusion it can cause, Biblish does have its good side. It enables members of a group to converse effectively without inviting continual interruption from curious onlookers, an advantage it shares with the rhyming slang of the Cockney underworld. In the past, a library or one of its departments could safeguard its autonomy by suggesting, through cryptic descriptions, that any intrusion would risk interference with a complex operation better left to itself.

But library administrators and their bosses are no longer so easily put off, nor can they afford to be in a time when every dollar counts and every dollar is counted. They are increasingly concerned with how their departments function, and reluctant to accept, without question, decisions of major and prolonged impact on the library as a whole. This is especially true in technical services, at once the most costly and most easily examined area of the library.

When procedures supplant goals

There is a tendency within complex organizations to lose sight of the goals for which operational procedures have been created. When people can attain their goals only through an effort of many years, procedures established to promote such



NO TWO ARE ALIKE.

Finally, security with a guarantee.

The new Copytex debit card copier control system offers absolute security. The Copytex system uses a revolutionary technique which makes CopyCheck cards the only debit cards impossible to duplicate or counterfeit. Each user card is inspected for its individual microstructure, which is as unique as any fingerprint. If the card's microstructure does not match what is encoded on its mag stripe, the card is rejected. Security is guaranteed.

One system above the rest.

No two debit card systems are alike, either. Copytex offers several outstanding advantages in addition to total security. Unique accounts can be assigned to individuals or departments. Troublesome key counters are replaced with convenient account cards, thus eliminating unauthorized copying. An optional printer is also available for analysis of copier use and system performance. **Plus, each card has a visual indicator of its current value.** No surprises and no more arguments over credits. Get the unduplicatable original...get Copytex and get the benefits and total support from Infortext Systems, Inc., the recognized leader in copier control systems.

PIERIAN PRESS
P.O. Box 1808 Ann Arbor, MI 48106

goals take on a life of their own. A shorthand vocabulary springs up, which simplifies daily activities but distracts people from their original objectives. (Whereas "backlog" implies a problem, for example, "on location" is neutral, with a suggestion of propriety.)

In time, the organization ceases to think about its aims, since the various interested parties have no common language with which to discuss and reconsider them. Routines become habits, and habits traditions. These traditions are reflected in the language by which they are passed on, and the language in turn perpetuates the traditions. And that is where the danger lies.

Still and all, library writing and speaking is no worse than that of other professions, and better than some (such as data processing). And the confusion the language sometimes causes can lead to fascinating and delightful encounters with those vast portions of the world which are not libraries.

A few years ago, at the annual conference of the Maryland Library Association, the exhibitors and their customers were intrigued to find that the first and largest exhibit was one displaying Sanyo brand vibrators and massagers. As librarians entered the hall, attractive young people of the opposite sex would lure them into the booth, remove their shoes, and massage their feet. This was pleasant but mysterious; the other vendors whispered about it throughout the conference until finally someone noticed the slogan on the exhibit banner:

SANYO IMPROVES YOUR CIRCULATION

Presumably Sanyo had noticed the codeword "circulation" in an index to conventions and assumed that the "M" in "MLA" stood for "Medical." The Sanyo people were obviously as puzzled by our presence as we by theirs. But how much drearier such a conference would be if there were nothing to do but listen to the presentation of papers. □

MODERN SUBJECT ACCESS in the Online Age

by Pauline A. Cochrane

Subject access: An up-to-date definition

Subject access is the process of finding information in a *collection of items* by *matching search words* with the *vocabulary* found in the *index or catalog records* for the collection, OR by matching search words with *words found in the items* themselves or with other *related words or clues* provided in the *file* being searched. It is assumed that the information being sought is about "something" we will call a "subject."

The key terms in the above definition are access, collection of items, search words, vocabulary, index or catalog records, related words or clues, and file.

In this second lesson of the course, we will identify each of these key terms and their part in providing *subject access* in both traditional and computer-based services.

The subject access process and the records produced during indexing and cataloging are undergoing many changes due to technology. Library card catalogs and printed abstracting and indexing services are changing into online catalogs and access services. Why? Because computer generation of these products is more efficient, and it provides us with the flexibility to create new and different products and services without duplicating records already in the online files.

Unfortunately, many good features of traditional catalogs and indexes are missing in computer-based products, largely because of constraints imposed by early computer technology. Before we examine modern subject access tools, it may be helpful to refresh our memories about what was good in the older ways. Perhaps there is a way to lift the constraints and revive the "good old" features in new tools.

The older ways

1. Main features

In library card catalogs, we have for many years used the unit card system of bibliographic control with references. Fig. 1[1] shows what the unit card system provides:

1. DISPLAY of complete bibliographic information at every entry (access) point.
2. ACCESS by first word in entry only.
3. TRACING at bottom of card of all additional entries made for each item described.
4. See and see also REFERENCES (on separate cards from unit cards) pointing to access points elsewhere in the file.
5. GUIDECARDS in the file drawers to make SCANNING easy.
6. DIRECTIONAL MESSAGES about related files such as a pamphlet file or printed indexes and bibliographies.

One of the most important subject access features of the unit card system is the practice of making additional cards to direct the searcher to related headings and entries. For example, in front of or behind all the cards at the access point BOXING in a library card catalog, you can usually find another card, called a cross reference, that says:

BOXING

see also

BAG PUNCHING

Still another card directs a searcher who has accessed the file using a synonym, e.g., *fighting*. TO the heading BOXING, which is the preferred heading for the subject, i.e., where the subject has actually been indexed. Because *fighting* has several meanings, the card might direct the searcher to other access points besides BOXING:

Fighting

see

ANIMAL FIGHTING
BATTLES
BOXING
BULL-FIGHTS
DUELING
WAR

To keep track of the form of established subject headings and other access points and to trace all the references made, a library cataloger could create a "subject authority file." In this file are recorded the form and scope of subject headings, tracings of all related terms, and the subheadings used with subject terms in the public catalog.

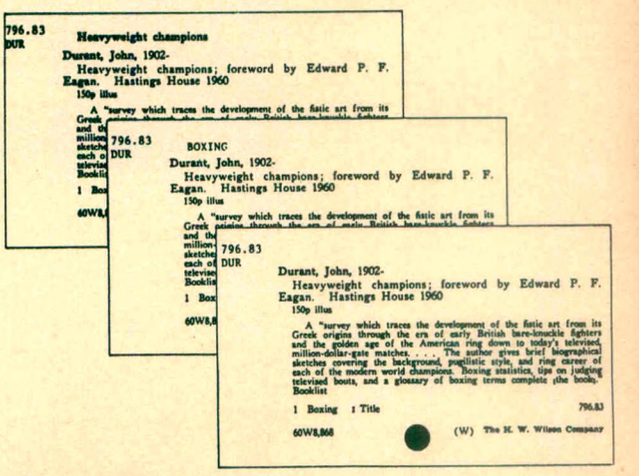

Fig. 1: The unit card system of bibliographic control

2. Problems with subject access

Over the years most libraries have given up the maintenance of subject authority files. Some have even given up typing cross reference cards and recording relationships between terms. Instead they have come to rely on the subject authority file maintained by the Library of Congress (called LCSH for *Library of Congress Subject Headings*) or the *Sears' List of Subject Headings* maintained by the H.W. Wilson Company. Perhaps because many catalogers had used the unit cards received from LC and Wilson *as is*, with few changes, *and* because they believed or were told that reference cards were not being used, the *subject access* system in card catalogs was breaking down.

Catalog users were told to use LCSH as a guide if they were having any difficulty with subject searches. But the related terms shown in LCSH for BOXING and Fighting (from the 9th ed., 1980) (Fig. 2) are inaccurate for the library that uses only the subject headings shown in col. 2 of the previous page. Fig. 2 shows all the subject authority cards catalogers might have made if they'd had time. Few librarians have marked their copies of LCSH at the public catalog to indicate which headings and references are valid in their catalog. (They may have been taught to do this in library school and the Sears' *List* has instructions for this, but the pressure of other work. . . .)

Fig. 2 shows how the *see* reference for Fighting is traced under the heading BOXING (*x* Fighting). You can also see that LC has used subdivisions with the heading, e.g.,—Accidents and injuries. As for subdivision usage, some libraries use what is on the catalog record as is; others ignore subdivisions when filing catalog cards if there are fewer than a dozen cards under the main heading. Some libraries have used only a few subdivisions for standard *forms* of works, e.g., bibliography, catalogs, etc. Here again, subject access suffers because some form subdivisions, such as Interviews, Caricatures and Cartoons, and Sermons, enhance the subject being described.

A library's cross reference card in the subject authority file (related headings are added as they are established)

Fig. 2: Subject authority records for BOXING and Fighting

Although many people think of LCSH as *the* subject authority file for their catalog, it is not a complete list of all the subject headings found on LC cards. In the introduction to LCSH is a long list of headings that do not appear in LCSH and another long list of subdivisions that are standard or "free-floating" and will therefore not be printed when used at LC, unless catalogers are "tracing references," as in Fig. 2. The tracing of references is fairly complete in LCSH, even if the notation used (*x, xx, sa*) is confusing to many.

From the situation just described we might conclude that both the old ways of producing catalogs and the catalogs themselves were useful but faulty, and for some time have needed changes to improve subject access.

In printed indexes such as *The Reader's Guide to Periodical Literature* (Fig. 3a), we see many of the features found in

(b) From the Hennepin County (Minn.) library catalog, 13th ed.

Fig. 3: Entries in a printed index (a) and a library catalog (b)

catalogs: full bibliographic information at each entry point, access via cross references, and subheadings. Some library catalogs produced in book form by computer look more like printed indexes than catalog/unit card systems because of the variations in typography offered by computer-based photocomposition (see Fig. 3b). A noticeable difference in such indexes and catalogs is the omission of tracings. But the Hennepin County (Minn.) Library book-form catalog (Fig. 3b) has kept many of the good features of catalogs and added features that increase ease of use and scanning. Notice the type variation in call numbers and notes.

Index publishers such as the H.W. Wilson Company, Information Access Corporation, and Public Affairs Information Service have tried to use subject index vocabularies similar to LCSH, the de facto standard used by the library world. But these index publishers and many others in the abstracting and indexing community have nevertheless strayed from LCSH; they felt it was not well suited to the literature they were covering, and they wanted to adopt other index

© 1984 by The H.W. Wilson Company. Material reproduced by permission of the publisher.

vocabulary styles. Because these indexes were unable to stay compatible with LCSH, problems with subject access have been greatly aggravated.

Figure 4 is an example of how two vocabularies at the Library of Congress itself have drifted apart after 15 years. The Legislative Indexing Vocabulary (LIV) was started from LCSH. Although many of the headings are identical, references to related headings are different. LIV has adopted the idea of a thesaurus and now shows the relationships between terms with the notation BT (broader term), NT (narrower term), RT (related term), and UF (use for).

Anti-submarine warfare	**Antisubmarine warfare**
sa Depth charges	NT Naval mines
Destroyer escorts	Submarine detection
Destroyers (Warships)	BT Maritime operations
Frigates	Naval aviation
Mines, Submarine	Naval science
Sonar	Submarines
Submarine chasers	War
Submarine warfare	RT Antisubmarine aircraft
x ASW	Destroyers
xx Aeronautics, Military	Naval mine warfare
Destroyers (Warships)	Submarine warfare
Submarine warfare	
Antimissile missiles	**Antimissile missiles**
x ABM (Antiballistic missiles)	UF ABM (Antiballistic missiles)
Antiballistic missiles	Antiballistic missiles
xx Air defenses, Military	NT Safeguard ABM system
Antiaircraft missiles	Sentinel ABM system
Guided missiles	BT Air defenses
	Guided missiles
	RT Surface-to-air missiles

Fig. 4: Comparison of Library of Congress Subject Headings and the Legislative Indexing Vocabulary

Many users find this notation less confusing than *x*, *xx*, *sa*. We can see in Fig. 4 how these two notations signify the same relations in different ways. The concept of hierarchy is easier to follow with the BT-NT notation (compare Guided Missiles), and items listed twice in LCSH as *sa* and *xx* (for example, submarine warfare) are listed only once in the legislative thesaurus as RT.

* * *

The online environment

1. New methods of subject access

Over the years criticism about LCSH has mounted.[2] However, the criticism from the library community has not been well focused and was ineffectual until findings from online catalog use studies revealed the problems users have with subject access.[3] The most severe problem appears to be "finding related words." The lack of cross reference structure in the file and the disuse of the printed LCSH beside the catalog are now seen by many to be the focal points for improving subject access. Many have compared subject access in online catalogs with what has been going on in online retrieval systems, such as ERIC on DIALOG, BRS, and ORBIT, and find most online catalogs wanting.

As more and more index publishers and libraries use computers to print catalogs or produce online catalogs, the use of pre-formed strings of subject headings (main heading plus subdivisions) with access only by the first word has also come into question. This feature, which we listed among the otherwise good features of traditional catalogs and printed indexes, has received the most criticism and is easiest for any computer-based system to "fix."

Consider, for example, the concept *Islam*. It is represented in LCSH by more than 200 subject headings, but only a small portion of them can be found by checking under ISLAM and its related terms or under any other terms in the alphabetical vicinity. Fig. 5 shows a portion of the tracing in LCSH for the

Islam *(Indirect) (BP1-223)*
Here are entered works on the religion of which Muhammad is the prophet. Works on the community of believers in this religion are entered under Muslims. references to *Islam* under other access points. Fig. 6 shows how a computer-based catalog can provide access in a browsing index list to every access point of a particular subject, whether it be in a heading or subdivision—all of this without LCSH.

Such a list of 250+ headings, which comes from the tracing on catalog records, is a mixed blessing. It does not show which are broader terms or narrower terms; it does not lead you to related headings (*sa* references) which do not have the word ISLAM in the access point (as LCSH does in Fig. 5); and it may exhaust the user's energy before the best headings are listed. For instance, in Fig. 6, the word ISLAM and its subheadings begin at line 38.

Given the criticisms raised against LCSH and the flexibility now available for improving subject access via the computer, it is exciting to see experimentation and variation in the design of online catalogs and access services. A number of articles and books document these developments.[4] Let's itemize some

Fig. 6: Browsing in an online subject index list
(lists every heading containing word *Islam;* note filing arrangement)

of the variations that can influence subject access:

1. The layouts of catalog and index records no longer follow the unit record system of old. At some access points, or for some online displays, only partial records are shown (Fig. 7).

2. Items retrieved online are displayed in sequences one would not expect, e.g., by accession number, or by date (Fig. 7).

3. Displays do not always include the information needed to assess the relevance of the item(s) retrieved. A title may be ambiguous, with no other information provided to relate it to a subject (see item 3 in Fig. 7).

4. Cross references and directional notes are sometimes missing.

5. New subject access information may be provided, such as the relationship between subject headings and classification numbers.

6. Many systems feature display of the relationship between old subject headings and their replacements, as well as the automatic retrieval of catalog records containing the old or the new heading, regardless of which one was used in the search (Fig. 8).

7. Additional terms can be chosen from the online display of the subject authority file by merely selecting lines from the display. In Fig. 8, the user could type EXPN T1, T13, etc.

2. Progress and challenges

Not all the variations from the unit card system and printed indexes are improvements. Perhaps the designers of online systems were constrained in some way or were led to believe that parts of the old catalog were not essential. Happily, for whatever reason, the missing references and directional notes are finding their way back into online catalogs. During the redesign stage systems are becoming more user friendly,[5] through online user aids, prompts, clearer displays, and more options for record displays.

Some wonderful things have been done to create greater access to the content of catalog and index records. Many systems allow access to *every word* in a record. This is often called "keyword" or "free text" searching. You might consider this a blessing until you wade through "too many results" and find no easy way to reduce false matches.

Fig. 8: Searching in an online file with an outdated subject term

In LC's SCORPIO (shown here), there is automatic retrieval of records containing either outdated or new terms (see sets 1, 2, 3, and 4 at top) because old and new terms are related in the online subject thesaurus.

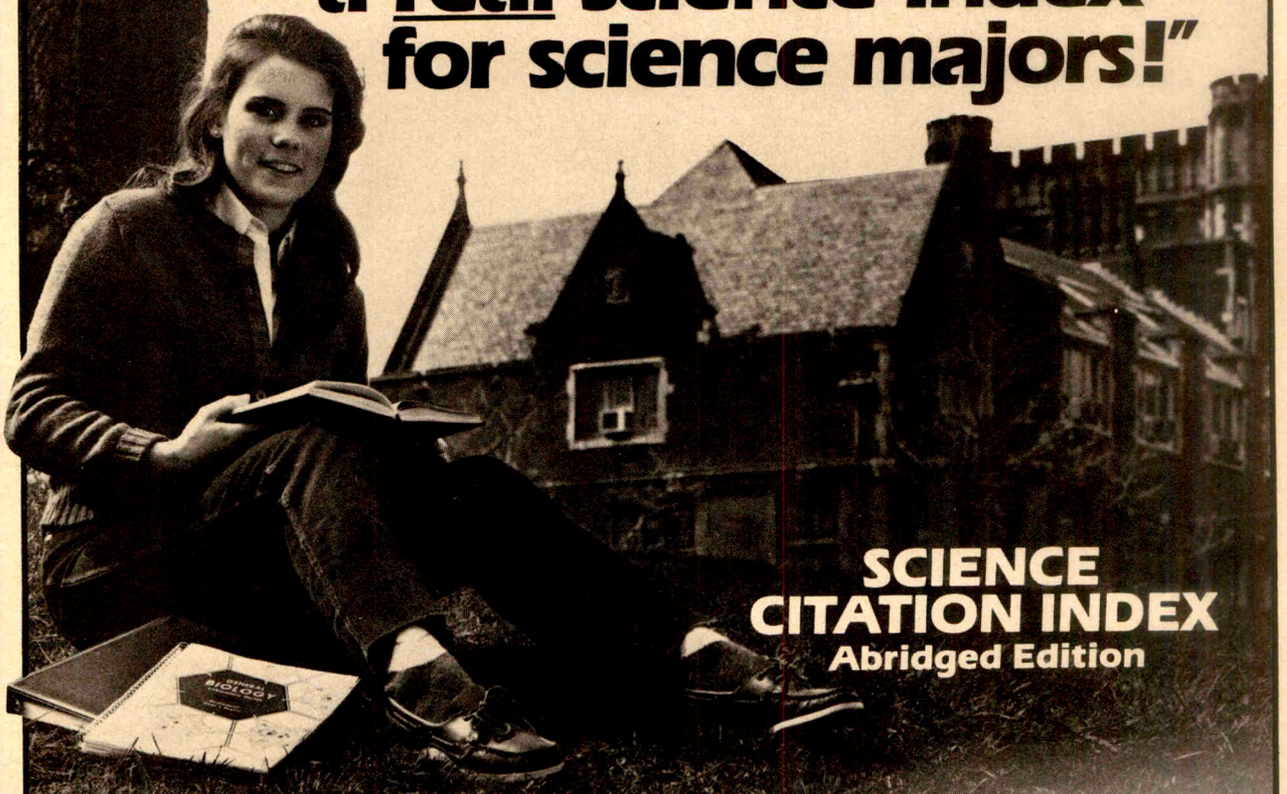
Responding to this frequent complaint about online searching (see references in footnote 3), some online services have "reloaded" their files and redesigned records, index lists, and retrieval features to help the searcher increase or decrease results more easily and accurately. For example, the popular browse index list (shown in Fig. 6) can alert searchers to check in the subject thesaurus besides going on to retrieve records (see Fig. 9, p. 150). By a simple command, they can view the subject thesaurus and add terms to their search strategy or revise their search completely by using narrower terms. Fig. 9 shows this capability through several search steps using the EXPN command in the SCORPIO (Subject-Content-Oriented Retriever for Processing Information Online) system at the Library of Congress.

The records found in the search in Fig. 9 are shown in Fig. 10, six in brief and one in full to show the subject index record that retrieved the bibliographic record. Although these records come from a special index file created for Congress by the Congressional Research Service (LIV, or Legislative Indexing Vocabulary thesaurus), they are searchable on SCORPIO, as is the Library of Congress Computer Catalog (i.e., catalog records for monographs, serials, maps, etc.) Eventually these files will be accessed *together* and LIV and LCSH can both be displayed online. The merger shown in Fig. 3 of the first part of this course (*AL*, Feb., p. 83) may become a reality at LC. Will other libraries follow?

Several online access services allow searching by classification or category number. This is often a useful and quick way to get to most of the relevant items on a subject.

You will notice from the examples in this lesson that subject access can be a complicated process. We would surely find that searchers' routes to information are sometimes strange and wonderful if we could but watch as they search. A team from OCLC did just that recently.[6] *(cont. on p. 150)*

"Finally, a real science index for science majors!"



SCIENCE CITATION INDEX
Abridged Edition

Order your free sample copy today!

Science students and faculty need a high-caliber, professional quality science index to keep them up-to-date on scientific advances. General indexes to scientific subjects just do not have the coverage or precision of access which is so important for accurate, thorough research.

Before now, superior science reference meant one thing — the Science Citation Index®. But now this same quality is available to you in the new Science Citation Index, Abridged Edition.

Author, title word, and citation indexes make the Science Citation Index, Abridged Edition sophisticated enough for science majors, yet easy enough to use for all of your general science reference needs.

What's more, its coverage—500 journals in the whole range of scientific disciplines—is ideal for the research needs of students and faculty at undergraduate institutions. And, since timeliness is a must in fast-paced scientific fields, the Abridged Edition is issued monthly. Semiannuals make retrospective searching fast and easy.

All this at a cost so low it won't take away from your other subject reference needs. Remember, superior indexes make superior students!

To get your FREE SAMPLE ISSUE of the Science Citation Index, Abridged Edition mail the coupon below.

LRS77-22930    ITEM 1 OF 8 IN SET 21                              (BIBL)
Mernissi, Fatima.
  Women, saints, and sanctuaries.  Signs, v. 3, autumn 1977: 101-112.
    Examines how North African women utilize the sanctuaries of Islamic
  saints, who are often "antiestablishment, antipatriarchal mythical figures,"
  as places to "adjust to the oppression of the system" by allowing and
  encouraging complaint and verbal vituperations.

Fig: 10: Display of records from SCORPIO BIBL (bibliographic citation) file resulting from search in Fig. 9

We are now beginning to examine the subject searching process in online catalogs and access services by using protocol analysis, transaction logs, and the like.[7]

The recent Council on Library Resources survey[8] is only the first of many studies of online catalog users. The more we observe these users the more we know we must improve subject access in our libraries, be it through the online catalog, at the printed index, or at the old card catalog. The next lessons will summarize expert opinion and suggestions about the role of the Library of Congress in improving subject access. Later, we will present some thoughts on how present and future technologies may change subject access still more. □

Now another choice for your union list.

Faxon has specialized in serials management for libraries for over 100 years. Now we're offering a Union List module on Linx, the online serials management system. Union list groups can add, share, and maintain up-to-date information on their collective serial titles and holdings.

Because we're flexible, we can handle your current machine-readable lists or save time during your manual conversion, thus saving you valuable manpower resources. Our Union List products are available now and include both group lists and individual member lists in hard copy, tape, or microfiche.

Make a choice soon! You don't have to use Faxon's subscription service to take advantage of our Union List. Call our Sales Department at (800) 225-6055 or (617) 329-3350 (collect) and arrange for a demonstration of Faxon's Union List.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

NOTICE: Beginning in June, LEADS type size will increase slightly for better legibility; rates-per-line will remain the same. In effect, the cost-per-character will rise approximately 7%.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries*, 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

JOBLINES

Joblines will appear in full on a quarterly basis—February, May, July/August, and November—and in abbreviated form the rest of the year. Space saved will be devoted to expanded Positions Open listings.

POSITIONS OPEN

ACADEMIC LIBRARY

Acquisitions, asst. head. Entry-level position. Assist department head in training and supervision of 5-member searching unit, vendor assignments, encumberance monitoring, and claiming. Responsible for department in absence of the department head. Qualifications: MLS from program accredited by ALA or its equivalent. Working knowledge of one or more foreign languages (Spanish, German, or French). Some experience with OCLC or other online system highly desirable. Appointment will be at Librarian I level. Minimum salary $16,000. Liberal benefits including tuition exemption and 22 days' vacation. 12-mo. academic appointment. Position available immediately. **Closing date for applications April 1.** Please forward resume and names, addresses, and phone numbers of 3 references to: Kate Maniscalco, Administrative Assistant, **Tulane University Libraries, New Orleans, LA 70118.** An equal-opportunity, affirmative-action employer.

Acquisitions librarian. The University of Arizona Library is seeking a librarian to supervise bibliographic searching and take part in other acquisitions activities, including collection development in the social sciences or humanities. The person selected will report to the head acquisitions librarian and will supervise students and help to organize the flow of orders through the acquisitions department. Qualifications for the position include a degree from an ALA-accredited library school and a reading knowledge of one or more European languages. Knowledge of bibliographic tools and the ability to organize the work of others are essential. Preference will be given to candidates with acquisitions experience. Professional librarians at the University of Arizona are academic professionals with voting faculty status, have 22 days per year of paid vacation, 12 days of sick leave, and a standard academic package of holidays and other fringe benefits. The beginning salary is $16,500; a higher salary is negotiable based on qualifications. **Deadline for applications is April 15.** Send inquiries and resumes, including at least 3 references, to: W. David Laird, University Librarian, **University of Arizona, Tucson, AZ 85721.** The University of Arizona is an EEO, AA employer.

Assistant catalog librarian (annual, non-tenure-track appointment, renewable up to 3 yrs.). Available July 1. Performs cataloging in all subject areas; limited work with serials and retrospective conversion project. Possible assignment up to 10 hrs. per mo. at main information desk. Requirements: ALA-MLS; working knowledge of OCLC, AACR2, Dewey, and LC classifications; demonstrated ability to communicate effectively with faculty, students, and co-workers. Preference given to candidates with one or more yrs.' cataloging experience using OCLC. Minimum salary $15,600. 12-mo. appointment with standard benefits. **Application deadline is April 20,** or until suitable applicant is hired. Send resume, academic credentials, and 3 current letters of recommendation to: Wendy Klosterman, **Briggs Library, South Dakota State University, Brookings, SD 57007-1098.** An AA, EEO employer.

Assistant director of libraries for personnel services: new position. Search reopened. Responsible for determining personnel needs of the libraries and recruiting, orienting, training, and developing staff. Recommends compensation and classification for positions. Serves as ombudsperson for staff. Requires techniques and principles of motivation, leadership, communication, and effective interviewing skills, and the ability to relate to people and render sensitive guidance in human problems. Master's degree in personnel management, counseling, or related field, and experience required. ALA-MLS and academic library experience preferred. Salary: $26,500 minimum for 12 mos. Liberal benefits. **Applicants should submit a cover letter, resume, and 3 applicable reference letters by April 10** to: Peggy Tooker, Chair, Search Committee, **Texas Tech University Libraries, Lubbock, TX 79409-0002.** EEO, AA employer.

Assistant head of acquisitions, serials department. Responsible for assisting in the administration and supervision of a combined department of 20.5 FTE, with major emphasis on quality control of serials. ALA-accredited MLS and 2 or more yrs.' professional experience in serials acquisition and control with some serials cataloging experience desired. Supervisory experience and knowledge of computer-based record systems desirable. Salary $17,000 minimum depending on qualifications and experience. 12-mo., tenure-track, TIAA/CREF, 22 days' annual leave, many other fringe benefits. Position available immediately. **Application deadline March 15** or until a suitable candidate is found. Send application and resume with names, addresses, and phone numbers of 3 references to: John A. Harrison, Director of Libraries, **University of Arkansas, Fayetteville, AR 72701.** An equal-opportunity, affirmative-action employer, welcomes applications from all qualified individuals.

Assistant university librarian—technical service. University of Arizona Library. The assistant university librarian has administrative responsibility for the 4 technical services departments (acquisitions, catalog, loan, and serials), and is a member of the administrative group. Technical services employs 22 professional librarians and more than 80 FTE clericals and other support staff. The library's annual acquisition budget exceeds $3 million, and the library adds more than 80,000 volumes per year and participates in OCLC as the 2nd-largest contributor in the Southwest. Required: ALA-accredited degree and 5 yrs.' professional library experience in a large academic library, 3 or more yrs. of such experience in a supervisory or administrative position in technical services. Experience with automated library services will be given special consideration. Professional librarians at the University of Arizona have academic professional status, are voting members of the faculty, and have 12-mo. appointments with 22 days of paid vacation, 12 days of sick leave, and 10 holidays annually. The minimum salary for this position is $35,000. A higher salary can be negotiated depending on qualifications. **Deadline for applications is May 1.** Send inquiries and resume, listing at least 3 references, to: W. David Laird, University Librarian, **University of Arizona, Tucson, AZ 85721.** The University of Arizona is an EEO, AA employer.

Associate director. The Vanderbilt University Library seeks an associate director. The associate director will have responsibility for operation of the library system, including the evaluation of programs and services, stewardship of the budget, and leadership in the implementation of systemwide policies. The associate director will work with the director in representing the library to the administration of the university. We expect to hire a person with substantial professional experience in a large academic or research library and with a proven record of creative leadership. We prefer a person of broad background, reflecting interest in the goals of scholarship and research. The associate director should be professionally active. The salary will be at least $40,000 and depend on qualifications. Vanderbilt University Library serves a scholarly community of over 10,000 students and faculty in 10 schools with a collection of over 1.5 million volumes and a staff of 175 persons. The library is organized into divisions with strong attachments to individual schools. The director and associate director work with the provost in balancing the university interest in the library with the concerns of the individual schools. **Qualified persons should send a resume and names of references by March 17** to: Malcolm Getz, Director, **Vanderbilt University Library, 419 21st Ave. S., Nashville, TN 37240-0007.** Vanderbilt is an equal-opportunity, affirmative-action employer.

Audiovisual and catalog librarian, instructor of library science. Concordia College, a 2,500-student, liberal arts college affiliated with the American Lutheran church, has tenure-track, 11-mo. position responsible for operation of AV department and cataloging of acquisitions into LC library collection using OCLC. Requirements: ALA-accredited graduate degree, training or experience with AV/TV equipment, OCLC, AACR2, and LC classification. Salary from $17,000 depending on qualifications and experience. **Application deadline: April 15.** Send letter of application, resume, and 3 letters of recommendation to: Verlyn D. Anderson, Library Director, **Carl**

University Librarian
University of Southern California

The University of Southern California invites applications and nominations for the position of university librarian. USC is a private, urban university with approximately 25,000 national and international students in undergraduate, graduate, and professional disciplines. The university librarian is the chief administrative officer for a library system consisting of Doheny Main Library and 11 branches, with 5 independent libraries, and reports to the provost. The university librarian is a member of the Council of Deans. The aggregate holdings total in excess of 2.2 million volumes and 1.4 million microforms, and there is a staff of 50 librarians and approximately 300 support personnel.

Responsibilities. Provide bold and imaginative leadership in enhancing a major research university library system, utilizing traditional as well as new and innovative technologies; participate in planning and evaluating policies and procedures which support the university's academic objectives and programs; maintain close communication between the library system, campus community, alumni, and the professional library world; guide the expansion of present library holdings and facilities; implement further appropriate information technologies; assist in solicitation of grants, benefactors, and prospective gifts; build a broader campus and community interest and support for the library system; plan and direct the library budget; administer the library personnel process.

Qualifications. An appropriate advanced degree, preferably a doctorate in an established discipline, or an accredited MLS, plus a second graduate degree; extensive experience relevant to the design, development, and operation of a substantial academic/research library; demonstrated understanding of the responsibilities of a library system that meets the needs of those engaged in teaching, research, and scholarly activities in a university; knowledge of current trends and applications of library information technologies; proven leadership and motivational abilities; superior communication skills; demonstrated success as an advocate within a university or related community, within a library community, and with potential donors; evidence of continuous growth through scholarly publication and active participation in the individual discipline and/or profession. Salary minimum $50,000.

Review of applications begins on March 15. Send letters of nomination or application (with resume and 3 professional letters of reference) to: **Chair, University Librarian Search Committee, Office of the Provost, ADM102, University of Southern California, Los Angeles, CA 90089-4019; Attn.: Janet K. Chaudhuri, Assistant Provost.**

USC is an affirmative-action, equal-opportunity employer.

B. Ylvisaker Library, Concordia College, Moorhead, MN 56560. EOE.

Audiovisual librarian to establish and operate an AV department in a 4-yr. college. Salary to $22,000, depending on qualifications. Minimum requirements: MLS from ALA-accredited library school, suitable experience in AV work, including production, promotion, and supervision; high energy level; ability to interact with the academic community. 12-mo. contract, 30 days' vacation, excellent fringe benefits through VMI Foundation, possibility of campus housing. Instructor rank. Position available from July. **Application deadline: April 1.** Send resume and updated library school placement folder to: James E. Gaines, Jr., Head Librarian, **Virginia Military Institute, Lexington, VA 24450.** AA, EEO employer.

Automation librarian. Tenure-track position with the rank of instructor or assistant professor dependent on qualifications. MLS from ALA-accredited institution required. Second master's or additional 30 hrs. preferred. Will report to library director and work closely with other professionals to plan, support, and achieve automation goals. Job includes involvement with systems including OCLC, statewide LCS, regional DataPhase ALIS-IIE system, microcomputer network, and batch-processing applications in library environment. Ideal candidate will have programming ability, familiarity with database management, and ability to work independently. Salary $20,000–$22,500. **Applications must be received by April 1.** Send letter of application, resume, the names, addresses, and telephone numbers of 3 references, and comments relating to applicant's experience with library automation and especially microcomputer applications to: Patricia A. Goheen, Director of Libraries, **Western Illinois University, Macomb, IL 61455.** Western Illinois University is an EEO, AA employer.

Cataloger. Entry-level position to perform a variety of professional assignments in bibliographic and authority record-keeping in a large academic library in theology. Applicants should be flexible enough to work in a variety of assignments, including some reference service, and able to work independently, though in close association with colleagues. Some supervision of student staff is expected. ALA-accredited master's degree in library science or equivalent competence; MDiv degree or equivalent experience desirable; knowledge of at least 2 foreign languages, ancient or modern, valued. Understanding and ability to work with AACR2, LC-RIs, OCLC-MARC formats, LC classification, LCSH, and other standards expected. The library's future will include an integrated online bibliographic system in accord with which current work is organized and evaluated. Pension and medical benefits. Salary dependent upon qualifications and experience, minimum $13,500. Available July 1. **Send letter of application, resume, and names of 3 references by April 15** to: Donald M. Vorp, Director, **Jesuit-Krauss-McCormick Library, 1100 E. 55th St., Chicago, IL 60615.** An equal-opportunity, affirmative-action institution.

Cataloger. Required: ALA-MLS; working knowledge of one European language. Recent experience with LC classification and subject headings, MARC formats, and AACR2 very desirable. This is a **beginning-level** position for someone with a strong interest in cataloging in an academic research library. Duties will be divided between serials cataloging team and general monographs cataloging. Original cataloging of serials and monographs in all languages. May be assigned subject selection responsibilities depending upon educational background. The salary is competitive, with a minimum of $17,000. **Please send resume, names and addresses of 3 references, and salary requirements by March 30** to: Sandra Carter, **General Library, University of New Mexico, Albuquerque, NM 87131.** AA, EOE.

Cataloging department head. Supervision and management of a cataloging department comprised of 4 professionals, 6 paraprofessionals, and 3.5 hourly FTE. Responsibilities include original cataloging and retrospective conversion. Qualifications: ALA-accredited MLS; 5 yrs.' increasing supervisory and administrative cataloging experience; experience with OCLC, AACR2, LC cataloging practices, and MARC format; managerial/supervisory skills. Salary $22,000 minimum depending on qualifications and experience. 12-mo., tenure-track, TIAA/CREF, 22 days' annual leave, many other fringe benefits. Position available immediately. **Application deadline March 15** or until a suitable candidate is found. Send application and resume with names, addresses, and phone numbers of 3 references to: John A. Harrison, Director of Libraries, **University of Arkansas, Fayetteville, AR 72701.** An equal-opportunity, affirmative-action employer, welcomes applications from all qualified individuals.

Catalog librarian. The University of Arizona Library is seeking a professional librarian to be responsible for the cataloging of audiovisual materials in subjects of education, art, library science, photography, and juvenile literature. Related activities such as staffing a catalog information desk will be assigned. This position reports to the head catalog librarian. The University of Arizona Library is a large academic research library with more than 2 million volumes and more than 4 million holdings in the main library system. The catalog department is one of 4 departments within the technical services division and employs 11 professional catalogers and 44 career staff. Requirements include an ALA-accredited degree; working knowledge of AACR2; experience with LC classification; experience with OCLC or a similar utility; knowledge of at least one foreign language. Previous audiovisual cataloging experience is pre-

OLD DOMINION UNIVERSITY

Library Vacancies

4 openings available April 1. ODU, an urban university in eastern Virginia, serves 15,000 students and 700 faculty at the bachelor's-, master's-, doctoral-degree levels. The fully automated library has a staff of 24 librarians, contains over 1.2 million items, and serves as the focal institution for the 18-member Tidewater Consortium.

Associate dean. Responsible for the supervision and coordination of public service functions, including reference, government publications, art library, music listening room, and archives, the incumbent also handles a variety of management functions including personnel (student, classified, professional) and physical plant management. Supervising a staff of 12 librarians and 10 support personnel, this individual is responsible for all public service activities including automated database searching, word processing, etc. Minimum qualifications include an ALA-accredited master's degree, 7 yrs.' progressively more responsible academic library experience in public service areas, demonstrated leadership ability. Additional education in computer applications and/or business practices helpful. Minimum salary: $31,000.

Head, reference department. Reporting to the associate dean, incumbent supervises a staff of 11, including 9 librarians, and manages all departmental activities and services. Duties include selection, training, and evaluation of personnel; participation in collection development, supervision of automated database searching and library instruction; planning, budgeting, reporting. Good communication skills essential. Reading knowledge of at least one foreign language highly desirable. 5 yrs.' relevant academic library experience with evidence of increasing responsibility required. Evidence of continued professional development and activity preferred. Minimum salary: $23,000.

Acquisitions librarian. Incumbent reports to head of collection management and resources development and coordinates all monographic acquisitions processes including preorder searching, order preparation and receipt, approval plan, gifts and exchange. Supervising a staff of 5, individual must have a minimum of 3 yrs.' relevant academic library experience, possess good communication skills, show evidence of continued professional development and a reading knowledge of one foreign language. Demonstrated interest in and/or experience with automated systems very helpful. Minimum salary: $16,000.

Serials librarian. Incumbent will be responsible for all functions of serials section of collection management/resources development department. Duties include management of serials acquisition and bindery, collection development and physical maintenance, report preparation, and data analysis. A background in acquisitions and/or serials control is preferred. Knowledge of OCLC and/or automated serials/acquisitions control and evidence of continued professional growth highly desirable. Minimum salary: $15,500.

All positions require an ALA-accredited master's degree at time of starting. Rank is commensurate with qualifications. **To receive full consideration, applicants should send letter of application, resume, names and addresses of 3 references, and photocopies of academic transcripts by March 15** to: **C. B. Duncan, Dean, Library, Old Dominion University, Norfolk, VA 23508.**

An affirmative-action, equal-opportunity institution

Computerized Data Services Librarian

Albert R. Mann Library

Cornell University

Cornell, the land-grant institution of New York State, is known worldwide for the teaching and research projects of the Collection of Agriculture and Life Sciences and the Collection of Human Ecology. Mann Library, which supports these programs, is the largest academic agricultural and life sciences library in the United States, and its collection is second only to the National Agricultural Library.

Mann Library is committed to exploring forward-looking ideas about the role of information services in an academic environment. Our microcomputer center, which opens this spring, will house 32 micros in a specially designed classroom and laboratory setting. The center will offer its own instructional programs in computer literacy for faculty and students, support course-related instruction, and feature a software library. Additional automation activity includes current planning for an imminent selection of an integrated library system.

Position Description

The computerized data services librarian analyzes user needs for access to nonbibliographic data; creates a library collection of data files as well as making provision for access to external data files. Provides traditional and online reference services; participates in library instruction program, including developing end-user expertise in independent retrieval of online information.

Qualifications: master's degree in relevant area such as library science, computer science, or information science. 5 yrs.' work experience in information services and experience with a wide variety of data files. Ability to communicate effectively orally and in writing with faculty, students, and administrators is essential. Demonstrated skills in reference services and instruction in access to information. Ability to identify and meet the requirements of a research faculty for access to machine-readable data files. Salary to $20,243; higher salary negotiable, dependent upon additional qualifications.

Apply by April 20. Position available July. Submit resume listing 3 references to: **Carolyn Pyhtila, 235 Olin Library, Cornell University, Ithaca, NY 14853.**

Cornell University is an equal-opportunity, affirmative-action employer.

Positions Open continued on p. 157.

Involves administrative duties, collection development, liaison work, supervision of staff, and development of policies for service, resources, and facilities. Faculty status and responsibilities. Rank commensurate with education and experience. Promotion and tenure require meeting standards of excellence in librarianship, publishing, research, and service. 12-mo. appointment with vacation of 22 days. Group life, major medical, and disability insurance plans are in effect as are TIAA/CREF and Social Security. Salary $18,000 or more depending on qualifications. **Application deadline: April 1.** Send resume and list of references to: Thomas L. Haworth, Personnel Officer, **Libraries, Stewart Center, Purdue University, West Lafayette, IN 47907.** An equal-opportunity, affirmative-action employer.

Coordinator of archival and special services, DePauw University Libraries. DePauw University is seeking an innovative librarian to manage the archives of DePauw University and Indiana United Methodism and to coordinate an emerging program of special services within the library. These services will include a visual-image library, an audiovisual collection, and a limited special collections and preservation program. The coordinator will serve as a subject liaison to several academic departments and will supervise 2 archives assistants, an audiovisual specialist, and student assistants. Active outreach to the Methodist church to promote use of the archives will be a major activity. Requirements include an ALA-accredited MLS, familiarity with archival techniques and slide or visual-image libraries, and highly developed communication and interpersonal skills. Experience in an archives, specialized archival education, and familiarity and/or willingness to become familiar with United Methodism are highly desirable. A 2nd master's degree in an historically based discipline is desirable. The successful applicant will also have an enthusiasm and an aptitude for forging innovative programs from nontraditional combinations of services and responsibilities. The position is available June 1, and offers faculty rank and excellent fringe benefits. Salary: $18,000. **Deadline: April 15.** Apply to: Jana Bradley, Director of Libraries, **Box 137, DePauw University, Greencastle, IN 46135.** An affirmative-action, equal-opportunity employer.

Director, Instructional Materials Center, School of Education, University of Wisconsin, Madison. The IMC is a special library and media center of education resources and services. Qualifications for director include an MLS from an ALA-accredited library school or equivalent, 5 yrs.' supervisory experience, and familiarity with computer-based library services. Background in education and instructional materials highly desirable. Minimum annual salary, $26,000. **Application deadline is April 2.** Position open on or about June 1. Letter of application, resume, transcripts, and 3 letters of recommendation should be sent to: Herbert M. Kleibard, Chair, IMC Director Search Committee, **University of Wisconsin-Madison, Box 25, Education Building,**

Librarian for Slavic Collections
University of California, Berkeley

Will be responsible for the selection of Slavic-language books and serials and the maintenance of the collections by review and evaluation; identification of lacunae; weeding and examination for preservation purposes. Will be expected to offer reference service and bibliographic assistance to users of the Slavic collections, particularly to the faculty associated with the Center for Slavic and East European Studies and their students. Will also offer reference and instructional services to the broader library clientele through service at the general reference desk and in orientation programs. Occasional night and weekend work will be required.

Requires graduate library degree and substantial graduate work in an academic discipline related to Slavic studies; advanced degree desirable. Fluent Russian and working facility in other Slavic and East European languages required. French, German, and Church Slavonic highly desirable. Broad knowledge of Slavic scholarship and book trade will be expected along with an understanding of current developments in research libraries and of systems of bibliographic organization and access. Full job description will be mailed on request. Classification as assistant or associate librarian in the $18,456–$32,484 per annum salary range depending on qualifications. Position available on or about June 1.

To apply, send resume and names of 3 professional references by March 15 to:

William E. Wenz, Personnel Officer
Room 447 General Library
University of California
Berkeley, CA 94720

The University of California is an equal-opportunity, affirmative-action employer.

Islamica Librarian
University of California, Berkeley

Responsible for development and maintenance of Islamica collections in humanities, social sciences, and broad interdisciplinary areas. Provide specialized reference service to faculty and students in the use of Arabic, Persian, and Turkish materials and to a broader library clientele through service at the catalog information desk. Perform original cataloging of monographs in Arabic, Persian, and Turkish including descriptive cataloging. Some weekend work required.

Requires graduate library degree, substantial graduate work in an appropriate academic discipline, and good knowledge of Arabic and working facility in either Persian or Turkish. Broad knowledge of Middle Eastern scholarship, book trade, and understanding of current developments in research libraries and of systems of bibliographic organization and access. Full job description mailed on request. Salary in the $22,560–$32,484 per annum range depending on qualifications. Position available June 1.

William E. Wenz
Library Personnel Officer
Room 447 General Library
University of California
Berkeley, CA 94720

The University of California is an equal-opportunity, affirmative-action employer.

Madison, WI 53706. The University of Wisconsin is an equal-opportunity employer and specifically encourages applications from women and members of minority groups.

Director of libraries, University of Florida, Gainesville, Fla. The University of Florida invites applications and nominations for the position of director of libraries. The University of Florida is a land-grant institution and the largest of the 9 universities comprising the state university system. The University of Florida encompasses 20 schools and colleges, over 34,000 students, and a distinguished faculty of 3,000. The institution offers the doctorate in 59 fields. The university has renowned programs in medicine, law, agriculture, engineering, and the sciences and is one of the few institutions in the country to combine instruction in all disciplines on one campus. The 13 libraries and reading rooms of the University of Florida in Gainesville house the university collection of over 2.5 million volumes, exclusive of a regional depository collection of over 500,000 documents, a map library containing 450,000 maps and aerial photographs, 1.5 million units of microtexts, and 5,000 machine-readable data sets. This collection ranks the library as 31st among the ARL libraries. The library staff includes 68 professional librarians and 128 career service staff. The library is implementing an integrated automated system which is also accessible through the state university system network of computers. A central science library and computer sciences complex costing $25 million will be completed in early 1986. The University of Florida is a member of the Association of Research Libraries, the Center for Research Libraries, the Association of Southeastern Research Libraries, and SOLINET, among other national and international organizations. The director of libraries is the chief administrative officer and reports to the vice president for academic affairs and is a member of the Council of Academic Deans. The responsibilities of the director of libraries include working with the library and the university administration to develop short- and long-range goals for the library, administering the human and fiscal resources of the library, presenting to the university administration the support needed by the libraries to accomplish its goals, and effectively representing the university libraries. A master's degree in library science from an ALA-accredited library school is required; additional advanced degrees are preferred. Candidates should have appropriate responsible experience in the administration of academic or research libraries, and a broad knowledge of the latest developments in library organization and technology. Superior management and communication skills are essential. The salary will be commensurate with qualifications and experience and competitive with other major research libraries. Minimum salary of $50,000 with upper range negotiable. **Letters of application and curriculum vitae should be submitted by April 15. Letters of nomination should be received by April 1.** All material should be sent to: John Kraft, Chair, Director of Libraries Search Committee, **College of Business Administration, University of Florida, Gainesville, FL 32611.** The University of Florida is an equal-employment-opportunity, affirmative-action employer.

Director of library/media/technology, University of Maine at Farmington. The University of Maine at Farmington invites applications and nominations for the position of director of library/media/technology. UMF is Maine's oldest public university; it serves 2,000 students and has a full-time faculty of 95. The campus is located in a charming New England town of 6,000, surrounded by clear lakes and mountains and close to major recreational areas. Undergraduate programs are provided in education, arts and sciences, and human services. The director is responsible for a staff of 19 (9 professional) and for supervision of a collection of 100,000 bound volumes; a computer center (primarily for student use) containing an IBM 4331 mainframe computer with 15 terminals (tied to the UM system computers) and 6 microcomputers; and a large instructional media service/production center that includes design stations, photo labs, and a TV studio. The successful candidate for the directorship will have an MLS degree from an ALA-accredited institution, very likely an advanced degree in an academic discipline, and at least 5 yrs. of academic library experience in a major administrative capacity. The candidate will also have a firm knowledge of current computer technology and of media services and production. UMF seeks an effective, innovative administrator who will be a strong advocate for library/media/technology. The director is on the Council of Academic Chairs and reports to the provost. Salary is commensurate with qualifications and experience, up to $30,000; the position is available after June 30. **Send letter of nomination or application with resume and 3 letters of recommendation postmarked by April 2** to: J. Karl Franson, Chair of Search Committee, **Provost's Office, University of Maine at Farmington, Farmington, ME 04938; 207-778-3501 x289 or 200.** UMF is an equal-opportunity, affirmative-action employer.

Director of library. Position available for director of library at a private college which offers a 4-yr. professional degree program to approximately 1,800 students. Qualifications required: MLS from an ALA-accredited institution, 5 yrs. of library experience with evidence of administrative responsibility, knowledge of current developments in library automation and resource sharing; strong leadership and management skills with ability to establish and maintain effective public and professional relationships. Additional degree in another academic field is highly desirable. Responsibilities: directing long- and short-term planning, fiscal management of budget; supervision of 5 professional librarians and 12 support staff. The director reports to the vice president for academic affairs. Salary: commensurate with qualifications, experience, and academic rank (assistant or associate professor), the range being $26,700–$31,500. **Application procedure: send nomination or resume along with 3 professional references by March 30** to: Iftikhar H. Bhatti, Chair of Search Committee, **Palmer College of Chiropractic, 1000 Brady St., Davenport, IA 52803; 319-324-1611 x282 or x251.** Palmer College is an equal-opportunity, affirmative-action employer.

Director of library. The director is responsible to the v.p. for academic affairs for all facets of library operation and development. This 12-mo. staff position requires a terminal degree in library science, preferably from an ALA-accredited institution, additional doctoral work preferred; 5 yrs.' experience in academic or research library; 2 yrs. in administrative position; and knowledge of academic library organization, especially in automated, state-of-the-art electronic and computer techniques. The library, opened in 1983, houses 350,000 volumes, numerous computer terminals, and is a federal government depository. The new library will offer the latest in retrieval systems and services and is designed to accept future growth. Salary range is $30,000 and above dependent upon qualifications. Position available: July 1. **Application deadline: April 1,** or until position is filled. Send letter of application, resume, and 3 letters of recommendation to: Director of Personnel, **Northwest Missouri State University, Maryville, MO 64468.** Affirmative-action, equal-opportunity employer.

General reference/government publications librarian. One 12-mo., tenure-track position as instructor or assistant professor. Salary range: $20,040–$22,560 depending on qualifications and experience. Reference duties include reference desk assignment, bibliographic instruction, database searching, and collection development. Government publications duties include administration of federal and state documents collections, reference and legal reference service, and bibliographic instruction. Minimum requirements: ALA-accredited MLS degree and experience in reference or government publications. Desired requirements: cognate master's; sciences or social sciences background; professional experience in both reference and government documents, including legal reference; and research or publication record. Library faculty members work under a union-negotiated contract. Evaluations for retention, promotion, and tenure are based upon performance in areas of primary duties, research, and service. Position description and application form available upon request. **Letters of application, resumes, current credentials, transcripts, and list of references should be postmarked by April 15.** Address correspondence to: Gordana Rezab, **Library, Western Illinois University, Macomb, IL 61455.** WIU is an EEO, AA employer.

Head, cataloging. Rollins College, Winter Park, Fla., a private, liberal arts institution, invites applications for a librarian to supervise its cataloging operations. Duties include supervision of all cataloging functions and 3.5 FTE staff. Knowledge of the LC classification, OCLC, and AACR2 are required. Rollins is building a new library and anticipates going to an automated online public catalog in the near future. An ALA-accredited MLS degree required. 5 yrs.' academic library experience is desirable with at least 3 yrs. in cataloging required. Salary is competitive and commensurate with rank and experience ($17,000 base). Liberal fringe benefits, including TIAA/CREF. This is a 12-mo., tenure-track faculty appointment beginning in September. **Closing date for applications April 20.** Send resume and letter of application to: Search Committee, **Mills Memorial Library, Rollins College, Winter Park, FL**

Associate University Librarian for Technical Services

University of California, Berkeley

Administer technical services departments for collection of 6 million volumes, with 80,000 titles cataloged annually, and with 80,000 serials currently received; coordinate all General Library technical services; participate in overall library policy making and administration.

Requires graduate library degree; substantial successful management experience relevant to large research collections, including such matters as budget, personnel, and systems development; thorough familiarity with technical services including automation and networking; and commitment to a consultative/participative managerial style.

Full job description will be mailed on request. Salary in the $33,000–$51,000 per annum range, depending on qualifications. Position available June 1 or as soon thereafter as possible.

Ithaca College
Library Director

Ithaca College invites applications and nominations for the position of director of the college library. Ithaca College is an independent, residential college with approximately 5,000 undergraduates, 140 graduate students, and 350 faculty. The institution is comprised of 6 schools (Humanities and Sciences; Business; Music; Allied Health Professions; Communications; Health, Physical Education, and Recreation) and the Division of Graduate Studies and Continuing Education. The library has 285,000 bound volumes, 110,000 microforms, and 12,000 sound recordings, and is a member of the OCLC network, the South Central Research Library Council, and other local and national library associations.

The director reports to the provost and is responsible for administering all library services, budgeting, policy development, personnel management (10 professional librarians and 19 support staff), and long-range planning. An ALA-accredited MLS is required, and additional graduate or professional degrees are desirable. Preference will be given to candidates who show a record of progressively more responsible administrative experience in an academic library, skills in management and personnel supervision, knowledge of library automation, and demonstrated ability to communicate and work effectively with all segments of the college community. Position available July 1; 12-mo. contract; salary will depend upon experience and qualifications (minimum $33,385).

Consideration of candidates will begin on March 15, but applications will be accepted until position is filled. Please send letter of application and resume to:

Director Search Committee

yr. appointment, TIAA/CREF, life/health insurance, 22 days' vacation. **Submit resume and 3 sources for current references by April 15** to: Shirley W. Bolles (APP. 74), **Alexander Library, Rutgers University, New Brunswick, NJ 08903.** An equal-opportunity, affirmative-action employer.

Librarian, academic (cataloging). Faculty, tenure-track position at instructor or assistant professor level. Supervises all cataloging operations, serves as library liaison to various academic disciplines, performs occasional online database searches, recommends policy and procedural modifications, performs other tasks as may be assigned. (Full job description available on request.) Requirements: ALA-accredited master's degree, knowledge of library operations with special emphasis on descriptive and subject cataloging utilizing AACR2, LCSH and LC classification, MARC formats, OCLC and ALA (1980) filing rules, and supervisory ability. Desirable qualifications: undergraduate or second master's degree in business or sciences, 3–5 yrs. of directly related professional experience. Salary range: from $15,000 depending on education and experience. Starting date not later than June 1. **Send letter of application, complete resume with all library positions held, naming (with addresses and phone numbers) immediate supervisors, plus 3 other references and transcripts before March 30** to: Gaynelle Pratt, **Personnel Office, Keene State College, 229 Main St., Keene, NH 03431.** AA, EEO.

Monographic cataloger (new position). The D. H. Hill Library needs an assistant catalog librarian to catalog print materials in the following areas: veterinary medicine, medicine, technology, and agriculture. The position offers the potential for advancement to those candidates demonstrating an ability to work well with both professional and support staff personnel, and who also have a fundamental understanding of the issues of bibliographic control in an online environment. The monographic cataloging department consists of 10 professional librarians and 13½ support staff members who process 30,000 titles a year for a collection in excess of 1 million volumes. Applicants should be familiar with the structure of the MARC format for books, the syndetic structure of LC subject headings, and the use of LC classification. Required: master's degree in library science or equivalent experience and education, reading ability in one or more foreign languages, and experience or education in the field of cataloging. Preference will be given to candidates who have one or more of the following qualifications: undergraduate or advanced degree in medical or scientific fields, knowledge of Cyrillic languages, and experience in cataloging for a research library. North Carolina State University offers academic status to librarians. Salary: starting between $15,000 and $17,500 depending on qualifications. **Send letter of application with resume and the names of 3 references by March 31** to: Walter M. High, Head, Monographic Cataloging Dept., **D. H. Hill Library, North Carolina State University, Box 7111, Raleigh, NC 27695-7111.** An equal-opportunity, affirmative-action employer.

Periodicals librarian. Fort Lewis College, Durango, Colo. Full-time, 12-mo. instructor appointment. Responsibilities include coordinating periodicals and related materials, supervising paraprofessional staff and students, providing reference service and bibliographic instruction, and materials selection. Required qualifications: master's or higher degree from ALA-accredited library school; academic background in business, science, or social sciences; ability to communicate effectively with a small, closely knit library staff. Preferred qualifications: background in business, computer science, or physical sciences; experience with periodicals; library computerization training or experience. Position available July 1. Salary $15,000–$16,000 for a 12-mo. appointment. 20 days' vacation, 12 holidays, state retirement, and other fringe benefits. Fort Lewis College is a state-supported, undergraduate, liberal arts college with 3,700 students, located in a town of 12,000 population at 6,500-ft. elevation in the San Juan Mountains of southwestern Colo. **Submit letter of application, resume, and names of 3 references, postmarked no later than April 15,** to: Daniel W. Lester, Director of the Library, **Fort Lewis College, Durango, CO 81301.**

Evans Ave., Denver, CO 80208-0287.** Preliminary interviews will be held at the June ALA conference. The University of Denver (Colorado Seminary) is an EEO, AA employer.

Reference librarian for dynamic program of humanities/social sciences reference service in an outstanding college library. 12-mo. appointment as replacement for librarian on leave; strong possibility of continuing position. Required: MLS, sound liberal arts education, academic library reference experience, demonstrated service commitment. Previous experience in library instruction, database searching, and government documents preferred, as well as additional degree in a humanities field. Salary: $17,000 minimum. Full benefits. Available: summer 1984. **Applications received by April 15 will be given preference.** Send letter of application, resume, and supporting credentials to: Reference Search Committee, **Oberlin College Library, Oberlin, OH 44074.** Applications from minority candidates are particularly welcome. AA, EOE.

Social sciences department head: University of Georgia, Main Library (salary: minimum $20,000). Duties: responsible to the assistant director for collection development for managing collection development activities in the social sciences. Activities include developing the general collections in assigned subject areas, facilitating access to the collections, and serving as liaison to faculty. The department head supervises a staff of 3 bibliographers and 3 support staff who use OCLC and libraries' in-house automation system for searching, verifying, and ordering material. The libraries' collection includes over 2.1 million volumes and the current materials budget is $2.7 million. Qualifications: ALA-accredited MLS; degree or substantial relevant experience in one of the following social science areas: anthropology, business, economics, education, law, political science, psychology, social work, or sociology. Prefer advanced degree in one of these disciplines; minimum of 2 yrs.' experience in an academic or research library, preferably in collection development work; demonstrated supervisory and managerial ability; knowledge of issues and trends in collection management and the acquisition of library materials; understanding of the library's role in the support of teaching and research in the social sciences; ability to deal with coworkers in a sensitive manner and to develop cooperative interaction with other library units; ability to work positively with university faculty and students; effective oral and written communication skills. Prefer ability to work with a variety of foreign languages, with emphasis on modern European languages. **Application procedure: send letter of application by April 6,** including resume and names of 3 references, to: Bonnie Jackson Clemens, Assistant Director for Administrative Services, **University of Georgia Libraries, Athens, GA 30602.** This position will be filled only if suitable applicants are found. An equal-opportunity, affirmative-action institution.

Special collections technical services coordinator: University of Georgia Libraries. Search reopened. (Salary minimum $18,000.) The special collections

Assistant Director for Public Services
Trinity University

Trinity University, San Antonio, Tex., is seeking candidates for the position of assistant director of libraries for public services, a faculty appointment in a rapidly growing university library. The incumbent of this position will serve as head of a reference department (6 professionals, 2 classified staff), which includes among its components traditional reference service, user education, faculty liaison, and online searching. Also within public services are the government documents and circulation departments (including interlibrary loan) and the Teacher Resource Center. May also have overall responsibility for the building.

Site of ALA Midwinter in 1983, San Antonio is the nation's 10th-largest city. Trinity, with 2,500 undergraduates and 600 graduate students, is strongly committed to excellence in the liberal arts tradition. Scholarly achievement is recognized through Phi Beta Kappa and other national honor societies. Under an accelerated program of collection development, the library is adding over 40,000 volumes annually; presently the collection has 430,000 volumes of books and bound periodicals, plus sizable holdings of government documents, microforms, and nonprint items. The modern building, opened in 1979, has space for 1.2 million volumes. There are 16 professional and 48 FTE classified staff positions. *Required qualifications:* ALA-accredited MLS; demonstrated pertinent experience in an academic library, including administrative responsibilities; strong interest in faculty liaison and user education programs; leadership ability with strong interpersonal skills, initiative, and creativity; and the ability to function effectively in a complex organization. *Highly desirable* is a graduate degree in the liberal arts or sciences. Salary minimum of $29,000, higher dependent on experience or other qualifications. (Texas has no state income tax.) TIAA/CREF and liberal fringe benefits. Faculty status, including professional title. **Send letter of application, detailed resume, placement file if available, and names of 3 references by April 15** to: **Richard Hume Werking, Director, Maddux Library, Trinity University, 715 Stadium Dr., San Antonio, TX 78284.**

Affirmative-action, equal-opportunity employer

division comprises rare books and manuscripts, Georgia collection, Richard B. Russell Memorial Library, and records management/university archives. The division services the libraries' collections of primary research materials including general rare books, Confederate imprints, Georgiana, historical and literary manuscripts, 20th-century political collections, and university archives. Duties: supervise the rare books cataloger and one support staff member; coordinate the work of other staff members in processing materials and maintaining catalogs and finding aids for the rare books and manuscripts and Georgia collections; participate in providing reference service for the collections, including some weekend and evening duty. Qualifications: ALA-accredited MLS; advanced subject degree preferred; experience with processing, cataloging, and indexing manuscripts and archives, rare books, and ephemera; experience with various policies and procedures of special collections librarianship, preferably in a large research library; knowledge of automated cataloging and indexing techniques; knowledge of basic research and reference techniques; demonstrated supervisory ability; effective communication skills; ability to establish and maintain effective working relationships with co-workers and patrons; knowledge of basic conservation techniques. **Application procedure: send letter of application by April 20,** including resume and names of 3 references, to: Bonnie Jackson Clemens, Assistant Director for Administrative Services, **University of Georgia Libraries, Athens, GA 30602.** This position will be filled only if suitable applicants are found. An equal-opportunity, affirmative-action institution.

---

2 positions (search extended) at Central Michigan University Library serving 16,000 students and 600 faculty. 1) **Reference librarian** who reports to the coordinator of public services. Responsibilities: provide general reference service at the library's main reference desk, computerized database searching, and bibliographic instruction. Position entails teaching of at least one section of a course on use of the library, reference work with government documents, and use of OCLC terminals at the reference desk. Will also serve as subject bibliographer with responsibilities for collection building and faculty liaison in area of specialty. Scheduling includes flexible work hrs. with some night and weekend assignments. Required: ALA-accredited MLS degree. Preference will be given to candidates with either experience or appropriate subject background in computer science or mathematics. Second master's degree in a subject specialty highly desirable. 2) **Serials/catalog librarian** who reports to the head of the catalog department. Duties include: responsibility for cataloging, classification, and online maintenance of all serials and other materials as assigned; some online OCLC operational work and training and supervision of staff and students in performance of related activities; and interaction with acquisition services and public services staff. May include the teaching of a library orientation course and possible subject area collection development activity. Required: substantial experience cataloging and classifying serials titles, pref. involving knowledge and use of LC classification and subject headings, AACR2, and OCLC; ALA-accredited MLS degree. An added advanced degree desirable. Both the reference and serials/catalog positions are regular, full-time, tenure-track faculty positions. Full faculty rights, privileges, and obligations. Reappointment and promotion dependent upon evaluation of demonstrated progress and achievement towards meeting school and university criteria based on professional competence and growth, scholarly and creative activity, and appropriate university and public service. Positions will remain open until suitable candidates are found. Salary is commensurate with qualifications and experience, $15,500 minimum at instructor level, and $17,500 minimum at assistant professor level; these quotes are for a 10-mo., academic-yr. contract. Some opportunity for additional summer employment exists. Submit written application, resume, and the names and addresses of 3 references to: Chair, Selection Committee, **Central Michigan University, POB 2067, Mt. Pleasant, MI 48858.** CMU is an affirmative-action and equal-opportunity institution.

Director will be responsible for public library service countywide and must communicate well with staff, library board, architect, government officials, and public during construction phase and after. Salary $15,789; good fringes. Send letter, resume, and 3 references to: **Chesterfield County Library, 130 Main St., Chesterfield, SC 29709.** Chesterfield County is an AA, EOE and does not discriminate against sex, age, race, religion, national origin, or handicapped status.

RESEARCH LIBRARY

PHYSICAL SCIENCES MATHEMATICS LIBRARIAN

ARGONNE NATIONAL LABORATORY, one of the nation's leading R&D laboratories, offers this excellent opportunity for an experienced librarian to supervise the physical sciences/mathematics branch library. This library is one of eight subject-oriented branch libraries at the Laboratory. It receives over 500 active journal subscriptions and all appropriate current monographs in its areas of interest.

The Branch Librarian is responsible for the operation of this facility which includes comprehensive collections in mathematics, physics, and computer science. Responsibilities also include literature searching, management and development of the collections, instruction and assistance to users in use of the resources, reference work, supervision of clerical employees, and cooperation with other branch librarians.

Qualifications should include 5 or more years experience in a physical sciences library, responsibility for collection development, and experience in providing comprehensive service to users (including experience with computerized data base search systems such as DOE-RECON, Lockheed DIALOG, SDC ORBIT, BRS, OCLC, and RLIN). Skill in dealing responsively and effectively with users is important. M.A. or equivalent in Library or Information Science with coursework in physics, mathematics, or chemistry also required.

We offer a good, competitive salary (starting range $1,690 to $2,700 per month) and excellent benefits which includes immediate vesting in our retirement programs (TIAA/CREF and others) and 5 weeks paid vacation. Argonne is located in the western suburbs of the Chicago Metropolitan area, 30 miles from the Chicago Loop. For consideration, send your resume with salary history to:

Rosalie L. Bottino
Box J-TIS-16181-1J
9700 S. Cass Avenue
Argonne, IL 60439
Affirmative Action
Equal Opportunity Employer

Books (on cassette) are better than ever

A primer for serving the patron-with-Walkman

by Bryan Davis

STRUGGLING TO KEEP UP with the latest glamour technologies in library service such as computer and video, one can easily overlook a product of older technology that has steadily gained in popularity. In fact, it has become one of the most common nonbook information media around: the ordinary audio cassette.

Many people now recognize such virtues of cassettes as portability, sound quality, and relatively low expense. A go-anywhere medium, prerecorded tapes can be enjoyed where other media, especially books, cannot: driving, gardening, exercising, or washing dishes are but a few examples.

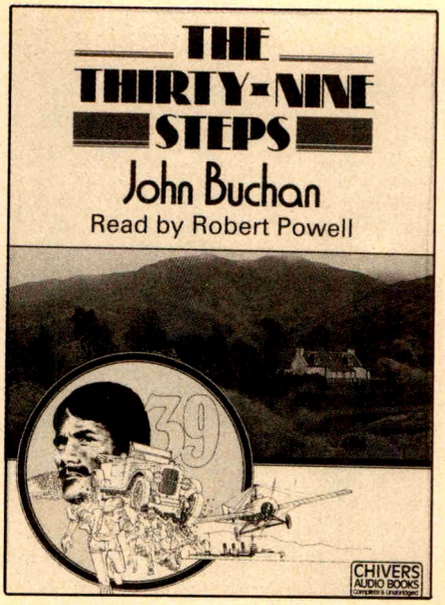
Although taped books have been in bookstores since the early '70s, the market for them is now maturing, possibly because more people have used audio cassettes as a learning tool in school.

Many libraries have circulated recorded books for years, especially to blind and physically impaired persons. Now, inexpensive versions produced and marketed for the average consumer offer libraries a new opportunity to develop spoken-word collections at prices competitive with conventional books.

Taking the plunge

It was with these thoughts in mind that we at the Oskaloosa (Ia.) Public Library decided two years ago to take the plunge with books on tape. We have been delighted ever since with the enthusiasm our patrons have shown for this service.

Initially, we introduced 48 abridged versions of popular novels, classics, and children's selections. In the first six weeks, these tapes had circulated 175 times, or 3.7 circs per title. Since then, they have accounted for a steady 2 percent of our total circulation though representing only .5 percent of the total collection. Audio cassette users have been of all ages and types, indicating a broad base of acceptance. Clearly, books on tape have been a worthwhile investment for us and represent a success that can be repeated in other libraries.



Typical of the unabridged recordings from Chivers Audio Books is Buchan's exciting adventure as read by Robert Powell, who starred in the recent remake of the classic Hitchcock film.

In this article I will describe how we handle books on tape in our public library, which serves a midwestern community of under 11,000. Much of the information presented here, particularly the list of companies at the end, should prove useful in other settings.

Determine audience and use

If interested in cassette books, you must first decide the purpose of this collection, which will affect its scope and eventual cost. Since just about any type of literature is available on spoken-word recordings, think carefully about which audience(s) your collection can reach within your means. Purpose of the overall library collection and current use patterns are the best guides.

We have chosen to serve a primarily general clientele by concentrating on popular novels, well known classics, and children's selections. But completely different areas of concentration such as poetry or serious prose might be the best choice for another user population. However, public libraries should plan to carry both children's and adult selections, since mothers of small children have been as enthusiastic about the tapes for youngsters as for themselves. By experimenting now and then with different types of tapes, you may uncover unsuspected user preferences while adding diversity to your collection.

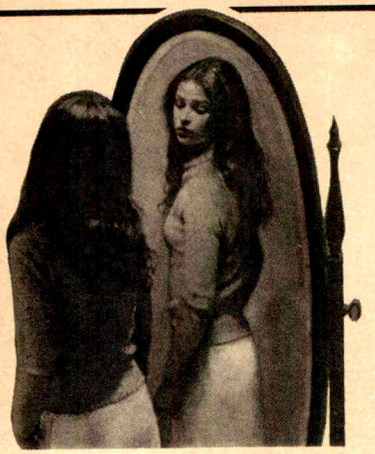
Another consideration related to scope is whether to buy full-length recordings or abridgments. Full-length recordings can run as much as $60 each, whereas abridgments usually cost under $15. In our case, we chose abridgments largely because of economy. Anticipating that the tapes would be used mainly for recreational listening, we didn't expect many objections to the abridged versions. In addition, the plain boxes in which full-length versions are commonly sold are useless for display, don't integrate well into book stacks, and require costly special binders. Given circumstances such as ours, we still feel abridgments are the best choice in the beginning. Others with a different set of users and more money, or who are less interested in public display of tapes, may come to the opposite conclusion with equally good results.

Displayed like paperbacks

Since we saw our tapes as having an appeal similar to paperbacks, it seemed that ease of access and browsing ability would be important factors in winning over patrons to cassette books. Therefore, we planned a prominent display in our new-book area, where patrons could readily handle the tapes and read the blurbs just as they would on a book.

A special rack was purchased with this in mind, and it has proved successful. Because our budget did not match our taste in library furniture, we settled for an inexpensive unit with a capacity of 96 titles. The display rack was purchased along with our first group of tapes from Listen for Pleasure (see no. 12 in the list). Designed for use in bookstores, it is an effective attention-getter. More aesthetically pleasing (and expensive) racks are available through library suppliers, but when shopping in catalogs look for these essentials: face-out display and ease of access for browsing. Other possibilities

Bryan Davis has been director of the Oskaloosa (Ia.) Public Library since his graduation from the University of Iowa library school four years ago.



Teenagers See Themselves in our Young Adult Cliffhangers

Our new book/cassette series reflects the best of YA literature. Judy Blume, Betsy Byars and Robert Newton Peck are just a few of the authors offering relevant, compelling stories such as *Deenie, The Pinballs* and *A Day No Pigs Would Die*. Nancy Smith

Listen for Pleasure's display rack serves as an attention-getter at the Oskaloosa Public Library and allows patrons to browse through the tape selection as they would through paperbacks.

include zig-zag shelf inserts or adaptable paperback racks.

To prevent theft, or in situations where tighter control of the tapes is desirable, some librarians prefer to restrict direct access to cassettes, using the card catalog or some type of list to inform patrons about the collection. In special cases, this system may make perfect sense, but we feel it should be employed only where absolutely necessary. Tapes and users will find each other most effectively through the open approach. In most public library settings, open displays are no more risky for tapes than for books.

Helpful tips on packaging

Another practical matter related to display is packaging. Tapes come packaged in several basic ways, not all of them well suited to library display. Some companies, especially those offering abridgments on a single cassette, sell their product in a simple plastic box with a cardboard insert showing the title and author. Where multi-cassette titles are involved, you may find the plain cardboard boxes mentioned earlier. However, we prefer packaging that presents a book-like appearance, because it gives the cassettes a familiar look and can be easily shelved. Usually these packages contain one or two cassettes in protective plastic boxes joined to lightweight cardboard covers. We reinforce this type of binder with clear book tape to preserve eye-catching art work and boost durability. We have many tapes packaged and reinforced this way that are two years old and show very little wear in spite of 30 or 40 circulations.

For card pockets that wouldn't obscure vital information, we chose a type of self-adhesive clear plastic book pocket available from most library suppliers. (Look in the index to your supplier's catalog under Hang-Up Systems.) These pockets fit perfectly on the outside back cover of our binders, and cards can be removed for an unobstructed view of the blurb.

For cassettes arriving in plain plastic boxes, there are a number of ways to create a book-like format. These boxes usually include cardboard or paper inserts containing both imprint information as well as the names of the performers (or readers) on the recording. The sturdy vinyl cassette binders available from most library suppliers are the most durable choice. However, these binders are relatively expensive, so we use them only when we need to store three or more cassettes together.

For titles on fewer than three cassettes, we use the less expensive pressboard binders that come in one- or two-cassette sizes and are also available from several library supply companies. To spruce up purchased binders, we simply clip the cardboard inserts mentioned above and fix pieces showing author and title to the front and spine. This at least identifies them.

Cataloging books on tape

How to catalog cassettes—that is another question. By following recommendations in *Introduction to Cataloging and Classification*, 6th ed., by Bohdan S. Wynar, we developed a workable card format. We also use "Sound recordings" as a subject entry on both fiction and nonfiction to group the tapes in a section of the catalog, and we type "TAPE" in the upper left corner to readily distinguish them from other formats. Nonfiction tapes are classified and assigned subject headings just like nonfiction books.

Despite increasing availability of cassette machines such as Walkman in the home, we still have requests for players. We keep two on hand to lend, with another reserved for in-library use. Although players are not heavily booked, patron interest justifies their purchase. They are handy to have around for our own use as well. When choosing players, look for models that have permanently attached cords. You may prefer one of the models that come without the record function. Our players have jacks for multiple headsets, and we also provide the headphones for private listening.

Check for quality a must

When new tapes arrive, check them for quality by actually listening to them. When time is short, spot-checking may be the only practical method. But after running into a number of tapes that were poorly recorded, we began listening to them all the way through whenever possible. Our children's staff usually does this when operating the player won't disturb patrons and they can do other work while listening.

Of late, we have had little trouble with quality. Most firms are understanding about defects and have good return policies. But try to check tapes as soon after arriving as possible, since some companies require defects to be reported within a specified period for a free replacement.

Reviews of cassette books are found in such sources as *Library Journal* and *School Library Journal*, and in *Booklist* on the 15th of the month. John Politis's "Rockingchair" column in *Voice of Youth Advocates* regularly reviews books on tape, as do *Media Review Digest* and many other professional journals. These critiques offer comment on technical quality.

What follows is a list of companies producing or distributing recorded books that would be adaptable to library services. The list is representative if not comprehensive. I would welcome information from firms unintentionally omitted. Some of these companies carry more than cassette books, but the emphasis here is on the book and selections of each firm.

Discounts are sometimes offered; but since policies and specials are constantly changing, I leave it up to the buyer to check prices. Included in the description is a summary of our experience with a given company, if any.

Production companies

1. Audio Book Company (Cassette Book Library), (213) 799-4139; P.O. Box 9100, Van Nuys, CA 91409.

Full-length and two-cassette abridged versions and collections. Diverse title selection: popular, classics, children's, nonfiction. Narrated by prominent actors, mostly American. The full-length versions we have seen come in plain boxes; two-cassette versions; in attractive cardboard binders. We have experienced inconsistent recording quality with these tapes. Prices: full-length $16.95 to $59.50, two cassettes at $9.95 each. Full-length versions are also rented to the public.

2. AVC Corporation, 800-227-2020 or (415) 883-7701; 4 Commercial Boulevard, Novato, CA 94947.

Dramatizations of classics for adults and children. Some titles are reproductions of vintage radio plays, others are new productions. Read-alongs are available. Marketed under the trade name Jabberwocky in the school market and The Mind's Eye to the general public. Most titles are one or two tapes sold in cassette boxes. Prices: $5.98 to $9.98. Other types of cassettes also available. Sound quality is very good. We have a number of these tapes and have had very good luck with them.

3. Books in Motion, (509) 922-1646; E. 9212 Montgomery, Suite 502, Spokane, WA 99206.

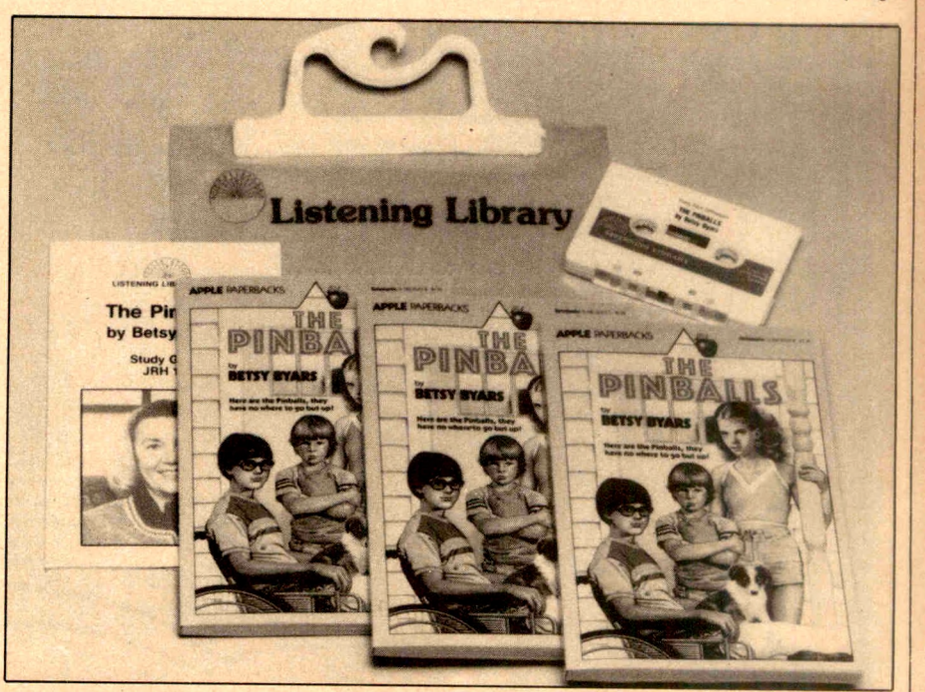
Full-length classics, popular, inspirational, motivational, etc. Primarily a rental company, but will sell also. Prices: $3.93 to $13.95. Packaging is in plain boxes. Samples not seen.

4. Books on Tape, 800-626-3333 (in California 800-432-7646); P.O. Box 7900, Newport Beach, CA 92660.

Full-length versions in plain boxes. Wide title selection including classics, popular, nonfiction. Prices are $8 per cassette for new recordings, $5 per cassette for used rentals. Most titles are between seven and twelve cassettes, some produced by Jimcin recordings (see no. 10). Samples not seen. Also sell abridged versions from Caedmon (no. 5) and Listen for Pleasure (no. 12) that include classics, popular and children's as well as other types of cassettes.

5. Caedmon, 800-223-0420 (in New York State (212) 580-3400); 1995 Broadway, New York, NY 10023.

Diverse selection of belles lettres and popular including children's, science fiction, classics, nonfiction, folk tales, plays, poetry; American, English, and world literature. Full-length, abridged, and excerpted versions on one or more cassettes or records. Some are dramatized, others read by prominent actors or the author. We have found these to be very high



Recorded books are only one element in this company's media package.

quality offerings. Prices: $8.98 to around $36 per title. (See also nos. 4, 20, 22, and 24.)

6. Cassette Classics, (702) 732-7676; P.O. Box 60366, Las Vegas, NV 89160-0366.

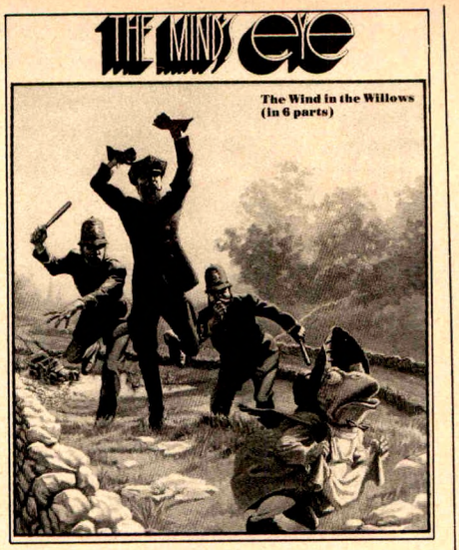
Only title available at present is an abridged dramatization of *A Tale of Two Cities.* Others in production are *Tom Sawyer, A Collection of O. Henry,* and *The Life of Helen Keller.* Samples not seen. Price: $14.95 each; order two at full-price and get subsequent tapes at half price. Performed by volunteers, both able and disabled, as an outgrowth of the International/National Years of Disabled Persons.

7. Chivers Audio Books. Distributed in the United States by G.K. Hall (see no. 21).

British in origin, full-length versions on four or six cassettes. Somewhat limited number of popular titles available at this time, all adult fiction. Their advertising emphasizes selections of "romances, romantic suspense, and other novels of sensitivity and emotion." Samples were examined. The packaging is excellent, consisting of dust proof vinyl binders with attractive cover art that are shelf ready. Good sound quality well narrated by prominent British actors. Prices are $29.95 for four cassettes, $39.95 for six.

8. Hear-A-Book, (213) 706-2234; 31200 La Baya Dr. #304, West Lake Village, CA 91362. Also distributed by Quality Books (see no. 25).

Abridged dramatizations on single cassettes in plastic case. Classics, mysteries, children's. Samples not seen. For average running time of over one hour, cassettes are $7.95. They also have Hear-A-Book Junior that features collections of stories and nursery rhymes with running times of about 15 minutes for $2.98 each.



Marketed as Jabberwocky in the school market and The Mind's Eye to the public, AVC Corporation audio dramas for adults and children are acted out by a full cast with a wide range of sound effects and music.

9. Jabberwocky, see AVC Corp. (no. 2).

10. Jimcin Recordings, P.O. Box 536, Portsmouth, RI 02871.

Many stories and collections of stories on single cassettes are available in both dramatized and narrated form. Full-length books also available. Classics, Russian authors, popular, short stories, some children's selections. Samples not seen. Prices: $6.95 for single cassettes with complete books ranging from $18 to $97. Some titles also carried by Books on Tape (see no. 4). Rentals also available.

11. Liberty Publishing Company (Literary Digest Cassette Tape Library), (301) 667-4093; 50 Scott Adam Road, Cockeysville, MD 21030.

Limited selection of single-cassette abridgments—classics, biography, Biblical. Sample tape seen. Clearly narrated by well known interpreter of books, Ermance Rejebian. Packaged in plastic box with cardboard cover. Price: $9.95 each. Counter display available.

12. Listen for Pleasure Limited, 800-962-5200 (New York State 800-252-1144); 417 Center Street, Lewiston, NY 14092.

British in origin. Abridgments on two cassettes (one four-cassette title recently introduced) in cardboard binders with excellent graphics—popular, classics, biography, nonfiction, children's. Well narrated by prominent British actors. Prices: $13.95 for two, $19.95 for four cassettes per title. Racks are available and may be purchased separately. These constitute the bulk of our collection, and we have had great success with them.

13. Listening Library Inc., 800-243-4504; P.O. Box L, Old Greenwich, CT 06870.

Prominent authors and actors read diverse selections from Caedmon.

This is only one of many companies offering recorded books as one element in a media package that may also include filmstrips or books intended primarily for the educational market. Cassettes and LPs of books may be purchased separately from other parts of the package, making them adaptable for casual listening. Samples not seen. Prices: $8.95 to $59.95 per title for cassettes only. British, Russian, American classics; classical and modern poetry; drama; and short stories plus a wide variety of other educational subjects. Both abridged and full-length. This company aims mainly at secondary-level educational programs.

14. Live Oak Media, (914) 277-4454; Box 116, Somers, NY 10589.

A variety of media packages in addition to tape books. This company has taken over the old Viking Recorded Book line, which offers abridged dramatizations. Sample tape sounded very good. Prices: cassettes only start at $8.95; cassette/book/filmstrip packages run up to $29.95. Aimed mainly at the primary grades.

15. Mind's Eye, see AVC Corporation (no. 2).

16. Random House School Division (Newbery Media Catalog), (212) 572-2521; 201 E. 50th St., New York, NY 10022.

Children's titles only, concentrating on Newbery Award winners and honor books. Purchase of cassettes or records with filmstrips and/or books is optional. Prices: most are $10.95 per title for a single cassette only. Samples not seen.

17. Recorded Books, 800-638-1304; 6306 Aaron Lane, Clinton, MD 20735.

Full-length recordings in boxes to rent or purchase and some abridgments by other companies. Classics, popular fiction, nonfiction predominate. Prices: $21.15 to $112.80 per title. Used cassettes available at $4.75 each. Samples not seen.

18. Spoken Arts, (914) 636-5482; Dept. R, P.O. Box 289, New Rochelle, NY 10802.

Belles lettres, children's, and other types of cassettes. Poetry and drama—American, British, international—some in foreign languages. A selection of Jewish works. Many children's selections available with books and guides. Prices: $9.95 to about $63, depending on title. Collections of cassettes also sold at package prices. Samples not seen.

19. Success Motivation Institute Inc., (817) 776-1230; P.O. Box 7614, Waco, TX 76714-7614.

Specialists in cassettes based on popular self-improvement and how-to-succeed books for business people, parents, teens, athletes, etc., in one-cassette abridgments. Samples seen. Recording adequate, a combination of narration and dramatization. Price: $11.95 for individual titles. To purchase, contact the company for the representative in your area.

Recorded Books

Distributors

20. Cassette Co. (Cassette Communications Industries), (206) 851-3800 (in Northwest 800-841-TAPE); P.O. Box 1400, Gig Harbor, WA 98355.

Distributes a large selection from Caedmon (see no. 5) and also Success Motivation Institute (see no. 19) as well as a variety of other types of cassettes. Cassette books run $8.95 to $11.98.

21. G.K. Hall, (617) 423-3990; 70 Lincoln St., Boston, MA 02111.

Distributes Chivers Audio Books (see no. 7).

22. Ingram Book Company, 800-251-5902 (in Tennessee 800-342-5800); 347 Reedwood Drive, Nashville, TN 37217.

Distributes cassette books and other types of tapes for many different companies including Audio Book Co. (no. 1), AVC Corp. (no. 2), and Caedmon (no. 5). Look under "Cas" in its title microfiche for a full listing of all cassettes offered. *Orders for cassettes may be combined with book orders for maximum discounts.*

23. Jon-Tone Co. Inc., (203) 245-2968; 50 Mungertown Road, Madison, CT 06443.

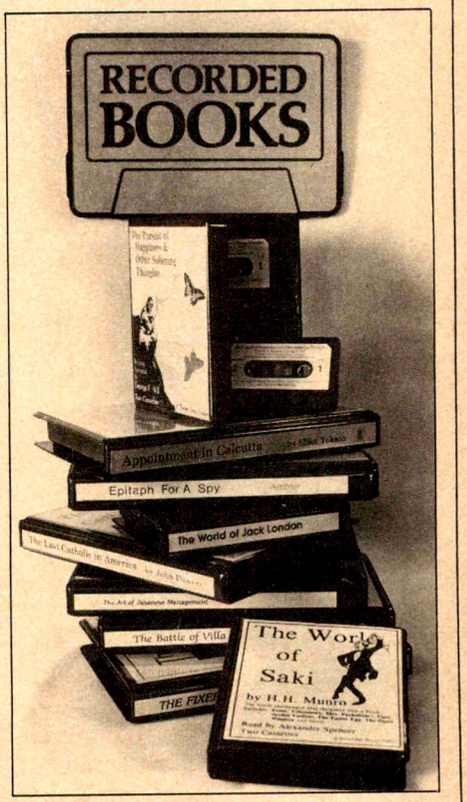
Distributes a wide array of tape products exclusively to libraries from most producers. Fiction, nonfiction, adult, and children's titles. Special lists may be requested or orders may be made from the producer's catalog.

24. Outlet Book Co., (212) 532-9200; 1 Park Ave., New York, NY 10016.

Distributes Caedmon (no. 5) titles.

25. Quality Books Inc., 800-323-4241 (in Illinois (312) 498-4000); 400 Anthony Trail, Northbrook, IL 60062.

Distributes Hear-A-Book products (see no. 8). □



Recorded Books specializes in full-length recordings that come in boxes suitable for library display.

The shape of ALA and of things to come

Part II, ALA 1984 Midwinter Meeting report

(For Midwinter Report, Part I, see AL, Feb., p. 100–104.)

President's fundraising workshop: live and delayed video

ALA President Brooke Sheldon announced at Midwinter that her Annual Conference President's Program will expand to one-day workshops held nationally during conference week. The topic is "Raising Funds for Libraries: Paths to the Private Sector."

The program, Sunday, June 24, 9:30 a.m.–12:30 p.m., will wind up Sheldon's year-long effort to help libraries raise money. The program will focus on how libraries can gain their share of the $60 billion in private monies awarded to worthy causes every year. The techniques may be equally valid in winning government support, Sheldon believes.

Lillian Bradshaw, former director of the Dallas Public Library, and Florence Greene, fundraising consultant, will contribute their expertise to the training activity. The entire program will be videotaped for the benefit of librarians unable to attend the Dallas conference. The tape will be flown to workshops being sponsored by ALA, state libraries, and library associations.

Besides presenting the videotape, the regional workshops will include live three-and-a-half hour sessions conducted by local trainers and designed by the President's Program Task Force. Participants will receive brochures on specific aspects of fund raising, including how to plan a campaign, use direct mail, and hire a fundraiser.

The task force would like to include examples of fundraising experience and expertise from all types of libraries. People are requested to share their experiences by sending reports, press releases, and other fundraising examples to Peggy Barber, Communications Services, ALA, 50 E. Huron St., Chicago, IL 60611.

The President's Program Task Force includes Patricia Breivik, Dan Bradbury, Peggy O'Donnell, Sharon Womrack, and Barber. The program is being planned in cooperation with ALA chapters, the American Library Trustee Association, the Library Administration and Management Association Fund Raising Section, and the Chief Officers of State Library Agencies.

More about alternative sources

The Library Administration and Management Association is sponsoring a preconference June 21–22 on "Fund Raising for Libraries," limited to 100 registrants. LAMA has also scheduled a two-hour program on "Special Events: An Alternative Source of Revenue," Monday, June 25th, 2–4 p.m. For information, contact Roger Parent, Executive Director, LAMA, at Headquarters.

Wedgeworth reports to Council on state of the Association

"The biggest story in ALA for 1983 is the Association's dramatic recovery from a $205,702 deficit as of August 1982 to a $167,548 positive balance [in general funds] as of Aug. 31, 1983," Executive Director Robert Wedgeworth told the ALA Council Jan. 10 at Midwinter Meeting in Washington, D.C. (*AL*, Feb., p. 100).

He continued: "But before we rejoice too loudly in our escape from the clutches of poverty, a few sobering facts emerge from the 1982–83 audit:

1. Although the Association has a strong asset base, it is cash poor. Our cash flow was assisted significantly by the [Public Library Association and Library and Information Technology Association] divisional national conferences in 1983, which had revenues well in advance of their expenses.

2. We have no reserves for our major revenue sources. Even a temporary resurgence of the poor business climate affecting ALA in 1981 and 1982 could sink us quickly into another deficit position before appropriate counter measures could be taken.

3. ALA membership reached an all-time high of 39,124 as of August 1983, but membership income grew by only 3.9%. Lacking the means to invest in a comprehensive membership retention *and* renewal program, we lost 1,272 regular members at $50

School library award people gathered to celebrate the new National School Library Media Program of the Year, co-sponsored by the American Association of School Librarians and the Encyclopaedia Britannica Companies. Successor to a 20-year program focusing on elementary school libraries and media-center impact on instructional programs, the new program is open to all types of schools and school districts, including high schools. It offers a total of three $2,500 awards in three categories. Forms are available from AASL; closing dates are in December. Pictured — with AASL President-elect Bettie Day (left) and President Judith King (2nd from rt.) — are members of the committee now selecting the 1983 winner, to be announced in spring: Jacqueline Morris, Wanna Ernst, Chair Donald Colberg, Geraldine Bell, and James Weigel. John Field of EB hosted the gathering, which paid tribute to Fred Kreuger, recently retired from EB and a prime supporter of the awards program.

and gained 3,382 new members at $25. This represented a net gain of only $20,950.

4. The reduction of expenditures for publishing of 1.4% less than 1981–82 suggests fewer products being produced for future sales. Lacking the means to invest significantly in expanded sales, we held expenditures below the prior year. This cannot continue without serious problems emerging in our publishing units.

Five-year projections

"Management and the Committee on Program Evaluation and Support (COPES) have drafted a five-year financial plan that presents in general terms our revenue and expenditure projections for the period 1985–89," Wedgeworth reported. "Our objectives are:

1. Eliminate use of the accrued income from Huron Plaza gradually over the next two years.

2. Establish operating reserve funds of at least 10% of net revenues for the Public Information Office graphics program and publishing departments.

3. Establish a second publishing reserve on a one-time basis at 10% of net revenues for investment in new products.

4. Establish a general funds operating reserve fund to support capital expenditures, finance special activities, restore program cuts, and absorb unexpected though necessary expenditures.

"The plan represents a simple and undramatic approach toward an appropriate level of financial stability for the ALA. It also positions us to invest in new revenue producing services and products within the scope of our educational charter."

In reviewing ALA activities in 1983, Wedgeworth reported that the Association for Specialized and Cooperative Library Agencies "operated in the black after a series of deficit years." As a result of the $900,000 National Endowment for the Humanities grant (see separate story), ASCLA presented a balanced budget to the Executive Board, which approved it.

Wedgeworth's full 10-page report, Council Document 22, may be requested from Miriam Hornback, Council Secretariat, ALA Headquarters.

Contributions to ALA Washington

In announcing an Alabama Library Association contribution of $100 to the ALA Washington Office discretionary fund, Councilor James Ramer told Council: "I would like it to be $1,000." Other chapter councilors added these pledges: Oregon, $500; Minnesota, $300; and Florida, Missouri, Montana, New Jersey, and West Virginia, $200 each, bringing the total to $1,900.

Honor to deceased ALA members

Council stood in silence one minute in recognition of the contributions to librarianship made by Ernest R. DeProspero, Jr., Mae Graham, Theodore Hines, Edmon Low, Peggy Pfieffer, Annette L. Phinazee, Elnora M. Portteus, and Jean Wichers, ALA members who died since Annual Conference.

COA continues accreditation

The Committee on Accreditation acted at Midwinter to continue the accreditation of two graduate library education programs leading to the first professional degree. They are the master of science in library science at Catholic University School of Library and Information Science, and the master of science at Drexel University College of Information Studies.

Publishers queried on trade book discounts

At Annual Conference last year, Councilor Marvin Scilken argued that publishers should favor public libraries with greater discounts on trade books. The Resources and Technical Services Division (RTSD) Bookdealer Library Relations Committee disagreed with the terms of his resolution. Scilken's proposal was referred to an ad hoc committee.

Annalee Bundy, chair of the ad hoc group, reported at Midwinter the committee had voted 5-3 to present a revised proposal. RTSD, the Library Administration and Management Association, and the American Library Trustee Association had voted in the negative.

The resolution, adopted by Council, declares that ALA supports "the concept of equal discounts on equal volume orders for all buyers and requests that American trade book publishers individually examine their discounts to libraries to see how such policy could be implemented."

Group charts "Heritage Trail" of public library landmarks

The Public Library Heritage Task Force, a group charged by the Public Library Association to develop projects to preserve and promote the history of the American library, met at Midwinter to chart its progress and discuss future activities.

Since its previous meeting at last year's Annual Conference, the task force has written to the state libraries of all 50 states to ask which libraries should be included on its "Heritage Trail" of public library landmarks across the nation. Questionnaires have been sent to the nominated libraries, and the process of selecting the final candidates has begun.

Before assembling its oral history collection of interviews with public library "pioneers," the task force is working to identify existing oral histories presently held in library school collections and other locations.

Task Force Chair Don Foos has written Chicago Mayor Harold Washington to ask about obtaining an exhibit building at the 1992 World Columbian Exhibition.

Foos announced that the task force was also planning to: make a presentation to the American Library Trustee Association board

Acts of Council Jan. 9-11, 1984

At its Midwinter Meeting sessions, ALA Council passed 20 resolutions listed below by Council Document number. To obtain any document, send your request with a self-addressed stamped envelope to Miriam Hornback, Council Secretariat, at Headquarters.

The Council voted to:

11. raise ALA personal dues.*

13. ask ALA Washington to include public libraries in Congressional laws providing for computer training.

14. place constitution and bylaws changes on the 1984 election ballot.

17. ask libraries to disseminate information about the arms race.

18. urge completion of the *Eighteenth-Century Short Title Catalogue.*

19. urge President Reagan to declare National Deaf Heritage Week Dec. 2–9.*

20. establish the Continuing Library Education Network and Exchange (CLENE) Round Table.*

21. call for continued U.S. membership in UNESCO.*

26. join the American Historical Association in opposing National Security Directive 84 requiring prior censorship of former federal officials' writings.

31.1 ask Congress and the Federal Communications Commission to reject access charges for library telecommunications.

31.2 commend Rep. Claude Pepper (D-Fla.) for early action reauthorizing the Library Services and Construction Act.

31.3 support reauthorization of the Higher Education Act with appropriate redrafting of Title II.

31.4 urge Congress to call a White House conference on libraries in 1989.

31.5 support legislation making public libraries eligible for Older Americans Act grants.

31.6 ask President Reagan to provide for equal and ready access to federally produced information.

31.7 urge the Office of Management and Budget to include the principle of equal access in its proposed circular on federal information management.

31.8 oppose a provision of Senate bill S.774 requiring full cost recovery for federal information.

31.9 study and monitor the public lending right issue.

32. ask publishers to individually review their trade discounts to libraries.*

33. reinstate the Ralph R. Shaw Award for Library Literature, donated by Knowledge Industry Publications, Inc.

*see *AL* stories in this or February issue.

of directors to seek the involvement of trustees and friends groups; record the experiences of retired armed forces librarians; continue work on its pictorial history of public library landmarks; and make a recommendation to the PLA board of directors that the group be given the status of a standing committee until 1993.

Fighting back against thieves

On the heels of last fall's Oberlin Conference on Theft, at which librarians, booksellers, and law enforcement agents discussed their concern over book theft (*AL*, Nov. 1983, p. 648–50), the Security Committee of the Association of College and Research Libraries Rare Books and Manuscripts Section met to take action to combat the problem.

One of the issues raised at the conference was the need for stronger laws in many states. With this in mind, the committee plans to identify existing model legislation and gather it in a packet along with a guide to getting it passed in state legislatures.

The committee also plans to produce a set of guidelines for theft prevention, to be tested in various libraries; and a manual of procedures to carry out in the event of a theft.

Another need determined at the Oberlin Conference was for a National Security Office to serve as a registry of libraries' marks. Such a clearinghouse could also provide reference service on national and state legislation, offer a referral service for the appraisal of stolen works for insurance claims, and serve as an arbitrator in disputes of ownership over recovered items.

As the first step in creating this office, the Security Committee will identify other groups with a stake in the issue, such as the Antiquarian Booksellers Association of America and the Society of American Archivists, and meet with them to develop plans and seek funding sources.

Exemplary adult services sought

Adult Services in Action is a practically oriented series published by the Reference and Adult Services Division to highlight successful examples for use by other libraries.

At the publication's Midwinter advisory committee meeting, Editor Leandra Fox said she is seeking authors for articles on the following topics: library orientation programs for adults; bilingual programs in public libraries; consumer health education; career and job counseling in libraries; services to non-English-speaking groups; and using "prepackaged" library programs. Authors may contact Fox through the RASD office at Headquarters.

The second number in the series, published in February, is *Developing Arts and Humanities Programs with the Elderly*, by Ronald J. Manheimer. It is available for $2.95 from the Order Dept., ALA, 50 E. Huron St., Chicago, IL 60611.

Multicultural handbook proposed

First steps were taken at Midwinter to create a "social policy handbook" for librarians that would include, among other features, guidelines on dealing with stereotyping in children's literature; on building coalitions with cultural and racial groups in communities; and on articulating, to publishers, reviewers, and librarians, the need for cultural and bilingual parity in adult and children's literature.

Donnarae MacCann proposed the handbook at a meeting of the Social Responsibilities Round Table Civil Rights Task Force and prepared a brief prospectus that has been sent to relevant groups for comment.

The working title of the document is "Principles and Practices of Multicultural, Nonsexist, Selection, Networking, Bibliographic Work, and Other Social Responsibilities." In proposing it, MacCann said "one of the situations we face is that there are two points of view in our profession about what intellectual freedom means."

Intellectual freedom committees have refined the wording in interpretation of diversity in collection development, she said, but there is a de facto policy widely used in the profession. The de facto policy has involved a great deal of research that needs to be pulled together in one place, she said.

MacCann and Effie Lee Morris are overseeing the project. They are asking for comments and suggestions in the latest *SRRT Newsletter* and hope to interest experts in writing individual chapters soon enough to have a rough presentation of research material at Annual Conference in Dallas.

Training devices strengthen intellectual freedom fighters

Energies of the Intellectual Freedom Committee at Midwinter were divided between a full agenda of business items and sessions to train facilitators for the IFC's Annual Conference program in Dallas. The program will feature skits depicting confrontations between librarians and censors, and the facilitators will lead small groups in discussing how the situations could have been defused.

In another training effort, the IFC is preparing a "Working with the Media" package to help librarians use the press when dealing with intellectual freedom issues. The kit, to include a training manual, transparencies, and audio and video cassettes, will be followed by a similar package on lobbying and legislation.

Another project planned by the committee is a survey of 100 to 150 public libraries on

Subliminal message. Taking her daughter Autumn to an ALA meeting for the first time, Karen Tallman of Iowa State University Library provides subtle input for the 14-year-old's career considerations. Autumn was politely noncommittal about her present leanings.

The subject is — books! Imagine, discussing books at a library meeting, and with such feeling. But at ALA Midwinter Meetings, the Association for Library Service to Children's Notable Children's Books Committee is one of several units discussing the year's best titles, as well as larger literary issues. In addition to its Notable Children's Books of 1983, ALSC has announced "Notable" lists of children's filmstrips, films, and recordings. The Young Adult Services Division has announced its Best Books for Young Adults list and Selected Films for Young Adults 1984. The Reference and Adult Services Division has released its Notable Books from 1983. The March 15 *Booklist* will include the notable lists for adult, children's, and YA books. List brochures will be announced in *AL* as available.

collection diversity and how censorship pressures affect selection and circulation practices.

An IFC subcommittee is working to develop a definition of "censorship incident" and other terms to insure a consistent base for comparison when researching censorship trends.

The committee also released a background paper on the issue of circulating R-rated movies to minors. The paper includes legal information provided by ALA counsel and recommends that libraries apply the same standards for the circulation of films as they do to books, and that they resist all attempts to "label" materials.

The IFC and the Intellectual Freedom Round Table prepared an open letter to the library community regarding Dodd, Mead, and Company's decision to cancel publication of three titles containing language offensive to the publisher's parent company. Calling the act "fraught with danger to the free flow of information," the statement recommended that libraries "protest such impositions in every possible way."

The IFRT agreed to take over responsibility for the presently inactive Task Force on Coalition-Building from the IFC, and announced that the 1984 John Phillip Immroth Memorial Award, honoring notable contributions to intellectual freedom, would be presented to Gene D. Lanier, professor of library science at East Carolina University, at the IFRT's program in Dallas.

Ref staff survey released

The preliminary results of a survey of reference departments of large and medium-sized academic libraries hold no surprises about librarians' majority gender, but reveal high levels of education and experience.

The survey, sent to 106 libraries last May by the Reference Services in Large Research Libraries Discussion Group of the Reference and Adult Services Division, was a followup to a 1976 study of reference department organization, staffing, and function conducted by the group.

Among the early findings, with 75 libraries responding thus far:

- The preponderance of reference department staff members—69 percent—is female.
- Eleven percent of the reference librarians work part time; and this group is even more overwhelmingly female than the total.
- Thirty-six percent have a higher academic degree in addition to the MLS: 29 percent hold a second master's and 7 percent a Ph.D. Just over 6 percent are currently working on an additional master's.
- Over 62 percent have more than seven years' experience. Around 22 percent have four to seven years' experience, and 15 percent have three years' experience or less.

Public to test LC optical disks

Plans call for the public to begin testing, as early as May, the optical disk storage and retrieval system being developed by the Library of Congress (*AL*, July/Aug. 1982, p. 476–78). Six "user stations" will be located in high activity areas of the Library, among them the Law Library, Science, and Main Reading Rooms. LC staff will use questionnaires and interviews to analyze user reaction to such factors as ease of viewing, print quality, response time, lack of color display, and fees for hard copy.

Ellen Hahn, chief of LC's General Reading Rooms Division and manager of the design print pilot experiment section of the project, told an RTSD/Association of American Publishers Joint Committee meeting that the Library has received the first half of the equipment needed for the project.

The system test, which began in January, involves entry of full pages of data from high-use journals, law materials, manuscripts, music scores, and maps onto 100 optical disks. The disks are stored in a jukebox-like device that can select and play them one at a time. The full-page images are quickly transferred from optical disks to a buffer system that provides the image to users at terminals, so that the optical disks can be re-stored and available for other uses immediately.

Hahn reported that nearly half of 90 publishers contacted are allowing LC to include their high-use current publications in the pilot. A group of publishers and librarians is advising LC regarding copyright implications of the pilot.

End of Midwinter Report

(ALA Report continues next page.)

Critical issues. Christina Carr Young, left, of the American Association of School Librarians' "Critical Issues" discussion group, finds the exhibits area worthy of some serious exchanges, too. With her is Claudia Dansby of DataPhase.

ASCLA, LITA, CLENE & LAMA announce preconferences

Communicator Arch Lustberg, who spoke on "Testifying with Impact" at the Midwinter Meeting President's Program, will conduct an all-day training session Friday, June 22, at the Hyatt Regency in Dallas.

Titled "Dealing with the Media, Political Officials, and Other Often Hostile Audiences," the preconference is sponsored by the Association of Specialized and Cooperative Library Agencies (ASCLA) State Library Agency Section. For information contact ASCLA at Headquarters.

- The Library and Information Technology Association (LITA) announces a two-day preconference institute designed to tell librarians how to negotiate a contract after choosing an automated system. "The Art and Politics of Contract Negotiation" will be held June 21–22 at the Hyatt Regency. For information, contact LITA at Headquarters.
- "Orchestrating and Conducting Conference Programs" is a one-day workshop June 22 sponsored by the Continuing Library Education Network and Exchange (CLENE) Round Table. Contact Syd Popinsky, Program Chair, Texas State Library, POB 12927, Austin, TX 78703 (512-475-4110).
- The Library Administration and Management Association (LAMA) Buildings and Equipment Section is sponsoring a two-and-a-half day preconference June 20–22 in Dallas. The topic: "Planning Library Buildings: From Decision to Design."

LAMA's Public Relations Section is holding a two-day preconference, "Getting on the Air," June 21–22 at the Plaza of the Americas.

"Automated Circulation & Beyond: Broadening Access to Services & Collections" is the subject of the LAMA Systems and Services Section preconference June 21–22. It will be held at the Holiday Inn Downtown.

For information about the LAMA preconferences, contact LAMA at Headquarters.

Annual Conference corrections

T.V. Travel has announced its special roundtrip discount rate from Seattle to the ALA conference in Dallas is $362.

The ALA Office for Library Personnel Resources Placement Center will be open on Tuesday, June 26, 9 a.m.—2 p.m.

The All Conference Reception hosted by the Dallas Public Library will be held Saturday, June 23, 7:30—10 p.m.

Literacy coalition attracts big bucks and phone calls

The Coalition for Literacy, coordinated by ALA, received $125,000 in January and promises of additional funds for its national literacy awareness campaign. The coalition of 11 organizations is dedicated to eradicating the functional illiteracy of some 23 million American adults.

The funding was contributed by the U.S. Department of Education ($50,000), B. Dalton ($50,000), and the General Electric Foundation ($25,000, the first payment on a $75,000 pledge). The total enabled the coalition to instruct the Advertising Council of America to begin designing the multimedia ad campaign to be launched next summer.

A promise of $350,000 more came from the new Business Council for Effective Literacy. McGraw-Hill Chair Harold W. McGraw launched the council Jan. 20 with $1 million of his own money. He indicated that one of the council's first funding efforts will be to provide $350,000 to the Coalition for Literacy. ALA member Dan Lacy is executive vice president of the council.

Coalition coordinator Jean Coleman reports that the toll-free literacy hotline attracted a record 7,400 calls in January as a result of the airing of the documentary film *Can't Read, Can't Write* and the "Good Morning, America" appearance of Barbara Bush. Fifty-nine percent of the calls came from potential volunteers, 32 percent from potential students. The telephone number is 1-800-228-8813.

Barber appointed to head ALA Communications Services

Peggy Barber, Public Information Office director since 1974, was appointed ALA Associate Executive Director for Communications effective Feb. 6.

In her new position Barber heads the new

ALA Nominating Committee seeks candidates for top jobs

The 1984–85 ALA Nominating Committee requests your aid in identifying candidates for ALA vice-president/president-elect and for Council.

The successful candidates for vice-president/president-elect will serve in the 1985–86 term. The councilors will be elected for four-year terms beginning at the close of the 1985 Annual Conference.

To help ensure that a cross section of individuals fully representative of the ALA membership is presented on next year's ballot, the committee uses the Nominee Suggestion Form. The various kinds of background information will help the committee evaluate areas of special interest and competence.

Suggestions must be sent by April 1 to the chair, Thomas E. Alford, Assistant City Librarian, Los Angeles Public Library, 630 W. Fifth St., Los Angeles, CA 90071.

NOMINEE SUGGESTION FORM
Return by April 1, 1984
(Use this form, or a similar format with additional space.)

Submitted by: **Name** _____

Address _____

_____ **Zip** _____

I should like to be considered for nomination for, OR I suggest the following nominees for: ☐ ALA vice-president/president-elect 1984–85; ☐ ALA treasurer, 1984–88; and/or ☐ ALA Councilor at Large, 1984–88.

Name: _____

Present Position: _____

Address (incl. zip): _____

(Optional) **Sex:** _____ **Race:** _____ **Bus. Phone:** _____

To assist the committee in its considerations, kindly provide as much of the following information as possible:

_____

For Committee Use: Region _____ Type of Library _____

department of Communications Services, overseeing planning and administration of ALA conference arrangements, membership promotion, and public relations and information.

A Phi Beta Kappa graduate of the University of California/Riverside, Barber holds an MLS from Rutgers University. She served as reference librarian at the San Francisco Public Library and as special projects librarian at the Orange County (Calif.) Public Library.

"Let's Talk" project to hold first workshop in April

"Let's Talk about It: Reading and Discussion Programs in America's Libraries," the $900,000 project sponsored by the Association of Specialized and Cooperative Library Agencies (ASCLA), will hold its first regional workshop near Madison, Wis., April 27–29. The two-year project funded by the National Endowment for the Humanities aims to bring adults, scholars, and literature together in community libraries across the nation (*AL*, Dec., p. 696 and 698).

Midwestern state teams representing the state library, library association, humanities council, and humanities community will be trained to sponsor "Let's Talk about It" programs. By July, the teams will submit proposals for local participation to ASCLA, with selections made by July 31.

Similar workshops will be held in Pomona, Calif., Sept. 21–22, and in Sulphur Springs, W. Va., Nov. 3–6. The participating teams will send in their proposals and all selections will be made by Dec. 31.

The "Let's Talk about It" format is based on time-tested reading discussion programs in libraries of all sizes. Each library group examines a given theme in each of five meetings held every other week for 10 weeks. Each discussion centers on one of five works. Speaking for 30–40 minutes, a scholar introduces the book, then participants discuss the work.

ASCLA is preparing a packet designed to provide information for local libraries and scholars on how to conduct reading discussion programs. The materials will include a manual and, for each of six suggested themes, an essay, five recommended titles with notes, an annotated bibliography, a poster, and a public relations kit. All the packet materials will be available to libraries next fall.

Librarians who wish to participate are encouraged to ask state library agencies, associations, or humanities councils to send a team to the regional workshop. Each state sending a team may apply for an award of money, consultation, or technical assistance. Cash awards totaling $250,000 will be presented to 10 to 15 states to help develop the programs.

For more information, contact the "Let's Talk about It" program, ASCLA, at Headquarters.

Unit Offerings from 50 E. Huron

Books for the Youngest Child, reprint from *Booklist*, Nov. 1, 1983. 3 pages, 25 cents with a stamped, self-addressed No. 10 envelope from *Booklist* (0-8389-6622-5).

Degrees and Certificates Awarded by U.S. Library Education Programs 1979–81, Office for Library Personnel Resources. 5 pages, free with SASE from OLPR.

EMIE Bulletin, Ethnic Materials Information Exchange Round Table. Quarterly, free to EMIE members; subscriptions $4 per year, $1.50 per issue from EMIE, c/o Queens College Community Facilities Bldg., Rm 251, Flushing, NY 11367 (0737-9021).

Environmental Control for Library Collections: A Checklist and Bibliography, Library Administration and Management Association. 5 pages, free with SASE from LAMA.

Financial Assistance for Library Education, Academic Year 1984–85, Standing Committee on Library Education. $1 per copy with rates available for multiple copies from SCOLE.

"Graduate Library Education Programs Accredited by the American Library Association," March, 1984. Single copies free with SASE; 2–50 copies, $1; 51–100 copies, $2; more than 100, $3, with check payable to ALA/COA from Accredited List, Committee on Accreditation.

Humanizing the Work Place: Quality of Work Life in Libraries, Office for Library Personnel Resources TIP Kit No. 4. $10 from OLPR.

LAMA Newsletter Special Supplement: Program Highlights, 14 program summaries from the 1983 Annual Conference, edited by Edward D. Garten. 11 pages, $2 from LAMA.

Librarians: A Study of Supply and Demand, by Nancy A. Van House, et al., reprint from June 1983 *American Libraries*. 6 pages, free with SASE from the Office for Library Personnel Resources.

The 1983–84 Official Directory of State and Regional Affiliate Organizations, American Association of School Libraries. 18 pages, $10 from AASL Order Dept. (8389-6618-7).

1984 Power Tools Publicity Book, Public Information Office. 115 pages, $4 from Library Graphics, PIO.

Online Bibliographic Database Searching in College Libraries, comp. by David Carlson and P. Grady Morein, Association of College and Research Libraries CLIP Note No. 4–83. 132 pages, $15 to ACRL members, $19 to others prepaid from ACRL (0-8389-6624-1).

Positive Aspects of the Contemporary American Family: A List of Books and Films Selected by the Media Selection and Usage Committee, Young Adult Services Division. 6 pages, 50 cents from YASD.

Scholarships for which Foreign Students Are Eligible to Apply, Standing Committee on Library Education. Free with SASE from SCOLE.

Skills for Library Planning: A Checklist and Bibliography. Library Administration and Management Association. 5 pages, free with SASE from LAMA.

Women in Libraries 1982: A Bibliography, by Katherine Phenix. 10 pages, 50 cents from the ALA Committee on the Status of Women in Librarianship.

Young Adult Reference Services in the Public Library by Mary K. Chelton. 15 pages, $1.50 from YASD.

Your input requested

- Public and academic librarians who wish to participate with humanist scholars in six two-day regional workshops designed to initiate cooperative humanities programming projects should contact Shirley Mills-Fischer, Barbara Macikas, and Julie Virgo at Headquarters.

The Association of College and Research Libraries and the Public Library Association have been awarded a $209,944 grant to conduct the workshops in 1984 and 1985.

- Groups belonging to Friends of Libraries USA are invited to send representatives to celebrate the fifth birthday party of FOLUSA at noon on Friday, June 22, on the plaza in front of the Dallas Public Library.

Please include names and addresses of local newspapers as well as the names of your representatives, or indicate that your group needs a Texas friend to represent you. Contact FOLUSA Birthday Celebration, Rosica, Mulhern & Associates, 627 Grove St., Ridgewood, NJ 07450.

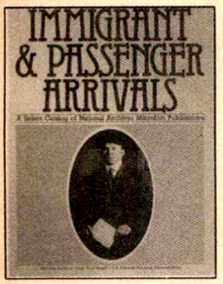
- For the Young Adult Services Division President's Program at Annual Conference, "Who Speaks up for Youth: Intellectual Freedom, Public Relations, and the Library," YASD needs information about how public libraries inform their users of library operations related to intellectual freedom. Please send examples of how your library communicates with users; who is allowed to borrow what; and how YASD materials are selected and reevaluated to Pat Latshaw, Akron-Summit County Public Library, 55 S. Main St., Akron, OH 44326.

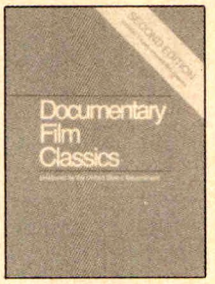
- The new Resources and Technical Services Division Resources Section Canadian Resources Study Committee invites colleagues interested in Canadian concerns to contact committee Chair Nancy Crane, Head, Reference Dept., University of Vermont Library, Burlington, VT 05401.

- The Association of College and Research Libraries Audio Visual Committee is calling for papers to be presented at the 1985 Annual Conference program "Integrated Library Systems—The Media Factor." Persons with experience in automated media services in libraries are asked to submit a one-page letter outlining their areas of interest to Richard Matzek, Library Director, Nazareth College of Rochester, NY 14610. Deadline for the letter of intent is June 10, 1984. □

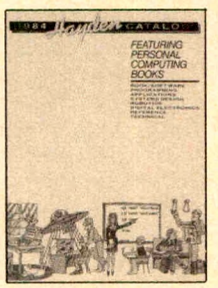
A small catalog of catalogs from the Midwinter '84 exhibits

From the record 276 exhibit booths at ALA's Midwinter Meeting in Washington, four AL *editors grabbed a trunkload of literature and later selected these 17 catalogs as a minute sampling.*

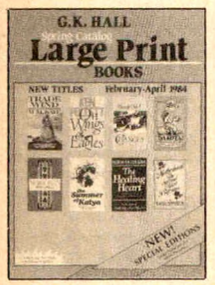




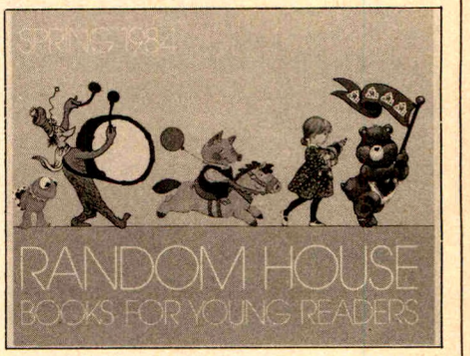
National Archives goodies. "Immigrants" is from a series describing microfilm pubs of high research interest. Request on library stationery from National Archives Trust Fund Board, Wash., DC 20408. "Film Classics" adds nine titles in its 2nd ed. Write National AudioVisual Center, NARS, GSA, Inf. Services JL, Wash., DC 20409.



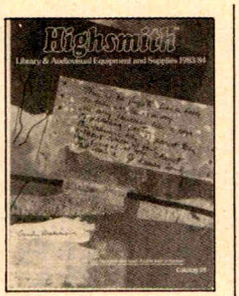
Hacker specials. The B&T catalog describes some 550 books and 100 software titles. Write B&T, 6 Kirby Ave., Somerville, NJ 08876. For Hayden's colorful catalog of computing books, write Hayden Book Co., 10 Mulholland Dr., Hasbrouck Heights, NJ 07604.



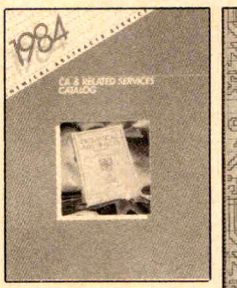
Easy reads. The latest in large-print editions of popular books: G.K. Hall, 70 Lincoln St., Boston, MA 02111. At right, Crestwood House (Hwy. 66 So., Box 3427, Mankato, MN 56002-3427) says it gives meaning to "high-interest, low-readability" with subjects kids love.

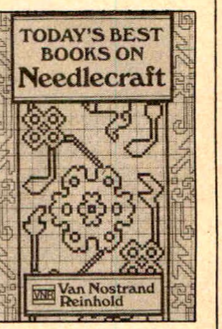


Ducks, bears, and Yooks are in order—not to mention thousands more creatures parading in spring catalogs of children's book publishers. These two come from Little Brown, 34 Beacon St., Boston, MA 02106, and Random House Juvenile Books, 201 E. 50th St., New York, NY 10022.

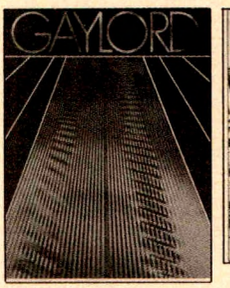


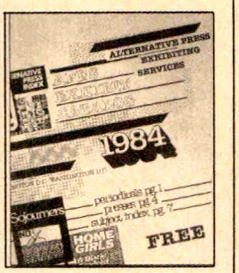
Heavyweights. These thick catalogs are jammed with illustrations. Phoenix (468 Park Ave. So., New York, NY 10016) weighs in at 304 pages. Highsmith (POB 800, Hwy. 106 E., Ft. Atkinson, WI 53538) at 268.



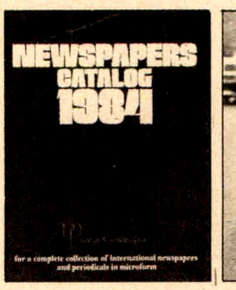


Two cultures. Left, chemical-info services galore from Chemical Abstracts, Marketing Dept. 34183, 2540 Olentangy River Rd., Columbus, OH 43210. Less abstract is a pocket-sized catalog of 64 needlecraft titles, from Library Service Dept., Van Nostrand Reinhold, 135 W. 50th St., New York, NY 10020.





Big and little. Gaylord's 272-p. catalog reads like a world's fair of library supplies, automation, and furniture. From Gaylord Bros., Box 4901, Syracuse, NY 13221. The tabloid APES Exhibit Catalog features 48 small-press items; write Alternative Press Exhibiting Services, 4426 S. Belsay Rd., Grand Blanc, MI 48439.



Newspapers on microfilm. Both catalogs feature historical and contemporary newspapers, domestic and international. Both have lively, informative copy. Left: Research Publications, 12 Lunar Dr., Drawer AB, Woodbridge, CT 06525. Right: University Microfilms International, 300 N. Zeeb Rd., Ann Arbor, MI 48106.

Get 'em while they last! Who knows which popular government titles will be axed next in the name of efficiency? This 56-page illustrated catalog features many well priced beauties. Ask for Catalog Y-4, SuDocs, GPO, Dept. 33, Wash., DC 20402.

Customized reference statistics programs

by Dana E. Smith

Ed. note: "Software Showcase" features announcements of microcomputer programs of special interest to library professionals. Software designers are invited to submit brief factual descriptions of their programs for consideration.

Inclusion of a product in this department in no way constitutes endorsement by ALA or any of its units.

Libraries share a common interest in the collection of reference statistics to facilitate planning and improve reference services. However, the lack of standards for uniform measurement and evaluation of reference services requires each library to act independently when designing a procedure for descriptive reference statistics. The result: inconsistencies in the methodologies used for this purpose.

Efforts have been made to overcome this problem by establishing a standardized format for the collection and reporting of descriptive reference statistics; but thus far no agreement has been reached on the overall design, content, and method of implementation of these standards.

Meanwhile, reference managers and researchers want to collect as much meaningful information as possible without placing undue constraints on those collecting and analyzing the recorded data. But in many surveys, the research objectives have been compromised due to inflexible or burdensome data encoding and decoding procedures. Reference transaction tally sheets must be collected, sorted, and manually analyzed. Optical-mark scan sheets used for this purpose have reduced much of the work involved in this process, but they are inflexible and costly to produce.

Dana E. Smith developed Create with his partner Steve M. Hutton. Co-owners of Microdex, both are librarians at Purdue University, W. Lafayette, Ind.

No programming experience needed

The Create program was designed to allow its users to develop their own customized, flexible programs for collection and analysis of reference statistics, using the microcomputer for direct input and immediate analysis of data. The program was developed by librarians in recognition of a need for various types of libraries to quickly and easily define their management statistical support requirements. Create gives librarians the freedom to structure statistical reports through their own program designs even if they have no programming experience. The program prompts the user from start to finish to develop unique programs for statistics collection requirements. From simple transaction tallies to complex analysis of elements of the reference transaction, the breadth and depth of the desired sample format is determined by the user.

A sample of some of the possible fields for inclusion and testing within the Create program is shown in Figure 1. Figure 2 demonstrates the nature of the two-dimensional frequency table which can be generated immediately on any two of these fields.

Cost and system requirements

The Create package will operate on the Apple II+ or Apple IIe with 48K RAM and the Apple DOS 3.3 operating system. The accompanying user manual is written for users with all levels of understanding of microcomputer operation. The manual suggests various types of programs that can be designed to produce useful reports while running simple or complex reference transaction analyses. Hints for possible sample techniques for use with the Create program are also included. The Create program, user manual, and blank program sheets are available for $80 plus $2.50 shipping from Microdex, 3000 Pemberly Court, Suite 3, West Lafayette, IN 47906.

Introductory offer

As an introductory offer, Microdex will give a 50-percent discount to selected users of the Create program. Users receiving the discount will be asked to participate in a survey to assist in future program enhancement. Microdex will choose a representative sample of various library types and settings in determining the locations receiving the discount. For information at no obligation, contact Microdex. □

Sharon Herrick gives the shush sign while cast members ready for "Everything's Up to Date in Central Reference." They are from left, Sylvia Geiger, Catalog Department; Vicki Mills, principal cataloger; Spencer Hunter, Music Library staff member; Herrick; Robert Maxwell, student assistant; and Mary McWhorter, Oriental Studies Collection.

Musical rejuvenates an academic library's blahs

The staff loved it. They went back to their jobs singing the songs, humming the tunes, and dancing the steps. They glowed for weeks afterward. It was the first time some of us felt we were all in this together.

That's how Sharon Herrick summed it up for the University of Arizona Library staff, which presented a musical last year before UA's library community. Herrick heads the Serials Receiving Station and was writer, director, and producer of the spectacle.

She dreamed up the entertainment last summer to dissipate the "gloom and doom" caused by such calamities as hiring freezes and a book processing budget that was never adjusted to the increased book-buying budget.

The production was filled with songs about library work and was performed by staff members. "It had the kind of magically unifying effect that even across-the-board pay raises can't accomplish," said Herrick.

In the fall a wary but willing cast of 10 or 12 began rehearsing during lunch breaks. The show was scheduled for an all-staff holiday party in December.

"The library administration actively supported the project from the beginning and, in the end, the administrators themselves even played cameo roles. This fact alone had a terrifically positive effect on library personnel," Herrick reported.

The show's lyrics were set to well known tunes. "Our Favorite Things," for example, inspired such verses as:

"Bar codes and labels and work-study students
Heads of department with patience and prudence
Shipments that show up with nothing missing
These are a few of our favorite things."

A command performance met with even greater success at the state library convention awards banquet.

"So have yourself a little library musical," says Herrick. "It's good for morale."

Almost all system staff attended.

Tobacco chewers outlawed

Definitely not the setting for cowhands or baseball players, the West Hartford (Conn.) Public Library recently has had to cope with a new kind of vandal: the tobacco chewer. Enraged custodians at the library complained to Librarian Dennis Lorenz of stained blue carpeting and bespattered cream-colored walls, apparently caused by tobacco-chewing students from local high schools.

"Kids get together in a group and they just let the stuff fly wherever they want to," said Lorenz.

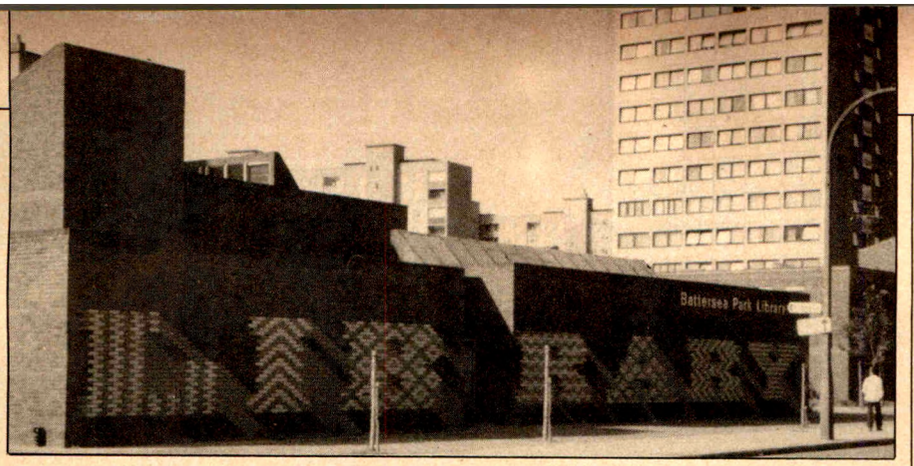
In the fall, the library board passed a resolution stating that chewing as well as smoking tobacco was outlawed in the library. The library's PR officer put up a sign showing a can of tobacco with a slash through it to announce the prohibition. The librarian told *AL* that after just two offenders were asked to leave, the problem seems to have diminished.

Lorenz reported that the habit had become popular with a small group of students, who probably were responding to a recent increase in chewing tobacco ads he had noted in magazines.

Paul Ollswang

Unusual life in your library?

AL seeks straight-to-the-point, human-interest picture stories for this column. Avoid clichés such as dance programs and limit submissions to 200 words. Look for the offbeat; send to E. McCormick.



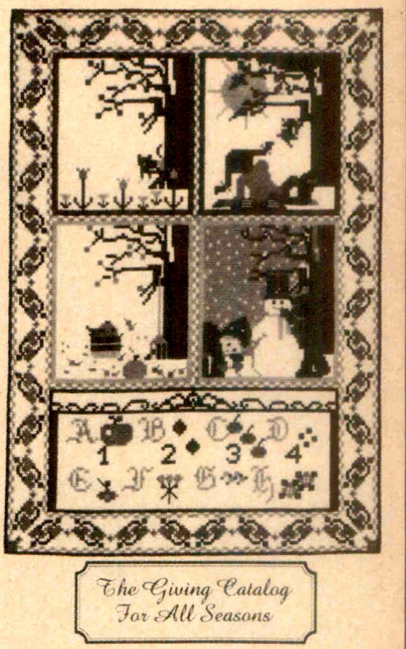
South London children paint ultimate library wall

South London children helped children's illustrator Jan Pienkowski paint this arresting graphic on a library wall last August.

AL recently learned of the art spectacle, which had more than 100 paint-smeared youngsters daubing giant red and yellow letters on a blue background to spell out the word "Library." The Battersea Park Library won the face-lift.

Pienkowski, known for "pop-up" books such as *Robot* and *The Haunted House*, returned to his native Battersea recently and thought the long brick wall needed brightening up. He conceived the project, offered it to Wandsworth Libraries, and the painting was completed in a day.

Now the seven-foot-high letters, which may form the world's largest library sign, leave no doubt as to the nature of the local facility.



Library issues "Giving Catalog"

Electric typewriters, an aquarium for the children's room, and a subscription to a periodical are among the items listed in the Salt Lake City Public Library's "Giving Catalog for All Seasons."

Designed to solicit (tax-deductible) gifts for the library, the catalog was mailed to members of the community in December and will be distributed in conjunction with holidays throughout the year. More than 20 items are described and illustrated with antique line art. An order form features a convenient option payment plan, which allows contributors to pay for higher-priced items, such as a $10,000 computer station for the children's room, over a three- or five-year period.

Priscilla Vermillion, the library's full-time graphic artist, created an original cross-stitch sampler to adorn the catalog cover. "It was my contribution toward helping to build a new branch," she told *AL*. The needlework will either be given to the largest contributor or it will be available for $1,000 in an outright sale.

Director J. Dennis Day said: "We're building two new branches and hope the catalog helps defray costs."

Lucky 13th book-and-author event an SRO success

The 13th annual Friends of the Library Book and Author Luncheon drew some 450 book-lovers to the campus of Queens College in Charlotte, N.C., Jan. 17.

Above, authors Jonallen Heckler (l.), Gail Godwin (seated), and Anne Hall Whitt (center) talk things over with Whitt's sister Marilynn during a visit to Everett Library. The writers, all with North Carolina backgrounds, mingled with members of the Friends at a reception preceding the luncheon.

Heckler, formerly of Charlotte, said she spent two years reading microfilm in her public library before establishing dates for events in her first work of fiction about the family of a POW held in North Vietnam (*Safekeeping*, Putnam, 1983). Whitt's book, *The Suitcase* (Acropolis, 1983), tells of the orphaned childhood she and her sisters spent in Charlotte institutional and foster homes. Godwin, author of *Mr. Bedford and the Muses* (Viking, 1983), said she often received inspiration for a piece of fiction in an instant flash that takes months of dedication to convert into a short story or novel.

Stewart Lillard, librarian of Queens College, reported that the Friends sold 130 books during a post-luncheon autographing session. The 900-member organization, he said, "broadens the usefulness of the library and contributes to the literary life of Charlotte."

youthreach

Parents "talk it over" with KIDS

"Let's Talk It Over," a series of workshops conducted recently at Chicago Public's Woodson Regional Library, offered youngsters and parents an opportunity to learn about themselves and each other in a stimulating environment.

Annie Carroll, Woodson children's librarian, coordinated the sessions. The series was made up of four workshops, each designed for a particular age group, and the entire series was repeated a second time. Each group leader was a parent and trained professional.

Author Harriet Robinet explored childhood fears and gang dynamics in her workshop.

Eugene Perkins, for example, led the meeting for 14- through 16-year-olds. Perkins, an author, poet, and playwright, directs the Better Boys Foundation. Among topics discussed were education, sex, life styles of youth, and the importance of one's own values. Perkins also explored various areas of concern by reading from one of his plays.

According to Carroll, one of the discoveries for participants was that others had similar problems.

The series was funded by a $5,000 grant from the KIDS fund established by children's author Judy Blume. KIDS is a acronym that stands for Knowledge, Independence, Decisionmaking, and Sensitivity.

Behind the scenes on video

Three videotapes in the new Houghton Mifflin Author and Artist Series take youngsters into the homes and studios of famous authors and illustrators. The artists share the inspiration, enthusiasm, and discipline behind the creation of their books.

Scott O'Dell, who has won the Newbery Award for *Island of the Blue Dolphins* among many other honors, talks about how he gets ideas for books and the process of writing in *A Visit with Scott O'Dell*.

The other two titles are *David Macaulay in His Studio* and *Bill Peet in His Studio*.

The videotapes are available in ¾-inch, ½-inch Beta, and ½-inch VHS formats and can be rented for a 10-day period at $30. The Peet and O'Dell tapes sell for $125; the Macaulay tape, $150. Preview copies will be sent when available, but indicate size and title needed to Jazan Higgins, Houghton Mifflin, 2 Park St., Boston, MA 02108.

Authors launch MS campaign

At a recent reception sponsored by the National Multiple Sclerosis Society, Paula Danziger announced that many well known writers of children's and YA books have joined the crusade to fight MS.

The prominent children's author, who chairs the society's Authors vs. MS Committee, spoke at a Dec. 14 kick-off event.

The new Authors vs. MS program enlists authors to support the crusade and to encourage its adoption by more schools around the country. During the six-week MS READ-aTHON conducted during fall or spring terms, each child reads about 14 books. By obtaining adult pledges for each book read, youngsters help raise funds for research.

Archive seeks films by children

A new Children's Film Archive is searching for films made by children attending grades K–12.

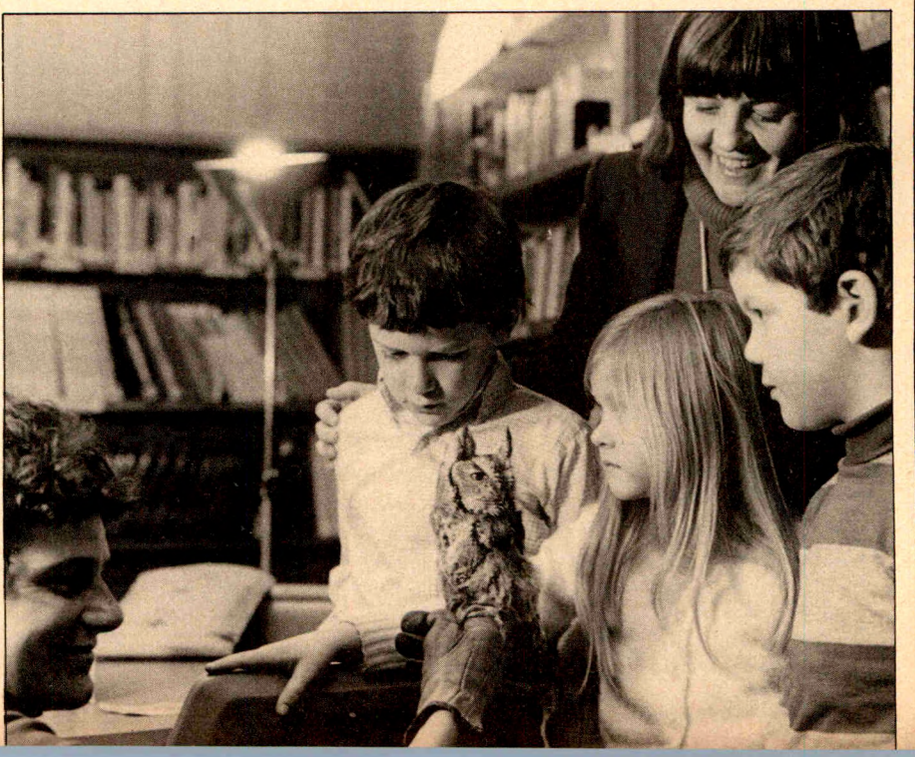
The first of its kind, the library/archive will be dedicated to the collection, exhibition, and preservation of work by young filmmakers.

Lorri Schneider Cramer, director, wants to learn of approriate filmmaking programs or individual films, any length, super-8, regular-8, or 16mm, color or black and white, realistic or abstract. Cramer says she is interested in considering the widest possible selection, "not just prize winners."

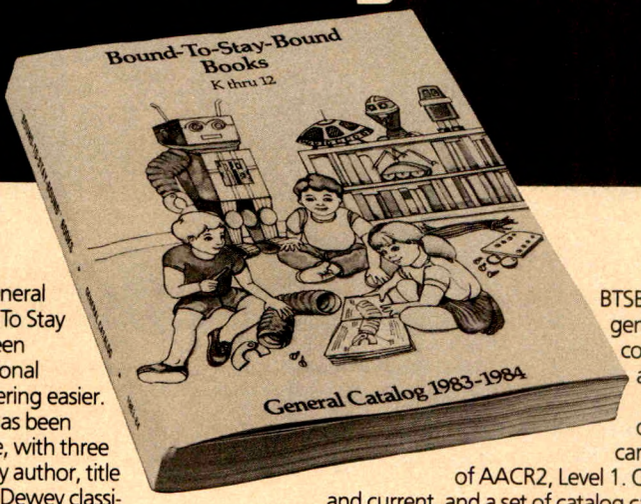
For more information, contact Cramer at CFA, Astoria Motion Picture and Television Foundation, 34-31 35th St., Astoria, NY 11106; or evenings, call 212-799-2114. Note: speak to someone at the archive before sending films.

Close-up on birds of prey

This screech owl and other birds of prey came eyeball to eyeball with young viewers at the Waterbury, Vt., Public Library in January. Margaret Barker (left) of the Vermont Institute of Natural Science told the youngsters about the benefits of these "raptors." Through such events she hopes to encourage protection of the creatures. This is the fourth season that 30 Vermont public libraries have offered this and similar natural science programs for children through matching grants from the Vermont Department of Libraries and the institute. VDOL children's services consultant Caroline Ward stands in the background.

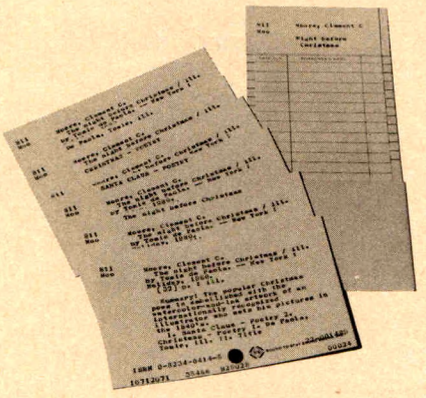


The Book You Should Read Before Ordering All Others!



The new 1983-'84 General Catalog from Bound To Stay Bound Books has now been expanded to provide additional information and make ordering easier.

The 464 page catalog has been designed for easy reference, with three classifications of listings...by author, title and subject area. ISBN and Dewey classification numbers have also been included to aid those libraries building a data base. In addition, our publishing date has been changed to coincide with the school year; yet we'll still publish Fall and Spring supplements, so your information on new titles will always be current.



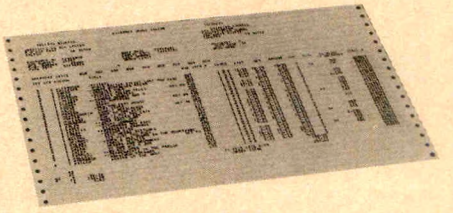
Reader Ready Books

As a service to our library customers, BTSB can provide full processing services, processing kits or just catalog cards. Our processing kits include 1 set of catalog cards, date-due pocket, book card and label. Or for a little bit more, we'll do all the processing for you, including hot spine stamping, so your new titles can go right to the shelf and into circulation quickly.

BTSB catalog cards are now generated on our own computer and are printed at the time your invoice is rendered. And we're one of the first suppliers whose cards meet the specifications of AACR2, Level 1. Our database is accurate and current, and a set of catalog cards/kits is available for practically every in-stock title. For new or expanding libraries, we also offer pre-sorted cards to minimize your cost of acquisition.

BTSB Printout Service

To aid you in ordering, each page of our catalog is perforated. By marking the quantity beside the titles you want, and sending us the pages, these sheets can serve as your order, thereby eliminating hours of expensive clerical time. If, for your own records, you require a typed list of your order, just indicate this



when you send the pages and we'll send you back a computer printout listing all titles, current prices, book and dollar totals, and the status of each title. This order printing service is offered at no charge for orders of 25 or more assorted books.

Since libraries are our **only** customers, BTSB provides these services to make your job easier and get books into circulation faster. Write or call today for a service brochure and free copy of our 1983-'84 catalog listing almost 17,000 in-stock titles.

The Source highlights useful items in major areas of library/information activity. Send materials to department editor Gordon Flagg, American Libraries, 50 E. Huron St., Chicago, IL 60611.

women

Feminist library workers. A new edition of the national directory of feminist library workers is being compiled by the Illinois Library Association Women's Concerns Task Force. Individuals wishing to be included in the 1984 National *SHARE* (for Sisters Have Resources Everywhere) *Directory* can obtain an application form from Tina M. Owens, 739 W. Melrose, Chicago, IL 60657.

Planning community programs. *Connecting Women in the Community* is a guide to planning programs on women's studies themes for community audiences. The handbook resulted from a two-year project funded by the National Endowment for the Humanities and administered by Radcliffe College's Schlesinger Library on the History of Women in America. Scholars, academic and public librarians, and community groups held programs in public libraries around the country on such topics as women in the arts, black women, women as child rearers throughout history, and women in politics.

The handbook, based on the experiences of the program participants, describes the programs and their benefits to the libraries and communities and offers advice to program planners on finding collaborators, obtaining funding, choosing topics and formats, using publicity, and evaluating the results.

Thomas J. Galvin, dean of the University of Pittsburgh School of Library and Information Science, calls the book "*must* professional reading for public and academic librarians and for leaders of community organizations."

$9.95 from Women in the Community Project, Radcliffe College, Schlesinger Library, 10 Garden St., Cambridge, MA 02130. Make checks payable to Radcliffe College/Women in the Community Project.

Counseling young women. *The Second Mile: Contemporary Approaches in Counseling Young Women* contains seven articles describing model programs for helping adolescent females deal with such problems as unintended pregnancy, single motherhood, unemployment, rape, battering, and disability. The anthology, edited by Sue Davidson, is published by New Directions for Young Women, a Tucson, Ariz., counseling agency working nationally to promote the interests of young women. $7.50 from New Directions for Young Women, 738 N. 5th Ave., Tucson, AZ 85705.

Immigrant women—from turn-of-the-century peddlers on New York's Hester Street (above) to the migrant camp laborers of today—will be the focus of a 10-part series on National Public Radio stations beginning this month. "The Golden Cradle: Immigrant Women in the United States" will use archival tapes, contemporary interviews, music, and dramatic readings by Liv Ullmann and other performers to portray the immigrant experience from the 1840s to the present.

Sex Role Stereotyping *in Occupational Choices: A Career Counseling Manual,* by Claudia Gaillard Meer, is designed to develop an awareness in students of their career options. The 62-page paperback contains information on women in the work force, sex role stereotyping, and managerial careers; classroom exercises; and a list of resources and agencies. $5 plus $1 shipping from the Rutgers University Institute of Management and Labor Relations, Public Education Dept., Ryders Lane, Cook Campus, New Brunswick, NJ 08903 (0-941312-01-1).

Women's art organizations. The *Guide to Women's Art Organizations and Directory for the Arts* lists women's groups, centers, and galleries in the visual arts, dance, music, and theatre. The guide also contains information on archives, resource and information agencies, financial help, work opportunities, health hazards in the arts, and legal assistance, and a bibliography of books and periodicals. 174 p., paper, $8.50, from Midmarch Associates, POB 3304, Grand Central Station, New York, NY 10163.

Bibliography of autobiographies. *Through a Women's I* is an annotated bibliography of 2,217 autobiographies written by American women and published from 1946 through 1976. Compiler Patricia K. Addis has also included other types of personal narratives, such as diaries, journals, collections of letters, and travel accounts. The 607-page volume indexes the biographies by author's profession or characteristic, subject matter, and title. $37.50 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (82-10813, 0-8108-1588-5).

young people

Book review contest. Next month the New England Booksellers Association will hold a Book Review Contest for students in New England schools and public libraries. Students in grades 1 through 12 can win 361 cash awards totaling $9,000 by submitting a review of up to 300 words of a new book to a local bookstore. Each entrant will compete for local prizes, and the winners from each store will be entered in a regionwide competition.

The NEBA is sponsoring the contest to give students recognition and tangible reward for thinking and writing well, to demonstrate the role of booksellers in aiding public education, and to promote cooperation among booksellers, librarians, and teachers.

Libraries and schools in the region can obtain a free promotional kit containing posters and entry forms from Ralph Woodward, Contest Chair, 1984 Book Review Contest Committee, POB 2436, Framingham, MA 01701.

Your Reading, a booklist for use by students in junior high and middle school, has been compiled by a committee of the National Council of Teachers of English. The new edition annotates over 3,000 books published since the 1975 edition and is over twice the size of its predecessor. Fiction titles are grouped under 14 topic headings such as adventure, family,

friendship, and mysteries, and the 16 nonfiction headings include animals, biography, history, and science. Annotations give the length and level of difficulty of each book, indicate mature subject matter or language, and list award winners.

Jane Christensen, chair of the committee that prepared the bibliography, said that students were consulted to find out what qualities in current books appeal to the 10-to-14 age group. "Our students contributed copy for many annotations and told why certain books have special meaning for them," she said.

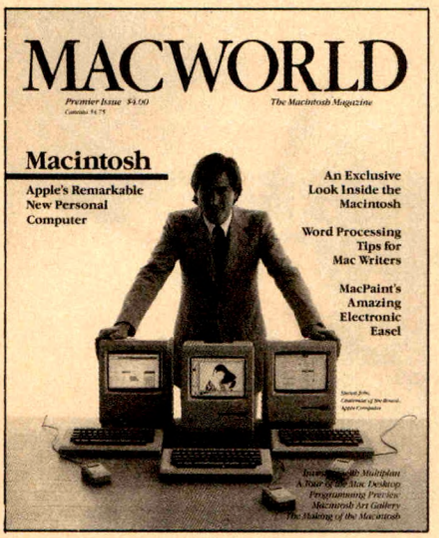
The 764-page paperback is $12 ($10 to NCTE members) from NCTE, 1111 Kenyon Rd., Urbana, IL 61801 (83-17426, 0-8141-5938-9).

Health, Illness, and Disability: *A Guide to Books for Children and Young Adults*, by Pat Azarnoff, is an annotated bibliography of in-print fiction and nonfiction titles to help children understand their condition, prepare for hospitalization or surgery, or accept ill or disabled children. A subject index includes over 250 headings, including various physical diseases and psychological problems, and such topics as the arrival of a baby, the death of a friend, x-rays, and pain. 259 p., $29.95 from R.R. Bowker, POB 1807, Ann Arbor, MI 48106 (83-19743, 0-8352-1518-0).

Child abuse. *Take Care With Yourself* is a guide to preventing and dealing with child abuse written for children ages 7 through 12. Therapists Laurie A. White and Steven L. Spencer have used their experience working with troubled families to develop the 36-page paperback, suitable for use by therapists, counselors, and teachers. $4.95 plus $1 shipping from DayStar Press, 4340 Tamarac Trail, Harbor Springs, MI 49740 (0-9612024-0-8).

Biographies of women. *Her Way: Biographies of Women for Young People* is an evaluative bibliography describing biographies of 1,100 historical and contemporary women. The 1,700 titles included were selected for literary merit, historical accuracy, and freedom from sexism and racism. The revised second edition adds 322 new titles and deletes 125 superseded ones from the 1976 first edition. The book gives brief profiles of each woman who is the subject of an individual biography and lists a number of collective biographies that include one or more women. Indexes provide access by subject, author, and title, and appendices list the women by nationality and vocation. Approx. 448 p., $35 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-22375, 0-8389-0396-7).

microcomputing



Macintosh mag. When a major company announces a new microcomputer, can magazines devoted to it be far behind? Not in the case of Apple's new Macintosh, which has already spawned *Macworld*, from the publisher of *PC World*. In fact, the first issue, pictured above, was released the same day the computer itself was introduced. An introductory subscription rate of $24 for 12 issues is available through July 31 from Macworld Subscription Dept., POB 20300, Bergenfield, NJ 07621.

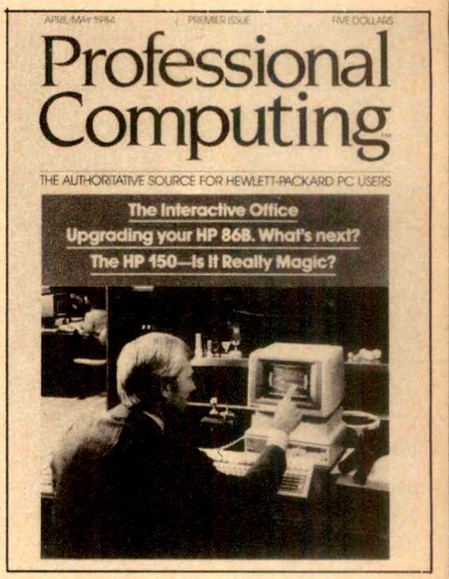
Manual for managing micros. *Microcomputers: A Planning and Implementation Guide for Librarians and Information Professionals* was written by Robert A. Walton "for the librarian who already has a full-time job and does not wish to become a technical expert." The 96-page paperback addresses the practical needs of public, academic, school, or special librarians facing the prospect of selecting and managing equipment and programs. Three major sections cover hardware, including printers, display devices, and data storage devices; operating systems, programming languages, utilities, and other software; and installation and management of the system. $18.50 from Oryx Press, 2214 N. Central at Encanto, Phoenix, AZ 85004 (82-42934, 0-89774-097-1).

Brand-name software review. Stewart Brand, founder of *The Whole Earth Catalog*, is back with a new publication, *The Whole Earth Software Review*. The digest-sized quarterly magazine is a guide to recommended software, hardware, books, information services, and "everything that adds to the usefulness of your personal computer."

Published by Point, a nonprofit educational foundation, the *Review* will not carry advertising. Research for the reviews will find its way into Brand's next project, *The Whole Earth Software Catalog*, a book to be published by Doubleday late this year.

Introductory subscriptions are $16 for four issues from The Whole Earth Software Review, POB 27956, San Diego, CA 92128.

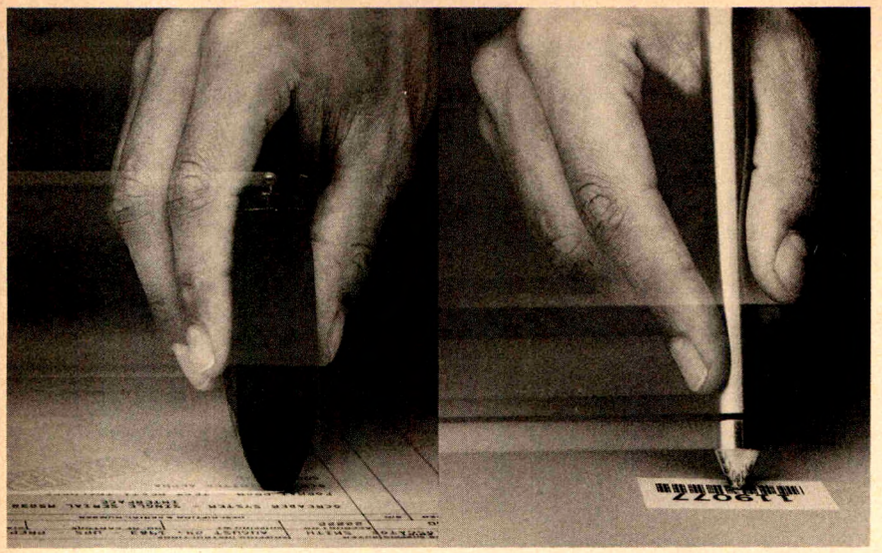
Educational software from AIMS. AIMS Media, a leading producer and distributor of educational films and videos, has opened an educational software division. The firm offers a liberal exchange policy and "bonus checks" with each $100 purchase that can be redeemed for additional software or selected videocassettes. For a free catalog listing hundreds of programs write AIMS Media, 626 Justin Ave., Glendale, CA 91201-2398.



Hewlett-Packard mag from Wiley. Book and scholarly journal publisher John Wiley & Sons will introduce its first general magazine next month when it launches *Professional Computing: The Authoritative Source for Hewlett-Packard PC Users*. In addition to feature articles, the bimonthly magazine will include hardware and software reviews, a buyer's guide evaluating Hewlett-Packard compatibility with peripherals; and book reviews. One-year subscriptions are $30 from John Wiley & Sons, 605 3rd Ave., New York, NY 10158.

Library micro applications database. Researchers at the Simmons College Graduate School of Library and Information Science are putting together MicroUse, a database of information on microcomputer applications in libraries and information centers. The project recently received a boost from a $3,300 grant from OCLC, Inc.

Over 400 applications have already been entered into the database, and the compilers are



HOW TO COMPUTEREYES™ YOUR COMPUTER.

Now you can give your computer eyes. Eyes that read OCR-A or MICR or bar code.

Computereyes. The cost-saving alternative to expensive manual data entry by keyboard.

Faster. And far more accurate.

Computereyes come as hand held wand readers and desk top slot readers, complete with standard parallel or RS-232C serial interfaces. We're the only company that offers all these keyboard interfaces: IBM 3178, 3278 and 5251. Memorex 2078. Telex 178 and 278. Mohawk 2192 and ITT-Courrier 2700.

A single board addition to your IBM® PC or XT, along with a wand or slot reader, allows your personal computer to read OCR-A or MICR or bar code. We also offer the software to let you print OCR-A and bar code media with your Epson printer.

Whether you use Computereyes for remittance processing, file folder tracking, document control, factory data collection, point-of-sale or any of thousands of applications, Caere products can decrease paper handling and increase productivity.

So if you're looking for keyless, automatic data entry, you've spotted the solution. To see even more, just fill out and return the coupon below:

searching for additional uses through journals, user groups, and contacts with individuals. Libraries should send information on their microcomputer projects—including hardware and software used, a description of the application, and background on the library developing or using the application—to Ching-chih Chen, GSLIS, Simmons College, 300 The Fenway, Boston, MA 02115.

Details on MicroUse will be given in the premier issue of *Microcomputers for Information Management: An International Journal for Library and Information Services*. The journal, scheduled to debut in March, is edited by Chen and published by Ablex Publishers, 355 Chestnut St., Norwood, NJ 07648.

video

Video vocabulary. Addressable boxes, electron guns, image burn, crash editing, and spike suppressors are among the hundreds of technical terms defined by author Larry Langman in the *Video Encyclopedia*. The 179-page glossary also covers important people and developments in the history of television broadcasting, cable, and videocassette recorders. $19 from Garland Publishing Co., 136 Madison Ave., New York, NY 10016 (83-47602, 0-8240-9108-6).

Group process training. The University of Minnesota School of Public Health has developed a videotape series, "From Groping to Gripping With Groups," to teach communication theory and technique to members of decision-making groups. The 10 videotapes—available in VHS, Beta, or U-Matic formats—cover verbal and nonverbal skills, maintenance and task functions, and group development, and offer exercises for viewers to practice skills in these areas.

A 20-minute sampler videotape containing excerpts from the series is available for a free two-week preview from Biomedical Graphics/Field Services, B-192 Phillips-Wangensteen Bldg., 516 Delaware St., S.E., University of Minnesota, Minneapolis, MN 55455.

Video Production Guide, by Lon McQuillin, uses simple language to explain the techniques of television production. Four sections cover pre-production planning and budgeting; production, including directing techniques and the mechanics of filming; editing and other post-production areas; and distribution and other topics. The 382-page guide also includes a production checklist, a manufacturers directory, a glossary, and appendices on teleconferencing and instructional video. $28.95 from Howard W. Sams & Co., 4300 W. 62nd St., Indianapolis, IN 46268 (0-672-22053-9).

"Alternative Views" is a weekly public access cable program in Austin, Texas, covering public affairs topics neglected by the mainstream media. During its five-year run the series has featured interviews with such social change advocates as former U.S. Attorney General

Ramsey Clark, antinuclear activist Helen Caldicott, and peace activist Daniel Ellsberg, and has screened independently produced documentaries on a wide range of issues.

A catalog describing 200 hour-long programs, most available for purchase, and containing background and articles on the project, is available for $3.75 from Alternative Views, POB 7279, Austin, TX 78712.

VDT NEWS

VDT News is a bimonthly newsletter reporting on health and safety issues for video display terminal operators. Coverage will include ergonomic health problems such as eyestrain and back and neck arches, as well as concern over suspected radiation-induced cataracts and miscarriages. One-year subscriptions are $18 for individuals and $35 for institutions from VDT News, POB 1799, Grand Central Station, New York, NY 10163.

Cable-ready libraries. A partnership between libraries and the cable television industry is proposed in *Cable for Information Delivery: A Guide for Librarians, Educators, and Cable Professionals*. Editor Brigitte L. Kenney suggests that such an alliance can enable libraries to provide a wider variety of information to their communities, as well as supplying cable companies with subscribers and an important source of non-entertainment programming. The seven essays in the collection cover the technology of cable; regulatory, franchising, and copyright issues; the library's role in cable system planning; equipment needs; programming ideas; satellite-cable networks; the future of interactive information delivery; and other topics. Also included are a selected bibliography and a list of suppliers of cable TV programming. 172 p., $34.50 cloth (0-86729-056-0), $27.50 paper (0-86729-055-2) from Knowledge Industry Publications, 701 Westchester Ave., White Plains, NY 10604 (83-19892).

Local history video archive. The Onondaga County (N.Y.) Public Library has established a local history video archive with the cooperation of the Syracuse Press Club and area television stations. Each year the news directors of each station will select up to 60 minutes of stories with high community importance and deposit the videotapes in the local history collection housed at the central library. The videotapes will be available to historians, reporters, and other patrons for in-library reference use only.

IRA educational program. "Individual Retirement Accounts—The More You Know, The More You'll Make" is a 30-minute videocassette outlining the rules and regulations of IRAs. The principles of tax-free compounding are also explained through 12 interactive examples. The program is $19 to libraries and $21.95 to individuals, in VHS or Beta formats, from Educational Video, Inc., 31800 Plymouth Rd., Livonia, MI 48150.

networks

Interlibrary loan policies compiled. The *Interlibrary Loan Policies Directory*, 2nd ed., by Leslie R. Morris and Patsy Ruth Brautigam, contains ILL policies of 830 public, academic, and special libraries. Libraries were selected on the basis of collection size and average number of ILL transactions.

ILL policies for books, periodicals, microforms, government documents, dissertations and theses, audiovisual materials, and computer software are included in each entry. Entries also contain NUC and OCLC codes; ILL address and phone numbers; photocopying and microfilming services available; and fees. The second edition expands and updates Sarah K. Thomson's 1975 first edition, which is now out-of-print.

Approx. 432 p., $27.50 paper, from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-11897, 0-8389-0393-2).

New England law library consortium. Fourteen law libraries in New England have formed the New England Law Library Consortium. The network was organized to deal with rising costs of law materials, the legal information explosion, and the impact of automation on law libraries.

Among the members are the law libraries of Harvard, Boston, Northeastern, and Yale Universities, Boston College, the University of Maine, and the New England School of Law. Members have agreed not to charge other members for interlibrary loan or photocopying, and to allow faculty from one institution access to law collections of other consortium members. The group also will investigate cooperative acquisitions.

For more information, contact Jeanette Yackle, NELLC coordinator, Harvard Law School Library, Langdell Hall, Cambridge, MA 02138.

WEBNET to expand. The Western Pennsylvania Buhl Network (WEBNET), a resource sharing network for small academic libraries, will move from a demonstration mode to an operational mode with $64,875 in grants from the Buhl Foundation to the School of Library and Information Science at the University of Pittsburgh. K. Leon Montgomery, associate dean of the school, directs the WEBNET project.

The project began in 1975 and now includes online acquisitions, cataloging, interlibrary loan, and circulation subsystems, as well as an online catalog. Libraries of Carlow, Chatham, Point Park, and Westminster Colleges now participate in the network.

Kansas network priorities. The Kansas Interlibrary Loan Development Plan, a proposal for a coordinated acquisitions program in the state's libraries, is the top priority for 1984 of the Kansas Library Network Board. The board comprises the state librarian and representatives of the seven types of libraries in Kansas, the State Board of Regents, and the State Department of Education.

The board will also monitor performance of a new microcomputer-based interlibrary loan system slated to begin operation in 17 locations throughout the state early this year. Two task forces of the board are looking at possible improvements in the Kansas Information Circuit (KIC) and document delivery in the state.

Public/private sectors and networking. *Public/Private Sector Interactions: The Implications for Networking* is network planning paper no. 8 from the Library of Congress Network Advisory Committee (NAC). The publication contains results of a NAC program held last fall to consider a National Commission on Libraries and Information Science (NCLIS) report on public/private sector interaction in providing information services.

NAC recommends that NCLIS compile a list of projects that show successful public and private sector interaction, explain why the projects were successful, and develop guidelines for funding or promoting similar projects. NCLIS should also review its existing reports to identify projects that would encourage such interaction.

48 p., $5 from Library of Congress, Cataloging Distribution Service, Customer Services Section, Washington, DC 20541 (0-8444-0438-1).

Packet," a selection of outstanding promotional items to be sent to LPRC members nationwide.

Flyers, newsletters, posters, annual reports, brochures, and any other forms of publicity produced during 1983 will be judged for originality, visual impact, effectiveness, and clarity of message.

Five copies of each entry should be sent to Linda Cervalli-Cioffi, Packets Chair, LPRC, Jersey City Public Library, 472 Jersey Avenue, Jersey City, NJ 07302, by April 30. Entrants should hold 300 copies of each item in reserve in case the item is selected for inclusion in the packet.

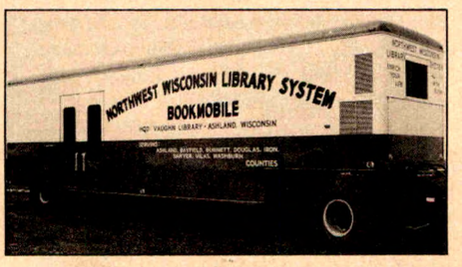
You're on the Air contains hundreds of ideas and suggestions for groups and individuals wanting to produce community public affairs radio programs. The 34-page guide is based on the experience of the Ventura County (Calif.) branch of the American Association of University Women in producing "Update," a biweekly program now in its 10th year. $6 from Pamela Lechtman, AAUW Special Projects, 668 Camino Rd., Thousand Oaks, CA 91360 (make checks out to AAUW Special Projects).

School library PR. *Practical PR for School Library Media Centers,* by Marian S. Edsall, is a handbook for planning public relations programs aimed at students, parents, faculty, administrators, school boards, and the general public. Among the ideas offered in the 178-page paperback are contests, fairs, and "read-ins"; cable TV programming; political involvement; bulletin boards and displays; news media contacts and press releases; flyers, orientation guides, and newsletters; and cooperative efforts with local public libraries. $17.95 from Neal-Schuman Publishers, 23 Cornelia St., New York, NY 10014 (83-4086, 0-918212-77-4).

special services

REFORMA changes subname. REFORMA, an affiliate of ALA, has changed its subname from "The National Association of Spanish-Speaking Librarians" to "The National Association to Promote Library Services to the Spanish-Speaking." The name change is aimed at expanding the organization's membership to include library trustees, support staff, and friends groups. To find out more about the association write REFORMA, POB 832, Anaheim, CA 92805-0832.

A braille computer terminal being tested in Croydon, Surrey, England enables blind library patrons to use Britain's Prestel videotex system. Brailtel, an adapted Brailink terminal manufactured by Clarke & Smith Industries, Ltd., retrieves news, weather, sports, and other current information and translates it into grade one Braille. The information available through Prestel is more up-to-date than that in Braille newspapers, and users can select exactly what they wish to read. Brailtel users can also contact other Prestel users through electronic mail, as



Bookmobiles that meet budgets

Constantly increasing land and construction costs and the squeeze of restricted budgets make it very difficult to maintain, let alone expand library services.

As a viable option to closing branches and reducing services, consider bookmobiles.

Then, consider GERSTENSLAGER BOOKMOBILES. We make them in all sizes. Custom designed from the chassis up. From mini-units to complete multi-media centers on wheels. Exactly the way you and your Gerstenslager sales engineer planned it.

If you're thinking bookmobiles, don't settle for someone else's assembly line, make-do unit. **Instead, write or call for free brochures** and examples of units we've built for other libraries.

Write: Gerstenslager, Dept. B, Wooster, OH 44691

The Wheels of Community Service for more than a Century.

well as performing limited shopping functions such as booking airline reservations.

Lector is a bimonthly review journal of Spanish language and bilingual materials suitable for purchase by libraries. Each issue features 80 to 100 reviews, with AACR2 cataloging for each item, plus articles, columns, and author interviews. One-year subscriptions are $20 for institutions and $15 for individuals from the California Spanish Language Data Base, POB 4273, Berkeley, CA 94704.

Large print largess

G.K. Hall has announced an annual $1,000 award to be given to the library or librarian demonstrating the most creative methods and comprehensive efforts to increase the awareness, availability, and use of large print books. The first Large Print Community Service Award, to be presented at ALA Conference in June, will be chosen by an independent panel of librarians with expertise in community service, outreach, and service to the elderly and visually impaired. The fiscal resources and other limitations of entrants will be taken into account in selecting a winner.

Applications, which must be submitted by April 15, are available from Large Print Community Service Award, c/o Jeffrey R. Wakefield, G.K. Hall & Co., 70 Lincoln St., Boston, MA 02111 (800-343-2806).

Bilingual education materials. Over 30,000 books and audiovisual materials for use in bilingual education and English as a Second Language programs, and to serve populations reading a second language, are listed in the first edition of *Bilingual Educational Publications in Print*. Textbooks and AV materials in 40 languages, as well as teachers' aids and professional materials, are entered in a Subject Index; a separate Young Peoples Reading Index lists children's fiction and nonfiction readers by subject. Author, title, and series indexes refer back to these two main listings. Introductory essays describe the problems surrounding bilingual education, and a directory of foreign book distributors is provided to help obtain the materials. 539 p., $45 from R.R. Bowker, POB 1807, Ann Arbor, MI 48106 (0-8352-1605-5).

Large print display for Apples. Visualtek, a manufacturer of electronic reading and writing aids for the visually impaired, has introduced a device to enlarge the displays of Apple II, II+, or IIe microcomputers up to 16 times their original size. The DP-10 Large Print Display Processor provides high-contrast letters up to 5½ inches high with either a black-on-white or white-on-black display. For more information write Visualtek, 1610 26th St., Santa Monica, CA 90404.

info briefs

Online searchers directory. The *Online Search Services Directory* lists libraries, private information firms, and other organizations in the U.S. and Canada that conduct online database searches for outside users. Six indexes give access to the entries by the name of the organization, online systems accessed, databases searched, subject areas searched, names of search personnel, and geographic location. Other information in the entries includes the fee policy, service availability, and the year the service was established.

Part one of the directory is now available; the second part is scheduled for publication in August. A subscription to both issues is $75 from Gale Research Co., Book Tower, Detroit, MI 48226 (0-8103-1698-6).

Balance of world information trade. A new firm charts the import-export figures for the information sector of several national economies. Reports covering 1978–81 are available for seven nations—and guess who had the only surplus in trade of information goods for 1981? Japan, to the tune of $25 billion. The United States had a $4.6 billion deficit.

Each report, charting more than 400 information goods in over 40 product groups, costs $30 prepaid. Countries charted to date are the U.S., Japan, Venezuela, Colombia, Brazil, and (one report) Bolivia-Ecuador. In preparation is a 1983 update for the U.S. Order from The Information Economy, Inc., POB 8099, Silver Spring, MD 20907. For inquiries, write Robert A. Vitro at that address.

The Challenge of Information Technology publishes papers from the 41st Congress of the Fédération Internationale de Documentation, held in Hong Kong in September 1982. More than 40 essays address such topics as new technology and developing countries, standardization for documentation and library works,

Yes, we have a less expensive way to access information. We charge for connect time only.

At VU/TEXT we're aware of how searching costs can add up. So we charge you for connect time only. No search unit charges. No telecommunications charges. No additional charge for 1200 baud. And, in most cases, no display or print costs.

And that goes for such full-text databases as The Washington Post, The Philadelphia Inquirer, The Wall Street Transcript, and more.

For complete information write or call nationwide 800-258-8080. In PA 215-854-8297.

societal implications of computerized information systems, the consultant as information intermediary, and the future of secondary services. 356 p., $51 from Elsevier Science Publishing Co., 52 Vanderbilt Ave., New York, NY 10017 (83-4217, 0-444-86646-9).

Information Access expands indexes. Information Access Company has announced the addition of a total of 66 new publications to three of its microform indexes.

Business Index will add 34 new titles in fields ranging from automation to banking, bringing its coverage to 810 magazines, journals, and newspapers. Indexing will begin with the October 1983 issues.

At the recommendation of the American Association of Law Libraries, 30 publications will be added to the *Legal Resource Index*, beginning with their January 1984 issues. The index, also available online through DIALOG, will now include over 750 titles.

The *National Newspaper Index* will offer full indexing of the *Los Angeles Times* as of October 1982 and the *Washington Post* as of September 1982, in addition to its full coverage of the *New York Times, Wall Street Journal,* and *Christian Science Monitor*.

For information on these and other Information Access publications, contact the firm at 404 6th Ave., Menlo Park, CA 94025.

Comfortable, full page viewing all day long...for years!

Dukane MDP Manual Microfilm Reader

It's easy to see why the MDP is the preferred reader for 35mm roll film, 16mm film and aperture cards.

A gently slanted screen assures comfortable viewing even over long stretches of time. Operating instructions are up front, in plain view. Loading is a snap. And you'll appreciate the MDP optical system. Choose our Zoom 13-23x or 18x lens. Both present images that are precise...crisp...crystal clear. High resolution from corner to corner allows you to view full pages as if you were reading the original.

Dukane's MDP...it's your best value for operating ease and reliability— any way you view it.

resources

The rights stuff. Bantam Books has issued three new titles in its American Civil Liberties Union Handbook Series. *The Rights of Authors and Artists,* by Kenneth P. Norwick and Jerry Simon Chasen, provides information for creators on copyright law, contracts, libel, obscenity, business and tax matters, and other concerns. *The Rights of Employees,* by Wayne N. Outten with Noah A. Kinigstein, is a guide to laws protecting employees during the hiring process, on the job, and after layoff, firing, or retirement. *The Rights of Teachers,* by David Rubin with Steven Greenhouse, covers academic freedom, protection of out-of-classroom activities, the right to strike, and other issues. Each mass market paperback is $3.95 from Bantam Books, 666 5th Avenue, New York, NY 10103.

Sources of Library Statistics, *1972–1982: A Guide* describes sources of national library statistics on academic, public, school, and special libraries, and state library agencies and other groups supporting library service. Compiler Mary Jo Lynch, director of ALA's Office for Research, also includes sources of statistics on library buildings, costs, salaries, library education, and other topics, plus a bibliography of recent articles and reports on descriptive library statistics. Approx. 56 p., paper, $7.95 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-25835, 0-8389-3292-4).

Challenge of the small presses. The *COSMEP Catalog* describes over 500 books and periodicals from more than 150 independent publishers. Published by COSMEP, the national trade association of small presses, the 200-page paperback showcases works of fiction, poetry, and nonfiction in areas ranging from computers to needlework. In his introduction, Bill Katz says the catalog "represents a good view of the existing panorama of the small press and little magazine" and calls it "a remarkably fresh, bitingly critical and imaginative challenge to the conglomerate." Includes author and title indexes. $7.95 from Dustbooks, POB 100, Paradise, CA 95969 or directly from COSMEP, c/o JP Publications, 2952 Grinnel, Davis, CA 95616 (83-072412, 0-9611378-0-0).

Depository awareness campaign. The U.S. Government Printing Office has launched a national campaign to increase public awareness and use of depository libraries. The GPO has prepared public service announcements for television, radio, and print media showing the types of information available in federal publications.

Information on the Depository Library Program has been sent to over 62,000 libraries to help answer patrons' questions prompted by the publicity campaign's "Contact your local library" tagline. In addition, libraries can order free brochures, bookmarks, posters, and a list of depository libraries for distribution to patrons.

Other promotional tools under consideration include a newsletter, bumper stickers, and book covers.

For more information on the campaign or on obtaining the free promotional materials write Mary Lee O'Brien, U.S. Government Printing Office, Marketing Dept., Stop MK, Washington, DC 20401.

Scene from a television spot publicizing the Federal Depository Library Program.

Sexuality in World Cinema, by film historian James L. Limbacher, describes the sexual content of over 13,000 films released between 1896 and 1982. The first part of the massive, 1,535-page work lists films dealing with adultery, homosexuality, prostitution, and 23 other sexual categories. The major portion of the book is devoted to an alphabetical filmography, including brief descriptions of each film and indicating the sexual categories into which they fall. The two-volume set also contains a glossary of 1,200 sexual terms, a glossary of film terms, a bibliography, and notes on censorship, pornography, and obscenity. $72.50 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-3019, 0-8108-1609-1).

Government scientific resources. Claiming that a gap exists between guides to federal documents and guides to scientific information, Rao Aluri and Judith Schiek Robinson have put together *A Guide to U.S. Government Scientific and Technical Resources*. The authors list federal sources of information on grants, awards, fellowships, and scholarships; research in progress; technical reports; patents; scientific translations; standards and specifications; and audiovisual materials. Other chapters describe periodicals, indexes and abstracts, databases, information analysis centers, and reference sources. 259 p., $23.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-14991, 0-87287-377-3).

bibliography

Career planning bibliography. *Where to Start* is an annotated bibliography describing nearly 1,500 career-related titles used at Cornell University's Career Planning Library. Compiled by Madeline T. Rockcastle, the library's coordinator, the guide lists resources in 20 career fields, from biological sciences to travel and hospitality, as well as identifying aids in such areas as education, financial aid, job hunting, women and minorities, overseas employment, and summer and short-term employment. Appendices list audiovisual and computerized resources, periodicals containing job listings, and other materials. 206 p., paper, $11.95 plus $2 shipping from Peterson's Guides, POB 2123, Princeton, NJ 08540.

Healthy . . . *Staying Healthy: A Bibliography of Health Promotion Materials* lists hundreds of health education items, most available free from agencies of the U.S. Department of Health and Human Services. Lots of good vertical file material is included in this free 47-page booklet, which describes pamphlets, books, films, and posters for the general public as well as program guidelines, directories, and technical papers for health professionals. For a copy send a mailing label to the National Health Information Clearinghouse. Dept. AL, POB 1133, Washington, DC 20013-1133.

. . . wealthy . . . Each year the staff of the Brooklyn Public Library's Business Library updates its *Investment Bibliography*, an annotated guide to handbooks, periodicals, reference books, investment services, and other resources for the experienced investor and the novice alike. Published by the New York Stock Exchange, free single copies of the latest edition of the 17-page brochure are available by sending a self-addressed, stamped, number 10 envelope to Public Information, Brooklyn Public Library, Grand Army Plaza, Brooklyn, NY 11238.

. . . and wise. The philosophy of science is a branch of philosophy dealing with the conceptual content, various methodologies, and cultural implications of science. Richard Blackwell's *Bibliography of the Philosophy of Science, 1945–1981* lists scholarly writings in the discipline published since World War II. Among the areas covered in the 585-page volume are the empirical basis of science, models of explanation and prediction, the structure of theory, the dependence of observation upon theory, and the rationality and objectivity of science. $75 from Greenwood Press, POB 5007, Westport, CT 06881 (83-5671, 0-313-23124-9).

Nuclear bibliographies. *Nuclear America: A Historical Bibliography* abstracts 824 articles published in history and social science journals from 1973 through 1982 on nuclear weapons and nuclear power. The abstracts are organized into five chapters on the development of the Hiroshima and Nagasaki bombs, the U.S. development of nuclear weapons after 1945, the nuclear arms race and Cold War, attempts at nuclear arms control, and nuclear reactors and public reaction. An extensive subject index and an author index are also included. 183 p., $25.50 from ABC-Clio, Riviera Campus, 2040 A.P.S., POB 4397, Santa Barbara, CA 93103 (83-12227, 0-87436-360-8).

Three Mile Island Sourcebook, by Philip Starr and William Pearman, covers the nation's worst commercial nuclear power plant accident in three sections: a chronology of selected news coverage of the plant from its inception in 1966 through the second anniversary of the accident in March 1981, describing articles from the *New York Times*, *Newsweek*, and three local newspapers; annotations of state and federal government documents pertaining to the plant; and a list of books, professional papers, and articles about the plant. The 411-page guide also includes a listing of pro- and anti-nuclear groups in the Three Mile Island area; a glossary of nuclear power terms; and author and subject indexes. $48 from Garland Publishing Co., 136 Madison Ave., New York, NY 10016 (82-49180, 0-8240-9184-1). □

Joyce N. Davis

Mary Ann Griffin

Alex Boyd

At Chicago (Ill.) Public Library, **Alex Boyd** is now an assistant commissioner and **James H. Lowry** is the newly elected president of the Board of Directors. . . . Two ALA members recently joined the staff of the Edmon Low Library at Oklahoma State University, Stillwater: **Joyce N. Davis** as assistant director for automated systems and technical services and **Kevin Elizabeth Kennedy** as assistant physical sciences librarian and instructor. . . . **Mary Ann Griffin** is now director of the Falvey Memorial Library at Villanova (Pa.) University. . . . **Marcia Miller**, former instructor in library education at Alabama State University Library, Montgomery, is now head of administrative services at Hammond (Ind.) Public Library.

Peter G. Sullivan is now director of the Citizens Library in Washington, Pa. He succeeds another ALA member, **Louise H. Stuart**, who retired Jan. 1. . . . At Cleveland (Ohio) Public Library ALA member **Norman D. Holman** is now head of community services. . . . Two ALA members were honored at the recent Nebraska Library Association conference. **Ella Jane Bailey**, technical services librarian at the University of Nebraska at Omaha Library, received the Distinguished Service award of NLA's College and University Section; and **Connie Champlin**, coordinator of computer education at Omaha Public Schools, became the first recipient of the Mad Hatter Youth Services award, presented by the association's School, Children's, and Young People's Section. . . . ALA member **James B. Nelson**, former director of Cabell County Public Library in Huntington, W. Va., recently became director of the Jacksonville (Fla.) Public Library System. He succeeded another ALA member, **Harry Brinton**, who recently retired after 23 years of service. . . . **Jacki Schenck**, former library consultant at the New Mexico State Library, Santa Fe, is now corrections librarian for the San Joaquin Valley Library System in Fresno, Calif. . . . Dec. 5 ALA member **Clara E. Breed** became the first city librarian since 1916 to be named Librarian Emeritus of the San Diego (Calif.) Public Library. . . . In January **Stella Kennan** became secretary general of the Federation Internationale de Documentation (FID), headquartered in The Hague, Netherlands. . . . ALA member **Joseph M. Dagnese**, director of libraries at Purdue University, West Lafayette, Ind., is 1984 president-elect of the Universal Serials & Book Exchange, Inc., headquartered in Washington, D.C. . . . **Chris R. Ikehara** is now manager, information resources, for the Special Libraries Association, New York, N.Y. . . . ALA member **Joan Rapp**, former head of the Access Services Department at Temple University, Philadelphia, Pa., is now assistant university librarian for circulation and automation services at San Diego (Calif.) State University Library. . . . From SUNY comes word that **Marcia Zubrow** and **Susan P. Besemer** are recipients of its Chancellor's Award for Excellence in Librarianship. Zubrow is head of reference, Charles B. Sears Law Library, at SUNY/Buffalo; Besemer, formerly media librarian in the E. H. Butler Library of the State University College at Buffalo, is now Butler's associate director. Other recent SUC/Buffalo library appointments are: ALA member **Mary Karen Delmont** as assistant to the director; **Jerome Earley** as coordinator of learning systems; and **Marilyn Kihl** as curriculum lab librarian. . . . At Syracuse (N.Y.) University Libraries **Wendy Bousfield** is now English and American language and literature/linguistics bibliographer; **Eileen Emerson** is personnel librarian; and ALA member **Barbara Uchtorff** is assistant circulation librarian. . . . March 30 ALA member **John Oliver** will retire as director of the Flint (Mich.) Public Library. . . . **Dena Janson**, cataloger at the James P. Adams Library of Rhode Island College, Providence, has exchanged posts for seven months with **Philip O'Donohue** of Preston Polytechnic Institute in Preston, Lancashire, England. . . . Recent appointments at the University of Missouri–Columbia Libraries are **Marsha Stevenson** as director of Circulation and Interlibrary Loan Services and **John Drew Racine** as assistant director for technical services. Both are ALA members. . . . ALA members **Hazel Furman** and **John Miniter** have announced their plans to retire this year from the faculty of the School of Library Science at Texas Woman's University, Denton. . . . **Barbara Turman** recently became head reference librarian at Brown University Library in Providence, R.I. An ALA member, she last served as head librarian, Documents Collection, at the General Libraries System of the University of Texas at Austin. . . . ALA member **Linda M. Olson** is now library automation specialist at the University of Wisconsin–Eau Claire. Olson is currently chair of the Wisconsin Association of Academic Librarians. . . . The Pennsylvania Library Association recently presented its New Librarian Honor's award to ALA member **Roberta Greene**, youth and public information specialist for the York (Pa.) County Library System.

Deaths

Jane Pulis, librarian for Germanic collections at University of California/Berkeley, died Nov. 20. She was coauthor of *Index to Festschriften in Librarianship, 1967–1975*, and was the author of several other publications. . . . **Eleanor M. Portteus**, retired director of school libraries for Cleveland Public Schools and assistant professor at Kent (Ohio) State University, died Nov. 4. She was named 1972 Librarian of the Year by the Ohio Library Association. Memorial contributions are being accepted by KSU's Friends of the Library group. . . . **Gordon L. Bennett**, 75, Colorado state librarian from 1943 to 1970, died Dec. 20. . . . **Robert A. Jones**, 57, founder of the Catalog Card Corporation and the first vendor to produce catalog cards by computer, died Dec. 21. . . . **Edith Scott**, chief of the Cataloging Instruction Office at the Library of Congress, died Nov. 2. . . . **Charles E. Sims, Sr.**, Kansas state librarian from 1973 to 1975, died last August. . . . **Elizabeth Krendel**, children's librarian at the Jordan-Bank/Hopewell School in Oxford, Pa., since 1972, died Nov. 6. The children's library at the school will be renamed in her memory. . . . **Bruce K. Schmidt**, city librarian at the Southfield (Mich.) Public Library since 1972, died Dec. 10. A memorial fund has been established at the library system for a special collection of Shakespearean materials. □

PLAIN AND SIMPLE

Our physical size and financial strength—necessary to make and honor commitments—indicate the successful working relationships we have with thousands of libraries worldwide.

But the plain truth is, simply, that it is our sensitivity to your unique requirements, and our flexibility in providing an exhaustive and relentless effort for total customer service that is our real strength.

We want to work with you—to help you provide exceptional patron service, which is your strength.

We can help. Write today—

World Book is the most frequently used encyclopedia in print, according to librarians. In fact, according to two independent surveys* reported in the *Encyclopedia Buying Guide,* librarians throughout the U.S. and Canada chose *World Book* over 34 other references as the one that's most frequently used, easiest to use, and easiest to understand.

World Book's popularity isn't the result of just ease of use. The *Guide* awarded *World Book* excellent ratings in nine categories: scope, authority, reliability, recency, objectivity, clarity, accessibility, graphics, and physical format. The closest competitors scored excellent ratings in only six, four and one categories, respectively.

What the ratings don't explain is how *World Book* appeals to children, high school and college students, and adults as well. It's no accident. Articles in *World Book* are written *at the language level of the people most likely to read them.* No matter how difficult the subject matter, *World Book* makes it **understandable.** Selected articles provide readers with quick overviews called "Facts in Brief." And *World Book* brings information to life with more than 29,000 photographs and illustrations.

"*World Book* is, page for page, the best encyclopedia on the market today," reports the *Guide.* "*World Book* is far and away the first choice of professionals who deal with knowledge and information day in and day out."

What's the busiest reference in your library?

Doesn't it make sense to have a *current* set on your shelves right now?

American Firms Importing from the People's Republic of China. 2nd ed. Updated directory provides names and addresses of some 2400 U.S. firms engaged in importing from China. The work also includes a Product Index listing over 450 categories of products and the firms that import them as well as a Countertrade Index giving the names of firms who have participated in or are interested in participating in countertrade arrangements with China. $85.00. **(SO)**

China's Provinces: An Organizational and Statistical Guide. 1st ed. This guide covers each of China's 29 provinces in great detail, providing information useful to the potential importer or exporter. Each province is covered in a separate chapter that includes a background survey, administrative details, and hundreds of statistics. Over 50,000 entries cover major organizations, Chinese officials, local government agencies, foreign trade corporations, industrial corporations, local banking and insurance agents, and much more. $235.00. **(SO)**

Computer Publishers and Publications 1984. New sourcebook provides detailed information on publishers of computer books and periodicals, recommended titles for core collections and bookstores, industry trends and statistics, and computer manufacturers as publishers. $90.00. **(SO)**

Custom House Guide 1984. Updated annually, this guide provides current information on principal U.S. Customs ports of entry, import commodities, tariff schedules, and U.S. Customs regulations. Also includes the complete text of the Tariff Schedules of the U.S. and an index of over 30,000 commodities and goods listed in the schedules. $259.00. **(SO)**

Education-for-Health: The Selective Guide. 5th ed. Presents expert evaluations for more than 2100 audiovisuals and publications. Arranged in nine subject sections for convenient browsing, entries include full title and descriptive information, summary of content, evaluation of strengths and weaknesses, and suggestions for use. $90.00. **(SO)**

Encyclopedia of Jewish Institutions in the United States and Canada. 1st ed. Directory of 4150 Jewish institutions including national organizations, synagogues, congregations, community centers, yeshivas, colleges, museums, libraries, and more. Entries include full name, address, and telephone number of each institution as well as information about membership, employees, facilities, affiliations, programs, current officers, and more. $55.00. **(SO)**

European Marketing Data and Statistics 1984. Presents the results of continuous analysis of available statistics on 26 European countries. Some 300 tables furnish at-a-glance comparisons between the countries. Fifteen sections cover broad areas such as population, employment, trade, standard of living, consumer expenditure, and more. $225.00. **(SO)**

Guide to Current National Bibliographies in the Third World. 1st ed. Describes 80 national bibliographies that are not generally known for 60 developing countries. Also covered are 10 regional bibliographies for six regions. Each entry consists of four main sections: bibliographical citation, background and history, description of scope and contents, critical analysis. The introductory chapter stands alone as a valuable survey of national bibliographical control. $42.00. **(SO)**

International Foundation Directory. 3rd ed. Emphasizes foundations, trusts, and other non-profit institutions that operate on an international basis. Covering over 700 institutions in 45 countries, entries typically provide full name and address, founding date, brief history and description of activities, financial data (if available), names of officers, publications, and other details. $78.00. **(SO)**

International Marketing Data and Statistics 1984. Provides comparative statistical data on 100 countries located in Asia, Africa, Australasia, and the Americas. Some 300 tables arranged in topical sections cover such areas of interest as population, employment, production, trade, consumption, standard of living, economy, and more. $225.00. **(SO)**

Middle East and North Africa 1983-84. Provides up-to-date information on social and political aspects of each country in the region, and covers topics of regional significance. $120.00. **(SO)**

Official Export Guide 1984. Provides essential information for American exporters on principal ports of the world, export commodities, Export Administration Regulations, and government forms. For each port, the work provides details about its Customs offices, port authorities, chambers of commerce, and more. Fully reproduced and indexed are the entire Export Administration Regulations governing the operations of exporters. Also included are numerous sample forms, with instructions for filling them out. $259.00. **(SO)**

Publishers Practical Dictionary. 3rd ed. Facilitating international contact among publishers, this dictionary provides equivalents in 20 languages of about 1000 terms used in publishing, printing, and bookselling. The first section is arranged alphabetically by the English, with equivalent terms supplied for the 19 other languages. The second section comprises 19 individual language indexes. $75.00. **(SO)**

Statistics—Asia and Australasia. 2nd ed. Covers a broad range of statistical sources. Some 2800 numbered entries cover "live" and print sources of economic, social, and market research statistics for all countries of Asia (except the USSR and Turkey), adjacent islands, and Austria. $175.00. **(SO)**

Tests: A Comprehensive Reference. 1st ed. Over 3000 tests used in psychology, education, and business are described and evaluated. Entries are grouped in 62 subcategories under three main classifications: Psychology, Education, and Business. Entries include information on the test's purpose, description, relevant cost and availability, appropriate level, whether or not self-administered and a basis for evaluation. $75.00. **(SO)**

Video Source Book. 5th ed. Provides details on over 35,000 video titles available on tape and/or disc. Access is facilitated by a detailed Subject Index containing 403 subject categories. Entries furnish up to 18 points of information about each title including availability, running time, audience rating, etc. $125.00. **(SO)**

World Guide to Special Libraries. 1st ed. Compact, subject-oriented sourcebook provides details on some 32,000 special libraries located in nearly 160 countries of the world. Entries are arranged under five major categories: General, Humanities, Social Sciences, Medicine and Life Sciences, and Science and Technology. The work is completed by a Subject Index of over 270 subject headings. $120.00. **(SO)**

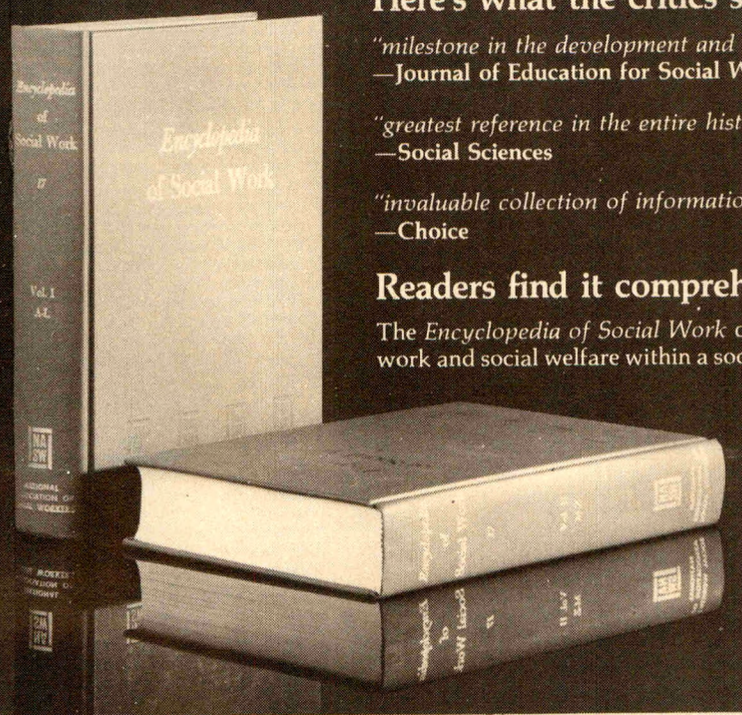
In all professional collections, one reference work stands out . . .

The ENCYCLOPEDIA OF SOCIAL WORK, 17th edition

John Turner, Editor-in-Chief

The 17th Edition of the *ENCYCLOPEDIA OF SOCIAL WORK* is the paramount reference for knowledge in social work and social welfare.



Here's what the critics said:

"milestone in the development and presentation of social work literature."
—**Journal of Education for Social Work**

"greatest reference in the entire history of social work literature."
—**Social Sciences**

"invaluable collection of information"
—**Choice**

Readers find it comprehensive and easy to use.

The *Encyclopedia of Social Work* covers the entire range of activities in social work and social welfare within a social and economic context. The two-volume, cloth-covered set contains topical and context articles, biographies, statistical tables, and a comprehensive index. Extensive bibliographies and cross-references enhance its ease of use. Each set is shipped with a 52-page 1980 supplement that updates the statistical tables.

Price: $48 plus $4.80 postage and handling **ISBN:** 0-87101-074-7

1983-84 Supplement Included in Price

This 274 page supplement updates areas that have seen change and provides information on new topics not covered in the 17th Edition. The supplement, which includes 22 articles and 112 statistical tables, may be purchased separately for $14.95 plus $1.50 postage and handling.

☐ Please send me _____ sets of the *Encyclopedia of Social Work, 17th Edition* at $52.80 (including postage and handling) per set.

☐ Please send me _____ copy(ies) of the *1983-84 Supplement to the Encyclopedia of Social Work, 17th Edition* at $16.45 per copy (including postage and handling).

☐ Enclosed is $_____. Prepayment is required on all orders under $25.

New Reference Titles from The Oryx Press

Women in Particular: An Index to American Women

Kali Herman
To help locate reference works containing biographical information about prominent United States women, this comprehensive resource provides indexes listing these women by occupation, religious affiliation, state, and ethnic background; also included is a listing for disabled women. These indexes identify sources of information for each woman listed. The book also contains an alphabetical index. A handy starting point for research in women's studies, history, genealogy, and other fields.
1984 / 448 pages / 8½ × 11 / Clothbound / ISBN 0-89774-088-2 / $74.50

Audiovisual Resources in Food and Nutrition Volume 2

National Agricultural Library
An annotated index, this volume lists all audiovisual materials compiled by the USDA's Food and Nutrition Information Center from 1979 through 1983. All media are included in this comprehensive listing and reference is provided in 5 indexes by author, title, media type, subject, and audience level.
1984 / 384 pages / 8½ × 11 / Paperbound / ISBN 0-89774-105-6 / $38.50

Directory of Food and Nutrition Information Services and Resources

Robyn Frank
Compiled to aid food and nutrition researchers, educators, and the librarians who serve them, this guide lists specialized information services, resources, and databases provided by a wide variety of organizations in food and human nutrition. Fully indexed by subject, type of organization, location, and approved American Dietetic Association training experiences.
1984 / 256 pages / 8½ × 11 / Paperbound / ISBN 0-89774-078-5 / $55.00

Parents as Sexuality Educators: An Annotated Print and Audiovisual Bibliography for Professionals and Parents (1970-1984)

Susan Untener Snyder and Sol Gordon
This descriptive guide is designed to help professionals and parents locate the widest possible selection of materials to use in discussing human sexuality with children. Descriptive annotations offer a guide to readability, accuracy, and type of treatment found in the material.
1984 / 168 pages / 8½ × 11 / Clothbound / ISBN 0-89774-087-4 / $29.50

Salt, Evaporites, and Brines: An Annotated Bibliography

Vivian S. Hall and Mary R. Spencer
An aid to geologists, chemists, other researchers, and librarians is available in this new volume, which provides easy access to materials on evaporites, brines, and salt. Fully indexed by subject and geographic location.
1984 / 224 pages / 8½ × 11 / Clothbound / ISBN 0-89774-042-4 / $74.50

editors' page one:

Retrieving library $$ from orbit

WHEN THE SPACE SHUTTLE CHALLENGER RE-trieved the malfunctioning, $235 million Solar Maximum Mission satellite at a cost of about $50 million, it seemed a reasonably good use of public funds as well as an act of heroism.

Less well known is another retrieval mission involving millions of federal dollars launched into library space in the late seventies. This mission, also, is costing the taxpayers plenty; but it isn't quite clear who benefits.

Under U.S. Office of Management and Budget guidelines, many federally funded programs administered by the states are being checked for fraud, waste, and abuse. Among the programs being audited by the Dept. of Education is the Library Services and Construction Act. The latest audit to surface concerns the Illinois State Library and more than $6 million in past grants. At least three other states have come under similar audits of LSCA management. Lois Pearson's account of recent developments appears in this month's news section.

No one wants fraud, waste, or abuse of public funds; and, happily, the audits have demonstrated nothing of the sort in the library programs. LSCA funds are being spent on libraries, and to the benefit of library users. Let no citizen or legislator think otherwise.

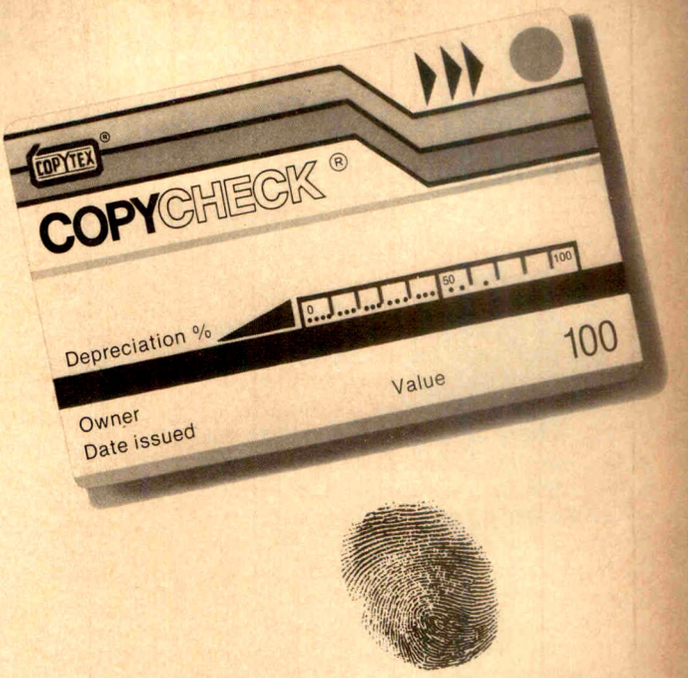
The questions coming up in the audits concern adherence to the letter of the LSCA regulations. Were funds earmarked for one title spent on another? Was a definition of public library stretched too far? Was the money spent within the allowable time? Were the proper accounting procedures employed at grantee level?

So far, the truth seems to be that in some cases yes, the library agencies were within bounds; but in others, they were lax, or confused, and will shape up in the future.

In the Challenger's mission, retrieval was carried out by right-stuff astronauts and ground crews while the world cheered. In the LSCA retrieval program, it is done by federal auditors who must sometimes camp for months in the offices of the state library agency to sift through the records. Is it one of those dirty, rotten jobs that somebody has to do? Maybe; but federal auditors are well paid, which is why an audit of a million-dollar program can cost a small fortune in itself. The dirty, rotten part really falls to the library agency people, who have to spend full time on the audit and full time on their ongoing projects.

Chances are that the present audits will be negotiated in long appeal processes and will not result in catastrophic penalties for the states. The worst that might happen is that audit-phobic grant administrators shy from innovative programs that might stretch the letter of the regulations.

We can be satisfied at least that the LSCA program is not malfunctioning. With careful piloting as well as sufficient thrust, we can keep this "Library Maximum Mission" vehicle in orbit. —*Art Plotnik*



NO TWO ARE ALIKE.

Finally, security with a guarantee.

The new Copytex debit card copier control system offers absolute security. The Copytex system uses a revolutionary technique which makes CopyCheck cards the only debit cards impossible to duplicate or counterfeit. Each user card is inspected for its individual microstructure, which is as unique as any fingerprint. If the card's microstructure does not match what is encoded on its mag stripe, the card is rejected. Security is guaranteed.

One system above the rest.

No two debit card systems are alike, either. Copytex offers several outstanding advantages in addition to total security. Unique accounts can be assigned to individuals or departments. Troublesome key counters are replaced with convenient account cards, thus eliminating unauthorized copying. An optional printer is also available for analysis of copier use and system performance. **Plus, each card has a visual indicator of its current value.** No surprises and no more arguments over credits. Get the unduplicatable original...get Copytex and get the benefits and total support from Infortext Systems, Inc., the recognized leader in copier control systems.

in the news

U.S. audit asks return of millions in LSCA grants

"U.S. seeks fortune from state library," the *Chicago Tribune* headlined March 25. The federal Department of Education wanted Illinois to refund $6.9 million of the $10.5 million it received during a two-and-a-half year period under the Library Services and Construction Act, the story reported.

Bridget Lamont, who has directed the State Library of Illinois since last July, told the *Trib*, "I'm optimistic that we will be able to resolve the problems, because I believe that we used the money appropriately." She explained to *AL*, "There's a philosophical disagreement about how the money was spent. The Inspector General's audit questions expenditures we felt were valid."

In 1981, IG auditors in Illinois spent nine months evaluating the use of LSCA program funds from July 1, 1977, through Dec. 31, 1980. In addition to their work at the state library, they made site visits to the Rolling Prairie Library System in Decatur, the Chicago Public Library System, the Illinois Valley Library System in Pekin, and the Kaskasia Library System in Smithton.

In the 24-page IG audit report dated Sept. 12, 1983, the auditors recommended that the state library refund $2.5 million used for library systems development they considered ineligible under LSCA Title I, Library Services, and $3.6 million spent on other projects they questioned. They also asked the Illinois library to refund $91,184 used on a salary equalization program which had not been included in the plan approved by the Education Department program office, the Center for Libraries and Education Improvement (CLEI).

The auditors also charged that some LSCA funds advanced by the state were not spent during the required two-year period but deposited for later use. The IG found that the state library failed to maintain adequate administrative control and accountability in compliance with federal regulations.

Illinois responds

"Illinois is an aggressive library state," Lamont told *AL*. "We are meeting the needs of Illinois citizens and the people at the Department of Education know it."

The Illinois State Library had never before been audited by the department. It contended that since its reports had been accepted and additional grants approved, it was acting in compliance with regulations. The library has been working on changes suggested during the audit process and recently launched a new grants management program approved by CLEI, Lamont said.

The state library sent a response with additional documents to the Inspector General in October. According to Robert Gwin, an IG auditor, the office is now reviewing the information for presentation to Assistant Secretary of Education Donald Senese, who will issue a letter of determination.

The assistant secretary's decision can be appealed to the department appeals board, which functions as a court. For more than a year, the state libraries of Hawaii and Indiana have been waiting for the appeals board to rule on their smaller but similar audits. If a state disputes the board's ruling, it can appeal to a circuit court.

With Congress now considering a reauthorization of LSCA, the library community expressed concern that the audits might make it appear the program funds have been misspent. Florida State Librarian Barratt Wilkins recently studied the audit reports of the three states and found no indication of fraud, waste, or abuse. States differ in their interpretations of the regulations, Wilkins said, but all the LSCA money goes to library programs.

At the April 9 meeting of the Chief Officers of State Library Agencies (COSLA), the group accepted Wilkins' report that the audits suggested no further revisions of the LSCA. COSLA resolved to "continue to work with the Department of Education in monitoring federal library aid programs which are based on state needs and state priorities."

Fraud charges threaten future of women's library

At the 1972 ALA Annual Conference in Chicago, Membership unanimously commended the unique and significant contribution made to the library community by the Women's History Research Center of Berkeley, Calif.

The international archives of women's studies materials is a personal collection begun by Laura X in 1968; microform copies of its data can now be found in 300 libraries in 13 countries. Laura X added a new project in 1979, the National Clearinghouse on Marital Rape.

Throughout the years, Laura X has collected the information in her own home, operating on a shoestring with the help of thousands of women and men who donated materials and time. Since grants to the tax-exempt foundation dried up in 1974, she has depended on contributions, sales of its microfilms, and the federal work-study program. Under that program, the University of California/Berkeley paid student employees and billed the center for half their salaries.

Last August the university ceased referring work-study applicants to the center and began investigating its finances. Earlier a student had reported peculiar pay practices and the university asked him to bring in cancelled checks and time sheets as evidence. University police seized records dating back to 1981.

After consultation with the Alameda County district attorney, campus police arrested Laura X; Colin Smith, a former work-study employee; and Ann Zane, secretary, on March 19. They were released on bail of $72,000, $27,000, and $12,000 respectively.

Two days later they were formally arraigned in municipal court on criminal charges of conspiracy, forgery, and grand theft by means of fraud. The work-study employees allegedly padded their time sheets and gave Laura X money to help pay the center's work-study bill for their salaries. The students also said they paid her money in advance so that she could pay them for working in a later quarter.

Laura X, Smith, and Zane pleaded not guilty, and Penny Cooper, their attorney, filed a demurer, claiming no cause for action. Historians, librarians, and others were writing Cooper in support of Laura X. At U. Cal/Berkeley, Library Education Officer Anne Lipow was working with faculty colleagues to urge mediation so that Laura X does not go on trial or to jail. "Whatever she is alleged to have done, it would have had to be not for herself but for the collection," Lipow told *AL* in April.

For information about the Laura X defense fund, write Penny Cooper, 2134 Allston Way, Berkeley, CA 94704.

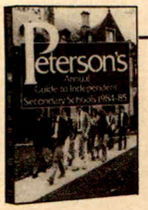
OCLC copyright claim registered

More than 120 OCLC member libraries complained to Register of Copyrights David Ladd after OCLC applied to register a claim to the entire bibliographic database late in 1982. The member libraries and the regional networks questioned OCLC ownership of the cooperative venture.

At Ladd's suggestion, OCLC limited its claim to the compilation of the online database, and in mid-March the claim was registered. The action means that OCLC, like any copyright registrant, now has a legal basis to initiate litigation against a commercial vendor who infringes on the copyright.

More than a dozen OCLC member libraries, including the universities of Missouri, Minnesota, and Johns Hopkins, recently filed claims for the records they entered into the database. The libraries believe that OCLC has changed the relationships between the utility, its 3,000 members, and the regional networks.

Authoritative new education & career reference books from Peterson's Guides!



Just published!

Peterson's Annual Guides

Guide to Independent Secondary Schools 1984–85

Editor: Rebecca A. Shepherd

Contains up-to-date information submitted by administrators at more than 1,200 college-preparatory schools in the United States and abroad. Covers accredited and state-approved day schools, boarding schools, and schools serving students with special needs. Detailed descriptions give information about academic programs, facilities, student life, costs, financial aid, and more! Paperback. 8½" x 11", about 1,050 pages.
ISBN 0-87866-258-8. **$12.95**

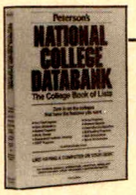
Just published!

Peterson's Competitive Colleges

THIRD EDITION

Editor: Kim R. Kaye

The only book that determines college selectivity from objective data—and gives you the facts to work with. A full page of data for each of 302 competitive colleges includes academic resources and special programs, an undergraduate background profile, cost, financial aid, faculty, honors programs, and more! Paperback. 7" x 9¼", about 290 pages.
ISBN 0-87866-267-7. **$7.95**



Just published!

Peterson's National College Databank:

The College Book of Lists

THIRD EDITION

Editor: Karen C. Hegener

"...a useful, quick resource. It is crammed with facts and figures in list after list on such subjects as college size, athletic scholarships, schools offering deferred entrance, colleges with coed housing...and on and on. Students and professionals will find this extremely helpful."—*Kliatt Young Adult Paperback Book Guide.* Paperback. 8½" x 11", about 750 pages.
ISBN 0-87866-268-5. **$11.95**

New! Due July 1984!

College 101

Dr. Ronald T. Farrar

College 101 answers the questions college-bound students most often ask—about money, health, social life, sex, and academic matters. Dr. Farrar writes with empathy, common sense, and knowledge. Paperback. 6" x 9", about 125 pages.
ISBN 0-87866-269-3. **$6.95**

New! Due July 1984!

The Engineering/ High-Tech Student's Handbook:

Preparing for the Careers of the Future

David R. Reyes-Guerra and Alan M. Fischer with the Editors of Peterson's Guides

This is the *only* book that defines the exciting new careers in the rapidly changing fields of engineering and high technology and gives full information about how to prepare for them. It includes concise profiles of over 250 colleges that offer ABET-accredited undergraduate engineering and high-tech programs, definitions of 44 high-tech and engineering majors, and answers to the many questions pre-engineering students ask. Paperback. 8½" x 11", about 160 pages.
ISBN 0-87866-270-7. **$8.95**

New! Just published!

Winning Money for College:

The High School Student's Guide to Scholarship Contests

Alan Deutschman

Winning Money for College is the complete guide to scholarship competitions that students can enter and win on their own. It is the only compilation of facts, figures, dates, and advice pertaining to America's most prestigious—and most financially rewarding—privately offered scholarships. Includes over 50 national contests that cover public speaking, science, citizenship, and more! Paperback. 6" x 9", about 190 pages.
ISBN 0-87866-261-8. **$7.95**

Renaissance in Fort Lauderdale

April 29 marked the opening of a spectacular, state-of-the-art library in Fort Lauderdale, Fla., to serve as the central research facility of the Broward County Library System. Three academic institutions will also use the library.

Opening-day plans called for trumpeting heralders and troubadours in period costume, emphasizing the Renaissance theme and slogan, "A Place for All Reasons." ALA Immediate Past President Carol Nemeyer was scheduled as keynote speaker.

The $39-million, eight-story structure is located in the revitalized downtown of Fort Lauderdale, 25 miles north of Miami. Marcel Breuer Associates of New York and Miller and Mier Associates and Planners of Fort Lauderdale designed the building, which faces a plaza of geometric tiles, a reflecting pool, and a small park. Edward D. Stone was the landscape architect.

The 256,000-square-foot building includes a six-story atrium, a 300-seat auditorium, and a 90-seat restaurant. The Main Library, directed by Phyllis Cartwright, will also serve Florida Atlantic University, Florida International University, and Broward Community College.

Headquarters of the Broward County Library System, directed by Cecil Beach, occupy the top two stories of the new building. Its dedication completed a six-year project that also built or renovated nine community or regional libraries, bringing the total number of libraries in the system to 23. In June the Broward County system will celebrate its 10th anniversary.

FCC hears library pleas, postpones proposed hikes

For months the library community has been warning Congress and the Federal Communications Commission that the proposed increases in telecommunications charges would cripple the nation's libraries (*AL*, Jan., p.9). Senators and representatives have spoken in support of libraries, and recently the FCC indicated it is getting the message.

In February an FCC memorandum noted: "The American Library Association states that the cost of private lines used to access the largest bibliographic data base would be increased by 60 to 84 percent and that an increase of this magnitude could threaten the viability of many library data bank systems."

In March, the FCC postponed higher phone charges and tariffs until June. The flat access charge of $6 per line per month for multiline business customers, including many libraries, scheduled to begin April 3 was postponed until June 13. So were rates changes for OutWATS and 800 service. The new tariff for AT&T interstate private line service used by OCLC, RLIN, and WLN for library data communications, was suspended until June 1.

The FCC told AT&T and the Bell System companies to maintain the status quo on fees until FCC staff could resolve questions about whether some of the new fees are too high. The 12.75 percent profit margin authorized for the exchange carriers and AT&T may lead to unjust and unreasonable rates, the agency said.

In an FCC memo dated March 28, the agency again noted that ALA was among the users expressing concern over the huge increases in special access rate levels. "Concerns that private line increases may drive these entities out of business, or at least make telecommunications so unaffordable as to

alter their primary business, require this commission to be diligent in reviewing the cost information submitted in justifying rate increases."

AASL document asks:

Stay with ALA, change it, or form separate group?

A committee of the American Association of School Librarians has identified several problems it believes must be resolved if AASL is to remain a division of the American Library Association.

The problems are outlined in a 13-page report prepared by the AASL Future Structure Committee and mailed to all division members in April. The document sets forth AASL's mission, perceived obstacles to carrying out that mission, and three options for AASL's future.

As revealed in an earlier draft discussed at ALA Midwinter (*AL*, Feb., p. 101), these options are: improving AASL's ability to operate within ALA; moving ALA toward a federated structure; or separating from ALA and establishing a new independent organization.

Committee members Carolyn L. Cain, Glenn E. Estes, and Karen Whitney identified

(Story continued on p. 283.)

Censorship exhibit to reopen NYPL exhibition hall

"Censorship: 500 Years of Conflict," a survey of censorship from the development of printing through the present, will reopen a major exhibition hall at the New York Public Library next month. The ornate marble Gottesman Exhibition Hall on the main floor, partitioned into offices in recent years, has been refurbished as part of a $44.6 million program to restore and repair the Central Research Library at Fifth Avenue and 42nd Street.

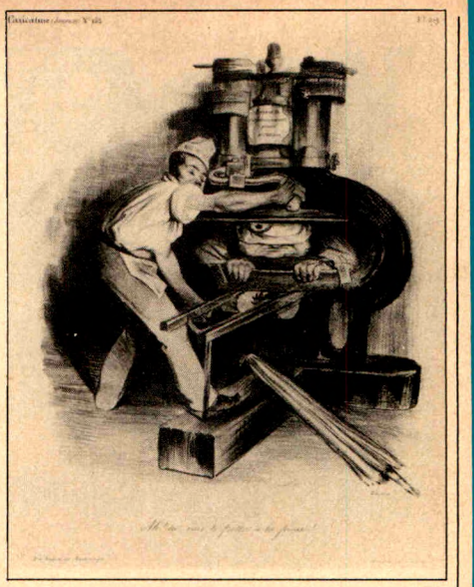
Opening June 1, the exhibition draws on the library's holdings to depict five centuries of political, scientific, religious, and moral censorship, organized in six chronological periods.

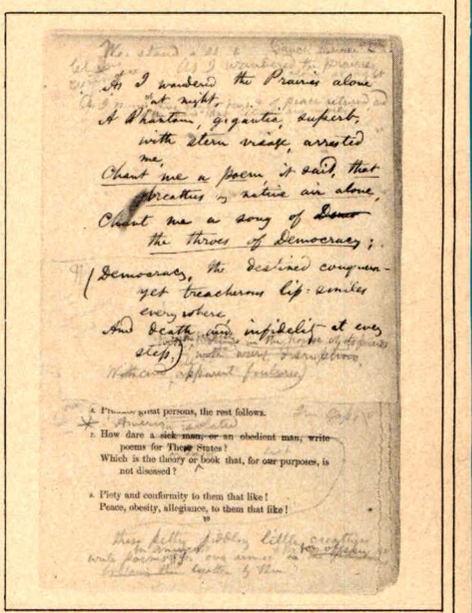
Among the nearly 300 items on display are (pictured, from top): an 1834 lithograph by Honore Daumier illustrating the artist's response to French laws restricting freedom of the press; Walt Whitman's own annotated copy of *Leaves of Grass,* which caused his dismissal from a clerkship in the Department of the Interior when found in his desk; and a first edition of Mark Twain's *Adventures of Huckleberry Finn,* which is now banned in some communities because of its depiction of blacks.

Other highlights of the exhibit include a 1534 first edition of Martin Luther's German translation of the Old Testament, condemned by the Catholic Church throughout Europe and placed on the Index of Prohibited Books; George Washington's personal copy of *Letters, from M. de Voltaire,* in which Voltaire discusses censorship issues surrounding the *Encyclopedie* and other banned writings of the day; a letter from William Thackeray, editor of *Cornhill Magazine,* to Elizabeth Barrett Browning rejecting a poem that mentioned an "illicit passion between a man and a married woman"; and a 1916 issue of *The Woman Rebel,* a newspaper published by Margaret Sanger, describing her indictment for mailing the publication, which offered advice on birth control and abortion.

"An exhibition of this breadth could only be drawn from the collections of a handful of institutions," said Ann Alter, a historian from the Institute of Research in History and member of the exhibition's curatorial team. "The sheer quantity of important material from which to choose, representing all periods in history, made our task both extremely complex and very exciting."

NYPL is also mounting four smaller, complementary exhibitions during the run of the central exhibition, covering censorship in black America (at the Schomburg Center for Research in Black Culture), in British and American theatre (at the Lincoln Center Library for the Performing Arts), in Slavic countries, and in libraries today (both at the Central Research Library). In addition, the library will present a series of films, lectures, and panel discussions examining contemporary censorship issues.





obstacles or "constraints" in areas of program, finance, staff, and governance. Under program, the report cited what might be paraphrased as: turf conflicts with other divisions; lack of clear responsibility within ALA for school library matters; AASL's insufficient share in ALA's legislative, intellectual freedom, and public information activities; limitations on national conferences sponsored by AASL; and restrictions on alliances with other associations.

In matters of finance, the report said, AASL finds itself a victim rather than a beneficiary of ALA dues increases and appears to be restricted in the net gain it can derive from non-dues resources.

The division's staff is too small for its responsibilities, and might be better off operating out of Washington, the committee said. Also, it claimed, AASL's 5,300 members are subject to underrepresentation in ALA's governance structure.

In a cover letter from AASL President Judith M. King, members are asked to study the report and take part in a survey to be conducted before ALA's Annual Conference. Membership input will go to the AASL Board and to a subcommittee of ALA's Executive Board, now studying the report. Subcommittee Chair Regina Minudri told *AL* she has asked King to form a group to work directly with ALA Executive Board members.

Asked for comment, ALA Executive Director Robert Wedgeworth said, "The report expresses AASL concern about a number of problems, some not unique to that division. It is ALA's responsibility to work with these problems as best we can, and the Executive Board has committed itself to doing so immediately. Although other divisions have similar concerns, AASL is the first to present them in this type of organized document, and so we'll be dealing with AASL first."

Stamp honors the nation's archivists and 50th year of Archives

U.S. Archivist Robert M. Warner welcomed guests to the dedication of a new tan, black, and red postage stamp recognizing the 50th anniversary of the National Archives April 16. In the National Archives Rotunda, where the Declaration of Independence, Constitution, and Bill of Rights are on display, Assistant Postmaster General William V. Chapp dedicated the 20-cent stamp designed by Michael David Brown and honoring the work of the nation's archivists in preserving the nation's heritage.

news in brief

USC options. On March 1, University of Southern California Provost Cornelius J. Pings asked Dean Roger Greer of the School of Library and Information Management to prepare a plan to discontinue the school. Greer responded with a review offering three options: closing the school, merging the program with another unit, and initiating a recovery and development program. He recommended the latter, pointing out that enrollment went up 25 percent last fall. The current enrollment is 105 masters and doctoral students.

USC alumni, friends, and library employers are mustering to save the school, which hopes to celebrate its 50th anniversary in 1986. On March 23 the California Library Association asked the university administration to consider "the grave consequences to this profession which serves all the people of our state." Alumni launched a drive to pledge $100,000 a year for the next five years.

A Generation of Service

Cornelius J. Pings, University of Southern California, University Park, Los Angeles, CA 90089-4019.

Senate considers reauthorizing LSCA. Vermont State Librarian Patricia Klinck, New York Public Library Branches Director Edwin Holmgren, and Literacy Resource Librarian Jane Heiser of the Enoch Pratt Free Library were among the nine witnesses testifying for reauthorization of the Library Services and Construction Act at a Senate Education, Arts, and Humanities Subcommittee hearing March 23.

A week later the subcommittee chair, Sen. Robert Stafford (R-Vt.), introduced S. 2490, a five-year reauthorization and amendment of LSCA (*Congressional Record*, March 29, p. S3427–3432). S. 2490 is based on HR 2878 passed by the House of Representatives Jan. 31 (*AL*, March, p. 126). The Senate bill adds an overall emphasis on the new technologies and reduces the required federal share of Title II construction grants from 50 percent to 33 percent.

House gets two HEA bills. In the House of Representatives March 22, Postsecondary Education Subcommittee Chair Paul Simon (D-Ill.) introduced HR 5240, a 356-page extension and amendment of the Higher Education Act. At the first HR 5240 hearing March 27, Rep. Tom Coleman (R-Mo.) expressed regret that minority members of the subcommittee could not support the bill mainly because of its increased cost.

Coleman and Rep. Bill Ford (D-Mich.) introduced a separate extension and amendment of HEA Title II, which they want renamed "Academic Library and Information Technology Enhancement," on March 21. Their bill, HR 5210, would authorize grants for technological equipment and joint use and demonstration projects.

Both bills would keep all parts of Title II together, and both, in different ways, would target college library grants to needier institutions. □

Next month in *American Libraries*

June's *AL* will highlight activities at the ALA Dallas conference, where extra copies of the magazine will be distributed. Articles on automation RFPs, injudicious weeding, publishing with ALA, the Linked Systems Project, and more will also appear.

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

TRAVEL NARRATIVES

Fodor's travel guides are fine for real-life travelers, but libraries also need to serve the armchair types who traverse only mental landscapes. As the vacation season approaches, vicarious travelers everywhere will be looking for books that not only transport them to distant lands, but do so stylishly, in prose that says as much about people as it does about landmarks. The titles below rate four stars on both counts: as introductions to such fascinating tour guides as the sophisticated Jan Morris and the iconoclastic John Krich, and as passports to an infinite variety of locales, from trout streams in Oregon to a restaurant in Katmandu known for its "knockout hash cookies." All the books included were published in 1984. Bon voyage!

Abbey, Edward. *Beyond the Wall*. Holt, 1984, $14.95.(0-03-069301-2, 83-18346)

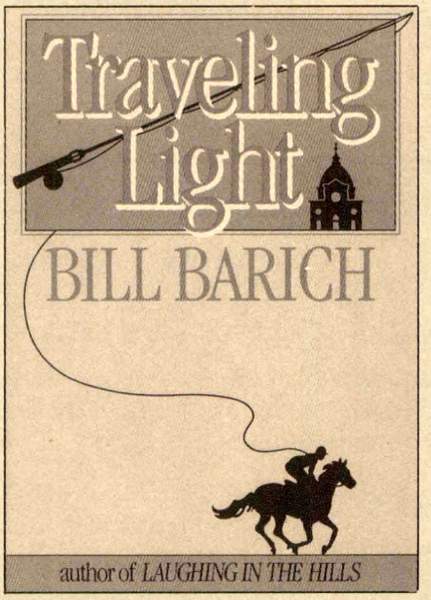
For anyone looking to escape the claustrophobia of urban life, Abbey points the way to such fresh-air pursuits as hunting grizzly bear in Alaska or exploring the "ancient dust" of the Great American Desert in Sonoma's Pinacate region.

Barich, Bill. *Traveling Light*. Viking, 1984, $14.95. (0-670-72477-7, 83-47998)

Barich is the kind of traveler who goes where his interests lie, and his interests include horse racing, fishing, and English beer. He takes the traveler from trout streams in northern California to Florentine *palazzi*. Teetotaling nonanglers who've never been near a backstretch needn't despair; Barich makes you care about a well-drawn pint of bitter whether you're thirsty or not.

Irvine, Lucy. *Castaway*. Random, 1984, $16.95. (0-394-53542-1, 83-43196)

After answering an ad in a London travel magazine ("writer seeks 'wife' for a year on a tropical island"), Irvine found herself living a Robinson Crusoe–like life off the Australian coast. Her vividly written account of this harrowing yet revelatory experience makes consistently gripping reading.



Barich's deeply personal book describes a year of wandering from the Pacific Northwest to Tuscany.

Krich, John. *Music in Every Room: Around the World in a Bad Mood*. McGraw-Hill, 1984, $14.95. (0-07-035302-6, 83-18755)

The curmudgeonly Krich and his amiable girlfriend, Iris, make a delightful odd couple as they meander through various Asian cities and regions. Share their travails and be glad you stayed home.

Morris, Jan. *Journeys*. Oxford, 1984, $15.95. (0-19-503452-X, 83-25009)

While never losing her ability to write graceful, perceptive prose, Morris has the knack of seeing a place on its own terms, whether it be Aberdeen, Scotland, or Brownsville, Texas—only two of her subjects in this captivating collection.

The Sophisticated Traveler. Ed. by A.M. Rosenthal and others. Random/Villard, 1984, $14.95. (0-394-53645-2, 83-50930)

Based upon material from the *New York Times* travel supplement, this collection features essays by famous writers on London, Paris, Rome, and Athens. Saul Bellow, V.S. Pritchett, and Muriel Spark beat Baedeker any day.

Thubron, Colin. *Where Nights are Longest: Travels by Car through Western Russia*. Random, 1984, $16.95. (0-394-53691, 83-43188)

A camping trip to the Soviet Union? Not the usual destination of the Winnebago set, to be sure, but somehow British writer Thubron received the necessary authorization and was able to meet a fascinating array of ordinary Russians in everyday situations.

Trevor, William. *A Writer's Ireland: Landscape in Literature*. Viking, 1984, $25. (0-670-79082-6, 83-81754)

Trevor mixes his own lilting prose, carefully selected quotes from other Irish writers, and evocative black-and-white and color photos to capture the uniqueness of his native land.

Wright, Ronald. *Cut Stones and Crossroads: A Journey into the Two Worlds of Peru*. Viking, 1984, $20 (0-670-69381-2, 83-40216)

In a comfortable combination of eccentric travelog and perceptive archaeological survey, Wright both muses on ancient Incan ruins and describes the daily life of modern Peru. His eye for detail extends well beyond artifacts: "In the mattress there were leggy things like silver-fish." □

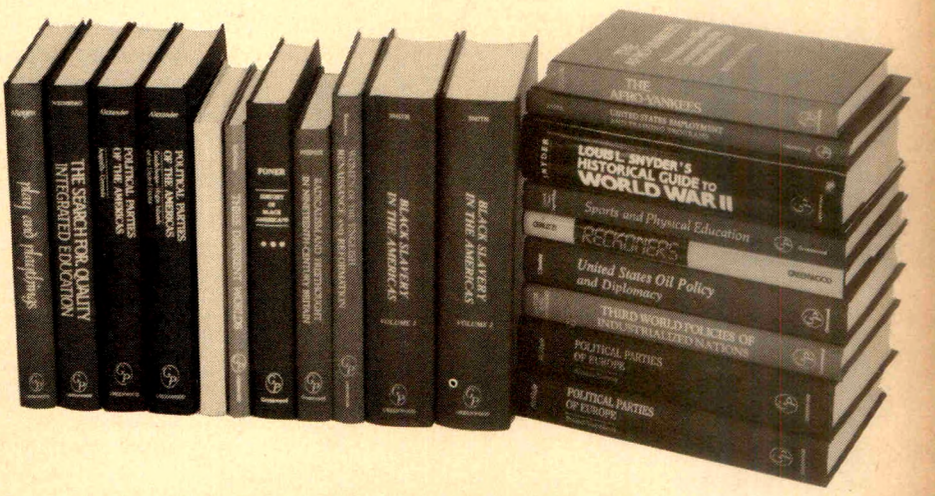
***Bill Ott,** who writes this column freelance for* American Libraries, *is books-for-adults editor of ALA's* Booklist *magazine.*

Congratulations to our authors

OUTSTANDING ACADEMIC BOOKS

published by Greenwood Press

17 Outstanding Academic Books
selected by Choice Magazine



Political Parties of the Americas: Canada, Latin America, and the West Indies edited by Robert J. Alexander. xxviii, 1274 pages in 2 volumes. $65.00 *Alexander's academic background and long personal involvement in Latin America qualify him eminently for the general editorship of this important work. His scholarly contributors have been meticulously selected for their individual expertise. . . . The uniform treatment by country is an alphabetical arrangement. . . . An extremely comprehensive index accompanies this highly recommended work.* —Choice

Reckoners: The Prehistory of the Digital Computer, from Relays to the Stored Program Concept, 1935-1945 by Paul E. Ceruzzi. xii, 181 pages. $29.95 *Lucid introduction and explanation, supplemented by helpful glossaries, an appendix, and historically valuable chapter-end notes and bibliography. . . . Highly informative, this little book is the promising first in a new series.* —Science

United States Oil Policy and Diplomacy: A Twentieth Century Overview by Edward W. Chester. xiv, 399 pages. $35.00 *An extensively researched and comprehensive study of American oil policy and diplomacy, from the beginnings of the petroleum industry up to 1973. . . . The exposition is balanced and scholarly. . . . An examination of the many twists and turns of diplomatic policies.* —Choice

The Afro-Yankees: Providence's Black Community in the Antebellum Era by Robert J. Cottrol. xviii, 200 pages. $27.50 *Cottrol ably traces the development of black family life, the formation of black churches, schools, and voluntary associations and . . . also analyzes the origins of the bitter antiblack prejudice. . . . Cottrol's work is thoroughly documented. . . . It is presented in a clear, straightforward style. . . . Makes a major contribution to our understanding of race relations in the antebellum North. Highly recommended.* —Choice

Voting in Revolutionary America: A Study of Elections in the Original Thirteen States, 1776-1789 by Robert J. Dinkin. x, 184 pages. $27.50 *All important aspects of the electoral process are covered. . . . This work, a worthy successor to the author's* Voting in Provincial America, *should prove an indispensable source to scholars/teachers who are interested in the evolution of the American democratic electoral process. Recommended.* —Choice

History of Black Americans: From the Compromise of 1850 to the End of the Civil War by Philip S. Foner. viii, 539 pages. $39.95 (Vol. 3 of a projected 5 vol. set) *Philip Foner adds to his impressive body of work on US history with this third volume of his* History of Black Americans *. . . He has produced the single best volume on what may have been the single most important decade in US history. Recommended for all academic and public libraries.* —Choice

Sports and Physical Education: A Guide to the Reference Resources compiled by Bonnie Gratch, Betty Chan, and Judith Lingenfelter. xxi, 198 pages. $29.95 *This excellent annotated bibliography . . . includes English-language monographs, serials, government publications, and ERIC documents . . . Recommended. . . . There is no other extensive annotated bibliography available on this subject. It will be a handy source.* —Choice

Political Parties of Europe edited by Vincent McHale with the assistance of Sharon Skowronski. Two volumes. $95.00 *The complete spectrum of parties, both existing and defunct, is covered for every European country. The arrangement of this information is very convenient. . . . A remarkable uniform style. . . . No other reference work offers such information in such convenient form. Recommended for all libraries.* —Choice

Play and Playthings: A Reference Guide by Bernard Mergen. xi, 281 pages. $35.00 *A guide to children's play in America. . . . A narrative history of play . . . and . . . a lengthy narrative bibliography of relevant sources. . . . A book that is both scholarly and accessible. Recommended.* —Library Journal

United States Employment and Training Programs: A Selected Annotated Bibliography compiled by Frederick A. Raffa, Clyde A. Haulman, and Djehane A. Hosni. xvi, 152 pages. $29.95 *This bibliography is an excellent guide to the literature produced in government and academic publications. Including a fine introduction, thorough annotations, an author index, and a superbly useful subject index.* —Choice

Three Different Worlds: Women, Men, and Children in an Industrializing Community by Frances Abrahamer Rothstein. xii, 148 pages. $27.50 *A refreshing research effort, away from the isolated social unit approach of anthropology . . . some interesting parallels among many of the social sciences. . . . Excellent multidisciplinary bibliography and many fine and easily understood charts and graphs. Undergraduate, graduate, and faculty-level use.* —Choice

Black Slavery in the Americas: An Interdisciplinary Bibliography, 1865-1980 compiled by John David Smith. xxix, 2712 pages in two volumes. $95.00 *This massive bibliography of 15,667 citations and 5,494 cross-references will surely be the most comprehensive compilation on slavery for a long time to come . . . has included material from osbcure and hitherto overlooked sources as well as the better-known books. . . . Highly recommended.* —Choice

Louis L. Snyder's Historical Guide to World War II by Louis L. Snyder. xii, 838 pages. $39.95 *Snyder has chosen to emphasize non-military aspects, and his* Historical Guide *is an interpretation of the political, economic, social, and cultural thrusts of the war . . . recommended as an addition to all academic and public library reference collections.* —Choice

Third World Policies of Industrialized Nations edited by Phillip Taylor and Gregory A. Raymond. xix, 282 pages. $35.00 *A superb collection of comparative economic aid analyses. . . . The work is not only timely but essential reading for international relations and comparative politics specialists. Strongly recommended for a wide range of libraries and reading audiences.* —Choice

Women of the English Renaissance and Reformation by Retha M. Warnicke. viii, 228 pages. $29.95 *An excellent monograph dealing with an inordinately neglected topic: the education of English women during the Tudor and early Stuart eras. . . . Warnicke's extensively researched and documented contribution is a pioneering effort.* —Choice

The Search for Quality Integrated Education: Policy and Research on Minority Students in School and College by Meyer Weinberg. xv, 354 pages. $35.00 *A comprehensive, balanced, and detailed analysis of hundreds of studies. . . . The author's own conclusions are balanced. . . . This is an excellent, readable, and even indispensable book. . . . More than a review of the literature, it defines the scope and diversity of minority education studies to date.* —Choice

Radicalism and Freethought in Nineteenth-Century Britain: The Life of Richard Carlile by Joel H. Wiener. x, 285 pages. $29.95 *The first full-length study of one of the most controversial and most important working-class reformers of late Georgian and early Victorian England. . . . An economical, tightly written narrative that expands considerably not only our knowledge of Carlile but also his controversial relationship to 19th-century British radicalism.* —Choice

On handling contest buffs and using p.a. systems

Q. How do libraries handle the multitude of patrons who ask for help in researching answers to contests? *Elizabeth Tyson, Reference Librarian, Delray Beach Library, 29 SE 4th Ave., Delray Beach, FL 33444 (AL,* Dec., p 711).

A. The Los Angeles Public Library handles contest questions as ready reference, except that we will not make a separate call-back to the patron. During a recent newspaper contest tie-breaker in which 21 questions had to be answered within three days, the strict application of our policy caused much frustration for both staff and patrons. As a result, we are currently examining the policy and would appreciate hearing from other libraries. *Helene G. Mochedlover, Principal Librarian, Literature and Fiction, Los Angeles Public Library, 630 W. Fifth St., Los Angeles, CA 90071.*

A. How about scheduling programs to help contest entrants make better use of the library? Instead of telling patrons "We don't answer contest questions," offer a workshop for puzzle-solvers on decoding the library. *Andrew Hansen, Executive Director, Reference and Adult Services Division, ALA.*

Q. Do any academic libraries use a public address system to summon patrons and staff? *Anthony G. Tassin, Humanities Chair, Earl K. Long Library, University of New Orleans, Lake Front, New Orleans, LA 70148 (AL,* Dec., p. 711).

A. While designing and planning the UCLA Engineering and Mathematical Sciences Library in 1958, I asked the architects to incorporate a public address system. It includes 11 speakers in the stacks and reading room. Switches at the microphone near the circulation desk can activate any or all the speakers at one time.

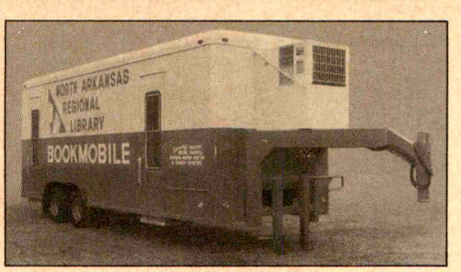
The system announces closing time, summons staff members in the stacks, and calls borrowers of reserve books when they are overdue and others request them. Occasionally it is used in emergencies.

If it is not abused by too many calls, readers don't object. I recommend it to academic libraries, including large branches. *Johanna E. Tallman, 4731 Daleridge Rd., La Canada, CA 91011.*

A. We have a p.a. system available to page patrons or staff in emergency situations. We employ an autocall paging system for everyday use, with individual signals of long and short bells for each librarian. My signal is one long bell and the coordinator of public services gets three long rings followed by three short ones. The system is fairly unobtrusive and suits the needs of our library. *Penny Elkins, Reference Librarian, Jessie Ball du Pont Library, University of the South, Sewanee, TN 36375.*

A. Our policy for use of our public address system is fairly strict, but we feel the system is a tool with mixed blessings. We refuse 90 percent of the paging requests and only about 50 percent of the people respond to the paging. *Janet Strong, Circulation Librarian, Boise State University Library, 1910 University Dr., Boise, ID 83725.*

(Continued on p. 288.)



Bookmobiles that meet budgets

Constantly increasing land and construction costs and the squeeze of restricted budgets make it very difficult to maintain, let alone expand library services.

As a viable option to closing branches and reducing services, consider bookmobiles.

Then, consider GERSTENSLAGER BOOKMOBILES. We make them in all sizes. Custom designed from the chassis up. From mini-units to complete multi-media centers on wheels. Exactly the way you and your Gerstenslager sales engineer planned it.

If you're thinking bookmobiles, don't settle for someone else's assembly line, production-type vehicle. **Instead, write or call for free brochures** and examples of units we've built for other libraries. Write: Gerstenslager, Dept. B, Wooster, OH 44691.

The Wheels of Community Service for more than a Century.

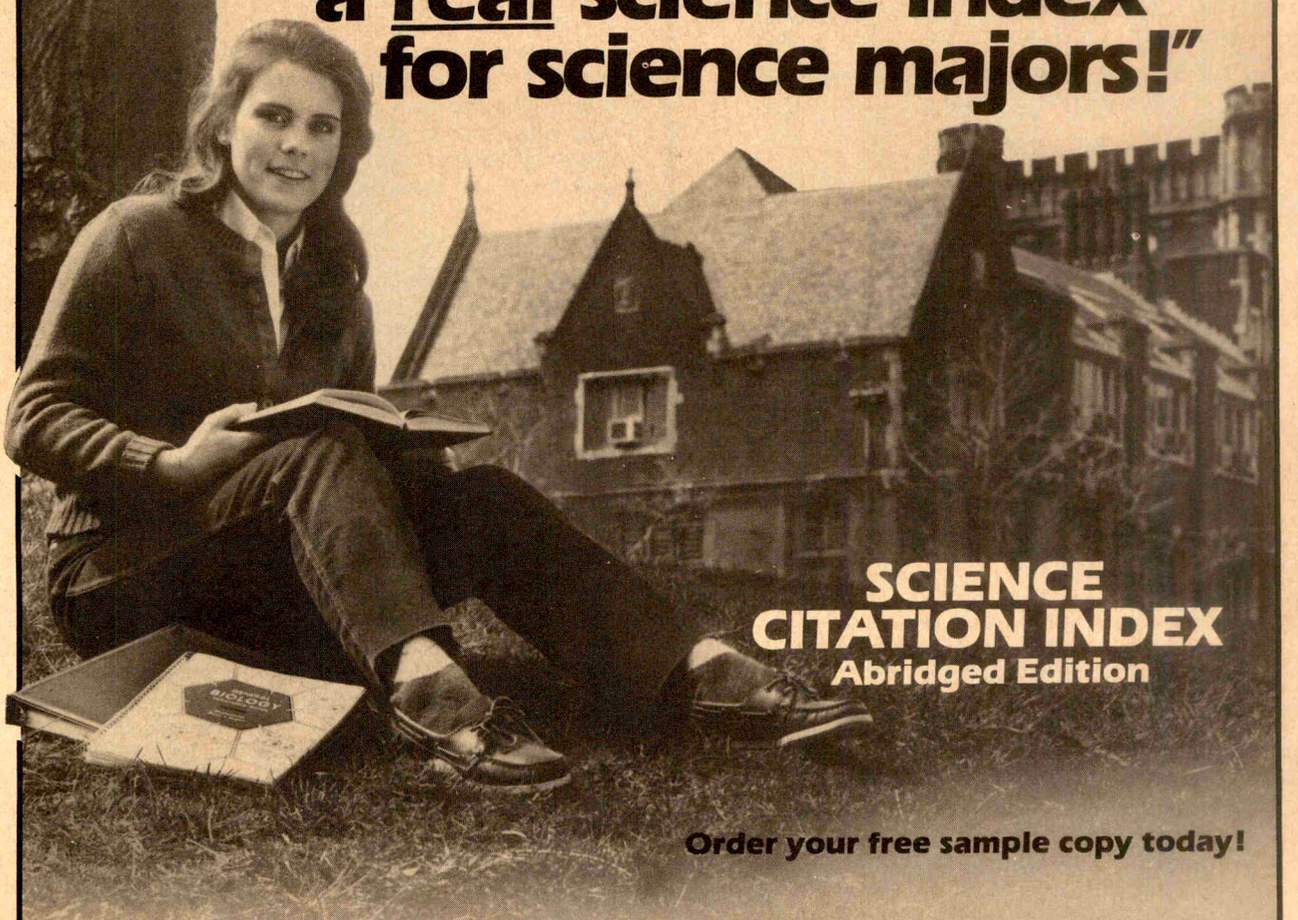
"Finally, a real science index for science majors!"



SCIENCE CITATION INDEX
Abridged Edition

Order your free sample copy today!

Science students and faculty need a high-caliber, professional quality science index to keep them up-to-date on scientific advances. General indexes to scientific subjects just do not have the coverage or precision of access which is so important for accurate, thorough research.

Before now, superior science reference meant one thing — the Science Citation Index®. But now this same quality is available to you in the new Science Citation Index, Abridged Edition.

Author, title word, and citation indexes make the Science Citation Index, Abridged Edition sophisticated enough for science majors, yet easy enough to use for all of your general science reference needs.

What's more, its coverage—500 journals in the whole range of scientific disciplines—is ideal for the research needs of students and faculty at undergraduate institutions. And, since timeliness is a must in fast-paced scientific fields, the Abridged Edition is issued monthly. Semiannuals make retrospective searching fast and easy.

All this at a cost so low it won't take away from your other subject reference needs. Remember, superior indexes make superior students!

To get your FREE SAMPLE ISSUE of the Science Citation Index, Abridged Edition mail the coupon below.

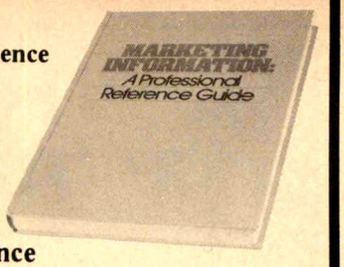
ALA Outstanding Reference Sources of 1983

***CHOICE's* Outstanding Academic Books 1983**



MARKETING INFORMATION: A Professional Reference Guide

"This reference book is so good that one would think it had been edited and compiled by librarians. . . ."
—*AMERICAN REFERENCE BOOKS ANNUAL*

This comprehensive directory is for anyone seeking marketing information—but it is especially designed for marketing executives, researchers, and information specialists who need ready access to pertinent marketing data.

Part I—Guide to Associations and Organizations
• Names, addresses, and phone numbers of over 1,500 professional and trade organizations • Descriptions of services • Key contacts

Part II—Guide to Sources of Marketing Information
• Annotated bibliographic materials for 21 marketing areas • More than 2,400 books, manuals, periodicals, directories • Other nonprint materials included • Indexed by publisher and title

Edited by Jac L. Goldstucker
Compiled by Dennis W. Goodwin. 400 pages. $60.00.

Business Publishing Division, Attn: Fulfillment Dept., College of Business Administration, Georgia State University, University Plaza, Atlanta, Georgia 30303

GSU is an EEO affirmative action employer and a unit of the University System of Georgia

Reviews are in for THE FIRST AND ONLY CRITICAL GUIDE TO MICROCOMPUTER BOOKS:

"It's well-written, complete, witty, and intelligent. If you spend any money at all on microcomputer books, spend $9.95 for this one; it'll pay you back quickly."
— Microcomputing Magazine

"It is in an easy to read format and is a useful book for all librarians. It is an excellent collection development tool."
— Microcomputer Newsletter of the Westchester Library System

"The collection is especially useful in that it highlights worthwhile titles from unusual publishers and doesn't mince words in its recommendations. (The guide) could prevent many selection errors now."
— Library Journal

And now an American Library Association selection as ***"one of 1983's Outstanding Reference Sources."***

If your school or library is not among the thousands who have already benefited from The Guide's research, contact Golden-Lee Book today at (800) 221-0960 or (212) 857-6333.

(Action Exchange continued)

A. Because my library work frequently takes me away from a telephone, I signed up with a paging and signaling service and lease a tone-only pager so that a disabled relative can always reach me in an emergency.

Libraries interested in radio paging should find out if their parent institution uses a private system that the library could join. The maintenance work crews here use a combination of pagers and portable radio transceivers. At least two nearby hospitals use low-power radio paging systems that work within the hospital. For more information, look in your phone directory yellow pages under paging and signaling service for common carrier systems or radio communication equipment for private system. *A Texas reader.*

Q. Where can we purchase a book-like folder for old U.S. Geological Service topographical maps done early in this century? ***Leonard Hammer, Director, Royal Oak Public Library, 222 E. Eleven Mile Road, Royal Oak, MI 48067.***

A. University Products, POB 101, South Canal, Holyoke, MA 01041, is a major provider of archival and preservation materials for libraries. The firm can provide boxes made to order and hinged mylar sheets, which we have found excellent for preserving the older 15' quadrangles. Not only are the quadrangles protected, they can be used by the public inside the mylar envelopes. Just using boxes leaves the maps open to damage.

If you have an extensive collection of the older USGS quadrangles, map cases are a better solution than boxes. The Hobart Cabinet Company, 301 E. Water St., Troy, OH 45373, makes map cases that are generally less expensive than the traditional "blueprint cases" and are adequate for USGS maps. *J. B. Post, North/Central Area Specialist, OWA, Free Library of Philadelphia, Logan Sq., Philadelphia, PA 19103.*

Over to you

1. Where can we get portable ultrafiche readers to go with our Library of American Civilization and Library of English Literature collections? (Wis.)

2. How do libraries catalog and check out toys? (Fla.)

3. How do undergraduate libraries maintain quiet? (N.C.)

4. How can school libraries dry out soaking wet books students return to us? (Mass.)

5. Is anyone using an integrated periodical display system to save space? We need ideas, please. (Ont.)

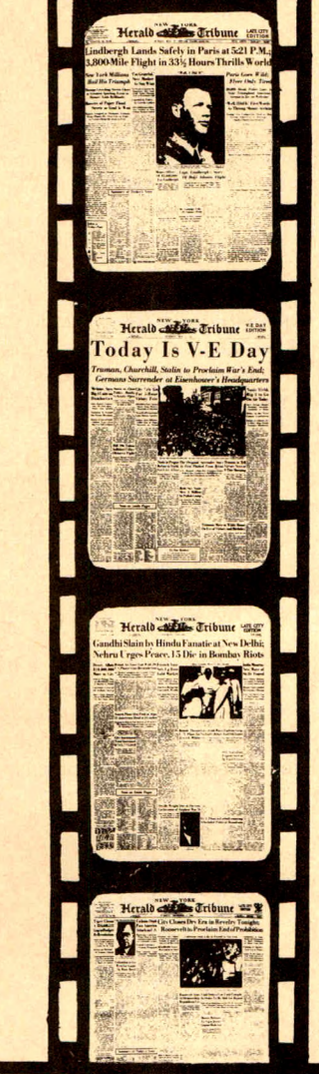
CAN YOU AFFORD TO MISS THE FILM THAT WON 13 PULITZER PRIZES?



NEW YORK Herald Tribune

now available at a 5% discount!

The NEW YORK HERALD TRIBUNE was one of the most vital newspapers of its time. With regular contributors such as Red Smith, Walter Lippman, Art Buchwald, John Steinbeck, Walter Kerr and Judith Crist, it consistently won just about every major journalism award, in addition to 13 Pulitzer Prizes. The microfilm of the NEW YORK HERALD TRIBUNE and its predecessors contains over one hundred years of vibrant journalism from 1835-1966. During that period, its pages included pieces by award winning writers like Arthur Miller, Katherine Anne Porter, Tennessee Williams and Nobel Prize winner, Pearl S. Buck.

The NEW YORK HERALD TRIBUNE provides you with an essential comprehensive history of New York newspapering at its best. Fortunately, for a limited time, it's available at a substantial 5% discount. For more information, simply complete the coupon below or call toll free and ask for Pam Shea at: 1-800-321-9881

American Libraries encourages comment up to 250 words on recent content in our pages or on matters of general interest to the library profession. Letters must be signed and are subject to editing for economy. Longer contributions may be submitted to the "On My Mind" department.

IRRT endorses UNESCO resolution

IN YOUR NEWS ARTICLE "ALA Council Urges Reagan to Stick with UNESCO" (Feb., p. 70), you failed to mention at least one ALA unit that endorsed the resolution urging the U.S. Secretary of State to negotiate with UNESCO's director general to resolve their differences: the International Relations Round Table.

The executive committee of IRRT voted unanimously at its Midwinter ALA meeting to support the resolution proposed by Tom Galvin in the International Relations Committee. The IRRT board shares the strong concern of many ALA members that the library community has a major stake in the worldwide information programs of UNESCO, and feels that U.S. withdrawal from UNESCO will not solve the problems which our administration hopes to correct. We concur in Dean Galvin's statement, "You don't correct by withdrawing; you then have no voice."

Members of our committee also feel that U.S. withdrawal from UNESCO jeopardizes our own international relations programs and further isolates our country, and our profession, from the developing information programs in the Third World in which many ALA members have played an important role.

EDWIN S. GLEAVES, ALA member, Vanderbilt University library school, Nashville, Tenn.

Gunman's disorder not caused by stress

I AM QUITE PERTURBED BY THE consistent insensitivity and seemingly voluntary ignorance of the media towards the millions of Americans with mental illnesses and about the nature of these disorders. The disorder to which you referred in your January "In the News" item (p. 10) on the shooting of Gustave Harrer by a former employee is properly called a bipolar affective disorder. It is not acquired due to an inability to cope with such environmental stresses as the loss of a job, nor is it in and of itself a cause of criminal behavior. Most Americans make very different assumptions, unfortunately, and allow their prejudices to be reinforced by what they read, see, and hear. As an official publication of an influential educational organization, you should have worded your story quite differently.

David Shelley's illness is excruciatingly painful and has killed millions of people over the centuries. Those involved in or aware of scientific, demographic, and clinical research on the disorder are increasingly convinced that the condition is transmitted genetically. It is also, for most people who have it, treatable —though not yet curable—by means of an inexpensive prescription medication, supplemented by other medications and psychotherapy.

Sufferers of the illness who deny its existence and the need for ongoing care take terrible risks for themselves and their associates. But having it is not a crime or a sin and it should not be handled as casually as it usually is.

BARBARA PILVIN, ALA member, Van Pelt Library, University of Pennsylvania, Philadelphia

Career advice for info faddists

YOUR MARCH EDITORIAL, "INFORmation Madness" (p. 124), is one of the finest and most needed of any that you have ever written. I have become increasingly irked by the faddists who have rushed to embrace "information science." They seem all too ready to drop the far more ancient and honorable term "library" in favor of the more ambiguous word "information." They should be grocery clerks or telephone operators.

ROBERT B. DOWNS, ALA honorary member, Urbana, Ill.

"More to a library than information"

YOUR EDITORIAL IN THE MARCH *AL* has my entire support. I have been concerned about the way "information" has become a dumping ground for so many library concepts. So when the *Voice of Z39* goes after you, you should know that there are many who feel that there is more to a library than information.

I thought that James C. Thompson's article, "Advanced Library Obfuscation" (Mar., p. 138–142), touched the same sensitive area, showing how pretentious some of our professional language can be. I trust that you will offer more articles on this subject.

LAWRENCE V. MOTT, ALA member, Champaign, Ill.

Precedent for phone-tariff exemption

AS A MEMBER OF THE SUNY/OCLC Network Advisory Council, I have received copies of ALA's Washington Office press release dated January 1984, and Eileen Cooke's letter to the Secretary of the Federal Communications Commission in the matter of "Investigation of Access Charges and Divestiture Related Tariffs, CC Docket No. 83-1145, Phase II, Part 2. . . ." Her letter (March, p. 128–29) was occasioned by the likelihood that, following the divestiture of AT&T, there will be a dramatic increase in telecommunications charges. Ms. Cooke states that the increased telecommunications charges will "interfere with libraries' social mission."

I am reminded that Alexander Hamilton, also speaking of tariffs, specifically exempted libraries from paying them. In his *Report on Manufactures,* December 5, 1791, he made these comments about a duty of "ten percent, instead of five" on imports:

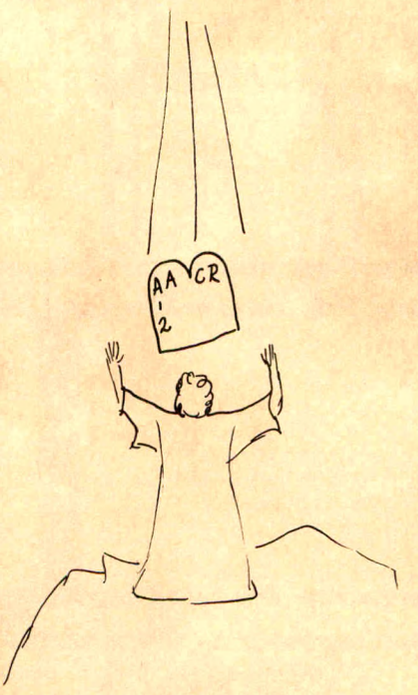
"As to Books which usually fill the Libraries of the wealthier classes and of professional Men, such an Augmentation of prices . . . would be too little felt to be an impediment to the acquisition.

"And with regard to books which may be especially imported for the use of particular seminaries of learning, and of public libraries, a total exemption from duty would be adviseable, which would go far towards obviating the objection (that it may have an unfavourable aspect toward literature). . . .

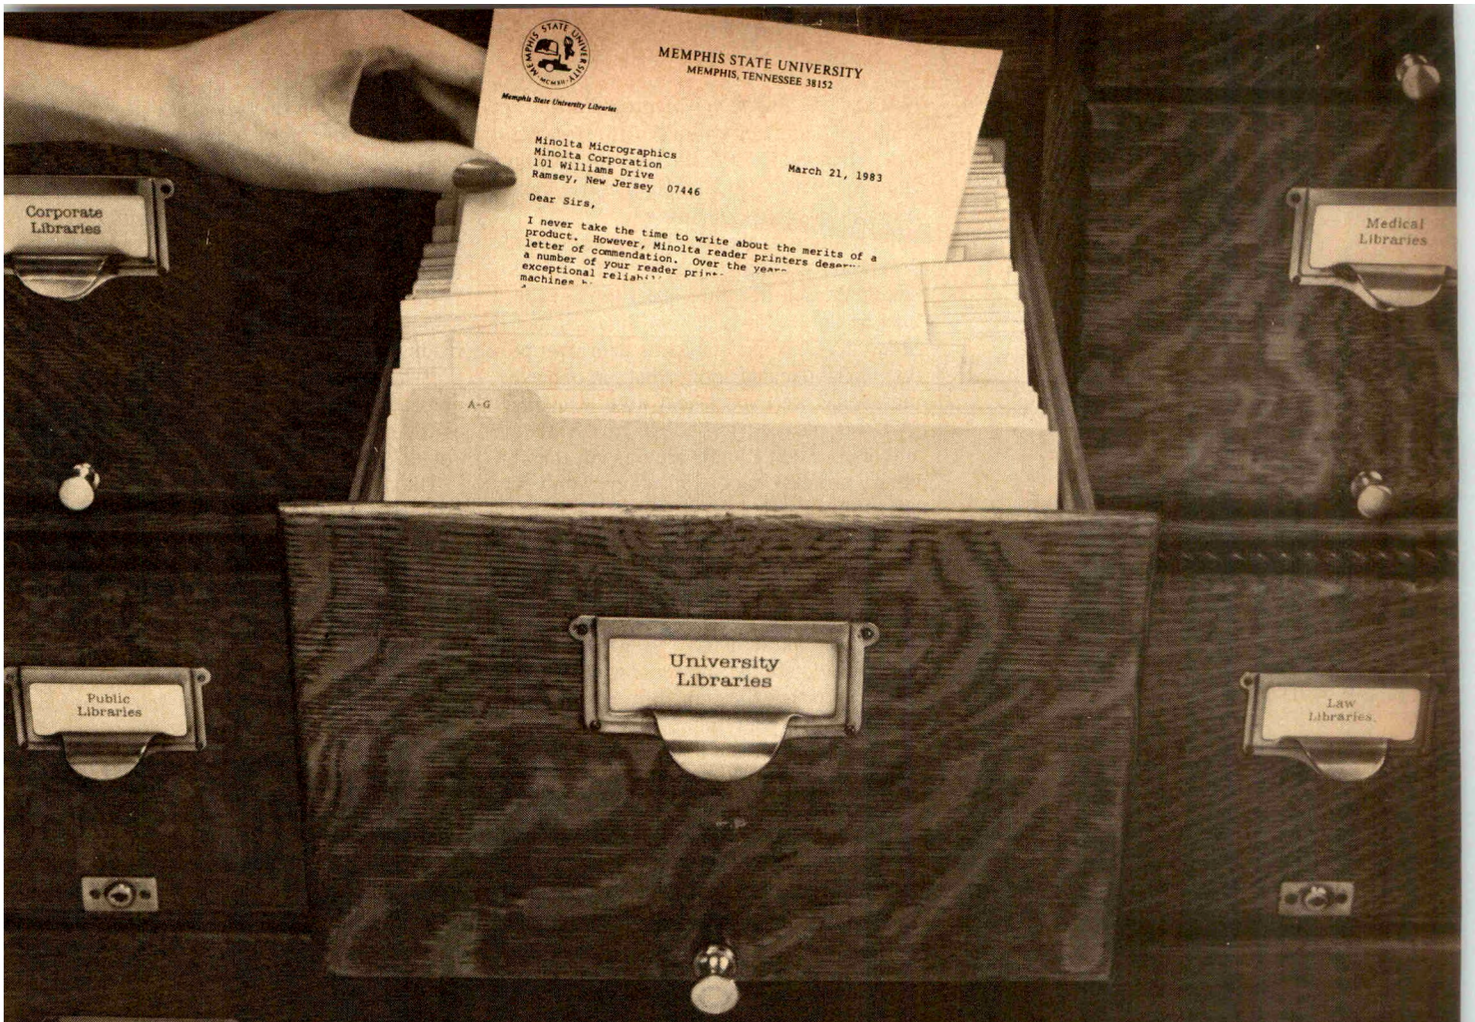
"As to the books in most general family use, the constancy and universality of the demand would insure exertions to furnish

If they'd been librarians by B.B. Rile

ALA member B.B. Rile continues her revisionist series (March, p. 134) on "how much nicer history could have been had there been more opportunity for gifted people to be usefully employed in the library profession."



Moses receives a cataloging code.



THEIR REFERENCES WOULD FILL A LIBRARY.

Libraries from A to Z have written us referencing the quality and reliability of Minolta RP 405E and RP 407E reader-printers.

We're pleased, but not surprised. Because both models have a lot to offer libraries. They give you sharp, positive, permanent prints from either positive or negative film. Prints you can write on with just about any writing instrument.

They feature Minolta's exclusive fully automatic exposure control for quality prints the first time. Saving time and reducing paper costs.

And they accept virtually every microformat made. With carriers that permit even untrained operators to switch from roll film to fiche in seconds.

See them at any authorized Minolta dealer in our nationwide network. Check the Yellow Pages for the one nearest you. Or call toll free 800-221-3333. In N.Y., (212) 775-1395.

Minolta reader-printers. Because libraries are where classics belong.

IF YOU DON'T INSIST ON A MINOLTA THIS TIME, YOU WILL NEXT TIME.

them at home and the means are completely adequate . . . domestic manufacture would conduce to the cheapness of the article.''

I would hope that the Library of Congress will use its original copy of this painstaking early ''policy analysis'' to impress the FCC that ''it is not merely necessary that the measures of government . . . should be calculated to assist and protect them, but that those which only collaterally affect them, in the general course of the administration, should be guarded from any peculiar tendency to injure them.''

JEAN C. PELLETIERE, ALA member, Schaeffer Library, Union College, Schenectady, N.Y.

Covering up a *Conspiracy*?

I WAS DISAPPOINTED THAT A GOOD book on Japanese-U.S. trade was not included in Bill Ott's March ''Quick-Bibs'' (p. 130).

That book is Marvin J. Wolf's *Japanese Conspiracy: The Plot to Dominate Industry Worldwide and How to Deal With It*, published by Empire Books, Nov. 1983, at $13.95. The title provoked quite a strong reaction when it was reviewed in February on ''The Fred Fiske Show,'' a radio talk show heard each weeknight on WAMU in Washington, D.C.

As an ALA member since 1960 I have watched the old *ALA Bulletin* become transformed into perhaps the best library periodical published today. I think you have done an excellent job to improve it even more.

JAY D. TEBO, ALA member, Rockville, Md.

Bill Ott replies:

''Quick-Bibs,'' as its title suggests, is not intended to be comprehensive. The selections are designed to reflect as many approaches as possible to a current topic. Certainly Wolf's Japanese Conspiracy *would have been an appropriate choice for the March list, but with a subject as ''hot'' as Japanese business, there inevitably will be worthy titles not included. One of the functions of ''Quick-Bibs,'' in fact, is to prompt librarians to recall other titles in their own collections on the same subject. Jay Tebo seems to have done just that.*

Equal treatment for software authors

I SHOULD HAVE WRITTEN EARLIER to applaud your ''Software Showcase'' for providing an insight into the makers of the future world of library automation. Now, however, I must pick up and carry the flag of the Personal Bibliographic System in response to Erwin Welsch's criticism (Mar., p. 136).

I find it odd that Welsch missed the review I had published in your sister publication *Booklist* at the same time the Rosenburg piece appeared: it mentioned the print formatting concern but also gave the program a lot of credit for being tremendous micro software. I have been using PBS for nine months now and have yet to see a single purpose library program of equal quality.

In addition to the excellent quality of the program, it uses the *library* standard of ANSI, which Welsch does not seem to care for. I may be only a lowly school librarian, but if librarians can't use standards their own profession has decided upon, what sort of bickering should we expect next from academia?

It was pleasant to see *AL* treat software authors as book authors are treated: frankly, library professional organizations won't permit software authors to speak at gatherings or detail their efforts in print. Judy Blume can speak anywhere she wants and editors fall over themselves to get her to be interviewed describing what role infantile nose-picking had in her latest book.

I'd love to see the showcase continue, and hope to see Bob Skapura, Bob Stevens, and Joe Ward fill your future pages. They are providing creative and useful applications for micros and libraries. I hope others can read your disclaimer, ''Inclusion . . . does not constitute endorsement by ALA or any of its units.'' They can get that from *Booklist*.

ERIC S. ANDERSON, Micro Computer Libraries, Freeport, Ill.

Pushy about standards

MAY I ADD TO DISCUSSION OF your controversial new feature in *AL*, ''Software Showcase,'' and also comment on the Personal Bibliographic System (PBS)?

First, I think *AL* ought to be congratulated for starting a feature that helps to develop our awareness of important new professional developments. We must find ways to keep up with new technology and clearly ''Software Showcase'' is a valuable aid.

Second, I think it is a mistake to allege that *AL*, by giving designers of new software an opportunity to explain their products, is ''touting'' a product or service. ALA members who develop products and services for our profession ought to be encouraged to communicate their efforts to their colleagues via ALA publications. But reviewing the software is a different matter. There are established review mechanisms for software, e.g., *Byte, PC Magazine, Library Software Review*. The fact that *AL* does not currently review software should not inhibit the publication of news about innovative library-related software. And who better than the innovator to provide authoritative, up-to-date information?

A few comments on library software in general, PBS in particular, and American National Standard Z39.29-1977. The first versions of any software package are never ideal and designers always depend upon user feedback for improvement. For an example one need only look at the continuing improvements in the products and services of the major bibliographic networks and of the growing number of free-standing systems or systems which interconnect with utilities. How primitive their early offerings seem now! Software design is always progressive, always iterative. The concept that a software product is ever finished, that it ought to ''come out of the oven nicely browned'' and ready for consumption, is simply misguided. Software is an infinitely flexible, ever-developmental tool. As a user of PBS, I am confident that it will be continually improved —but I doubt it will ever be ''perfected.''

The American National Standard for Bibliographic References is endorsed by 54 organizations, including every major U.S. library association, the three U.S. national libraries, the Association of American Publishers, a number of abstracting and indexing services, and some publishers. The American National Standards Institute (ANSI) is a voluntary organization which devises but cannot impose standards. The expensive experience of MARC should teach us the value and economy of standards; so should the long, arduous process of adopting ISBD.

I hope that the ANSI standard soon becomes universally valued, accepted, and used. This is not to denigrate other bibliographic styles, but until those other practices are fully computerized, they must inevitably be more expensive, more time-consuming, and more trouble to work with. I am not willing to sit at a terminal with p-slips in hand, ready to practice library script to transcribe search results; nor am I willing to prepare complex bibliographic entries by hand when I can get a machine to do it for me. The conclusion I reach is that we should use new systems, provide clear and immediate feedback to the designers, and push, push, push, for standards, standards, standards.

ALLEN B. VEANER, ALA member, Allen B. Veaner Associates, Toronto, Ont., Canada

Rosenberg's standard response

RESPONDING TO MY ''SOFTWARE Showcase'' article in the January issue of *AL*, Erwin Welsch criticizes my choice of the ANSI Standard Bibliographic Format for the Personal Bibliographic System (Mar., p. 136). I submit that one of the greatest assets of the library profession with regard to automation is the widespread acceptance and use of standards for the interchange of bibliographic information. Our profession has taken the lead in this. Why then should we shy away from using a standard that we as a profession developed? If we show some leadership, the publishing industry will probably follow. After all, except for bureaucratic inertia, why favor one format over another as long as the format is attractive and consistent?

VICTOR ROSENBERG, ALA member, University of Michigan library school, Ann Arbor □

Data Phase Today

MOVING AHEAD, HELPING AMERICA'S LIBRARIES MEET THE CHALLENGE OF THE INFORMATION AGE.

There are important things you should know about Data Phase today.

Because today, we are offering unprecedented turnkey automation resources to the library community.

We're investing almost $4 million in the research, development and quality assurance programs that clearly give you more capability, more reliability and more flexibility than any other available system.

The Data Phase Research and Development staff is devoting more than 1000 hours per week in the development of the best software in the industry.

And we are expanding customer support programs to give you greater personal access to the information, expertise and technology that help you make the most effective use of your automation.

It is our goal to provide you with turnkey automation products of exceptional quality. Products that uniquely allow you to plan and build for the future. So that your automation dollars today are truly a long-term investment.

Data Phase is changing quickly. This ongoing series of articles is intended to keep you abreast of those changes, and give you a close up perspective of the many resources Data Phase offers your library today.

"TODAY, ONLY DATA PHASE S
FUTURE ISSUES OF LIBRARY AUTOM

"MOST LIBRARY AUTOMATION VENDORS TODAY ARE REHASHING OLD ISSUES," says Pat Pitkin, Director of the Wallace Library at the Rochester Institute of Technology. "But Data Phase seems to be addressing the real future issues of library automation."

"The real excitement of library automation is yet to come, especially once we really get into networking and develop more productive resource sharing. The ability for systems designed by different vendors to talk to one another will be a tremendous service for the sharing of information. I think that Data Phase has a sensitive insight into what needs to be done and how to do it."

Pat is President-elect of the Data Phase Users Group. She assumes the role of President this spring.

"DATA PHASE GOES THE EXTRA MILE TO HELP US," says Max Moore, project director at Oral Roberts University in Tulsa, Oklahoma. ORU had a big task facing it at the same time it began implementing its Data Phase system in 1978, and it credits Data Phase for helping the library make substantial progress.

"When we first implemented the system," says Max, "we were in the process of developing both a new Law Library and a new Health Sciences Library, both which involved extensive collection development. We had immediate online access to our new library's holdings."

Today, ORU is beginning a major upgrade of their system that will allow them to provide about 20 terminals to their students as a Public Access Catalog.

"DATA PHASE JUST COMES OUT ON TOP IN MOST ALL CATEGORIES," says Jim Gosier, Director of Harford County Library

'MS TO BE ADDRESSING THE REAL TION."

Data Phase shares a special partnership with the libraries that use our system. Every library's perspective is enlightening, so we felt that commentary from our users themselves would best illustrate the value that both our product design and our service philosophy bring to our partnerships. The following comments and excerpts are from interviews with our users.

(Maryland) of the stringent evaluation process the library used to evaluate vendors when it began its automation efforts three years ago.

"It's more user friendly, for one thing," says Jim. "And Data Phase has done an excellent job of integrating software. It's difficult for anyone who has a working knowledge of just one system to appreciate the vast improvement that this software has achieved over the others. The Data Phase system, for example, allows an infinite listing of delinquent account information, which we find very useful. It's details like this that are very impressive."

"I had a branch head comment to me yesterday that she didn't know what we would do now if we didn't have Data Phase."

"DATA PHASE HAS BY FAR THE BEST SOFTWARE, BY FAR THE MOST FLEXIBLE AND INTEGRATED," says Michael Garrison, Director of Quincy Public Library in Quincy, Illinois. How has the software quality affected the operation of the library?

"We have 10 different departments," says Michael. "Communications between the departments has always been time consuming and difficult. Now we have instantaneous communications because information is so quickly updated online. The system has taken enormous pressure off the reference librarian. And it has greatly upgraded the way patrons look at the circulation desk. Users are rightfully looking at circulation as a patron-oriented department of the library."

"Our circulation is definitely up. Fines have dropped. Materials are returned quickly. I have nothing but the highest praise for Data Phase."

Data Phase Today

SUPERIOR SOFTWARE REQUIRES EXTRAORDINARY EFFORTS.

FOR WHAT IT MEANS FOR YOUR LIBRARY, IT'S WORTH IT.

SOFTWARE IS INTRICATELY SPECIFIED, DESIGNED, PROGRAMMED AND TESTED CODE THAT TELLS THE COMPUTER TO PROCESS INFORMATION THE WAY YOU WANT IT TO.

Guaranteeing its quality requires a substantial investment in research and development. One that most companies aren't readily willing to commit to.

Data Phase spends an extraordinary 40% of its annual budget on research and development. Every dollar represents a return in the form of vastly superior automation products.

DATA PHASE'S RIGID DEVELOPMENT PROCEDURES ASSURE THE PROPER INTEGRATION OF THE "RICHEST SOFTWARE IN THE INDUSTRY."

Data Phase software provides you with substantially more integration, flexibility and functional capability. Designing such a system requires great discipline.

Our specification, software design and programming, and testing phases must adhere to rigid benchmark requirements.

In a field where standards are slow to evolve, our approach assures quality control throughout the entire software development process.

DATA PHASE HAS AN INDEPENDENT QUALITY ASSURANCE GROUP—AND THE TECHNOLOGY TO SUPPORT IT—TO ASSURE SOFTWARE RELIABILITY IN YOUR LIBRARY.

Our quality assurance group tests the software to its limit, before you do.

Simulating the transaction load found in a real library environment, they uncover problems that otherwise would be discovered on a library site.

It takes weeks to test any single function. Time to fix the problems we find.

But to assure the reliability of the software, it's necessary.

DATA PHASE'S 24-HOUR, 7-DAY-A-WEEK ONLINE SOFTWARE SUPPORT MEANS LESS DOLLARS YOU SPEND ON MAINTENANCE.

Data Phase is the only turnkey vendor providing its users with online dialup software maintenance 24 hours a day, 7 days a week.

Most problems are quickly resolved over the phone. Those that aren't can be more thoroughly diagnosed before an engineer is dispatched to repair the problem.

DATA PHASE'S DEDICATION TO TECHNICAL PROCEDURES AND TECHNOLOGICAL INNOVATION WILL PROVIDE MORE FUTURE OPTIONS FOR YOUR LIBRARY.

A turnkey vendor must be flexible in terms of both hardware and software in order to take advantage of new technology for its users.

Our use of unmodified Data General and Tandem hardware provides many more options to our customers. Unlike most other vendors, we are not bound to the equipment we manufacture, or just one product line.

And since our software is written in standard languages, it will easily interface with future technological innovations.

It takes great effort to coordinate the wide range of variables that our approach takes.

But there's no other way to assure that your investment today will help you meet the challenges of tomorrow.

AND, DATA PHASE PROVIDES YOU WITH THE EXPERTISE OF THE MOST EXPERIENCED PROFESSIONALS WORKING IN SOFTWARE DEVELOPMENT TODAY.

We have over 50 full-time professionals in one of the finest research and development groups to be found supporting any automation endeavor.

They spend thousands of man-hours a week designing, testing and supporting Data Phase software.

And they are dedicated to being a part of the finest turnkey system offered to the library community.

The effort that we have put forward in developing our product for your library is extraordinary.

But it's what provides Data Phase users with extraordinary software.

There's no doubt that it's well worth it.

Data Phase

AMERICAN LIBRARY LAWS
Fifth Edition, edited by **Alex Ladenson.**
A complete revision of all of the basic general library laws enacted by the state and federal governments and in effect as of December 31, 1982. Approximately 25% of the material is new, with many of the new or amended laws reflecting current concerns such as library security and automation. 0-8389-0400-9 x, 2010p. $110.00 cloth December 1983

REFERENCE SOURCES FOR SMALL AND MEDIUM-SIZED LIBRARIES
Fourth Edition, edited by **Jovian Lang** and **Deborah Masters.**
Since the third edition (1979) coverage has been expanded to include materials for use with children and young adults, significant out-of-print titles, and nonprint resources. 75% of the entries cite new titles or new editions. 0-8389-3293-2 Approx. 432p. $20.00 paper May 1984

MUSICALS! *A Directory of Musical Properties Available for Production,* compiled by **Richard C. Lynch.**
Provides concise information on approximately 400 shows: complete credits, availability of scores and recordings, addresses of licensing agents, plot summaries and production tips. A single source of answers to questions asked in public, school, and academic library reference rooms. 0-8389-0404-1 Approx. 288p. $19.50 cloth June 1984
A related title: **A BASIC MUSIC LIBRARY** *Essential Scores and Books* Second Edition, edited by **Robert Michael Fling** for the Music Library Association and published by ALA. 0-8389-0375-4 xii, 357p. $12.00 paper 1983

MAGAZINES FOR CHILDREN *A Guide for Parents, Teachers, and Librarians* and **MAGAZINES FOR YOUNG ADULTS** *Selections for School and Public Libraries,* by **Selma Richardson.**
Thorough evaluations and basic bibliographic and ordering information for 90 publications for children in grade 8 or under in the first book and equivalent information on approximately 600 publications for young people in grades 7 through 12 in the second.
Magazines for Children 0-8389-0392-4 x, 147p. $12.50 paper October 1983
Magazines for Young Adults 0-8389-0407-6 Approx. 464p. $22.50 paper May 1984

DIRECTORY OF INFORMATION MANAGEMENT SOFTWARE FOR LIBRARIES, INFORMATION CENTERS, RECORD CENTERS
published by Cibbarelli & Associates, Studio City, California.

Appearing for the first time in American Libraries

OUTSTANDING REFERENCE SOURCES OF 1983

A compilation of distinguished reference titles selected by the Reference Sources Committee of the ALA Reference and Adult Services Division

edited by K. M. Rosswurm

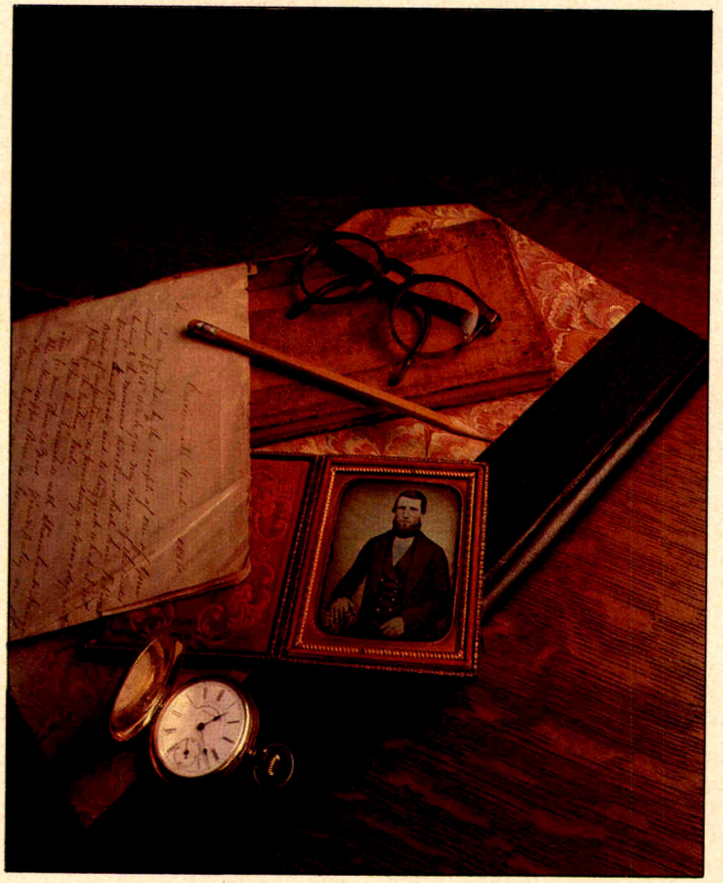
THIS YEAR'S LIST IS A SPECIAL event. It marks the first time this annual compilation appears in *American Libraries*, and the sources themselves are exceptional. They will rightfully take their place among the more than 1,700 works the Reference Sources Committee has chosen over the years.

The 25 previous lists of outstanding reference sources appeared in *Library Journal*; the committee itself was originally named the *Library Journal* List of Reference Books Committee. The RASD Board of Directors decided at the 1983 San Antonio Midwinter Meeting that this annual list should be published in an ALA membership journal. *American Libraries* was the logical choice. Now the RASD Committee selections, the product of many hours of volunteer effort, can be distributed freely to all ALA members in their copies of *AL*.

As reflected in the committee's selections, 1983 reference publishing was not especially deep, but it was strong. Some of these sources are sure to become classics. Of particular merit are legal and biographical works. Two multivolume legal encyclopedias are sterling products with wide audience appeal. Two of the selected biographical dictionaries, one on Afro-Americans and the other on dance, should take prominent positions on any reference shelf.

Other works of particular note are two sumptuous atlases, one of the oceans, the other of the Islamic world; a long-awaited Latin dictionary; a revision of the standard companion to American literature; the first few volumes of a most promising encyclopedia of the Middle Ages; and a wonderfully comprehensive guide to American foreign relations.

Though the committee believes that this list represents the year's outstanding reference sources, a number of notable works had to be excluded. Because the committee is to select the outstanding sources for *small and medium-sized college and public libraries*, some otherwise worthy, but too specialized sources were omitted. The most obvious example of this is the *Kodansha Encyclopedia of Japan* (Kodansha: Harper, 1983, $600).



A researcher beginning a family history may learn what can be found in government records by consulting the* Guide to Genealogical Records in the National Archives, *published by National Archives Trust Fund Board. Photo by Mike Mitchell, courtesy of the National Archives.

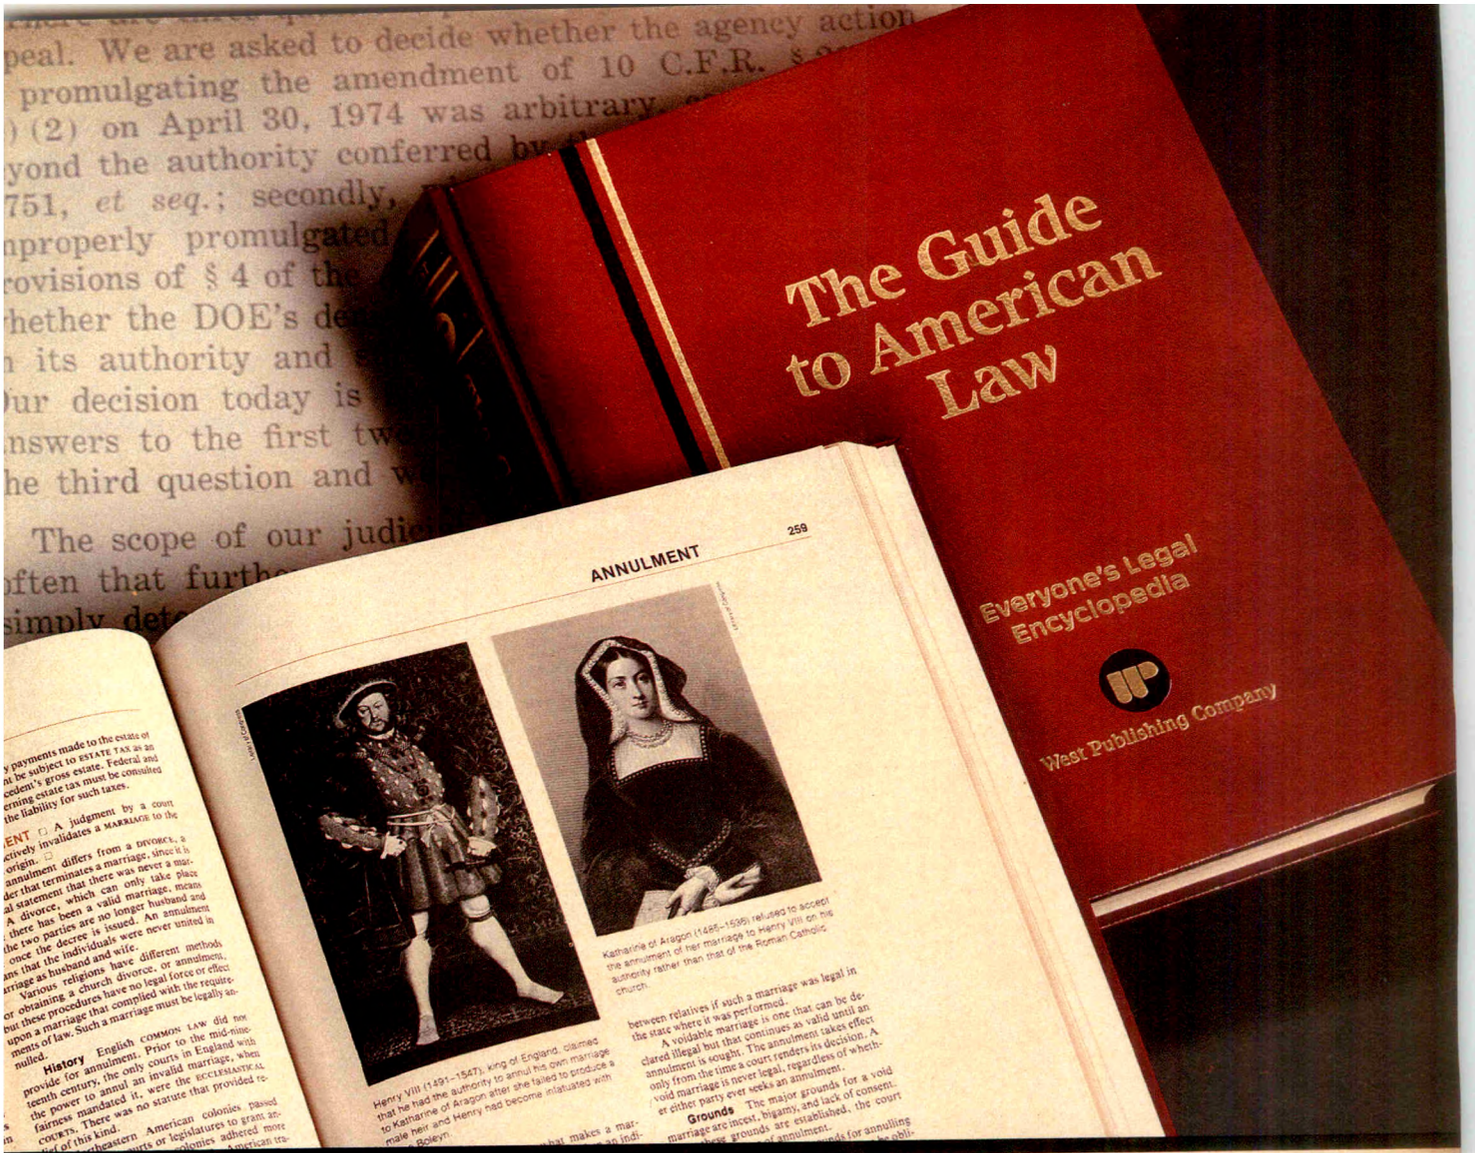
Also excluded from the list are works in a set or series, the initial volume of which appeared in a previous year. Falling into this category is *American Women Writers* (abridged edition, Unger, 1983, 2-vol. pa., $14.95). The original, unabridged version of this set appeared on the 1979 list of outstanding reference sources and is therefore not included this year.

Annuals, yearbooks, foreign-language publications, and new editions are also omitted unless there are major changes in their content or arrangement. Pamphlets, works of purely local or regional interest, and how-to manuals are excluded as well.

The committee seriously considers reference sources in nonprint formats, including online databases, though none are included on this year's list. Such nonprint formats must, however, be readily available to small and medium-sized public and college libraries and must provide unique information or access to information unavailable through printed sources.

Though computers are a boon to reference work, they can also be crutches for lazy publishers and bibliographers. In examining hundreds of sources, the committee discovered a good many computer-generated bibliographies that lacked a telling editorial hand, or, for that matter, any editorial hand at all.

This compilation contains something for almost every library. Clearly, certain works will be more useful in some libraries than in others. Collection development librarians will have to determine for themselves the appropriateness of each source for their clientele.



The Guide to American Law translates legalese into legal-ease.

West Publishing announces the first—and only—legal encyclopedia that doesn't require a law degree to understand.

Called The Guide to American Law, that is exactly what it is: a comprehensive, authoritative look at the laws, court decisions, principles, notable people and historic documents of America. And it is written in clear, understandable language.

The entire 12-volume set is available for a short time only at a special low pre-publication price. Send in the coupon below for more details and sample pages of The Guide to American Law.

Reference sources, cont. from p. 294

Unless otherwise indicated, all sources on the list were published in 1983. A number of titles from 1982 are included, however, because they were published too late for consideration by last year's committee.

The members of the 1983 Reference Sources Committee are: Frances Cable, Pennsylvania State University Libraries, University Park; LaVerne Z. Coan, University of Kansas Libraries, Lawrence; Betty A. Gard, Fritz Library, University of North Dakota, Grand Forks; Suzanne Holler, Dacus Library, Winthrop College, Rock Hill, S.C.; James R. Kuhlman, Ramsey Library, University of North Carolina at Asheville; Ellen Lodwick, Prince George's County Memorial Library—Laurel Branch, Md.; Ellen Safley, University of Texas at Dallas; Debby L. Simone, Gainesville Public Library, Fla.; Carol M. Tobin, General Reference Department, Princeton University Library, N.J.; and serving as chair, K. M. Rosswurm, Mount Vernon Public Library, N.Y.

The "Outstanding Reference Sources of 1983" will be on display at the Reference and Adult Services Division booth during the ALA Annual Conference in Dallas. After the conference, the books will be available for loan to any interested group for exhibits at regional, state, or local meetings for the cost of transportation. Those interested are encouraged to contact Andrew Hansen, Executive Director, Reference and Adult Services Division, American Library Association, 50 East Huron St., Chicago, IL 60611, for further information.

Religion and psychology

Atlas of the Islamic World Since 1500, by Francis Robinson. 238p. Facts on File, 1982 (0-87196-629-8), $35.

The essence of 500 years of Islamic civilization is captured in this beautiful book. The introduction describes Western attitudes toward Islam and provides a basis for subsequent discussions of Muslim historical periods and dynasties. The section "To Be A Muslim" depicts religious life, arts, and Islamic society in the modern world. Other special features include: a chronological table showing Islamic presence on various continents, a glossary, bibliography, gazetteer, and a superb index. From murals of the Safavid Empire to a contemporary pilgrimage to Mecca, this book illustrates the diversity of the Islamic people—one fifth of the world's population.

A Concordance to the Apocrypha/Deuterocanonical Books of the Revised Standard Version, derived from the Bible Data Bank. 479p. Eerdmans, 1983 (0-8028-2312-2), $35.

An essential work for anyone studying the literature that evolved between the time of the Hebrew Scriptures and the New Testament. This is the first concordance to the Revised Standard Version of the Apocrypha, or Deuterocanonical Books, in Ro-

In the Anastasis Mosaic, W. Vault San Marco, Venice, Christ triumphs over death through his descent into hell, redeeming the righteous who died before him. The depiction appears in the* Dictionary of the Middle Ages, *vol. 1, copyright © 1982 American Council of Learned Societies, published by Charles Scribner's Sons. Photograph courtesy of Byzantine Photographic Collection, Dumbarton Oaks, Washington, D.C.

man Catholic theology. Information is extracted from the Centre Informatique et Bible of Maredsous, Belgium. The volume contains entries for every word in the 1977 edition of the RSV Apocrypha/Deuterocanonicals. The only exceptions are words appearing so frequently as to be of little value in research. Biblical references and contexts of words are given in addition to the number of times a word occurs in the books; this figure is then converted to a percentage of the total number of words in those books. Accessibility is enhanced by the technique of grouping variant forms of one word under a consistent heading: e.g., "feet" is found under "foot." A unique tool, this concordance will become a standard in most libraries.

Dictionary of Classical Mythology: Symbols, Attributes, and Associations, by Robert E. Bell. 390p. ABC-Clio, 1982 (0-87436-305-5), $26.50; (0-87436-023-4), pa. $19.95.

The first stop for answers to such questions as "What name was given to the maidens who attracted sailors with their voices?" or "Who was chained to a pillar where an eagle daily consumed his liver?" Symbols, attributes, and associations surrounding characters in Greek and Roman mythology are organized alphabetically. Listings for concepts such as "fire," "locust," and "swiftness" are followed by concise descriptions of situations and characters. Cross-references add to the value of this work. An appendix contains personal names with references to main subject headings. Additional sections include alternate names of important gods and goddesses, and participants in heroic expeditions such as that of the Argonauts. Notes to primary sources are included. A well-organized, time-saving tool for all general reference collections.

Encyclopedic Dictionary of Psychology, edited by Rom Harré & Roger Lamb. 718p. MIT Pr., 1983 (0-262-08135-0), $80.

The field of contemporary psychology, specifically psycholinguistics, neuropsychology, and cognitive psychology, is covered expertly in this single volume. In addition, the editors give objective treatment to "fringe" movements such as folk and popular psychologies. A total of 1,300 signed articles, varying in length from one paragraph to more than a page, are augmented by bibliographies that include popular as well as scholarly books and journal articles. Cross-references are abundant and diagrams and tables enhance the text. The index defines terms and also serves as a means to locate major topics and concepts within articles. From "anorexia nervosa" to "est," this encyclopedic dictionary speaks to the specialist and the nonspecialist alike.

Magic, Witchcraft and Paganism in America: a Bibliography, compiled by J. Gordon Melton. 231p. Garland, 1982 (0-8240-9377-1), $36.

Compiled by an eminent scholar, this bibliography offers an overview of the "American magical community" from Colonial times to the present. Concise introductions to each section yield insights into the history and contemporary philosophy of witchcraft, ritual magic, and neopaganism that derive from Europe, Africa, and the Caribbean. Background material is also supplied for the magic religions of Afro-Americans and Hawaiians, and the folk magic of the Mexican Southwest. Sources include books, periodical articles, pamphlets, and booklets. Three sections add to the usefulness of the work: periodicals that are issued within the magical religious community, those works in New York Public Library relating to witchcraft in the U.S., and an author index. This bibliography is not only comprehensive, it is thoroughly researched and a welcome addition to reference collections.

Science and technology

The A to Z of Women's Health: A Concise Encyclopedia, by Christine Ammer. 481p. Cloth edition, Facts On File, 1983 (0-87196-785-5), $19.95; paper edition, Everest House, 1983 (0-89696-173-7), $13.95.

The purpose of this encyclopedia is to encourage women to take responsibility for their health by becoming aware of available care and treatment. The more than 900 entries, some several pages in length, cover a broad range of subjects including the maintenance of good health, principal diseases of women, weight control, and sexual behavior. The clear, concise language, dictionary format, numerous cross-references, and comprehensive subject index make this ideal for definitions and ready reference in both public and academic libraries.

Dictionary of Information Technology, compiled by Dennis Longley & Michael Shain. 379p. Wiley-Interscience, 1982 (0-471-89574-1), $34.95

Over 6,000 terms are defined in brief but readable style. Information technology is taken in its broadest sense to include printing, computers, photography, television, videotex, word processing, and business. Line drawings throughout are clear and relevant to the text. Generous cross-references and the inclusion of acronyms add to this work's usefulness. This should be the first dictionary to consult when explaining information technology jargon to the layperson.

The Encyclopedia of Alcoholism, by Robert O'Brien & Morris Chafetz. 378p. Facts On File, 1983 (0-87196-623-9), $40.

Devoted to a wide variety of topics relating to alcoholism, this new encyclopedia is useful for the professional, the layperson, and the student. The definitions, ranging from one sentence to several pages, are nontechnical, informative, and cross-referenced. Other features are an extensive bibliography and numerous tables and charts. 43 tables in the appendix provide such hard-to-find facts as the age limit for purchase and consumption of alcohol, public revenue from such beverages, and the cost of abuse. This will prove to be an excellent reference source for just about any college or public library.

Encyclopedia of Computer Science and Engineering, 2nd ed., edited by Anthony Ralston & Edwin D. Reilly, Jr., 1,664p. Van Nostrand Reinhold, 1983 (0-442-24496-7), $87.50.

An outstanding successor to the acclaimed 1976 edition, with over 40 percent of the material new or revised, this massive reference work is an excellent starting place for computer questions. It provides signed articles, most with bibliographies and illustrations, on topics such as hardware, software, languages, theories, applications, and people. In the alphabetical arrangement, subject access is facilitated by an excellent cross-reference structure, a listing of all entries according to category, and a detailed index. Six useful appendixes, including a multilingual glossary, are included. Offering clear, concise information for the nonspecialist, this work should be a welcome addition to any collection.

The Essential Guide to Nonprescription Drugs, by David R. Zimmerman. 886p. Harper, 1983 (0-06-014915-9), $27.50; (0-06-091023-2), pa. $10.95.

While other guides may cover the ingredients of over-the-counter drugs and their possible side effects, the author of this work has compiled a review of active ingredients used in categories of preparations and has added therapeutic claims

made by their manufacturers. He provides a breakdown of the approved, conditionally approved, and disapproved substances in each category. Ratings and approval notations were culled from a 10-year FDA review of every medically active ingredient being used in the U.S. In each of the 70 categories, a chart provides comparisons between products. An excellent work to enhance the numerous "brand evaluations" now on the market.

National Nursing Directory, edited by Kenneth E. Lawrence & Howard S. Rowland. 424p. Aspen Systems Corporation, 1982 (0-89443-805-0), $34.50.

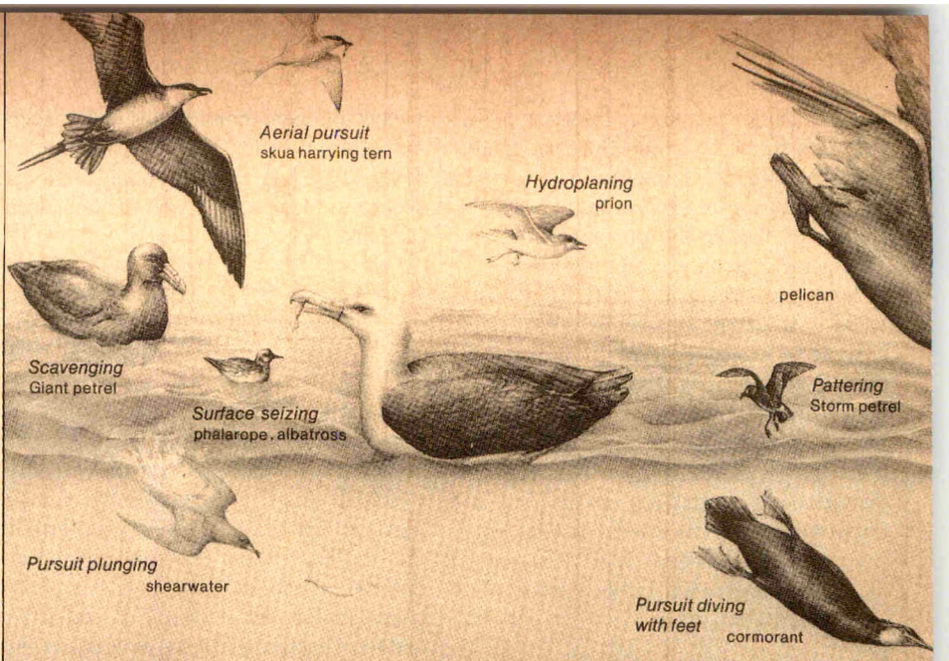
This work, a directory in every sense of the word, leads the reader to organizations for and about nursing. In 10 sections the user can find addresses for credentialing agencies (including the state nursing boards), outreach organizations, recruitment groups working with nursing personpower planning on a national and regional level, all the nursing schools in the U.S. (whether placed in hospitals or colleges), state health offices, and professional organizations. Especially appropriate for nursing schools and education and job information centers.

North American Horticulture: a Reference Guide, compiled by the American Horticultural Society; edited by Barbara W. Ellis. 367p. Scribner's, 1982 (0-684-17604-1), $50.

Academic, commercial, and amateur horticulturists will find in this tremendously expanded version of the *Directory of American Horticulture* (1977) a treasure trove of difficult-to-find information. Organizations, educational institutions, government programs, nomenclature authorities, gardens, other horticultural information, and reference materials are detailed in directory format. Within most chapters, arrangement is alphabetical by state; the index provides access by subject, organization, and botanical names.

Prentice-Hall Encyclopedia of Mathematics, by Beverly Henderson West & others. 683p. Prentice-Hall, 1982 (0-13-696013-8), $35.

To most students, mathematics has some of the qualities of a foreign language. In 90 clearly written articles, this encyclopedia takes the mystery out of such concepts as induction, measures, scientific notation, circle, and statistics. Most articles are a page or two in length and end with a few references for further reading. Examples in the text correspond to situations in everyday life (the computation of baseball batting averages illustrates a point on "statistics"). Indexes refer the reader to biographical, bibliographical, and topical information within the articles. A work suitable for high school and college-level readers.



Seabird feeding methods

The complete world of the sea, including ocean bird life is covered in the* Times Atlas of t *London. Published in the U.S. and Canada by Van Nostrand Reinhold. Reproduced by permissi

The Reader's Guide to Microcomputer Books, by Michael Nicita & Ronald Petrusha. 409p. Golden-Lee, 1983 (0-912331-00-3), pa. $9.95.

Microcomputer fans will have a difficult time wresting this evaluative tool from harried collection development librarians, who will be clutching it until the promised second edition arrives. With an alphabetic arrangement by title under six main headings, this guide provides bibliographic information, a rating between 10 and 100 for content and presentation, and a critical review for over 400 currently available microcomputer books. Completing the utility of this work are author, title, subject, and rating indexes.

The Times Atlas of the Oceans, edited by Alastair Couper. 272p. Van Nostrand Reinhold, 1983 (0-442-21661-0), $90.50.

In a stunning compilation of maps and photos accompanied by lucid text, this unique and comprehensive resource offers something for all readers, from students and sportsmen to naval strategists, businessmen, and marine specialists. The scope of the work is massive. Through the 17 thematic chapters, 11 appendixes, glossary, up-to-date bibliography, and excellent index, nearly all aspects of ocean research, resources, environment, uses, and policies are masterfully explored.

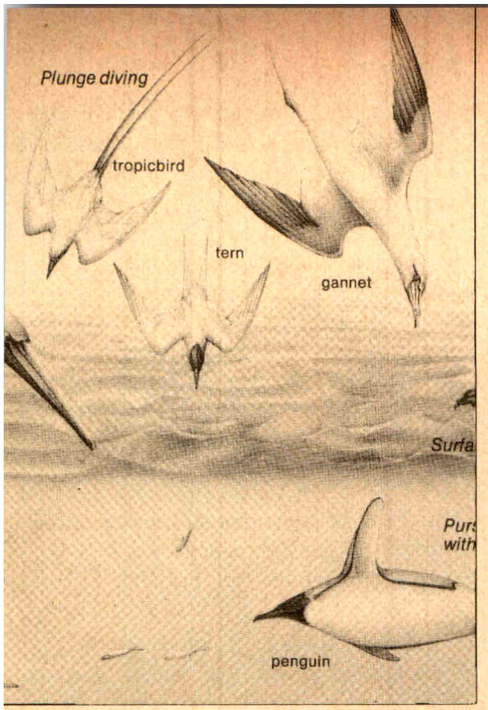
Social science, law, and business

Atlas of Demographics: U.S. by County, from the 1980 Census. 60p. Infomap, 1982 (0-910471-00-2), pa. $195.

This beautiful atlas, the first to present socioeconomic information at the county level, is based on the 1980 census. Population and housing information is presented on 16 colored maps, which also identify concentrations of socioeconomic characteristics. Most of the data is expressed in medians and percentages, and appears plotted on maps or in tabular form. This is an interesting and easily understood approach that will help to answer many reference inquiries.

A Dictionary of Social Science Methods, compiled by P. McC. Miller & M. J. Wilson. 124p. Wiley, 1983 (0-471-90035-4), $39.95; (0-471-90036-2), pa. $17.50.

In order to go beyond mere definitions, this dictionary attempts to illustrate and describe social science methods currently in practice. The compilers have refrained from including entries on theory and philosophy, emphasizing explications of issues and statistical techniques widely applied in or peculiar to the social sciences. One helpful feature of this resource is its elaborate system of internal cross-references, which allows for easy access to discussions of related terms or techniques. Black-and-white illustrations complement and clarify the text. This work will be of primary interest to academic libraries.



ceans. Copyright ©1983 by Times Books Ltd., f the publisher.

Encyclopedia of Crime and Justice, 4 vols., edited by Sanford H. Kadish & others. 1,790p. Free Pr.: Macmillan, 1983 (0-02-918110-0), $300 per set.

Constituting the first comprehensive work for this interdisciplinary field, the encyclopedia provides in-depth articles by known specialists. Besides including extensive bibliographies on every subject, each article ranges from 1,000 to 10,000 words and contains legal citations to decisions and statutes, and cross-references. The authors have taken great care to integrate all viewpoints of controversial issues in a clear, evenhanded style. Although the work is arranged alphabetically, the editors have grouped related ideas under one entry. This format allows for excellent coverage of the field. Other special features include a glossary, a table of cited legal cases, a subject-topical catalog of cases, and a superb general subject index. Will become the standard source for criminal justice studies.

Encyclopedia of Investments, edited by Marshall E. Blume & Jack P. Friedman. 1,093p. Warren, Gorham & Lamont, 1982 (now o.p.: 0-88262-713-9), $47.50. To be published as a paperback by Free Press in 1984.

Substantial articles approximately 20 pages each, written by experts, cover over 50 different types of investments. Included are arbitrage, books, art nouveau and art deco, American folk art, motion pictures, theatrical productions, rugs and porcelain, as well as the more typical U. S. Treasury bills, mutual funds, commercial paper, metals, futures, and money market funds. Chapters typically detail the basic characteristics of the investment, attractive features, potential risks, tax consequences, representative types of investors, and important factors in buying and selling. Each concludes with a glossary unique to the particular investment, a list of leading galleries, dealers and auction houses, plus recommended reading for additional information. This work will serve as an excellent introduction to a wide variety of investment opportunities. After selecting this book as an Outstanding Reference Source, the committee learned that it is, unfortunately, no longer in print in hardback. It will be available in paper (see citation).

The Guide to American Law: Everyone's Legal Encyclopedia, 3 vols. of 12, edited by Lucy Shot. Vol. I: A to Award. 481p. Vol. II: B to Closed shop. 468p. Vol. III: Closely held to Cruelty. 482p. West, 1983 (0-314-73224-1), $660 per set (pre-publication $540); also available at $45 per volume.

The Guide to American Law is the first encyclopedia written for people who need concise, comprehensible information about major theories, topics, and concepts of law. This 12-volume reference work, when completed by the end of 1984, will cover 5,000 varied topics, including contemporary legal issues, cases and statutes, landmark documents, fundamental rights and freedoms, and famous trials. Each volume is individually indexed and has cross-references and photographs. The last volume will fully index the entire set. This encyclopedia meets a heretofore unfulfilled need for answers to legal reference questions.

Information U.S.A., by Matthew Lesko. 990p. Cloth edition, Viking, 1983 (0-670-39823-3), $52; paper edition, Penguin, 1983 (0-14-046564-2), $19.95.

Do you need to file a Freedom of Information Act request for papers, adopt a wild horse, or acquire a permit to build a still? Need a cloud-seeding expert or an astronaut to speak at a civic function? These and thousands more traditional questions can be answered by this massive reference work. Arranged by department, agency, or branch of government, the directory provides information on sources and specialists in the federal bureaucracy. Many quasi-official agencies are also included. An organizational chart, addresses, and a catalog of major resources are provided for each group. A special sampler section acts as a source within a source, and lists regional federal centers, free items, and hotlines. *Information U.S.A.* is a fine companion to *The United States Government Manual*.

Marketing Information: A Professional Reference Guide, edited by Jac L. Goldstucker; compiled by Dennis W. Goodwin. 369p. College of Business Administration, Georgia State Univ., 1982 (0-88406-132-9), $60.

A wealth of information can be obtained from this concise and consolidated sourcebook on marketing. Arranged by subject, the first half is in directory format and includes associations, government agencies, consulting groups, continuing education programs, special libraries, and research centers particular to marketing. The remainder of the book consists of a source guide for the various subject divisions of marketing such as advertising, direct mail, franchising, retailing, and sales. Each section gives descriptive information on bibliographies, handbooks and manuals, directories, dictionaries, periodicals, newsletters, and databases. A valuable starting place for any marketing researcher, especially since the resource is due to be updated every two years.

Small Business Sourcebook: A Guide to the Information Services and Sources Provided to 100 Small Businesses . . . , edited by John Ganly, Diane Sciattara, & Andrea Pedolsky. 796p. Gale, 1983 (0-8103-1108-9), $95.

The title is justified! *Small Business Sourcebook* is designed for persons interested in going into business for themselves. From antiques to video, this directory categorizes and lists sources of information for a hundred different types of small business enterprises. Included are special sections on federal, state, and local assistance, trade associations, consultants, venture capital firms, published sources of information, government agencies, and universities. An excellent starting place for the novice entrepreneur.

Biography

Biographical Dictionary of Dance, by Barbara Naomi Cohen-Stratyner. 970p. Schirmer: Macmillan, 1982 (0-02-870260-3), $75.

Dance enthusiasts will welcome this substantial work. It covers 400 years of European and American dance through biographical sketches of approximately 3,000 notable figures. Major dancers, composers, designers, and impresarios are

profiled in readable articles, frequently supplemented by bibliographies. Entries for choreographers are extensive, with lists of major works accompanied by premiere dates. This is the perfect choice for a basic biographical source on the dance.

Dictionary of American Negro Biography, edited by Rayford W. Logan & Michael R. Winston. 680p. Norton, 1982 (0-393-01513-0), $50.

Taking as its subject Afro-Americans who met the test of "historical significance," this dictionary covers more than 600 individuals who died before 1970. It not only fills an important gap in black biography, but is also eminently readable. The signed entries contain an incredible amount of detail and are based on sound scholarship. Often manuscript sources were consulted and these, along with secondary sources, are listed with the entry. The biographies range from photographers to cowboys, from explorers to educators. The second printing includes a classified index. A must for even the smallest collection.

International Dictionary of Women's Biography, compiled and edited by Jennifer S. Uglow; Frances Hinton, asst. ed. 534p. Continuum, 1982 (0-8264-0192-9), $27.50.

What do Zelda Fitzgerald and Anne Frank have in common? They are often difficult to find in standard biographical dictionaries. Uglow, however, includes them and more than 1,500 other women, living and dead, in this useful compendium. While the scope of the dictionary is international, the emphasis is on Western women of the last two centuries. Brief, but well written, entries give basic facts and the woman's historical significance. Short bibliographies are often included and a subject index is provided. This book was originally published in England as the *Macmillan Dictionary of Women's Biography*. A good choice, even for libraries with large biography collections.

Index to Black American Writers in Collective Biographies, by Dorothy W. Campbell. 162p. Libraries Unlimited, 1983 (0-87287-349-8), $27.50.

The lives of approximately 1,900 living and deceased black American writers, including creative authors, journalists, and scholars, are now markedly more accessible. Alphabetically arranged, cross-referenced entries list the writers' dates, fields of activity, and references to substantive information found in 267 titles published from 1837 to 1982. Researchers will discover leads to specialized materials such as *Men of Mark* (1887), while students at all levels will find this a valuable aid in tracking black writers through such library standards as *Contemporary Authors* and the *Negro Almanac*.

Who Was Who in the Greek World, 776 B.C.–30 B.C., edited by Diana Bowder. 227p. Cornell Univ. Pr., 1982 (0-8014-1538-1), $29.95.

A companion to *Who Was Who in the Roman World* (Cornell, 1980, $29.95), an outstanding reference source of 1981. Bowder provides brief but scholarly descriptions of over 750 Greeks and important non-Greeks who figured in Hellenic history during this important period. An index identifies the names of those mentioned in the text, but without entries of their own. Many cross-references are provided. An outline of Greek history, glossary, maps, and six family trees are included. Short bibliographies are appended to the entries.

Language, literature, and music

Black Music in the United States: an Annotated Bibliography of Selected Reference and Research Materials, by Samuel A. Floyd, Jr., & Marsha J. Reisser. 234p. Kraus, 1983 (0-527-30164-7), $30.

A worthy companion to Eileen Southern's *Biographical Dictionary of Afro-American and African Musicians* (Greenwood, 1982, $49.95), one of last year's Outstanding Reference Sources. Floyd and Reisser direct the student of American black music to over 300 extensively annotated sources, including reference works, monographs, biographies, records, and printed music anthologies. Also listed and annotated are 50 special collections of black music. Additional aids for the researcher include author, title, and subject indexes to the text. Any library serving students interested in music will find this a valuable reference tool.

Critical Survey of Poetry: English Language Series, 8 vols., edited by Frank N. Magill. Salem, 1982 (0-89356-340-4), $350.

Students of poetry and librarians aiding their search for information will rejoice at this impressive survey of the genre. Alphabetically arranged articles, averaging 10 pages, on 340 English-language poets from Cynewulf to the present comprise the first seven volumes. Each entry presents the poet's dates and place of birth and death and a listing of major collections; discusses works in other literary forms; provides a short biography and critical analysis, and a brief bibliography of criticism signed by the contributing scholar. The final volume offers 20 extended essays on poetry by historical period and on subjects such as forms of criticism. A detailed poet, title, and subject index enhances and completes this attractive set.

The Oxford Companion to American Literature, 5th ed., compiled by James D. Hart. 896p. Oxford Univ. Pr., 1983 (0-19-503074-5), $49.95.

The first revision of this classic in 18 years adds more than 240 author biographies and 115 summaries of novels, stories, poems, plays, biographies, and histories to what was already the essential ready reference survey of American literature. Entries on nearly 600 authors and subjects covered in previous editions have been substantially revised while the text has been reset into a more readable format. From *Abbotsford and Newstead Abbey* to Salinger's Zooey Glass, the trail of American literature has become a little easier to follow.

Oxford Latin Dictionary, edited by P.G.W. Glare, 2,126p. Oxford Univ. Pr., 1982 (0-19-864224-5), $145.

After 50 years of preparation, this impressive dictionary has been completed and is now available in a one-volume edition. Librarians and scholars have been watching its progress since the first fascicle was issued in 1968. Following the general format of the *Oxford English Dictionary*, the work examines classical Latin from its beginnings through the second century A.D. It is an indispensable purchase for any library having users with even a passing interest in Latin or the history of language. It should be the first choice in a Latin-English dictionary.

Twentieth-Century Western Writers, edited by James Vinson & D. L. Kirkpatrick. 941p. Gale, 1982 (0-8103-0227-6), $95.

This guide to the lives and works of more than 300 living and deceased writers will intrigue devotees of western (as in *frontier*) literature. Each of the alphabetically arranged entries presents a brief biography, bibliographies of western and nonwestern works, a short list of critical studies, and a signed critical essay. Many living authors have contributed comments on their work. A title index and pseud-

onym cross-references enhance this useful volume.

History

Dictionary of the Middle Ages, 3 vols. of 12 (plus index), edited by Joseph R. Strayer. Vol. 1: Aachen–Augustinism, 661p. (0-684-16760-3); Vol. 2: Augustinus Triumphus–Byzantine Literature, 525p. (0-684-17022-1); Vol. 3: Cobala–Crimea, 680p. (0-684-17023-X). Scribner's, 1982–83, $70 per vol. (pre-publication $780).

All aspects of medieval studies—history, philosophy, religion, literature, art, and science—are covered in this encyclopedic dictionary. The entries range from short definitions (e.g. archivolt) to lengthy treatments (e.g. Arabic numerals). Designed to meet the needs of readers from high school students to specialists, this work provides a mass of information on an important thousand-year span of history, 500 A.D. to 1500 A.D. The bibliographies included stress English-language sources. If the first three volumes of this work are any indication, it is sure to become a standard source in the field.

Oscar & Associates

Completing their selections of the 1983 outstanding reference sources at ALA Midwinter in Washington, D.C., are, from l. to rt., (top row): Frances Cable, Suzanne E. Holler, James R. Kuhlman, Ellen D. Safley, and Debby L. Simone; (bottom row) LaVerne Z. Coan, K.M. Rosswurm (chair), Carol M. Tobin, Betty A. Gard, and Ellen Lodwick.

Guide to American Foreign Relations Since 1700, edited by Richard Dean Burns. 1,311p. ABC-Clio, 1982 (0-87436-323-3), $135.

This handsomely arranged, annotated, selective bibliography covers the international experiences of America from the Colonial era through the issues and personalities of 1981. Each of the 40 chapters is preceded by an introductory essay prepared by an eminent authority. The chap-

Magill Books

An ALA "Best Reference Source of 1983"

"The format is excellent, with contents and continuous paging clearly shown on spines. An excellent Index including authors, titles, and subject entries for topical essays appears at the end of volume 8.

"The wide experience of the editor, the generous representation of modern poets, and the extensive analysis recommend Critical Survey of Poetry *to academic and large public libraries."*
—Reference Books Bulletin

"The essays read smoothly and will be understandable to the intended audience of high school students and undergraduates ... The time is ripe for this remedial survey." —Wilson Library Bulletin

CRITICAL SURVEY OF POETRY

English Language Series

Edited by Frank N. Magill

This eight-volume set is a standard reference source for all poetry reference needs. It contains 340 essays on individual poets, 21 essays on the historical and critical background essential for reading poetry, and exhaustive indexing of poets by their given and pen names, titles of collections, titles of poems discussed, critical terminology, and literary movements.

1982/8 volumes; 3,800 pages/ISBN 0-89356-340-8/$350.00

Catalog Cards and *Librarian's Guide* supplied FREE

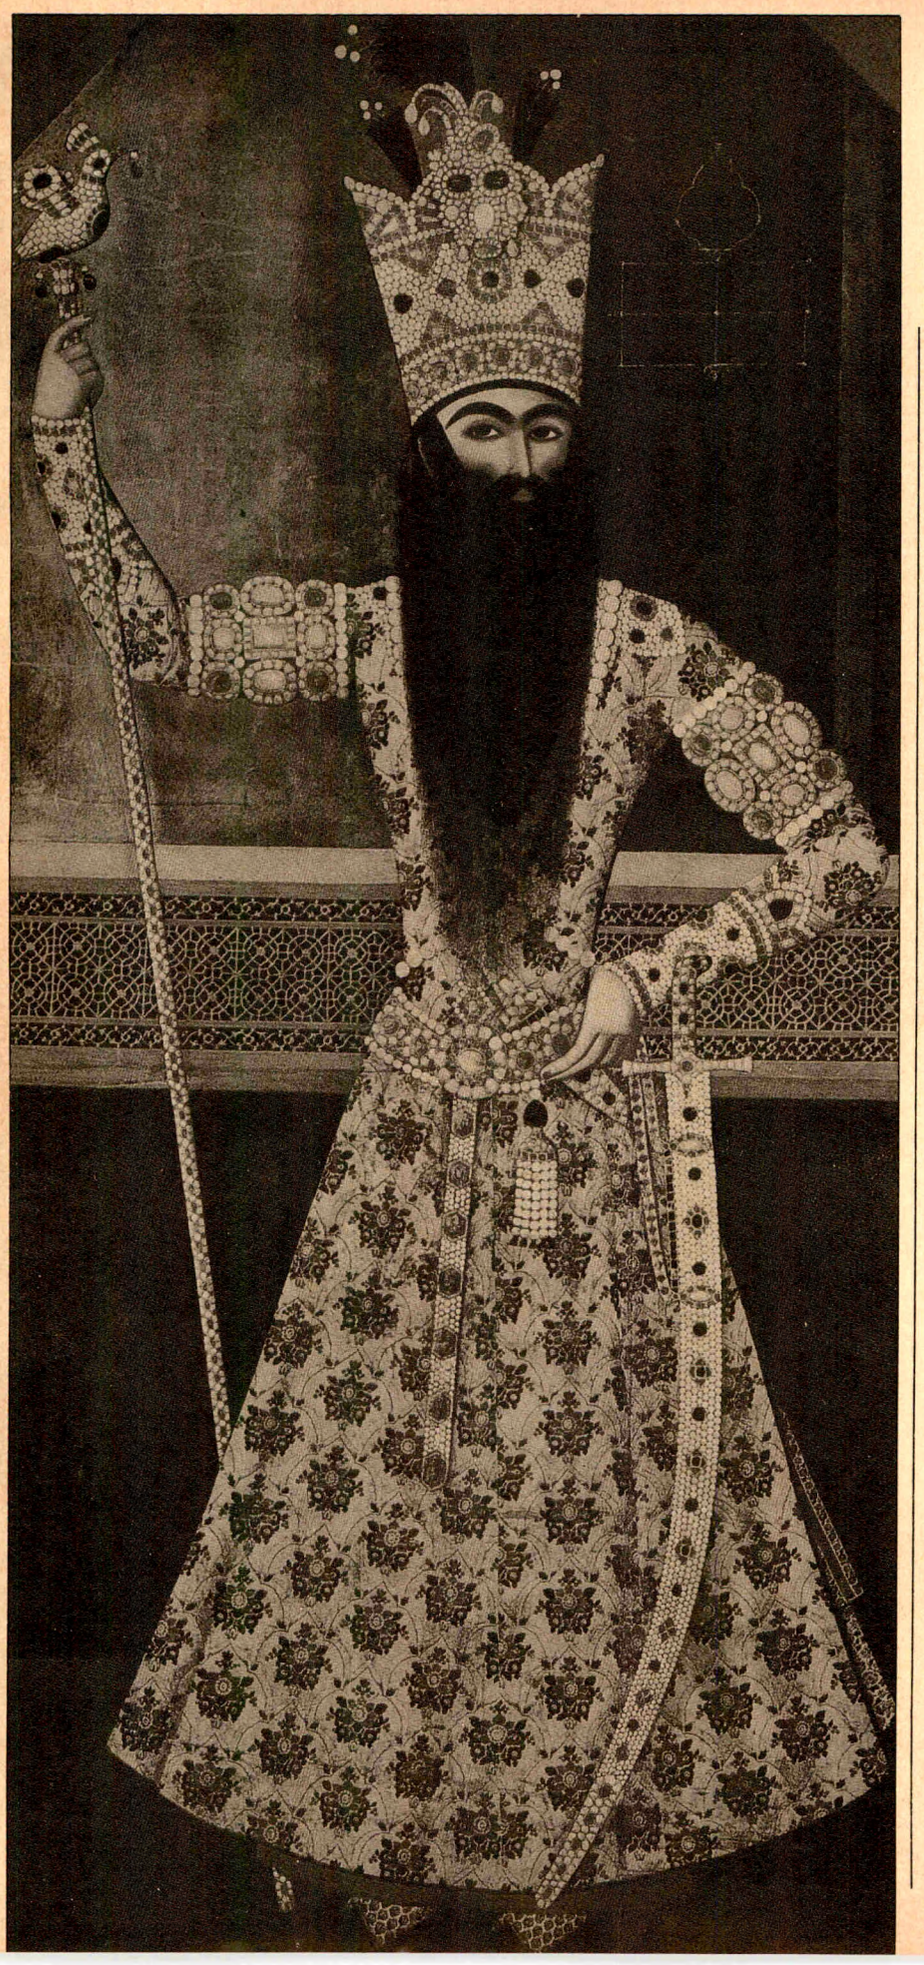
SALEM PRESS, INC.

P.O. Box 1097 • Englewood Cliffs, NJ 07632



Fath Ali Shah Qajar (left), who reigned from 1797 to 1834, was the last Iranian monarch confident in his world beyond the reach of Europe.

He is pictured in the* Atlas of the Islamic World Since 1500 *by Francis Robinson, copyright © 1983 Facts On File, Inc. Reproduced by permission of the publisher.

ters are arranged chronologically, and, for later periods, by major regions as well. Attractive features: plentiful references, maps, chronological charts, and subject, author, and individual indexes, plus the promise of a revision or supplement in five years. An important purchase for any institution.

Guide to Genealogical Research in the National Archives, United States, rev. ed., compiled by National Archives and Records Service. 304p. National Archives Trust Fund Board, 1983 (0-911333-00-2), $25; (0-911333-01-0), pa. $19.

A person beginning a family history may know that government records such as the census can be valuable, but may not know how to get hold of them, what information is needed to use them, and what can be found in the records. This extensively revised and enlarged version of the 1964 *Guide* will answer all these questions and more. An excellent introduction explains how to get started in genealogical research and how to use the *Guide* and the resources of the National Archives. Census, naturalization, pension, military service, and land claim records are described in detail and microfilm reel numbers are given. A basic source for any genealogical collection.

Louis L. Snyder's Historical Guide to World War II, by Louis L. Snyder. 838p. Greenwood, 1982 (0-313-23216-4), $39.95.

What distinguishes this work from other dictionaries of World War II is Snyder's emphasis on cultural and social history. The short entries not only identify, but also provide insight into the causes or consequences of an event or the significance of a person. For example, while other works may describe the bombing of Coventry, Snyder mentions the theory that Churchill chose not to save Coventry in order to protect Ultra, a code-breaking machine. The *Guide* is arranged A–Z, has liberal cross-references, includes bibliographies, and has an index. An excellent addition for even the largest World War II collections. □

What's wrong with reference:

Coping with success and failure at the reference desk

by William Miller

A malaise is abroad in reference departments everywhere. The annual reports make no mention of it, boasting instead of increasing numbers of searches performed, increasing numbers of reference books purchased, and increasing involvement of staff in committee work. The reports, however, do not mention the darker side of reference life.

THEY DO NOT MENTION THAT OUTDATED WORKS clog the reference shelves, and that new ones sit unknown and unused. They do not mention that many reference librarians are unfamiliar or uncomfortable with the newer technological resources, many of which are going untapped. The reports do not mention that reference librarians are becoming so frazzled by the press of their various commitments that they are increasingly short-tempered with each other and impatient with those they serve. Nor do the reports mention that many reference librarians promise more service during instructional sessions than they have time to deliver in actual practice, and that many reference librarians do not often enough take the time that would be necessary to deal thoroughly with people's requests for information.

These seemingly disparate symptoms have a common cause which goes beyond individual character flaws or individual examples of unprofessional behavior. Essentially, we have succeeded in pushing ourselves beyond our levels of comfort and competence. As a result of our commendable zeal in desiring to help others, we have reached beyond our grasp. Such a situation is not unique to reference departments; but it will be of critical concern to those of us who work in them, manage them, or are affected by them.

Not for aid or comfort

It is with great reluctance that I dare to mention this situation publicly, because it may open too many Pandora's boxes. For one thing, even those people who do not work very hard by any reasonable standard nevertheless believe themselves to be overworked. For another thing, those few people who enjoy the luxury of working in overstaffed libraries nevertheless believe their libraries to be understaffed. I do not mean here to give aid and comfort to such people.

On the other hand, too many administrators and librarians like to maintain the official gospel that they can add on a seeming infinitude of new services without cost of any kind, as though their library contained within it the capacity for unlimited growth, and as though staff had the capacity to do unlimited amounts of work. It is such thoughtless adding on of activities without any overall plan or system of priorities that bothers me.

We can all see the potential value of new services, we all like to be upbeat, and we all know that people can usually accomplish more than they think if only they try hard enough. I have little patience with "can't-do" attitudes; but I worry about those well-intentioned articles exhorting us to market our services more aggressively in order to create more business for ourselves.[1] Such advice would be fine for libraries with staff standing around, legs crossed, wondering why there is so little to do. In most large reference departments, however, and in many small ones, too, the problem is not lack of activity; it is overload, and the real problem facing us is not the generation of more business, but proper management of the business we have already generated.

The past few decades have seen a marked proliferation of services provided by reference departments as our consciousness of people's needs has expanded. A few decades ago we were not worrying about library instruction for much of anybody, let alone for minority and foreign students and the disabled. We were not worrying about the creation of collection-development statements for reference collections. We were not worried about how to keep abreast of online services, and we certainly were not worried about teaching ourselves and our public how to use a variety of new machines and search systems. We did not have extensive library handout and publications programs, orientation programs, and massive freshman workbook programs. And even a decade ago, I daresay, we did not have nearly as many people demanding reference service, both in person and over the phone, as we do today.

That we are doing so much more is a tribute to our concern and good intentions. It is not, however, a tribute to our foresight or planning. We have largely ignored the consequences of our reference sprawl, and it would behoove us to consider such consequences now.

Think of the personnel problems we have created. We have encouraged our bright and energetic people to jump on their horses and ride off in all directions at once. Having done this,

William Miller, who has written extensively on reference services, heads the Reference Library at Michigan State University Libraries, East Lansing. He holds the MLS from the University of Toronto, and MA and Ph.D. degrees in English from the University of Rochester. He chaired ALA's *Choice* Editorial Board in 1980-82 and has served with many other professional groups. The opinions expressed here, based on observations at numerous libraries and research in the literature, are his own.

they now find they have as great a time commitment as if they were senior administrators; to carry out their library responsibilities and professional association activities, they must give up evenings, weekends, and even vacation time. Even so, there is only a finite amount of time and energy the best and the brightest can give. Eventually they supernova and begin to burn out.[2] They feel burdened by the continuing obligation to maintain and expand innovative programs. Meetings, typing chores, and other obligations associated with new programs cut into the time available for traditional reference duties.[3]

Eventually, such people may begin to see themselves as the activists on the staff who carry the burden of innovation; simultaneously, they come to resent the demands of traditional reference duties. It is more energizing to work on new programs than to tell the ten-thousandth freshman how to find a magazine article. Ultimately, their successful outreach efforts may bring them little but frustration—and the resentment of colleagues who bear the brunt of the "business" they have created.

Staff fears

And what of those librarians who are less bright, flexible, energetic, and professionally active? Less committed to the provision of reference services? Barely able to cope with what currently exists—or unwilling to do so, perhaps, because they see what has happened to their more active colleagues—they do not volunteer for new assignments, task forces, or programs likely to involve additional work and pay little dividend. They are in many cases fearful of machines; they lack what have become the basic skills expected from entry-level reference librarians.[4] They may be uncomfortable with or terrified of the public contact associated with library instruction, and would need retraining to reintegrate themselves fully into the current mission of their department. The world has changed around them, and they have not been willing or able to change with it.

Instead of renewing these people's perspectives and skills, however, or transferring them to non-public duties, administrators have found it easier (in the short run) to pass them by at raise time, giving them clerical chores or an increasing share of reference desk time in order to free up their more energetic and involved colleagues for other activities.

Even when such people carry lighter workloads than their more active colleagues, they grow increasingly uncomfortable, resentful, and jealous as a result of their situation. They can tell that their contributions are less highly esteemed than those of the activists. Slowly, they become more truculent, uncommunicative, and unhappy. The negative perceptions become a self-fulfilling prophecy.

Thus we have the schism which has developed in so many reference departments. The energetic people perceive the others as lugubrious dead wood—people who do not care, who wish to drag the program down to their low level, and who carry their share of the department's workload grudgingly if at all. The less active ones, in turn, perceive the energetic as annoying prima donnas who are perpetually off to meetings and never around for the daily grind of reference desk work.

Of course neither stereotype is true, but the consequences of the conflict are becoming destructive. In truth, what both groups need is more time to talk, more time to work with old and new reference resources, and more time to give to patrons.

The problem is not lack of activity; it is overload, and the real problem facing us is not the generation of more business, but proper management of the business we have already generated.

Reference departments could stand to go on overnight retreats to clarify their members' assumptions and philosophies of service. All reference librarians who have been on the job for any length of time could well benefit from sabbatical leaves for study, intellectual growth, and personal renewal. But public librarians do not receive sabbaticals, and neither do most academic librarians, despite their variously defined status as faculty members.[5]

Can we continue to ignore our growing staff problems? Yes, if we choose to:

- deny the link between added new services and declining old ones, given steady-state resources;
- pretend it doesn't matter who works on the reference desk for how many years, since people never burn out at the desk, never become unsuited for it, and never need massive retraining in order to keep up with the quickly-changing demands.
- allow some bitter, outdated, and burned-out people to represent us to the public rather than retrain or rechannel such people.
- assume that the basic reference services we offer are of high quality, and ignore, at least officially, what each new unobtrusive study of reference service further demonstrates: that the actual quality of reference service being provided by most academic and public libraries today is probably not very good.[6]

Basic services imperiled

The lack of discussion or reassessment in light of the critical studies is not surprising. Few of us who are reference administrators wish to call attention to this quality-of-service dilemma, especially when dealing with our administrative superiors. We would much prefer to ignore or deny the reality, perhaps to spare ourselves embarrassment or because the dimensions of the problem are overwhelming to the point of despair.[7]

I strongly suspect that most reference librarians, if they were being honest, would admit to not probing often enough or deeply enough into the real heart of their inquirers' questions. For a variety of reasons, the chief of which are lack of time and energy, not to mention fellow desk workers' resentment at those who desert the reference desk post for too long while on duty, it is easier to accept questions at face value, pointing people to the *Readers' Guide*, the *Magazine Index*, or the card catalog and leaving them to shift for themselves.[8] We do this with a heavy heart, however, because we know that many if not most library users, even if they understand something about how libraries and information are organized, nevertheless need 5, 10, or 20 minutes of help from a more experienced person if they are to put together,

sequentially and successfully, all the steps involved in a search for information.

Finding information in a library, and particularly in a large research library, is difficult. In our library instruction sessions and workbooks we present straightforward, pre-programmed search exercises likely to be successful. We try to make using libraries seem easy and enjoyable. But the real world is a complex place, and application of even simple principles of library use is difficult and frustrating for the inexperienced.

Our reference departments are simply not staffed to provide the personalized service so many of our users would need to be successful, and too often dedicated librarians are forced to engage in triage, apportioning their time parsimoniously in order to give band-aid help to the greatest number, rather than in-depth help to the few. In such an atmosphere, unnecessary or artificial library use becomes as much an enemy as it is a friend. Do we really want to retain freshman workbook programs that increase the workload at already swamped reference desks?

I remain a strong advocate of library instruction, because we do need to teach those who have a need to be taught. But it seems that artificial instructional activities, not closely related to course work or research, must have limits. Librarians must always have known subconsciously that if such large-scale instructional programs never took root, chaos would result. Now it has. Things can only become "better," and thus worse, if libraries succeed in involving themselves in Nation at Risk-generated efforts to address the lack of basic skills endemic in our culture (and which, in truth, has been endemic in every culture).

CLEARLY, SOMETHING NEEDS TO CHANGE. JUST as clearly, however, the answer to our dilemma is not massive and indiscriminate retrenchment. Who would go back to the pre-instruction, pre-machine era? There is much of value in what we do today, and we need to preserve the advances we have made in the past decades. The question is how to do it in ways that make best use of staff and improve our quality of performance.

Approaches: 1) The staffing solution

The classic response to increased workload is increased staff. In past eras, libraries have often demonstrated the need for more staff and have had their way. But imagine an advertisement such as this one appearing in our professional journals:

Metropolitan University
Metropolitan, Ohio

As a result of its successful public service program, Metropolitan University Libraries has created the following new positions: 5 general reference librarians; 4 bibliographic instruction librarians; 4 database searchers; 2 circulation librarians; 2 inter-library loan librarians; 2 system librarians. Appropriate clerical and student staff are also being hired. For full job descriptions and more information about our highly successful and heavily-used library, please contact our Personnel Librarian.

A comparable advertisement appeared recently in my local newspaper. The booming advertiser, however, was a pizza parlor rather than a library. When the simple effects of growth

Chosen by ALA For "Outstanding Reference Sources 1983"

Guide to Genealogical Research in the National Archives

Interest in genealogy and local history is growing rapidly. More than 20,000,000 individuals in the United States are now conducting research into the histories of their families and communities. In response, the National Archives—official keeper of more than 1.3 million cubic feet of federal records—has revised and substantially expanded its GUIDE TO GENEALOGICAL RESEARCH IN THE NATIONAL ARCHIVES. Genealogists everywhere have been waiting eagerly for this edition, which expands and updates the 1964 GUIDE.

❧ The 320-page GUIDE is an indispensable tool for both sophisticated and beginning researchers. It can help them make a systematic review and selection among the wide range of federal records important to genealogists and local historians:

Census records
Military service and pension files

Ship passenger arrival lists
Federal land records and many more. . .

❧ The GUIDE includes references to more than 550 microfilm publications available from the National Archives. Numerous citations to secondary sources will also prove valuable to reference librarians in assisting their patrons to locate relevant materials. In addition, the GUIDE makes clear what records are not in the National Archives and frequently indicates where they might be found.

❧ An essential addition to any genealogy or local history reference library.

Can we continue to ignore our growing staff problems? Yes, if we choose to ignore what each new unobstrusive study of reference service further demonstrates: that the quality of service being provided by most academic and public libraries today is probably not very good.

for a pizza parlor are applied to a library, it is not only farcical, but it underscores the central fallacy inherent in the arguments of the library marketing advocates.

We can run our libraries like businesses, hire business officiers, and emulate businesses in any other way we please; the fact remains that most libraries are not businesses, and are not associated with businesses. We do not generate direct profits for our parent or funding institutions. We could conceivably bill our students or the general public for time spent and services rendered on top of what they are already paying in taxes or tuition—but political considerations make this unlikely. Though many libraries will pass along some costs to patrons in coming years, libraries will remain predominantly nonprofit in orientation.

In sum, we cannot demand staffing increases commensurate with the increases in activity we are experiencing and which we have in large part created for ourselves. When my local pizza parlor experienced a boom in sales, it also experienced an influx of profits that it could translate immediately into a number of new positions for coping with demand.

But booming libraries can quickly drown in their own success. At best they can generate modest budget increases through demonstrated excellence of service over time. But excellence counts for little when taxes and tuition are pushed to the limit, especially when library expenses gain notoriety for outpacing the rate of inflation.[9]

Regardless of the excellence of their services, therefore, most libraries cannot expect appreciable increases in human resources in the foreseeable future. It would be folly for reference staffs to expect salvation to come from this quarter.

2) The technological fix

What about technology—can it save us? Perhaps online systems of various kinds will solve our reference problems. Computer-assisted instruction, end-user searching, and syndetic structures within intelligent, front-ended, user-friendly online catalogs may some day answer people's basic questions and leave reference librarians free to tackle the more complex matters.

This notion is appealing, and if it were reality it might go far to help us. As yet, however, it is largely unrealized. One OCLC terminal may do the work of many catalogers, and one approval plan may do the work of many bibliographers; but provision of help to the public continues to be a labor-intensive activity that machines have not ameliorated.

Just the opposite may be true. Machines tend to give the public more complete and up-to-date information than they had access to previously. So far, so good. But each new machine also seems to generate additional questions and demand its own quotient of additional time for user instruction. Those of us who work extensively with a variety of machines and a multiplicity of online systems are discovering that although they expand, improve, and redirect many of our efforts, they do not really save us any time. Moreover, keeping up with their physical maintenance and remaining knowledgeable in their use are time-consuming tasks in themselves.

As I compose this article at a personal computer, however, it is clear that machines can help us now in at least one area—the clerical one. Librarians have always made wonderful clerks, and too many reference staff are still spending excessive time on clerical tasks simply because there is no one else available to do them. Library instruction, database searching, and massive handout programs have created a volume of record-keeping and typing chores beyond the comprehension of most library front offices. Even where the need is comprehended, libraries can no more hire necessary support staff than they can hire adequate numbers of librarians.[10]

Lots of typing has to be done these days, and much of it has to be done immediately, the first draft serving as final copy. If librarians continue to perform clerical chores, as they probably will, they can save some time by using computers for word processing, budgeting, report generation, and such other repetitive activities as reshuffling old sets of workbook questions for reuse.[11]

3) Alternative staffing arrangements

If we cannot hire more reference librarians, perhaps we can organize present staff more creatively. Many libraries have already tried at least these four staffing innovations:

- creation of separate information desks, staffed with students and clerical people, to handle directional and other straightforward questions;
- use of paraprofessional and student staff at the reference desk itself;
- expansion of reference desk staffing with librarians from other areas of the library;
- spinning off of ancillary activities and programs (e.g., ILL, database searching, and library instruction) as separate offices, allowing for specialization and greater efficiency than in the general approach.

Each of these innovations has potential benefit—and problems. Most problematic is the use of students and nonprofessionals at the reference and information desks. They can certainly be trained to screen out large numbers of simple and basic questions—but can they perceive the complex needs which so often lie just below the surface of apparently simple inquiries? Also problematic is whether new and innovative services, holding great potential for professional growth, should be spun off only to leave us with the traditional, desk-bound activities which have become so limiting or stultifying for some.

A mix of professional and other staffing, a core of common tasks, and a variety of activities for all librarians would seem

(Continued on p. 321.)

Twilight of the Czars

A microfilm collection of Newspapers from the Russian Revolutionary Era.

The Columbia University Libraries' collection provides a unique and vital source for students of Russian history, government, and culture. The collection (including Journal de Saint Petersbourg, RusskiiaViedomosti, and Drug) chronicles the revolutionary era in Russia from 1873 to 1927 resulting in the formation of the Soviet Union through critical works questioning Czarist leadership and the tenets of absolute rule.

Other major resources have been used to fill in any information that did not exist in Columbia University's holdings — thereby creating a comprehensive reference for the western world.

EMPLOYERS: Catch the CONFERENCE EXPRESS, A Job Listing for Conferees

Employers, place your newest "Positions Open" notices directly in the hands of thousands of professionally qualified job candidates at the ALA Annual Meeting in Dallas.

A special CONFERENCE EXPRESS classified listing will be printed quickly in June and handed out free to conference job seekers. The special one-time rate is $3.00 per line, about one-third the cost of our monthly LATE JOB NOTICES (membership discounts not applicable). Lines are approximately 100 spaces; 10-line maximum.

Here's a unique chance to advertise those job openings falling between our June and July/August issues. (Our regular July/August issue isn't mailed until Aug. 1.)

To be included, your position announcement must reach us by June 1. Send to:

AL CONFERENCE EXPRESS
American Libraries
50 E. Huron St.
Chicago, IL 60611

If you have any questions, please contact Beverly Goldberg, 312-944-6780 x326.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

NOTICE: Beginning in June, LEADS type size will increase slightly for better legibility; rates-per-line will remain the same. In effect, the cost-per-character will rise approximately 7%.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries*, 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

Get your June Leads *Express!*

Only $1/copy, *AL's Career LEADS Express* brings you next month's LEADS 3-4 wks. early. Send $1 check (made out to *AL Express*) & legal-sized SASE c/o LEADS Editor.

POSITIONS OPEN

ACADEMIC LIBRARY

Assistant acquisitions librarian (new position). Responsibilities of this position include ordering monographic materials for the library collections, revising bibliographic searching, assigning vendors, assisting faculty with book selection, corresponding with book dealers and publishers, supervising paraprofessional staff 2 evenings per week. Qualifications: ALA-accredited MLS required, paraprofessional experience in technical services preferred, knowledge of MARC format and library automation highly desirable. Applicants should have the ability to communicate well with faculty and library staff. Benefits: faculty status, Blue Cross–Blue Shield plan, Fla. state retirement, 22 days' vacation, no state or local income tax. Rank and salary: assistant university librarian, $14,023–$15,200. **Send a letter of application with complete resume and the names of 3 references by June 1** to: James H. Ranz, Associate Director for Technical Services, **216 Library West, University of Florida, Gainesville, FL 32611.** An equal-opportunity, affirmative-action employer.

Assistant acquisitions librarian. 2 new faculty positions with academic rank at the Pennsylvania State University Libraries will focus respectively on humanities/social science and science/technology subjects. They will report to the acquisitions librarian and work closely with the collection development coordinator and will be responsible for acquisitions coordination in all formats within subject focus. Initial broad subject assignment may be modified in future toward more specific subject areas. Both positions will have opportunities for expanded professional involvement in public services. Responsibilities: selection monitoring in line with collection principles; work with selectors and staff on collection goals, budgets, sources, evaluation, etc.; consultation with university faculty, campus librarians, fund administrators on acquisitions matters; monitoring of vendor and publisher performance, approval plans, and exchange relationships. Related duties include storage and withdrawal decisions; evaluation of circulation/interlibrary loan data, faculty and student requests, and potential gifts to determine collection needs; donor relations; book/serial budget and gift-fund monitoring; and participation in departmental planning. Qualifications: ALA-accredited MLS or equivalent; minimum 2 yrs.' acquisitions or collection development experience in academic or major public library (with some reference experience preferred); thorough knowledge of domestic and foreign book trade; knowledge of foreign language (German or Russian for science/technology, Western European for humanities/social sciences); excellent communication and public relations skills. Subject master's, familiarity with library automation desirable. Potential for promotion and tenure will be considered. Salary and tenurable rank dependent upon qualifications, $18,000 minimum. Available immediately. Liberal vacation; life, health, dental, and vision care insurances; state or TIAA/CREF retirement; optional insurance and tax-shelter plans; educational privilege. **Deadline: May 31**, or until a suitable candidate is identified. To apply, send letter of application, current complete resume, and names of 3 references to: Anne Minshall, **Box LDS, The Pennsylvania State University, E505 Pattee Library, University Park, PA 16802.** An equal-opportunity, affirmative-action employer.

Assistant director for administrative services. A staff position responsible for personnel administration, budget control, public relations, University Library Friends' activities, and other special projects and assignments. Accredited MLS and 2–3 yrs. of aca-

demic library administrative experience, including personnel and budget responsibilities, required. Must have superior planning, analytic, writing, and communication skills. Background in supervision, business systems, and/or building space planning preferred. Starting date Aug. 1. Salary: $20,000 minimum. Faculty status, tenure-track, TIAA/CREF. **Closing date July 7.** Send application, resume, and 3 references to: Robert S. Runyon, Library Director, **University of Nebraska at Omaha, Omaha, NE 68182.** Interviews available at ALA Conference in Dallas. The University of Nebraska is an equal-opportunity, affirmative-action employer.

Assistant director of libraries & head of public services (search reopened), Thomas G. Carpenter Library, University of North Florida, Jacksonville. Opportunity for a librarian with strong administrative talents and a desire to maintain active involvement in the daily operations of a medium-sized, publicly supported academic library. The assistant director assumes chief administrative responsibility in the absence of the director, functions as an advisor to the director in the coordination and evaluation of all library operations, and serves as the next-to-highest-level supervisor of a staff comprising 14 professionals and 23 support staff. Minimum qualifications include an ALA-accredited MLS, at least 9 yrs.' increasingly responsible professional experience, preferably in an academic/research library, and a strong record of administrative performance. The successful candidate should be able to demonstrate expertise in automation, budgeting, and personnel management, will have good written and oral communication skills, and will show evidence of an ability to relate well to colleagues and administrators at the local and state level. Salary is $26,000 minimum depending on qualifications. **Send letter of application, resume, and names of 3 professional references postmarked by May 31** to: Linda L. Smith, Chair, Search Committee, **University of North Florida, POB 17605, Jacksonville, FL 32216.** The University of North Florida is an affirmative-action, equal-opportunity employer.

Assistant head, periodicals department. Reporting to the head, periodicals department, the incumbent is responsible for assisting in the management of the periodicals department, which has a periodicals budget of $115,000 and receives approximately 2,000 subscriptions. Departmental functions include selection and acquisition, record keeping, bindery, and periodicals information desk. The incumbent will be responsible for online searches in science and technology, especially book and periodical selection in the sciences, and for microcomputer application in periodicals. Qualifications: ALA-accredited master's degree and undergraduate preparation in science are required. Additional graduate coursework in science or computer science is highly desirable. Post-MLS periodicals work experience is necessary. Salary range $20,000–$24,000 for 12 mos., tenure-track position. **Letter of application, resume, names, addresses, and telephone numbers of 3 current professional references should be sent by June 1** to: Henry R. Stewart, Director, **William Allen White Library, Emporia State University, Emporia, KS 66801.**

Assistant librarian. An **entry-level** position to perform a variety of professional assignments. Emphasis will be on CLSI circulation, OCLC cataloging, and database searching. Other assignments will include reference service and other duties as assigned. Applicants must be flexible enough to work a variety of assignments and be willing to be trained as necessary. Experience in library automation and CLSI is highly desirable. Some weekend and evening work required. ALA-accredited library degree required. Initial appointment may be above first step based on qualifications and experience. Permanent, tenure-track appointment. Personal interview required. Travel expenses must be paid by the candidate. Position will open Sept. 3. Current salary range $18,024–$24,756; an increase is anticipated July 1. **Submit letter of application and resume by June 29** to: Library Coordinator, Library Recruiting Committee, **California State College/San Bernardino, 5500 State College Parkway, San Bernardino, CA 92407.** California State College, San Bernardino, is an equal-opportunity, affirmative-action, Section 504, Title IX employer.

Assistant librarian—cataloger. The University of Arkansas at Monticello has an opening for assistant librarian—cataloger. Requirements: MLS from ALA-accredited school. Desirable qualifications: experience in original cataloging of monographs and serials using AACR2, LCSH and LC class.; knowledge of OCLC subsystems. Recent graduates encouraged to apply. Salary range $15,000–$18,000 for 12-mo. appointment. Fringe benefits. Applications taken until position is filled. Send application, credentials, and references to: William F. Droessler, Librarian, **University of Arkansas at Monticello, POB 3599, Monticello, AR 71655.** An EEO, AA employer.

Assistant librarians—2 entry-level positions. Work includes technical services using the 4 OCLC subsystems, liaison with academic depts., and reference service, possibly including bibliographic instruction. MLS from ALA-accredited school required. Preference given to those with academic experience. Salary range: $16,000 range. Starting date: Sept. 1. **Deliberations will begin May 15.** Send letter of application and 3 letters of reference to: Personnel Responsibilities Committee, **Crumb Library, SUNY Potsdam, Potsdam, NY 13676.** An equal-opportunity, affirmative-action employer.

Assistant science librarian, 12-mo., tenure-track appointment, available July 18. Responsible for general reference in the Science Library, a collection of 250,000 vols.; collection development in the biomedical, biological, physical, or earth sciences, depending on background and interests; management of computerized literature retrieval in the DIALOG, ORBIT, NLM, and CAS systems; management of library instruction and orientation, and overseeing interlibrary loan activities. Requires ALA-accredited MLS; strong coursework in an area of the sciences; successful coursework or library experience with computerized literature retrieval; and ability to interact effectively with students and faculty. Prefer a bachelor's degree in the sciences; library experience with scientific materials; experience with online literature retrieval in the DIALOG, ORBIT, NLM, and CAS systems; and a broad European-language background. Salary: $17,000–$21,000 dependent upon qualifications. Benefits: paid vacation of 22 days per year; paid sick leave of one day per mo.; participation in TIAA/CREF retirement program; individual health insurance provided. **Applications must be postmarked no later than June 11.** To apply, submit letter of application, resume, transcripts, and 3 letters of reference to: Sandra K. Gilliland, Assistant to the Dean, **University of Kansas Libraries, Lawrence, KS 66045-2800.** Qualified minorities are encouraged to apply. An equal-opportunity, affirmative-action employer.

Assistant special collections librarian: University of Nevada, Las Vegas. Special collections contains materials pertaining to southern Nevada, gaming industry, culinary arts, and the UNLV archives. Responsibilities: acquire, arrange, describe, and provide access to manuscript collections and archival records of UNLV; develop Nevada collection; participate in reference desk and exhibit schedule; and perform other duties as assigned. Qualifications: ALA-accredited degree and formal archival and/or manuscript training required; an advanced subject degree in an appropriate field such as U.S. history or political science and substantial experience in processing manuscripts preferred; interest in computer applications for cataloging and indexing archival and manuscript collections desirable; effective communication skills; ability to establish and maintain harmonious working relationships with staff, donors, and patrons; and ability to organize, analyze, and plan efficiently is essential. Minimum salary: $16,800. Tenure-track, faculty status, 12-mo. appointment, 24 days' vacation, fringe benefits. **Send letter of application, resume, and names of 3 references by May 31** to: Mary Dale Palsson, Director of Libraries, **University of Nevada/Las Vegas, 4505 Maryland Parkway, Las Vegas, NV 89154.** The University of Nevada/Las Vegas is an equal-opportunity, affirmative-action, Title IX, 504, 402 employer.

Associate Librarian II/bibliographic support librarian. Provides staff support at the professional level for clerical cataloging of monographs and serials; serves as staff assistant to the head, biblio-

Positions Open continued on p. 314.

Chief, Humanities and History Division
Columbia University Libraries

This position has primary responsibility for the public services activities and operations of one of 3 major divisions, including Columbia University's major collection of over 1.5 million volumes in the humanities and history, and pre-1974 social sciences. The division includes Butler Library, which houses the Instructional and SLS libraries, and the Music and Paterno libraries. The incumbent will report directly to the director of the Library Resources Group and is expected to ensure the effective continuation of current service activities while continuing the development of innovative services and programs, including: exploration with faculty of new approaches to information services; expanding access to computer-based data systems; and developing the application of video, audiovisual, and computer-based bibliographic instruction. The incumbent is also responsible for coordinating, with the staff of the Resources Group, collection development objectives to ensure an effective program of collection building, organization, and preservation.

Requirements for the position: accredited MLS or equivalent relevant experience required, graduate subject degree desirable. Demonstrated evidence of imagination, leadership, and managerial skills are essential and will be sought in all cases. Knowledge and understanding of the process of scholarly communication and of the complexities of a major research library are also essential. Candidates with 5 yrs.' administrative experience in pertinent areas of library operations will be sought, with special attention given to responsibility for public service activities. Salary ranges: Librarian II, $28,500–$37,050; Librarian III, $31,500–$45,675.

Deadline for applications is June 8. Applications, along with a list of 3 references and salary requirements, or nominations should be submitted in writing to: **Box 35, Butler Library, Columbia University, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

Chief, Bibliographic Control Division
Columbia University Libraries

The chief of the bibliographic control division is responsible for managing cataloging production and maintenance activities for the majority of collections of the Columbia libraries (except East Asian vernacular, Health Sciences, and Law) and for coordinating bibliographic control policies systemwide. The incumbent will report directly to the director of the Technical Services Group and work closely with the Services and Resources groups to ensure the effective development of bibliographic, reference, and support services to provide access to instructional and research resources, including continuing development of the online catalog. The staff of the division consists of 26 librarians, 36 supporting staff, and an FTE of 10 student assistants. The incumbent is a member of the libraries' senior staff Operations and Planning Council.

Requirements for the position: accredited MLS or equivalent relevant experience; demonstrated evidence of imagination, leadership, and managerial and analytical skills; broad knowledge of cataloging theory and practice; substantial knowledge of computer-assisted technical processing activities and systems; effective writing, speaking, and interpersonal skills; ability to work effectively in a complex, participative environment; knowledge and understanding of the process of scholarly communication in various disciplines. Candidates with 5 yrs. of relevant administrative experience will be sought, with special attention given to responsibility for cataloging activities. Salary ranges (through June): Librarian II, $28,500–$37,050; Librarian III, $31,500–$45,675.

Deadline for applications is June 8. Applications, along with a list of 3 references and salary requirements, or nominations should be submitted in writing to: **Box 35, Butler Library, Columbia University, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

HERITAGE:
CIVILIZATION AND THE JEWS

A soyfer prepares a torah scroll, 1912.
Courtesy archives of the YIVO Institute for Jewish Research.

Airing October-November, 1984, on local PBS stations.

Narrator and on-screen host: Abba Eban, former Israeli Minister of Foreign Affairs.

Produced by WNET/THIRTEEN (New York's Public Broadcasting Station).

Filmed for five years in 18 countries on four continents, HERITAGE covers more than 3,000 years of the Jewish people's development and their interactions with Western religions and cultures.

HERITAGE is not just one people's story, but the story of Western civilization. Its focus is universal, mixing Jewish history with the growth of Christianity, Islam, and Western secular traditions.

HERITAGE is filmed where it actually happened, from Mesopotamia to Jerusalem, from Tunisia and Morocco to France, Spain and Germany.

HERITAGE is not a dramatic recreation, but a 9-part documentary that uses period art and music, manuscripts, artifacts, sculptures, and rare film footage.

Through a grant from WNET, ALA is producing library programming materials for the series. On the following pages are a general bibliography and bibliographies for junior high school and high school aged readers.

This is the first library educational program supported on a major scale by public television—let's show what libraries can do!

Educational and outreach programs funded by the Charles H. Revson Foundation, the National Endowment for the Humanities and the Brookdale Foundation.

Program Synopsis

I. A People Is Born (13th century BC to 6th century BC). The birth of a new people—with their patriarchs, prophets and kings—amid the ancient civilizations of Egypt and Mesopotamia.

II. The Power of the Word (6th century BC to 2nd century AD). The consolidation of the Jewish people and their law; their creative interaction with the ancient Greeks and Romans.

III. The Shaping of Traditions (1st to 9th centuries AD). The destruction of the Second Temple, the rise of Christianity and Islam, and the emergence of Jewish culture in Europe.

IV. The Crucible of Europe (9th to 15th centuries). The turbulent and creative interplay of Judaism, Christianity and Islam during the Middle Ages.

V. The Search for Deliverance (1492-1789). The bustle of Jewish life in Amsterdam, Constantinople, Safed and Venice in the wake of the expulsion from Spain; the flourishing of Polish Jewry.

VI. Roads From the Ghetto (1789-1917). From the industrial and French revolutions to the struggle for Jewish emancipation, the rise of modern anti-Semitism and the birth of Zionism.

VII. The American Jewish Experience (1654-1932). The Jewish experience in the new world.

VIII. Out of the Ashes (1917-1945). The turmoil of the twenties, the fury of Nazism and the Holocaust; the beginnings of reconstruction and a glimmer of hope for the future.

IX. Into the Future (1945-present). The birth of the state of Israel, the plight of Soviet Jewry, relations between the Jews of Israel and those in other parts of the world, and the meaning of Jewish identity today.

General Bibliography

Dr. Maurice S. Tuchman
Librarian, Hebrew College
Brookline, MA

Blau, Joseph L. *The Story of Jewish Philosophy.* New York: Ktav, 1962. $8.85.
ISBN 0-87068-174-5.
A history of Jewish philosophy and thought, showing its continuities, changes and development from Biblical times to the 20th century.

Cardozo, Arlene R. *Jewish Family Celebrations: Shabbat, Festivals and Traditional Ceremonies.* New York: St. Martin, 1982. $17.50.
ISBN 0-312-44231-9.
An illustrated survey of Jewish holidays, customs and ceremonies, describing their origin and evolution, as well as their observance and celebration today.

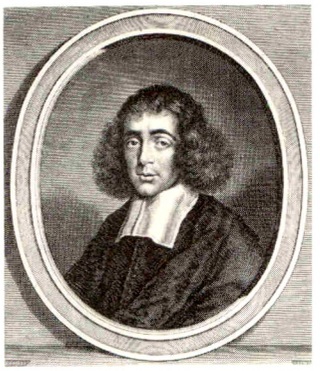
Yitshok Zandberg acting company in Lodz, 1910.

Courtesy archives of the YIVO Institute for Jewish Research.

The Concise Jewish Encyclopedia. Edited by Cecil Roth and Geoffrey Wigoder. New York: New American Library, 1980. $8.95. ISBN 0-452-00526-4.
An authoritative one volume encyclopedia containing short articles on Jewish life, thought, personalities and history.

Eban, Abba. *My People: The Story of the Jews.* New York: Behrman, 1968. $25.00 ISBN 0-87441-294-3.
An illustrated, readable and concise history of the Jews from ancient times to the post-World War II era.

Spinoza. Courtesy the library of the Jewish Theological Seminary of America.



Great Ages and Ideas of the Jewish People. Edited by Leo W. Schwarz. New York: Modern Library, 1983, © 1956. $6.95. ISBN 0-394-60413-X.
An analysis by six intellectual historians of the ideas and values in Jewish history and its relationship to world culture and civilization.

The Judaic Tradition. Texts edited and introduced by Nahum N. Glatzer. New York: Behrman, 1982. $9.95. ISBN 0-87441-344-3.
An anthology of the major works of Judaic literature from the post-Biblical era to the modern age.

Kravitz, Nathaniel. *Three Thousand Years of Hebrew Literature: From the Earliest Times Through the 20th Century.* Chicago: Swallow, 1971. $20.00. ISBN 0-8040-0505-2.
A history of Jewish literature from the Bible to modern times, that examines the forms of literature, the key figures, important works and their significance in terms of Jewish life and culture.

Roth, Cecil. *Jewish Contribution to Civilization.* New York: Hebrew Publishing Co., 1978. paper $3.95. ISBN 0-85222-217-3.
Short, readable essays on the contribution of the Jews to all aspects of world civilization, including art, music, literature, science, medicine, economics, public life, law and the voyages of discovery.

Steinberg, Milton. *Basic Judaism.* New York: Harcourt, Brace, Jovanovich, 1965. $2.95. ISBN 0-15-610698-1.
A clear discussion of the beliefs, ideals, practices and institutions of Judaism.

Readings For Individual Programs

Dr. Maurice S. Tuchman

I. A People is Born

Chouraqui, Andre. *The People and the Faith of the Bible.* Amherst: University of Massachusetts, 1975. $13.50. ISBN 0-87023-172-3.
An analysis of the culture of ancient Israel, describing daily life in its social, economic and political aspects, as well as discussing its religious and literary thoughts and accomplishments.

Comay, Joan. *The World's Greatest Story: The Epic of the Jewish People in Biblical Times.* New York: Holt, Rinehart, Winston, 1978. $22.95. ISBN 0-03-019861-5.
An illustrated, readable examination of the Hebrew Bible, describing the narrative, explaining the literary forms, religious and philosophical ideas and placing it in its historical and cultural setting.

Moscati, Sabatino. *Face of the Ancient Orient.* Garden City: Doubleday, 1962. paper $2.95. ISBN 0-385-01397-3.
A concise, illustrated survey of the major cultures of the ancient Middle East, that describes the history, religion, literature and art of the Sumerian, Babylonian, Egyptian, Persian and Israelite civilizations.

II. The Power of the Word

Nickelsburg, George W. *Jewish Literature Between the Bible and the Mishnah: A Historical and Literary Introduction.* Philadelphia: Fortress Press, 1981. $19.95. ISBN 0-8006-0649-3.
An analysis of the unique Jewish literature that developed in the intertestimental period, 400 B.C.-140 A.D., introducing the reader to Persian-Judaic, Hellenistic Judaic, Roman and early Christian writings in their historical and literary settings.

Sandmel, Samuel. *Judaism and Christian Beginnings.* New York: Oxford, 1978. $29.95. ISBN 0-19-502281-5; $9.95. ISBN 0-19-502282-3.
A clear presentation of the history, institutions and ideas of Judaism from 200 B.C. to 175 A.D. and its impact on Christianity.

Odessa Merchants. Courtesy the library of the Jewish Theological Seminary of America.

III. The Shaping of Traditions

Adler, Morris. *The World of the Talmud.* 2nd ed. New York: Schocken, 1963. $4.95. ISBN 0-8052-0058-4.
A short guide to the Talmud and its historic and cultural background, introducing the life and thought of the rabbinic sages and their religious and ethical teachings.

Parkes, James. *The Conflict of the Church and Synagogue: A Study in the Origins of Anti-Semitism.* New York: Atheneum, 1969. $6.95. ISBN 0-689-70151-9.
A clear analysis of the origins of the conflict between Judaism and Christianity, tracing its passage from the relationship of the Jews to the Roman world until the beginning of the Middle Ages.

IV. The Crucible of Europe

Abrahams, Israel. *Jewish Life in the Middle Ages.* New York: Atheneum, 1969. $7.95. ISBN 0-689-70001-6.
A survey of the social, economic and political life of the Jews during the Middle Ages, that discusses their relationship to both Christianity and Islam, their ethics, literary accomplishments and recreation.

Parkes, James. *The Jew in the Medieval Community.* New York: Hermon, 1976. $9.75. ISBN 0-87203-060-1.
A study of the political and economic status of the Jews during the Middle Ages, tracing their legal, communal and financial position in this society in relation to both the church and local governments.

V. The Search for Deliverance

Roth, Cecil. *The Jews in the Renaissance.* Philadelphia: Jewish Publication Society, 1978. $5.25. ISBN 0-8276-0103-4.
A study of Jewish participation in the Italian renaissance, examining their place in this society and the impact of the art, music, literature, theater, science and printing on Jewish cultural life.

Stern, Selma. *The Court Jew: A Contribution to the History of the Period of Absolutism in Central Europe.* New Brunswick: Transaction Books, 1984 (Fall). $29.95. ISBN 0-88738-019-0.
An examination of the place of Jews in the financial and economic history of the early modern period, containing an analysis of the Jewish community, forms of communal life and personality of participants.

Stillman, Norman A. *The Jews in Arab Lands: A History and Source Book.* Philadelphia: Jewish Publication Society, 1979. $9.95. ISBN 0-8276-0116-6.
A survey of Jewish social history in the Arab world from the time of Muhammad to the mid-19th century; both a narrative account and contemporary documents illustrating how Arabs and Jews viewed each other.

VI. Roads from the Ghetto

Sachar, Howard M. *The Course of Modern Jewish History.* Rev. enl. ed. New York: Dell, 1977. $10.95. ISBN 0-385-28172-2.

A street scene from the Jewish quarter of Nikolsburg, Moravia, ca. 1900.

Courtesy Leo Baeck Institute, New York.

A history of the Jews in the modern period, from the 18th century until 1950, surveying Jewish life, the interrelationship of world history and Jewish culture, the rise of Zionism, Jewish Socialism and anti-Semitism.

Zborowski, Mark and Elizabeth Herzog. *Life is with People: The Culture of the Shtetl.* New York: Schocken, 1962. $7.95. ISBN 0-8052-0020-7.
A sociological study of Jewish life in the small towns of Eastern Europe, describing the life cycle, the social and ethical mores and the people's view of the world.

VII. The American Jewish Experience

Learsi, Rufus. *The Jews in America: A History.* Rev. ed. New York: Ktav, 1972. $9.95. ISBN 0-87068-177-X.
A history of the Jews in the United States from the Colonial Period until 1971, containing maps and illustrations of some of the notable figures.

Sklare, Marshall. *America's Jews.* New York: Random House, 1971. $9.95. ISBN 0-394-31645-2.
A sociological analysis of the American Jewish community surveying the origins, social characteristics, family, education and religion of this group and the interaction between Jew and Gentile and between American Jewry and Israel.

VIII. Out of the Ashes

Bauer, Yehuda and Nili Keren. *A History of the Holocaust.* New York: Watts, 1982. $15.95. ISBN 0-531-09862-1; $12.95. ISBN 0-531-05641-4.
A history that places the Holocaust in its historical perspective, examines the acts and events that occurred, looks at resistance and rescue attempts and analyzes the immediate aftereffects—the events of 1945-1948 and the establishment of Israel.

Dawidowicz, Lucy S. *The War against the Jews, 1933-1945.* New York: Bantam, 1976. $3.50. ISBN 0-553-02504-X.
A thorough study of the Holocaust, showing the origins and growth of the ideology that led to the mass extermination of European Jewry, the actual plight of Jews to the German terror and Jewish behavior in crisis and extremity.

Patai, Raphael. *The Vanished Worlds of Jewry.* New York: Macmillan, 1981. $17.95. ISBN 0-02-595120-3.
An illustrated examination of the Jewish communities of Europe, North Africa, the Near East and India in the 20th century, describing the culture that existed before their destruction at the hands of the Nazis and their disappearance in Moslem countries after the establishment of Israel.

IX. Into the Future

Diaspora, Exile and the Jewish Condition. Ed. by Etan Levine. New York: Aronson, 1983. $20.00 ISBN 0-87668-601-3.
An anthology of essays and articles on the meaning of exile, the relationship between Israel and Diaspora, Jewish identity, the place of the Jews in the world and the future of the Jewish people.

Sachar, Howard M. *A History of Israel from the Rise of Zionism to Our Time.* New York: Knopf, 1979. $12.95. ISBN 0-394-73679-6.
The history of Israel, tracing the evolution of Jewish nationalism, growth of Zionism, establishment and development of Israel and its place in world Jewry and the world community.

RMG Consultants, Inc.
presents

LIBRARY AUTOMATION: A SEMINAR ON THE STATE-OF-THE-ART

Dallas • June 21–22, 1984
Fairmont Hotel
1609 Ross Ave., Dallas, TX 75201

Thursday, June 21, 9 am–5 pm

Planning and Buying Integrated Library Systems

—Alternatives available today
—Structuring planning and procurement processes

Choosing Microcomputers

—Stand-alone applications
—Integrated library system applications

Friday, June 22, 9 am–5 pm

The Online Public-Access Catalog

—Current capabilities and features
—Emerging trends
—Alternatives for microcomputer, minicomputer, and main-frame systems
—Applicability by size and type of library
—Relationship to an integrated library system
—Strategies for bibliographic data conversion

RMG is actively consulting with public, academic, and school libraries throughout the United States, assisting them in automation planning and in the evaluation and purchase of systems. The seminar will give participants the latest information on what is available in the library automation marketplace and how best to acquire it. Presentations will include information resulting from RMG's recent comprehensive evaluation of online public-access catalogs for the chancellor's office of the California State University. Rob McGee, president of RMG, will lead the seminar and present a price/performance analysis of integrated library systems. Dan Iddings, RMG, will discuss data conversion and system implementation. Howard Harris, RMG, and Neal Kaske, RMG and associate professor, Case Western Reserve University, will address the current state of online catalogs. Lawrence Woods, assistant director for automation, University of Notre Dame, will speak about choosing microcomputers and their applications.

INDIVIDUAL REGISTRATION: $100 for one day; $150 for both days.

GROUP DISCOUNT: Registration received in the same envelope for 2 or more persons from the same organization will be $75 per person for the same day, or $120 per person for both days. Call **312-321-0432** for more information.

Registration for RMG Library Automation Seminar in Dallas:

Positions Open continued from p. 311.

graphic support department. Qualifications required: MLS degree from ALA-accredited school; one yr.'s professional cataloging experience in both serials and monographs; experience in using automated cataloging system, preferably OCLC; knowledge of AACR1 and AACR2. Preferred: supervisory experience in copy cataloging environment; knowledge of one foreign language. Salary: $15,700 minimum; excellent fringe benefits. **For full consideration, submit resume and names of 3 references by May 31** to: Virginia Sojdehei, Personnel Librarian, **McKeldin Library, University of Maryland, College Park, MD 20742.** AA, EOE.

Associate Librarian II/head, EPSL circulation services. Responsible for supervision, maintenance, and development of Engineering and Physical Sciences Library circulation services, including service desk, course reserves, billing and recalls, and stack maintenance; supervision of 3 FTE, plus student assistants; represents EPSL circulation within UMCP library system. Qualifications required: MLS from ALA-accredited school; one yr.'s professional library experience with circulation system, preferably with automated components. Desired: demonstrated organizational abilities and demonstrated effective communication skills with staff and patrons. Salary: $15,700 minimum; excellent fringe benefits. **For full consideration, submit resume and names of 3 references by May 31** to: Virginia Sojdehei, Personnel Librarian, **McKeldin Library, University of Maryland, College Park, MD 20742.** AA, EOE.

Business/economics reference librarian. Along with 2 other reference librarians, the position is responsible for providing general and in-depth reference service in the Thomas J. Watson Library of Business and Economics. Duties also include performing bibliographic database searches, assisting in bibliographic instruction of students and faculty, conducting orientation lectures and tours for new students and faculty, assisting in the selection of reference material, assisting the librarian in the selection of serials and monographs, compiling bibliographies, conducting subject consultations, coordinating the selection and maintenance of the vertical files, and assisting in planning for the introduction of an online catalog. In addition to an accredited MLS, the requirements are a knowledge of business and economics sources, a working knowledge of bibliographic database searching, knowledge of at least one Western European language, and the abilities to work well with the public and to communicate effectively orally and in writing. Preferential consideration will be given to applicants with previous relevant professional experience. Salary ranges (through June): Librarian I, $18,000–$23,400; Librarian II, $20,000–$26,000. **Deadline for applications is June 15.** Submit resume, listing 3 references and salary requirements, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** Interviews will be conducted at the SLA Annual Conference. An equal-opportuntity, affirmative-action employer.

Catalog librarian at Arizona State University, where the ALIS III system is operational for circulation, and the public-access catalog for 400,000 full MARC records will be brought up in 1984. The successful candidate will catalog, classify, and provide subject analysis for monographs in the social sciences or humanities and for monographs and manuscripts in the Arizona, Arizona Historical Foundation, and special collections as well as supervise the paraprofessional(s) engaged in special collections cataloging. Required qualifications: ALA-accredited MLS; minimum of 3 yrs.' post-MLS original cataloging experience in a research library (preferably a large academic library); working knowledge of AACR2, LCSH and LC classification system; experience with OCLC or similar utility and its practice; working knowledge of minimum of 2 Western European languages; academic background and cataloging experience in the social sciences or humanities; good communication and organizational skills. Preferred: demonstrated successful supervisory and training experience and familiarity with special or archival collections cataloging. Salary: from $18,000 dependent on qualifications. **Send letter of application which addresses each of the qualifications listed above, a current resume, and the names, addresses, and telephone numbers of 4 current references by June 30 (postmark accepted)** to: Constance Corey, Assistant University Librarian, **Hayden Library, Arizona State University, Tempe, AZ 85287.** Copies of the complete announcement vacancy may be requested from the same person. ASU is a committed, equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

Catalog librarian. Librarian II (assistant professor) target level. Responsibilities: interpretation and implementation of AACR2, LCSH, DDC, MARC formats, and LC cataloging practice; assistance in determination of cataloging and catalog maintenance policy and procedures; OCLC cataloging operations including regular and retrospective conversion activities; syndetic structure of the catalog; original cataloging of printed materials; training personnel; some reference duties. Qualifications: master's degree from ALA-accredited program required. 4 yrs.' professional experience in cataloging and a second master's degree in a subject area required for appointment at rank of Librarian II. Competency in a modern Romance language desirable. Salary: dependent on education and experience. Minimum of $18,000 for 9-mo. appointment at rank of Librarian II. Summer conditional upon library needs. **Application deadline: June 8.** Send letter of application, resume, transcripts, and 3 current letters of reference to: James Zink, Director, **Kent Library, Southeast Missouri State University, Cape Girardeau, MO 63701.** An equal-opportunity, M/F, affirmative-action employer.

Catalog librarian. Responsible for cataloging of library materials in all formats: OCLC/AACR2/LC. Managerial, fiscal control of all OCLC procedures, including serials check-in, ILL. Supervision of paraprofessional staff in cataloging and serials. Additional part-time duties in reference and collection development, assigned to specified disciplines. Requirements: ALA-accredited degree in library or information science. Experienced enough to function with complete autonomy. Subject background in social sciences (teacher education) or science/technology desirable, along with knowledge of computer applications in libraries (other than OCLC). Minimum salary in the upper teens, depending on qualifications. 12-mo. contract. Send resume to: Theresa Taborsky, Director, **Wolfgram Memorial Library, Widener University, Chester, PA 19013.** An affirmative-action, equal-opportunity employer.

Catalog librarian. The University of Arizona Library is seeking a professional librarian to be responsible for the monographic cataloging of literature in French, German, and English languages. Related activities such as staffing a catalog information desk will also be assigned. This position reports to the head catalog librarian. The University of Arizona Library is a large academic research library with more than 2 million volumes and more than 4 million holdings in the main library system. The catalog department is one of 4 departments within the technical services division, employing 11 professional catalogers and 44 career staff. Requirements include: an ALA-accredited degree; working knowledge of AACR2; experience with LC classification and the LCSH; experience with OCLC or a similar utility; knowledge of French and German. Previous cataloging experience is preferred. The beginning professional salary is $16,500; a higher salary can be negotiated depending upon qualifications and experience. Professional librarians at the University of Arizona are academic professionals and voting members of the faculty, have 12-mo. appointments with 22 days' vacation and 12 days' sick leave and 10 holidays annually. Position is available July 1. **Deadline for application is June 15.** Send letter of application, resume, and the names of 3 referees to: W. David Laird, **University of Arizona Library, Tucson, AZ 85721.** The University of Arizona is an EOE, AA employer.

Catalog librarian, West Virginia University. Primary duty is original cataloging of monographs in a broad range of subjects. Will also serve as first assistant to the department head and will be responsible for the department in the absence of the head. The department has a staff of 11+ student assistants. The position requires the MLS from an ALA-accredited school and a minimum of 3 yrs. of professional cataloging experience. Facility with 2 foreign languages desirable. Starting salary: $19,356. Good fringe benefits. Apply to: Dean, **Library Services, West Virginia University, Morgantown, WV 26506.** An equal-opportunity, affirmative-action employer.

Cataloger: Northwestern University Library. Performs original and complex copy cataloging of monographs, including descriptive and subject cataloging, classification and authority work, using AACR2, LCSH, DDC 19, and the MARC bibliographic and authorities formats. Works cataloged may be on any subject, and in a variety of languages. Cataloging and authority work are performed on Northwestern's NOTIS (Northwestern Online Total Integrated System) library automation system, for inclusion in the union online catalog, and forwarding to the RLIN database. Some authority work may be performed for the Library of Congress's Name Authority Cooperative (NACO) program. Qualifications: MLS from an ALA-accredited library school, working knowledge of one or more foreign languages, preferably including German or a Romance language. Experience in library technical services, using an automated system, preferred. Salary: $16,000–$18,000. **Applications received by May 31 will be considered.** Send application and resume, including names of 3 references, to: Lance Query, Director of Library Research, Analysis, and Personnel, **Northwestern University Library, Evanston, IL 60201.** An EEO, AA employer.

Cataloger. Responsible for original cataloging and tagging of book and serial materials in assigned areas including sciences, technology, and social sciences. Requirements: ALA-accredited MLS; minimum one yr.'s professional cataloging experience; reading knowledge of one foreign language; working knowledge of AACR1/2, LC classification and LCSH; OCLC experience; prefer science/technology background or experience cataloging science/technology materials; ability to work well with others. Salary minimum: $18,000. Assistant professor rank. 12-mo., tenure-track appointment. Position begins July 1. **Application deadline: May 30.** Send resume and 3 letters of reference to: Gail J. Junion, Coordinator, **Cataloging Dept., Jerome Library, Bowling Green State University, Bowling Green, OH 43403.** An equal-opportunity, affirmative-action employer.

Cataloger, serials. Primary responsibilities include original as well as copy cataloging of serials (using LC or RLIN member copy) in English and European languages (other than those which use non-Roman alphabets) for humanities, history, and sciences. The incumbent will also be responsible for original cataloging of serial analytics. In addition to an accredited

Director of Milton R. Merrill Library and Learning Resources Center

Utah State University

Utah State University invites applications for the position of director of the Milton R. Merrill Library and Learning Resources Center. The successful candidate will direct the development, operations, and services of the library and learning resources center. Provide leadership in developing the policies and procedures to fully support university instruction, research, and extension goals. Provide assistance for future planning in information technology as it relates to campus communication, and solicit extramural funding to supplement state appropriations.

Qualifications include a terminal (doctorate) degree which may be in a discipline other than library and information science; and university administrative experience, innovation, and leadership in the conception and management of academic and academic-support programs must be evident. Ability to communicate and work with, and to maintain the confidence of, faculty, administration, and students. Knowledge of principles and practices of management, planning and budgeting, record of scholarly research, and/or creative activity and knowledge of the fields of library, information management, and learning resources including future directions and trends are required. Salary range $30,000–$60,000, depending upon qualifications. **Application deadline: May 15** or until a suitable applicant is identified. Position available July 1. Letters of inquiry may be addressed to the Search and Screening Committee at the address below. **A letter of application including a professional vita and names of 3 persons who may be contacted for appropriate professional and personal information must be received by May 15.**

Head, access/circulation services, John M. Olin Research Library. Duties and responsibilities: Cornell University is seeking an outstanding librarian as head of access/circulation services for its John M. Olin Research Library. As the largest unit of the Cornell University Libraries, Olin Library houses more than 2.5 million volumes and serves primarily faculty and graduate students in the humanities and social sci-

Project Librarian
Harvard College Library

Reporting to the associate librarian of Harvard College, the project librarian will plan and manage a 2-yr. project to survey, collect information, and catalog over 7,500 manuscript and archival collections located in more than 50 repositories at Harvard University and Radcliffe College.

The project librarian will be responsible for hiring, training, and supervising a staff of 5. In coordination with the University Planning Committee, he/she will devise a survey form and develop a schedule for the 2-yr. project. Other responsibilities include working with the Systems Office to develop procedures and a format for entering the descriptions and cataloging into machine-readable form, editing collection descriptions and planning for a series of printed index guides, compiling survey information and issuing reports on preservation needs and cataloging in each repository, and planning and coordinating the distribution of Harvard's manuscript cataloging to national utilities and databases. The project librarian is also responsible for explaining and publicizing the project and its various products to the Harvard community, as well as other users.

QUALIFICATIONS: MLS or equivalent experience; at least 4 yrs.' significant archival, manuscript, and/or research library experience; proven managerial and communication skills; and good knowledge of the MARC manuscript format required. Graduate degree in history or humanities desirable. The ability to work in a decentralized system with the cooperation and support of a diverse group of archivists, curators, and librarians will be important to success of this project. Salary negotiable depending on qualifications, with minimum of $20,600. Good benefits package.

Resumes to: **Karen N. McFarlan, University Personnel Librarian, Harvard University Library, Cambridge, MA 02138.**

An equal-opportunity, affirmative-action employer

---

ences. The head of Olin access/circulation services administers one of the largest departments in the Cornell system (24 FTE support staff and 18 FTE student assistants) and is expected to play a major role in development of the campuswide integrated library information system recently initiated with a $1.5 million grant from the J. N. Pew Trust. In addition to circulation, stack maintenance, and security, the department's responsibilities include management of a current periodicals collection, a rapidly developing preservation program, and the operation of Cornell's Annex Library. The department head, who reports to the Olin librarian, is expected to administer and publicize policies affecting physical access to the collections, to assemble and analyze statistical data reflecting use and growth of the collections, and to work closely with collection development personnel in developing effective collection management programs for Olin Library. The department head also serves as a central liaison with other library departments and with patrons. He/she is responsible for integrating the department's services with other information services provided within the Cornell University library system and must establish effective working relationships with faculty and students as well as library colleagues. Qualifications: 5th-yr. degree from an accredited library school plus 6 yrs.' experience in academic libraries, including active participation in public service functions and demonstrated managerial capability. Experience with library automation as applied to public services is essential, as is familiarity with preservation and collection management procedures in large research libraries. Evidence of initiative, leadership, and increasing supervisory responsibility are required. Candidate must have capacity to work effectively in an unusually complex organization and have demonstrated ability to motivate and direct highly diverse staff in providing effective user-oriented service. Preference will be given to candidates with knowledge of the information requirements of faculty and graduate students and familiarity with access/circulation procedures. Available date: July 1. **Closing date: June 1.** Salary: $23,500 plus, depending on qualifications and experience. Submit cover letter and resume listing at least 3 references to: Carolyn A. Pyhtila, Personnel Director, **235 Olin Library, Cornell University, Ithaca, NY 14853.** Cornell University is an equal-opportunity, affirmative-action employer.

Head, Architecture and Environmental Design Library at Arizona State University, where special collections include material on Paolo Soleri and Frank Lloyd Wright. The library is located within the college of the same name and is staffed by one professional (the head), one paraprofessional, and student assistants. The librarian reports to the associate university librarian for public services and is responsible for management of the branch, collection development, reference and research assistance, bibliographic instruction, and liaison with the college and the main library. Required qualifications: ALA-accredited MLS; at least 2 yrs.' public service experience in an academic or research library; demonstrated managerial, communication, and interpersonal skills; subject expertise in one or more of the fields of architecture, interior design, landscape architecture, urban design, and city planning. Preferred: administrative experience in a branch, unit, or department, preferably in an academic library. Salary: dependent on qualifications and experience ($21,000 minimum). **Send letter of application which addresses each of the qualifications listed above, a current resume, and the names, addresses, and telephone numbers of 4 recent references by May 31 (postmark accepted)** to: Constance Corey, Assistant University Librarian, **Hayden Library, Arizona State University, Tempe, AZ 85287.** Copies of the complete announcement of vacancy may be requested from same person. ASU is a committed, equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

Head, Chemistry Library (reannouncement). A 12-mo., tenure-track position at assistant librarian rank. Equivalent faculty status including participation in faculty governance. Salary dependent on qualifications and experience (minimum $20,000). Excellent benefits provide 1.75 days' vacation/one day sick leave per mo., retirement system, optional life and health insurance. Responsible to the associate director for the administration of the Chemistry Library, a branch library containing approx. 40,000 vols. in chemistry, biochemistry, and chem. engineering. Responsible for all aspects of service and development of the Chemistry Library, online searches, bibliographic instruction, and supervision of a part-time library assistant, 2 graduate assistants, and student assistants. Requires an ALA-accredited MLS degree. Preference given to candidates with degrees in chemistry or related science subjects or equivalent experience in science libraries; experience with online database searching and library instruction highly desirable. **Apply by June 30** to: Lance E. Dickson, Acting Director, **Middleton Library, Louisiana State University, Baton Rouge, LA 70803-3300.** LSU is an equal-opportunity university.

Head, Graduate Library, University of Michigan Libraries. This position, reporting to the associate director for public services, is responsible for the coordination of the following public service units in the Graduate Library: circulation, reference, government documents, document delivery (including interlibrary loan), area programs, and the Library Science Library. The head of the Graduate Library will coordinate activities and communication among Graduate Library public services units as well as with other divisional libraries, be a primary liaison with faculty, and have coordinating responsibilities for collection development, and for the management activities for Graduate Library public services. Qualifications: managerial experience in a research library with demonstrated success in the areas of oral and written communication and analytical, budgeting, and planning activities. Strong collection development experience. Knowledge and experience with automation and a good grasp of issues and trends facing research libraries. Demonstrated success in working with faculty. ALA-accredited MLS required and an advanced degree in the humanities or social sciences desirable. Minimum salary of $35,000. **Applications received by June 30 will be given first consideration.** Apply to: **Library Personnel Office, 404 Hatcher Graduate Library, University of Michigan, Ann Arbor, MI 48109.** The University of Michigan is a nondiscriminatory, affirmative-action employer.

Head of bibliographic instruction services. Faculty, tenure-track position available in the university library. The head of BI services, a new position at the university library, coordinates the activities of librarians active in instruction; guides the development of the university library BI program; and reports to the director of libraries. Responsibilities include the examination of programs at other institutions, the application of computer technology and AVs in BI, and the recommendation of a multiyear, phased development for the library's BI program. Required: ALA-accredited MLS; 5 yrs.' relevant library experience; second subject MA or PhD preferred; demonstrated leadership and supervisory skills. Appointment at assistant librarian rank or above (equivalent to assistant professor). Minimum salary $18,500, depending on education and experience. USA Libraries are a member of SOLINET/OCLC, and operate NOTIS, an integrated library system with a full online catalog. Benefits include: 20 days' vacation, university-subsidized insurance, state retirement, TIAA/CREF option. **Submit resume and names of 3 references by June 1** to: Patricia G. Ramage, Chair, University Library Search Committee, Library Administration, **The University of South Alabama, Mobile, AL 36688.** An equal-opportunity, affirmative-action employer.

Head of serials department, University of California, Irvine. Appointment at associate or librarian rank depending on qualifications. Associate salary range $22,776–$32,796. Librarian salary range $30,612–$42,444. Cost of benefits equal to approximately 40 percent of salary. Benefits include 24 vacation days and 12 sick leave days per year, retirement plan coordinated with Social Security, reductions in incidental fees, and a variety of group life, medical, and dental insurance plans. Responsibilities: organize and administer department of 3 librarians and 14.5 FTE support staff with a subscription list of approximately 11,000 active titles. Supervise departmental bibliographic searching, ordering, cataloging, records, receipt, payment, binding of serials, and the collections in current periodicals room and microform room. Select, train, and evaluate staff employees. Initiate reviews for 3 librarians. Primary responsibility for conversion of serials records to online technical processing system (ORION) and online operation of processing functions. Acts as library liaison with systemwide office for library automated serials functions. Serves as member of Council of Department Heads. Qualifications: graduate degree in library science. Demonstrated skills and knowledge in serials work in an academic library, with increasing levels of responsibility. General knowledge of publishing, acquisitions, records control, cataloging, and binding of serial publications. Demonstrated administrative skills in planning, organizing workflow, and setting priorities, showing good judgement and flexibility. Demonstrated ability to work effectively with people at all levels. Good understanding of interrelatedness of all library operations. Demonstrated ability to relate to overall library goals, to work toward established goals and objectives, to gather and analyze data, and to prepare reports. Strong oral and written communications skills. Familiarity with OCLC or the equivalent, with MARC serials format, and with automated serials control. Evidence of university service, research, or participation in professional associations. Desirable are familiarity with one or more European languages and second master's degree. **Deadline for receipt of letters is June 1.** This is an extension of an April 1 deadline. Candidates who have already responded will remain under consideration. Send letter, resume, telephone numbers, and names and addresses of at least 3 referees to: Michael J. MacInnes, Acting AUL for Personnel Services, **Main Library, UC/Irvine, POB 19557, Irvine, CA 92713; 714-856-7115.** An affirmative-action, equal-opportunity employer.

Head of technical services. Primary responsibilities: automated procedures, coordination of cataloging, acquisitions, and serials as well as planning for online catalog and circulation systems. Purchasing and fiscal control of materials budget. Additional duties: part-time reference, some nights and weekends. Collection development in specified subject areas, faculty liaison. Participate in long-range planning, use studies, and other specific projects. Requirements: ALA-accredited library degree. Additional graduate degree (or extensive experience) in computer science and/or administration. Familiarity with academic library issues essential. 12-mo. contract. Salary: minimum $20,000, depending on qualifications. Send resume to: Theresa Taborsky, Director, **Wolfgram Memorial Library, Widener University, Chester, PA 19013.** An affirmative-action, equal-opportunity employer.

MARCFICHE is used by 1,500 libraries as the source of cataloging data. MARCFICHE includes total cumulative indexes to more than 17 yrs. of LC Cataloging. For information on free trial use, phone 800-624-0559, or write MARC APPLIED RESEARCH COMPANY, POB 40035, Washington, DC 20016.

WORD INDEX TO BOOK TITLES. Every word in the title of most books arranged alphabetically in context. The 4-million-entry "WORDS" index costs $24 delivered on standard microfiche. Order toll-free 800-624-0559 from Library Corp., Richwood Hall, Charles Town, WV 25414.

LIBRARY NEWSLETTERS. Let a professional librarian/artist/writer produce camera-ready copy for your newsletter. Rates and samples, $1. Library Newsletter Service, Box 637, Belleville, NJ 07109.

LABELS . . . BAR CODE & OCR LABELS: phototypeset, supporting formats for all automated library systems. Labels have a protective laminate coating. For a competitive price quote, write or call: MDSI, Dept. AL, 115 S. Oak St., Falls Church, VA 22046; 703-532-8128.

PATRON & I.D. CARDS . . . All types, plastic and vinyl. Call collect or write: ID RECALL, 306 Kennedy Rd., Los Gatos, CA 95030; 408-356-5462.

BAR CODE LABELS AND PATRON CARDS with preprinted bar codes or OCR imprints. Large and small quantities. Customized. Economical. Prompt delivery. Contact: John Morrison, DATA SYMBOLOGY, P.O. Box 18077, Rochester, NY 14618; 716-442-3152.

FILE CONVERSION AND BIBLIOGRAPHIC DATABASE MANAGEMENT. MARC-based, cost-effective services for libraries. Call or write AMIGOS Bibliographic Council, Inc., 11300 North Central Expwy., Suite 321, Dallas, TX 75243; 214-750-6130.

BAR CODE/OCR LABELS to support all automated circulation and inventory control systems. Highest quality phototypesetting and adhesive products, first-scan readability, competitive prices, and prompt delivery. Toll-free outside California 800-227-2121, collect in California 415-232-6200 or write: Optical Scanning Sales, Data Composition, Inc., 1099 Essex, Richmond, CA 94801-2185.

LONG-RANGE PLANS demand PR today! Get highly reviewed *SPARKLE! PR for Library Staff* ($5) by Virginia Baeckler. SOURCES, 26 Hart Ave., Hopewell, NJ 08525.

TEACHING OPPORTUNITIES OVERSEAS. Vacancies in all fields, on all levels. For details, please send a self-addressed, stamped, long envelope to: FRIENDS OF WORLD TEACHING, P.O. Box 1049, San Diego, CA 92112-1049.

PUT SEARS TO WORK. 1,200 "see" and "see also" cards plus Manual/List of Headings with DEWEY numbers. From Sears 12th ed., $49.95. Woods Library Publishing Co., 9159 Clifton Park, Evergreen Park, IL 60642.

***THE ONE-PERSON LIBRARY:* A NEWSLETTER FOR LIBRARIANS AND MANAGEMENT.** Professional isolation is one of the major problems of working alone. We want to change that. This new newsletter is informal, informative, and above all, quick and to the point. Charter subscriptions (one yr.—12 issues) for $35., a saving of over 20%. Prepaid orders to: OPL RESOURCES, LTD., POB 948, Murray Hill Station, New York, NY 10156.

MEXICAN monographs and serials. Government publications. Free referral service and book lists. Selective blanket order service for academic libraries. Selection and distribution of single or multiple copies of textbooks. MACH, Apartado Postal 13-319, Delegacion Benito Juarez, 03500, Mexico, D.F.

BAR CODE LABELS for all library automated circulation systems. Guaranteed to exceed library bar code specs for readability, wear, and adhesion. Check our low prices. For more information, write or call collect: ID RECALL, 306 Kennedy Rd., Los Gatos, CA 95030; 408-356-5462.

BIBLIOGRAPHIC DATA CONVERSION: catalog records converted to MARC II, OCLC/MARC, and other computer formats. Database extraction and reformatting of existing tape files. Call toll-free 800-325-4984 or write: ELECTRONIC KEYBOARDING, INC., 140 Weldon Pkwy., St. Louis, MO 63043.

MICROCOMPUTER PROGRAMS FOR MEDIA CENTERS. Overdues, mailing list, index, inventory, and more. Write or call for free catalog to: Media Center Factory, POB 13536, Greensboro, NC 27405; 919-274-5653.

DIRECTORY OF ISLAMIC LIBRARIES AND LIBRARIANS compiled by Mohammed A. S. Khan, lecturer, King Abdulaziz University, Jeddah, Saudi Arabia, 1983. 138 pages. Soft cover. U.S. $10 (postage extra). Contact Islamic Library Association, 6304 Cory St., Simi Valley, CA 93063.

NEW MONOGRAPHS AT DISCOUNT. Reliable, experienced service by former acquisitions librarian. Musmann/Scholarly & Professional Books, POB 6437, Altadena, CA 91001.

What's wrong with reference (cont. from p. 306.)

to hold the most promise for those working with these options. Even more promising would be experimentation with job enlargement, job-sharing, and job exchange among professionals in any given library. It may be that no one should be encouraged to work more than 10 years in reference; it may be that reference librarians should spend every fifth year working in other departments to broaden their knowledge and refresh themselves with new though equally challenging duties; it may be desirable for all new librarians to begin in reference, where they might gain a good sense of the reason for the library's being before moving on to their cataloging, acquisitions, or bibliographic duties. It may even be desirable to move toward "quality circles," or the model espoused by Michael Gorman, in which we all do a little bit of everything.[12]

The point is that most libraries have yet to show much compassion for the problems of reference staff, much concern for their professional growth, or much concern for their mental health. Any broadening of experience would have to pay long-term dividends of many kinds for those libraries brave enough to experiment with the concept. The alternative is to leave reference librarians to reify and stultify as they mark time on that long road to retirement by performing for the nth time the numbingly repetitive tasks which gradually deaden the mind and erase the smile.

4) Planning and rearrangement of priorities

Planning for intelligent management of the reference overload is an obvious ideal. How much staffing are we willing to commit to new programs? How can we aid staff development? How much staffing do we need to maintain the quality of old programs? How much business do we really wish to generate at the reference desk? How will we handle the increasing volume of labor-intensive database searches, and is it fair to give those who need such services so much more of our time than we give to others? Should we even reconsider the traditional assumption that the primary purpose of reference departments is to provide one-on-one reference service?[13]

One can think of many such questions, and once having asked them it would be natural to begin the planning process. Why is it that so little planning has actually taken place?

Long-range planning in reference is more often honored in the breach than the observance.[14] It is not that people lack the imagination to ask the right questions, but that it is far easier to ask than to answer them. Planning is difficult, and not merely because it requires quantitative and managerial skills many of us lack. Planning requires objectivity, and presupposes a willingness to recognize failures and limitations, to be candid about them to oneself and the public. Planning may mean change and where change is perceived as an undesirable or unlikely occurrence, planning becomes a needless and burdensome exercise. Planning may also entail staff conflict and dissatisfaction; every current activity has an advocate with passionate reasons why things must continue to be done as they have always been done, and many have no wish to step on the hooves of some colleague's sacred cow.

EVEN IF THE APPROACHES AND PROBLEMS MENtioned above are manageable, however, we must still contend with a major stumbling block: assessment of library users' needs. How can we plan to serve people until we know for certain what they need?

As obvious as this question seems, it is not widely understood. Most of us believe we know intuitively what our users need—a convenient belief, considering that as yet we know little about making an objective assessment.

Our current stock-in-trade is the administration of virtually useless questionnaires which ask people to tell us what they like and do not like about our services. At best, such questionnaires may tell us a little about what people think that they want, but very little about what they actually need. How dare we presume to differentiate between what people say that they want and what they actually need? The answer, one would like to think, is that we are professional librarians with a much better sense of the range of possibilities than those we serve.

An important prelude to rational planning, then, is needs assessment, a sophisticated approach analysing population patterns, course syllabi and reading lists, course descriptions in catalogs, enrollment patterns, and library use patterns. Such analysis yields an idea of what the real service needs are, and these may be very different from the needs we perceive intuitively or that people express consciously. However, conducting such analysis is not a simple matter, and even when we have done it we still know little about such things as how needs may change with technology over time.

The tail of the idealistic dog

Even if we conduct our assessments, and even if we are willing to accept change and plan for it, we must still operate within the context of political and public relations realities. Every institution or community has its own stated and unstated goals, philosophy, and priorities. These are often so vague or lofty that they place service areas in an impossible position. Institutions are quick to enunciate high ideals, but few are willing also to enunciate a system of priorities identifying those who will fall at the lower end of the scale.

The practical effect of this, for reference departments, is that they are officially locked into a system proclaiming that universally excellent service for everyone is the priority. In practice, when we try to serve everyone superbly, we end up serving no one especially well. In order to plan, then, reference librarians would in many cases have to assign *de facto* priorities that their institution has not announced and would not care to acknowledge or endorse. Usually, it would be impossible for the reference tail to wag the institutional dog in this way.

If, for example, an academic library conducted a rational needs assessment concluding that library instruction needed to be targeted mainly to graduate students, or that reference service during holidays and weekend evenings should be

The alternative to innovative staffing arrangements is to leave reference librarians to mark time on that long road to retirement by performing for the nth time the numbingly repetitive tasks which gradually deaden the mind and erase the smile.

eliminated to give librarians more time for other duties, or that database searching for undergraduates is not pedagogically sound and should not be provided, what would be the chances of implementing the findings?

How many libraries have had the courage to discontinue any service for reasons other than dire fiscal emergency, and how many have had the courage to be candid about what services they no longer wish to offer?

THERE ARE MANY STUMBLING BLOCKS TO change within reference, As there surely must be in all other areas of the library, and within all institutions generally. For a variety of reasons, reference librarians and those who supervise them have shied from these problems, allowing traditional services to decay like an inner city, while sprawling new services grow up around them.

Objective analyses of reference desk service indicate the cost of pretending that we can continue to do everything for everybody, and do it well. This is an organizational fiction which needs to be discarded. Our success is turning into failure, and we must acknowledge this reality in order to cope with it. Will we have the courage, or will we continue to burn out staff to keep the fiction alive? Let us show the collective wisdom to look again at our situation, and, when warranted, change it. □

Notes

1. The best bibliography on this topic is O. Gene Norman's "Marketing Libraries and Information Services: An Annotated Guide to the Literature," *Reference Services Review* 10 (Spring 1982):69–80. Also relevant is William F. Wright's "Information Management: A Bibliography," *Special Libraries* 73 (October 1982):298–310.

2. The standard articles on reference burnout are Sandra H. Neville, "Job Stress and Burnout: Occupational Hazards for Service Staff," *College & Research Libraries* 42 (May 1981):242–47, and David S. Ferriero and Kathleen A. Powers, "Burnout at the Reference Desk," *RQ* 21 (Spring 1982):274–79. An alternative view is presented by Nathan M. Smith and Veneese C. Nelson in "Burnout: A Survey of Academic Reference Librarians," *College & Research Libraries* 44 (May 1983):245–50. Based on a survey of reference librarians at 75 institutions, they conclude that "academic reference librarians do not seem to be especially prone to burnout" (249).

3. A good way to gain an understanding of the wide range of duties—from faculty liaison to typing and record-keeping—associated with the creation and maintenance of new programs is to read practical how-to guides for practitioners. Two good ones are Beverly Renford and Linnea Hendrickson's *Bibliographic Instruction: A handbook* (New York: Neal-Schuman, 1980), and Ryan Hoover's *The Library and Information Manager's Guide to Online Services* (White Plains, NY: Knowledge Industry Publications, 1980).

4. Such skills are described in Kathleen Gunning's paper "The Impact of User Education and Computer Searching Programs on Reference Services," in *Reference Service: A Perspective*, ed. Sul H. Lee (Ann Arbor: Pierian Press, 1983), p. 79–88.

5. In his article "Librarian Status in the Eighty-Nine U.S. Academic Institutions of the Association of Research Libraries: 1982," *College & Research Libraries* 44 (May 1983):199–211, Thomas G. English found that 61.4% of librarians at state institutions and 31.3% of librarians at private institutions had sabbatical privileges. My own survey of 41 small colleges, conducted in 1980, indicates that only one-third of such institutions offer even the theoretical possibility of sabbaticals to their "Library Faculty." It may be found in the "Faculty Status" chapter of *College Librarianship*, ed. William Miller and D. Stephen Rockwood (Metuchen, NJ: Scarecrow Press, 1981), p. 125.

6. Many of the studies of the quality of reference service, including the work of Crowley, Childers, and Bunge, are well summarized in William A. Katz, *Introduction to Reference Work*, 4th ed. (New York: McGraw-Hill, 1982), II, 273–78. The most recently published study, based on the dissertations of the authors, is Marcia J. Myers and Jassium M. Jirjees' *The Accuracy of Telephone Reference/Information Services in Academic Libraries: Two Studies* (Metuchen, NJ: Scarecrow Press, 1983). These investigators, like their predecessors, find that the average accuracy rate for telephoned reference questions of a straightforward nature is approximately 50 percent.

7. There are of course some exceptions to the general silence. Billy Wilkinson, reviewing Myers and Jirjees' book in *LJ* 108 (May 15, 1983):984, says: "Depression! . . . Heed particularly Jirjees who advises that we now have enough evidence showing at best a 50-60 percent chance of obtaining a correct answer to a simple question when it is posed in person or by phone and that the emphasis should now be on getting the data disseminated and receiving responses from the field rather than on more studies. . . Are other reference services (bibliographical instruction, etc.) performed as poorly? What actions should heads of reference departments take?" A possible course of action is suggested by Linda M. Olson in "Reference Service Evaluation in Medium-Sized Academic Libraries," *JAL* 9 (January 1984):322–29. She recommends conducting unobtrusive testing of reference service á lá Childers-Myers-Jirjees, along with obtrusive and survey testing, in order to identify each librarian's strengths and weaknesses. She says little about the practicality of such testing programs, except that "evaluation of any sort is bound to cause considerable staff discussion and in some cases outright resistance" (328).

8. I discuss the problem of triage at the reference desk more fully in "Reference and the Other Technical Services in a Large University Library," in *Reference Service: A Perspective*, p. 31–45.

9. Jack Magarrell's "Tuition Increases Slow but Are Likely to Outpace Inflation," *The Chronicle of Higher Education* (February 29, 1984), explains that one major reason for next fall's tuition increases will be the need "to meet the costs of energy, library materials, and other items with prices that rise faster than the price index" (p. 3).

10. One wonders how many workbook programs are carried out from A to Z by librarians, despite Renford and Hendrickson's assertion that "Clerical help is a necessity for the workbook preparation. Someone has to type the test and prepare the exercise sets. . . . Understaffing can quickly undermine what could be a feasible and exciting program" (*Bibliographic Instruction: A Handbook*, p. 118).

11. See Susanne Villar and Paul Emmons, "Using the Computer to Randomize Questions for Library Instruction Worksheets," *Research Strategies* 1 (Spring 1983):52–57.

12. See Michael Gorman, "Reorganization at the University of Illinois—Urbana/Champaign Library: A Case Study," *Journal of Academic Librarianship* 9 (September 1983):223–25.

13. The series of articles entitled "Large-Scale Bibliographic Instruction: The Undergraduate Library Instruction Program at the University of Illinois—Urbana/Champaign," by David F. Kohl et al. in the Winter 1984 issue of *Research Strategies* suggests that, at least in some specialized situations where a homogeneous clientele can be identified, one-on-one reference service may not be the most desirable primary service to offer. Kohl and his colleagues have adopted as their primary goal the provision of bibliographic instruction, "supplemented by some one-on-one reference" (7).

14. The same may be said, of course, for other areas of the library, for the nonprofit sector in general, and for the profit and government sectors as well. Perhaps we may take some comfort in Peter Drucker's assertion, as quoted in Frederick S. Lane's "Managing Not-For-Profit Organizations," *Public Administration Review* 40 (September/October 1980), that in terms of the management problems which they present, not-for-profits " 'are more complex than either business or government agencies' " (527). Ultimately, however, like most explanations, this is not an acceptable excuse.

How Long Would It Take You to Identify
All Biomedical Publications, Related to Engineering,
Published in England, in a Large Database or Directory?

You Could Do It in Seconds, With EBSCO/SEARCH.

Introducing EBSCO/SEARCH . . .
The Daily-Updated Online Periodicals Directory.

EBSCO/SEARCH—A major EBSCONET OSS Enhancement—is a powerful new information retrieval system for EBSCO's database including publisher, title and price files. Using natural language commands, you can access information by subject, language, price and much more.

EBSCO/SEARCH gives you fast, efficient access to a database of more than 160,000 serial titles. Simply key in your request, and EBSCO/SEARCH does the serials searching for you. It's the first information retrieval system of its kind for such an extensive database.

EBSCO/SEARCH, developed by EBSCO Subscription Services, is available only through our EBSCONET Online Subscription Service—the online system which allows you to claim, order, route and much more. For more information, call or write your nearest EBSCO office today.

The automated reference desk

Three ways libraries can use computers to enhance reference services

Community I&R service expands by going online

by Nancy C. Jacobson

THE MEMORIAL HALL LIBRARY in Andover, Mass., established its information and referral service, Answers, in 1977. An LSCA grant was used to: gather information from the local area covering Lawrence, Methuen, North Andover, and Andover; install a telephone line; hire a public relations outfit to come up with a name and an advertising campaign; and implement the publicity program. In addition to offering the standard I&R services to refer patrons to community agencies, the library has also used the files to produce such spin-off publications as a booklet listing area day care centers.

In fall 1981 the library installed a CL Systems, Inc., P 11/44 computer and began converting its records into the bibliographic database. After most of the collection was converted, the next step seemed to be the addition of the Answers file to the database.

The in-house automation coordinator worked with the head of reference and the Answers staff person (who spends half-time on the reference desk) to take advantage of the fields already being used for books and other materials within the CLSI setup. Subject headings were reworded and over 800 I&R entries were entered over several months.

After six months the project seemed to be working well. The bugs were eliminated, and the staff was ready to respond to requests from other libraries for advice on inputting. Since 11 towns in northeastern Massachusetts belong to the Merrimack Valley Library Consortium, a CLSI circulation systems network, it was natural to expand the service to allow other libraries in the system to input their information and referral files into the common database. The libraries of Lowell and Haverhill plan to add to the original I&R file of greater Lawrence, giving it broader scope.

CLSI does offer a software package of its own for Information and Referral, but Andover's I&R file did not require the large amount of storage provided by the CLSI program. The idea of using the in-house microcomputers was discussed briefly, but there seemed to be very little gain in efficiency in changing from a manual file to, say, an Apple diskette.

The automated Answers file offers several advantages over the manual system. Instead of a single file that could only be used by one person at a time (and that had to be carried between the office and the reference desk several times each day), there is now access from every terminal in the library. Patrons can use the public access terminals to search the I&R files by themselves. This is a major advantage from a privacy standpoint, since users can obtain information on such subjects as venereal disease and teenage pregnancy without having to ask a librarian.

Another benefit of automation is that the other 10 libraries in the consortium now have online access to the Andover records as well as to the newly added records of the other member libraries.

The idea of extending reference services to a larger constituency, some of whom had never used the public library before, has developed beyond all expectations. The quantum leap, however, occurs in the greater geographic reach made possible by terminals linked into the network through the CLSI circulation system. □

Nancy C. Jacobson is director of Memorial Hall Library in Andover, Mass.

File of database searches aids research on "Hot Topics"

by Natalie Sturr

THE HOT TOPICS FILE AT THE State University of New York/Oswego, Penfield Library is a collection of 10 to 15 database searches on topics frequently researched by students. Searches containing 20 to 50 citations are available at the reference desk for in-library use. Topics currently available include cartoons and children, product failure, subliminal advertising, teacher burnout, television advertising and children, television in the courtroom, and management "theory Z."

Subjects of hot topics searches tend to reflect class assignments that make heavy use of reference services. Business administration and education are two of the strongest programs on campus, so it is not surprising that most of the searches deal with either business or education. The search on theory Z is the most popular; the search on product failure was added to the file recently to reflect a new class assignment. Student interest in topics changes

Natalie Sturr is head of the Computer Search Service at the Penfield Library, State University of New York at Oswego.

Sample entry from the Answers online information and referral service.

How to research the world's most powerful city at the speed of light.

What happens in Washington, D.C. each day affects people, organizations and governments in every corner of the world.

And nowhere in the world are these important events reported more thoroughly and accurately than in *The Washington Post.*

That's why, as a researcher, you will be interested in our new Washington information data base, The Electronic Washington Post.

Because, in the time it takes you to read this ad, you could search every word in today's *Washington Post.*

And every word of every *Post* of the last *six years!* (Depending on which computer vendor you choose).

Not only would you be able to access information at the speed of light, but you'd be connected to one of the most extensive computerized newspaper files in the world.

Over 400,000 items. And growing by 1,200 each week. Stories, columns, sections, and reports, as far back as January 1, 1977.

What's more, you can search through Pulitzer Prize-winning material word-by-word. Subject-by-subject. Day-by-day.

The Electronic Washington Post can feed you *Post* stories published on any topic. And every report is retrievable in its entirety or in summary form.

Imagine how much more thorough your research would be if you could do in a minute what is humanly impossible to do in a month!

THE ELECTRONIC WASHINGTON POST

Write for more information today. Address your requests to The Electronic Washington Post, Washington, D.C. 20071-7850.

periodically—for example, the search on toxic shock syndrome, in demand two years ago, has recently been removed from the file because of lack of use.

Although searches are added to the file as needed, it is important to keep the file current. The Hot Topics File is updated annually. Searches that have not been used are removed from the file. The remaining searches are run again and the new copies replace the older ones. The original copy of each search is made available for in-library use only, meeting the fair use doctrine of the copyright law.

Keeping it simple

As a rule, searches are run in only one database and search strategies are very simple. Additional databases are searched only when retrieval is low: a search on subliminal advertising retrieved fewer than 20 unique citations from four databases. Search strategies are most often a keyword or phrase such as "teacher burnout." The next most common strategy is to combine only two subject terms with the "and" operator—"television" and "courtroom," for example. Some searches are limited by year and list only recent articles, a tactic which reduces retrieval. The ERIC search on teacher burnout, however, lists articles published *prior* to 1982, the first full year the term was a major descriptor. Currently, all results are printed offline to save time and money. The offline prints also look and wear better than online prints.

Only bibliographic citations are printed for most searches. Users are expected to locate abstracts in the library's printed tools. Abstracts have recently been included on searches if retrieval is extremely low, if it is anticipated that the library will own few items listed (thus placing a strain on interlibrary loan services), or if the library does not receive the printed equivalent of the database. When the library owns few of the journals listed, articles owned by the library are denoted.

Since it was created three years ago, the Hot Topics File has become an integral part of the Ready Reference collection. Because searches are on hot topics, librarians have quickly learned to think of the file as an additional reference tool. If a search is relevant to a student's need, the student is made aware of the search.

Attractive features of the Hot Topics File are its simple maintenance and its promotional value. Maintaining the file requires little time and money on the library's part: database charges are minimal because search strategies are short, only one database is normally searched per topic, and results are printed offline. Updating the entire file takes less than an hour of staff time and only 15 to 20 minutes of connect time. By using the Hot Topics File, students are made aware of the library's computer search service. The Hot Topics File has become an inexpensive yet effective means of enhancing the quality of reference service. □

Attractive features of the Hot Topics File are its simple maintenance and its promotional value.

RLIN and WLN databases: not for catalogers only

by Kathleen Low

WHEN DATABASES LIKE RLIN and WLN are mentioned, they are usually thought of as databases for catalogers. Although these databases do contain bibliographic catalog records, their usage should not be thought of as confined to catalogers. Both RLIN and WLN have features that make them valuable reference tools. In addition, search access to these databases is available to nonmember libraries on a dial-up basis.

The database of the Washington Library Network (WLN) contains over 2.7 million unique bibliographic records. These records represent the Library of Congress MARC (MAchine Readable Cataloging) for books, serials, and films since 1968, catalog records input by WLN libraries, and the Government Printing Office (GPO) records released since 1978.

The WLN system has a special "PRINT" feature useful for producing bibliographies and other lists. After completing a search, the searcher may issue a command to have the search results (or a range within the results) printed offline at WLN. If a PRINT command is used, the results of either a Bibliographic File or Authority File search can be printed at WLN that night. The entries will be in the display format and sort order requested, or in the default settings if no format is selected. The library thus avoids the online connect time required to print pages upon pages of records.

Kathleen Low is coordinator of online services at the California Library Authority for Systems and Services (CLASS).

The RLIN (Research Libraries Information Network) database, owned by the Research Libraries Group (RLG), contains over 12 million bibliographic records and is constantly growing as the LC MARC, GPO, and National Library of Medicine records are added to the database, as well as the records input online by libraries cataloging on the system. This data is divided into seven bibliographic files (books, serials, maps, films, sound recordings, scores, and archives and manuscripts), four special databases (AVERY, the online Avery Index to Architectural Periodicals; ESTC, the Eighteenth-Century Short Title Catalog Database; SCIPIO, an art auction sales catalog database; and CONSPECTUS, the RLG members' collection-assessment database), and an Authority Subsystem.

Multiple access points

A nice feature of RLIN is the ease with which data can be obtained. Including the subject phrase and subject division indexes, there are a total of 37 indexes through which records may be retrieved. In addition to the standard indexes such as title word or phrase, author, and LCCN, RLIN offers access to records by CODEN, GPO Catalog Entry Number, Publisher, Form, Genre Word, and other indexes.

The terminal requirements for dialup access to both WLN and RLIN are: 1) the ability to send, receive, and display the full upper- and lower-case ASCII character set; 2) half-duplex asynchronous transmission of at least 30 characters per second; 3) even parity; and 4) an 80-column data line (for WLN only). Recommended features are: 1) typewriter-style tabs, i.e. tabs that can be set by the operator at any column; 2) an 80-column data line, and for CRT terminals a screen that can display 24 lines; and 3) capability for 120-character-per-second transmission rate.

The WLN and RLIN databases are two reference sources that should not be ignored. As the wealth of data continues to grow in both RLIN and WLN, so will their value as reference tools.

The California Library Authority for Systems and Services (CLASS) brokers the RLIN database nationwide, and the WLN database to libraries in California, Arizona, Nevada, and Utah. Libraries can also contact the networks directly. The addresses are: CLASS, 1415 Koll Circle, Suite 101, San Jose, CA 95112 (408-289-1756); RLG, Jordan Quadrangle, Stanford, CA 94305 (415-328-0920); and WLN, Washington State Library, Olympia, WA 98504 (206-459-6518). □

Library master's degree on trial

The Merwine Case and the MLS: Where was ALA?

Views of an "expert witness" in defense of the "ALA-MLS" requirement

by Edward G. Holley

Fears do strange things to people. They encourage vacillation. They promote poor decisions. They often lead us to refrain from actions which would support long-held principles. The American Library Association's ambivalence about the MLS degree, and unwillingness to support that degree legally, are the results of such fears.

Doubtless these fears are what lead the ALA Executive Board to accept the recommendation of Executive Director Robert Wedgeworth and legal counsel that "the ALA divorce itself from the tangled Merwine Case, where the facts are in dispute, and talk about principles."[1]

That decision, unfortunately, will come back to haunt librarians in the years immediately ahead. Under these circumstances I am not comforted by legal counsel nor the ALA Office for Library Personnel Resources (OLPR) Advisory Committee assertion that the ALA supports the MLS for every professional position.

In talking about principles, the Association is faced with a problem. Its Library Education and Personnel Utilization (LEPU) policy, the Asheim statement adopted by Council on June 30, 1970, recommends the master's degree as the basic requirement for those holding positions designated "librarian." To quote from paragraph 8:

> The title "librarian" carries with it the connotation of "professional" in the sense that professional tasks are those which require a special background and education on the basis of which library needs are identified, problems are analyzed, goals are set, and original and creative solutions are formulated for them, integrating theory into practice, and planning, organizing, communicating, and administering successful programs of service to users of the library's materials and services. In defining services to users, the professional person recognizes potential users as well as current ones, and designs services which will reach all who could benefit from them.

In paragraph 20 the statement is even more explicit:

> Until examinations are identified that are valid and reliable tests of equivalent qualifications, the advanced degree (or evidence of years of academic work completed) is recommended as the single best means for determining that an applicant has the background recommended for each category.[2]

Edward G. Holley is dean of the School of Library Science at the University of North Carolina/Chapel Hill. He testified for the defense in *Merwine vs. Mississippi State University*, (*AL*, July/August, p. 444-45). Holley served as ALA president in 1974-75.

Minimum qualifications question

In light of these statements, what can be done to maintain the principle of the master's degree as the basic requirement expected of beginning librarians? That question still has no satisfactory answer, but earlier actions by the OLPR Advisory Committee do not encourage those who want to maintain the LEPU principles. Some even believe we have been led down the garden path by OLPR's Minimum Qualifications Task Force.

After California and Ohio attacked the MLS degree as a fundamental requirement for a beginning library position in the mid-seventies, OLPR appointed the Minimum Qualifications Task Force to look into the matter. Hearings were held, speeches were made, and conclusions were reached that somehow it was necesary to validate the degree as a basic requirement. Librarians seemed overawed by court decisions against the requirement of a high school diploma for jobs at Duke Power Company and in other places. Fear of court suits seemed to dominate task force thinking.[3]

In March 1980 the OLPR Advisory Committee sent out a message that the Library Education and Personnel Utilization statement represents not a requirement but an ideal. "The MLS degree and other educational qualifications are desirable for identifying and selecting employees. . . . However, recent court decisions . . . necessitate careful consideration before requiring applicants to possess these credentials." So without asking what the abandonment of the MLS would mean for professionalism generally, librarians were advised not to lean upon the degree as a minimum qualification.

Ads specify ALA-MLS

Employers paid little attention to the Minimum Qualifications Task Force recommendations. They continued to advertise in *American Libraries* and various ALA division publications for persons with the MLS degree from an ALA-accredited library school program. As late as November 1982, the U.S. Supreme Court sent out a flyer for a research librarian which listed first among the qualifications "MLS from ALA-accredited library school." Among the other qualifications the flyer noted "J.D. or advanced degree in subject area relevant to position *desirable*" (emphasis mine).

In preparing to testify in *Merwine vs. Mississippi State University*, I examined the September 1981 *American Libraries* and *C&RL News* ads. I discovered that *American Libraries* published 64 ads with 48 requiring the ALA MLS; 16 either did not mention ALA or required the MLS without the designation. I suspect ALA accreditation is assumed for the latter. In *C&RL News* 41 ads required the ALA MLS, six didn't mention either, and three specified MLS without adding "ALA-accredited." Since the latter magazine is published by ALA's largest division and the one with most interest in academic libraries, this overwhelming ALA-MLS requirement is significant.

Some other recent studies confirm that the ALA-MLS is held by upwards of 90 to 95 percent of all academic librarians.[4] In examining numerous ads which cross my desk, I rarely see one in which the ALA-MLS is not the minimum qualification. In academia, where courses and degrees are the coin of the realm, I hardly find this surprising.

Yet Keith Cottam was right when he said the issue of minimum qualifications is a time bomb.[5] Unfortunately, as matters turned out, the task force recommendations have worked to the disadvantage of ALA members defending the professional degree. Their opponents pointed out that even the Association would not recom-

mend the ALA-accredited degree as a minimum qualification for a beginning level librarian position.

The Mississippi State lawyers were astounded that a professional organization would not defend its own degree. They couldn't imagine the American Bar Association taking a similar "hands off" position. Nor, might I add, can I.

The case of Glenda Merwine

The case of Glenda Merwine vs. Mississippi State University first came to my attention in August 1981. Library Director George Lewis called to ask my help in defending the MSU requirement of the ALA-accredited MLS. The American Library Association had refused to get involved, I was told, because its officials believed they would not be unbiased about such matters. After hearing the outline of the case, I agreed to become an "expert witness."

Let me confess my own bias in this case: I am biased in favor of quality-graduate professional education. Those who have heard my comments on the need for tougher Committee on Accreditation standards are well aware of that bias. Yet someone needed to speak up in defense of basic, minimal standards for professional librarians. We've fought too long for those minimal standards to surrender them without a fight.

For two years I have been involved with Mississippi State and its lawyers in defending the principle that the MLS degree is an entirely appropriate and recognized standard for employment as a college or university librarian. While there were a number of extraneous charges made by the plaintiff, Glenda Merwine, the essential issue was whether or not Mississippi State University had a right to require the ALA accredited master's degree as a condition of employment.

What are the facts?

Mississippi State University advertised for the position of librarian of the College of Veterinary Medicine. Its ad stated that, among other qualifications, the individual should have an ALA-accredited MLS. Glenda Merwine, who holds a master's degree in secondary education, with a number of school-library-oriented courses, applied for the position. She had previously worked in the MSU library as a para-professional. Her courses, both at MSU and elsewhere, were in children's literature and other school/children's literature areas. Although she claimed that she held an unaccredited library science degree, the fact of the matter is that she had no library science degree at all.

Sex discrimination claim

Merwine further alleged that, because there were more women enrolled in unaccredited programs than in accredited programs, she was a victim of sex discrimination. Her assertion contained no statistical evidence.

Based on the Association of American Library Schools (AALS) *Statistical Report*, 1981, the difference in enrollments ranged from approximately 81 percent female in accredited school programs to approximately 89 percent in those unaccredited schools cited in the AALS report. One needn't be a statistician to recognize that enrollments in all library education programs are predominantly female.

After several postponements, the case came to trial in federal district court the week of May 23, 1983. While there were some complexities, a jury was responsible for certain issues related to intentional discrimination and Judge Charles M. Powers for issues relating to disparate impact. After five days of testimony the jury decided against Library Director George Lewis and awarded Merwine $5,000 actual and $5,000 punitive damages.

During my testimony I hammered away at the necessity for the MLS degree for beginning professional librarians, the importance of a university maintaining the quality of its library faculty through imposition of this qualification, and the fact that discrimination on the basis of sex could hardly occur when approximately 80 percent of the MLS degrees conferred in the last three decades were awarded to women. While I do not pretend to be a statistician, I surely do know the difference in a four to one ratio *in favor of women*. That there are other issues of sex discrimination in this profession I am well aware; but the number of degreed librarians is not one of them.

I was not permitted to hear the testimony of other witnesses, but I know that Glen Zimmerman, associate librarian for management at the Library of Congress, testified for the plaintiff. He said that high school graduates who have the requisite experience are "eligible" to compete for professional librarian positions at LC.

The Library of Congress is a unique institution with specialized needs. It employs about 5,500 persons, more than five times as many as any other large library in this country. Sensitive to attacks on its affirmative action plans, LC instituted new policies revising its employment opportunities in the mid-seventies and began its own validation studies of various positions. Cynics would say that LC adopted these measures not on principle but to keep from being sued. Whatever the reasons, we need to remember that LC is atypical as an employer of librarians.

"I hardly see how we can talk about sophisticated library services unless we also want to talk about well educated librarians to offer these services."

Model statement from ACRL

For university libraries, the ALA Association of College and Research Libraries (ACRL) model statement about the appointment of academic librarians is clear: "Any librarian appointed to a college or university library faculty should have the appropriate terminal professional degree, for example, a master's degree or its historical antecedent from a library school accredited by the American Library Association or its appropriate equivalent."[6]

ACRL's statement reflects university practice for the employment of faculty and other professional personnel. Just as a university is unlikely to appoint a law school faculty member who has no law degree, it is also unlikely to appoint a library faculty member who has no library science degree. Exceptions are made only in the case of distinguished individuals whose other qualifications are unquestionably superior or different from those already on the faculty.

Thus abandonment of the MLS degree, in my opinion, would mean making the exception the norm. If the profession wishes to do that, then members themselves should ponder carefully the consequences. Mississippi State officials argued that the setting of appropriate educational qualifications for their faculty was indispensible to maintaining a quality faculty.

On May 28, 1983, when the jury decided in favor of Merwine, it stated that, in its opinion, she was qualified for the job as veterinary medicine librarian. The jury believed that Lewis had showed preferential treatment by hiring Bruce Evans, a librarian with an MLS degree from Florida State University. All of us on the MSU side were astounded at what we consid-

"It flies in the face of logic and common sense for ALA to fight vigorously for the MLS degree as a criterion before the U.S. Office of Personnel Management and not fight strongly for the MLS degree in the federal courts."

ered the jury's disregard for evidence. The MSU lawyers therefore quickly filed a motion for judgment notwithstanding the verdict (JNOV).

Judge overturns jury

The wheels of justice turn slowly. However, on Dec. 29, 1983, Judge Powers overturned the jury verdict. He noted that the only claims before the court were the plaintiff's claim under 42 U.S.C. 1983 of intentional discrimination against her on the basis of sex, her counterpart claim under Title VII of the Civil Rights Act of 1964, and her Title VII claim of disparate impact upon women because she didn't have an MLS degree from an ALA-accredited library school. Judge Powers rejected the jury verdict because he believed reasonable persons could not, under the applicable law, arrive at such a conclusion.

A few quotations from the judge's decision may be helpful for ALA members:

> Plaintiff's own testimony is that Lewis informed her from her initial inquiry about the job that . . . he was going to adhere to the ALA-MLS requirement . . . . It is further stipulated that of the six applications . . . before the Search Committee at the time the hiring decision was made, three applicants, two female and one male, had ALA-MLS degrees . . . and only those with the ALA-MLS degrees were interviewed for the job. . . .
>
> In short, the stipulations and other evidence establish without any contradiction that the ALA-MLS was the minimum educational requirement for the job . . . . The conclusion that plantiff was not fully qualified for the job thus is inescapable . . . .
>
> The evidence clearly establishes that the degree is a standard widely recognized by academic and professional employers, including the United States Supreme Court. No reasonable jury could conclude otherwise from the evidence received, and no reasonable jury could find that the preference for such a degree was a pretext in view of the above-enumerated facts established by the stipulations and other evidence, and the total lack of any credible evidence indicating the preference for such a degree was not a legitimate factor uniformly applied to all applicants.

Judge Powers also added that, in the face of evidence that women earned 80 percent of the approximately 50,000 ALA-MLS degrees awarded in the past 10–12 years, "it flies in the face of logic and common sense to say that an ALA-MLS requirement 'selects applicants for hire' in a manner discriminatory to women."

Challenge to ALA

In my opinion, it does indeed fly in the face of logic and common sense to state that the ALA degree discriminates against women. If, after years of struggle to promote higher standards for professional education, better employment opportunities, and higher salaries for librarians, ALA now refuses to defend its own accredited degree held by 96 percent of its members,[7] ALA members will suffer—and the chief sufferers will be women.

Let me add that it also flies in the face of logic and common sense for ALA to fight vigorously for the MLS degree as a criterion before the U.S. Office of Personnel Management [8] and not fight strongly for the MLS degree in the federal courts. The actions are mutually contradictory.

As for the advice of legal counsel, I have one additional observation. We pay legal counsel to give us their best advice on cases. We are not compelled to take that advice. If current counsel is uninterested in tangled cases, maybe ALA should seek new counsel. Executive Board members need to remember who has managerial responsibility for such decisions. Ultimately, they do.

The plaintiff in the Merwine Case has appealed Judge Powers' decision to the Fifth Circuit Court of Appeals. In my opinion, this would give ALA an excellent opportunity to enter the case as a friend of the court. Since the case may wind its way eventually to the U.S. Supreme Court, there is a lot at stake for librarians in the ultimate outcome.

While I am not often given to undue alarm about governmental actions, I am concerned about legal attacks on appropriate educational standards. If we are concerned about excellence, we shall scarcely achieve it by dismissing sound professional education. I hardly see how we can talk about sophisticated library services unless we also talk about well educated librarians prepared to offer those services.

What bothers me is that the OPM attack on federal librarian standards and court cases denigrating professional library degrees may well be followed by attacks on degrees in other professions: journalism, social work, and nursing. The aim will be to downgrade the professions, especially those paying low salaries, to save money at all levels of government.

In this country we have invested heavily in the sophisticated education of personnel. As a result, we have competent and skilled workers in a variety of human service agencies. If we wish to continue to provide services which are the envy of the world, we had better insist that our professional associations do a better job of explaining why skilled personnel are necessary. And we had better be prepared to fight for those minimal educational qualifications needed by library personnel.

ALA cannot have it both ways. If we believe the accredited ALA-MLS degree is a reasonable standard for a beginning librarian, then we shall have to defend the MLS in the courts and in the legislative arena. By my personal actions in the Merwine Case, I have made my decision. I encourage other ALA members to do the same. □

Library confidentiality for the other half

About half our library users are unprotected by state confidentiality laws; One successful intellectual freedom group shows how to get such protection

by Heather McNeil McQuarie

When John W. Hinckley, Jr., shot President Ronald Reagan May 30, 1981, police found a Jefferson County (Colo.) Public Library card in Hinckley's pocket. Within hours, *Newsweek* raced to Jefferson County's main library in Lakewood and demanded to see Hinckley's circulation records. The FBI followed the next day.

Both organizations were well aware that the library records were open to the public under Colorado's "sunshine" Public Records Act. The Jefferson County attorney advised library Director Bill Knott and other county officials to release the records.

Librarians everywhere were outraged that this information could be—must be—so easily handed over. The Jefferson County Library soon learned that the FBI had plenty of time and staff to inspect all the microfilm records for any reference to Hinckley. The library was swamped with reporters as well as federal agents.

The Hinckley affair made Colorado librarians realize they had to solve the problem of confidentiality. The Colorado Library Association took the first steps toward getting legislation passed to protect library records. Intellectual Freedom Committee Chair Bill Murray appointed Maryanne Brush, assistant director of the Jefferson County Public Library, and Geri Schmidt, Colorado State Library consultant, as a subcommittee to research privacy laws and propose legislation for Colorado.

Checking the facts

Their research revealed the following:

1. Federal records are protected by the Privacy Act of 1974, with access available through the Freedom of Information Act.

2. Most states have a sunshine law under which library records are open to the public.

3. Colorado's Public Records Act stated, "All public records shall be open for inspection by any person at reasonable times. . .but the official custodian of any public records may make such rules and regulations with reference to the inspection of such records as are reasonably necessary." In other words, the director may create procedural guidelines (such as a fee to be charged or a certain time for viewing), but anyone with patience and money can see the records.

4. The ALA policy statement on confidentiality is not a legal document and will not protect any library records. Only 14 states at that time were legally protected —California, Connecticut, Florida, Iowa, Maryland, Michigan, Minnesota, Nevada, New York, Oregon, Rhode Island, Virginia, Washington, and Wisconsin.

The subcommittee next had to become familiar with the state confidentiality laws, and learn about local and national incidents concerning confidentiality. The ALA Office for Intellectual Freedom provided copies of all the state statutes exempting library circulation records from open-record laws, several articles and legal opinions on the topic, and 39 specific incidents. The following examples indicate the variety of requests:

1967, Illinois—Police want a list of persons who borrowed a book some officials consider obscene.

1970, Wisconsin—Treasury agents ask for information on all reference questions and stack searches relating to explosives.

1977, Texas—Two library clerks (on their own initiative) search through records and turn over to police the name of a patron thought to be involved in a child abduction.

1977, Washington—A newspaper editor demands circulation records of an AV equipment collection to prove that the taxpayer's money is being wasted.

1978, Florida—Religious groups request the names of persons who have read certain books in order to urge them to join a religious organization.

1978, Illinois—A divorced father wants access to story-hour registration to make sure his child is using his name and not that of the mother's current husband.

1979, New York—Detectives ask for circulation records of books on lie detectors because they suspect "somebody was trying to beat a lie detector test."

1981, Washington—The state Moral Majority files suit demanding the state library release the names of public schools and their employees who borrowed the film *Achieving Sexual Maturity*.

When Georgia Shovlain directed the Sheridan County (Wyo.) Public Library several years ago, a man was arrested for illegally shooting a moose. He claimed that he had shot the moose in fear for his life because he had read a Western in which a moose charged and killed a man. Shovlain was subpoenaed for circulation records after she told law officials the records were protected by ALA's statement. The records proved the man had checked out the book, and he was found innocent on the grounds of self-defense. Ironically, the moose was shot in its hindquarters.

Designing an ideal

By now the subcommittee felt it had enough background to write the "ideal" legislation to protect:

All types of libraries—school, public, academic, private, special;

All types of use—registration, circulation, requests (filled or not), cards used, facilities used (to field such questions as, "Who requested the use of the meeting room for the KKK?");

All information containing the library user's name or other identifying personal detail.

Finally, in the ideal legislation, all such records should be made available only with the user's permission or by subpoena. The process should not interfere with the keeping of statistics, evaluation, or regular library routines. Also, any library employee who divulges confidential information should be held liable.

The next step was to confer with Kay Johnson, lobbyist for the Colorado Library

Heather McNeil McQuarie is children's librarian at the Edwin A. Bemis Public Library, Littleton, Colo., and chairs the Mountain Plains Library Association Intellectual Freedom Committee.

Association. She accepted the challenge and found sponsors for the bill. A first draft was written, but it omitted protection for children and gave the library director authority to determine whether or not the records would be made available.

Objections were loud and strong when the draft was presented at the 1982 CLA conference. The bill was rewritten to protect children in publicly funded libraries and withdraw responsibility from the director.

Testifying at the statehouse

On Jan. 18, 1983, Maryanne Brush testified in support of Bill No. 1114 before the Colorado House State Affairs Committee. "In order for people to make full and effective use of library resources," Brush stated, "they must feel unconstrained by the possibility that the books they read, the materials they use, or the questions they ask could become public knowledge. The present lack of protection could inhibit free usage of the library and have a chilling effect on the freedom to read."

The bill was read to the House three times and passed unanimously. Despite a last-minute Colorado Press Association campaign to stop the bill, the state Senate also approved it unanimously. On March 22, 1983, Gov. Richard D. Lamm signed the bill amending the Public Records Act and making library records confidential.

Now 23 states are legally protected by such legislation. Delaware, Illinois, Indiana, Louisiana, Maine, Massachusetts, Nebraska, and South Dakota have joined Colorado and the 14 states mentioned earlier. Each bill is different, depending on the individual legislatures, sponsors, and local power groups.

Advising the unprotected

To the 27 unprotected states, we offer the following advice:

1. Avoid unnecessary records! Think twice before committing a name to a written record.

2. Destroy records as soon as possible. Check with your local governing body to see if the city, county, school board, or other agencies set a time limit on record keeping, then determine what it should be for the library.

3. If your library uses names on borrower cards, consider using numbers or blacking out the names.

4. Be aware of information on public view owing to library procedure; e.g., overdue notices or filled-request notices mailed on postcards, names of patrons with overdues posted by the circulation desk, or titles of interlibrary loan or reserve requests given out over the phone to family members.

5. Stall. Establish a detailed policy procedure for making records available and hope that the person or agency requesting the information will become discouraged. Cite ALA's statement, but realize it can't legally protect you.

6. Contact the ALA Intellectual Freedom Office for information, advice, and assistance.

Most requests for records are innocent: "I just have to see that book for a term paper due tomorrow. Could you tell me who checked it out so I can get it?" "Oh, look! Edith's name is on the borrower's card. If she read it, I know it must be good!" "Could you tell me what books my daughter has checked out so I can make sure they're all returned?" Most patrons will accept your statement that such information is private. But some people believe that "you are what you read" and remain determined to link a borrower's name with a crime, belief, or moral issue.

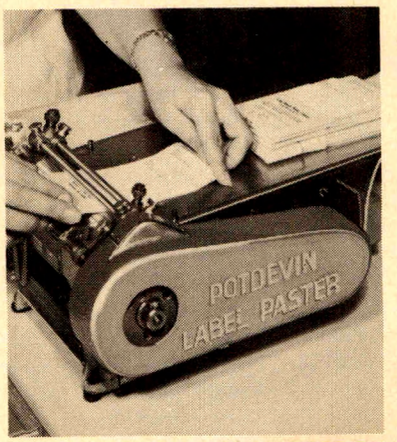
If your state chooses to pursue confidentiality legislation, be sure you recognize the local organizations that might protest. Obviously, law enforcement agencies and investigators are the most likely groups to oppose privacy laws, but religious groups, private organizations, lawyers, parents, and the press may also become involved. Be alert and be prepared.

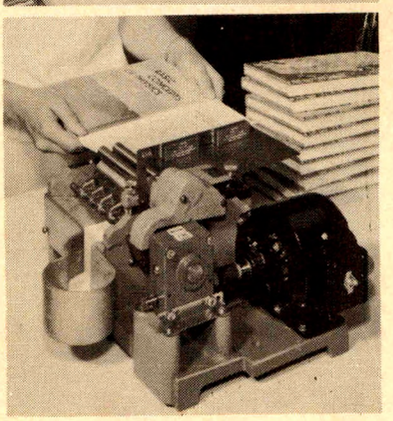
Finally, avoid compromises at the beginning of your efforts. Work toward the ideal legislation, since compromises will probably come later. Colorado's law protects only publicly supported libraries, which was a compromise. Also, realize that publicity on the legislation may increase public awareness of a right patrons never knew they had. If you propose a weak law, you could be in more trouble than when you started.

Colorado libraries now have legal protection, but few laws go untested. Librarians must consider new complications: When a parent telephones, do we tell whether or not a child is in the library? Do we help a teacher who suspects plagiarism? Do school policies, such as the Family Education Records Privacy Act, preempt state law and give parents the right to inspect library records? Only a test case will answer these questions definitely.

In the meantime, we recommend a confidentiality law in each of the 50 states, to protect the records, the institutions, ourselves, and most of all, the freedom to read. □

POTDEVIN'S PASTING PACKAGE...





Everything to meet your needs

Your library has specific pasting needs and Potdevin provides you with materials to meet them. All of them.

You have ooze-proof Potdevin Label Pasters and versatile Edge Coaters . . . the standard-setters for clean, professional paste application in the nation's libraries. You can take advantage of a 10 day free trial, except for transportation charges.

Then you have your choice of ready to apply pastes for pockets, due date slips, book plates, ID labels, Mylar dust jackets, you name it.

You also have Potdevin Deadening Pads for maintaining a noise-free atmosphere. And Potdevin heavy duty plastic bags to cut down on paste reservoir cleaning.

Pasting?
Potdevin!

Academic libraries: sifting fact from fiction

ACRL's third national conference confronts myths and seeks the "real"

by Susan Brandehoff

ALTHOUGH SPEAKERS AND conferees at the third national conference of the Association of College and Research Libraries identified many common myths associated with academic libraries, they found it more difficult to agree on realities. The attempts, however, sparked candid discussion, controversy, exchanges of wit, and enough ideas and information to simmer until ACRL's next conference in 1986.

The conference, held in Seattle April 4–7, was titled "Academic Libraries: Myths and Realities." It forcefully pointed out the diversity of opinion in higher education—especially between large institutions and their smaller counterparts—on the role of academic libraries on campuses facing technological, financial, and organizational change.

Nearly 1,400 librarians and 390 exhibitors from 46 states, Canada, and several other countries pushed attendance beyond expectations and prompted conference planners to offer copies of the proceedings to all registrants as a bonus.

Conference well paced

The conference was satisfying on many levels. A well-paced blend of theme addresses, practical "alternative format" sessions, refereed papers, and free time for exhibit-going was complemented by dashes of Northwest culture, such as a salmon bake and a tour of Seattle's international district. Eight of ACRL's highly regarded continuing education courses preceded the main meeting.

The Seattle conference was the last ACRL national meeting for Executive Director Julie Virgo, who resigns her post in June. Virgo received thanks from many speakers and conferees for her sure hand in managing what ALA President Brooke Sheldon termed "the flagship division of ALA—a model the whole Association could follow in developing a long-range plan, sticking to it, and navigating by it." ALA Executive Director Robert Wedgeworth also praised Virgo's leadership in a telegram sent to the conference.

Theme speakers—several of them college administrators—kept referring to the myth of the library as the "heart" of the campus. Most conferees agreed they've known all along *that* was a myth. But the "presence" of the academic library on campus, both electronically and through bibliographic instruction, reference services, and collection building, was the heart of the conference.

Kaye Gapen, dean of the library at the University of Alabama, focused on the need to go beyond the library to respond to technology-based changes in society and educational institutions. Gapen recently took part in some future-gazing sessions concerning academic libraries and change that emphasized the role of the library in campus information networks.

Entreprenurial management needed

Librarians and their leadership groups need to develop models of the "electronic campus," with libraries in an integral role in the local network of classroom and office cable, online searching, and other electronic avenues to information, Gapen said. Libraries must develop closer ties to campus computing centers so that together they can become the information centers for campuses. "If we fight with computing centers for funds," Gapen said, "libraries will probably lose."

The electronic campus scenario will require many changes in the types of decisions library administrators make, in library job descriptions, staff development, work cycles, and hierarchical organization. Above all, academic libraries must establish clear-cut "stages of growth" models, incorporate strategic planning mechanisms into administration, and develop an entrepreneurial management style to remain in the campus mainstream, Gapen said. Libraries have the opportunity to bring a "humanistic" aspect to increasingly technology-oriented acquisition and dissemination of knowledge. "But stepping outside our comfortable hierarchies will not be easy," she said. "It will require openness, initiative, and courage."

Paul Olum, president of the University of Oregon, Eugene, stressed the crucial importance of the research library in building and maintaining collections. Even in times of retrenchment, "the library materials budget must remain inviolable," he said. The University of Oregon has protected its library materials budget from both across-the-board reductions and inflation. However, library personnel and services budgets were reduced along with other campus services and departmental faculty.

In contrast, Gresham Riley, president of Colorado College, Colorado Springs, and Joe Rushing, chancellor of Tarrant County (Tex.) Junior College, Fort Worth, said they would cut acquisitions before personnel and services.

BI: how much and what kind?

Administrative policy differences between large research universities and smaller, student-focused colleges were also apparent in opinions about bibliographic instruction. Gresham Riley said that although many faculty consider BI an "add-on" and library orientation not basic to the educational mission, he considers librarians equal partners in the learning process. "Bibliographic instruction is integrally related to the primary content of every course," he said. "Librarians have a major role in helping students acquire the insight and critical thinking skills needed for lifelong learning through helping them master library search strategies." Riley sees the college library evolving into "an array of services across campus" rather than providing service in one physical place.

Olum, however, said librarians "have exaggerated the difficulty and importance of bibliographic instruction." Elevating it to the level at which it appears in every course is extreme, he said, acknowledging that such a view was probably not popular with his audience.

"New paradigm for librarianship"

In presenting a "new paradigm for librarianship" from the perspective of a library user, William Parson, a member of the faculty at innovative Evergreen State College, Olympia, Wash., spoke of the predictable, dehumanizing, and unimaginative bibliographic instruction that is often the norm for libraries. Parson said the librarians can occupy a central place in the academic community only if they concern themselves more with the critical treatment of information. Parson's paradigm unites the "fantastic array of abilities and experience" librarians possess with the educational goals of academic institutions. It moves libraries into a "proactive" relationship with their users. Librarians no longer wait for users' calls for service, but anticipate user needs and invite users to improve their efficiency in evaluating and processing information through responsive library programs. Librarians become, in essence, "sociologists of information," going beyond merely matching users with information to helping users conceive of what they can do with information, Parson said.

In the final theme session, William Moffett, director of the Oberlin (Ohio) College Library, described what he sees as a decline in the status of college libraries in ALA and ACRL, at the same time that research libraries are gaining ascendancy.

Moffett attributed the decline to the diversity of institutions and perspectives represented in the College Libraries Section of ACRL, as well as to the bias so common in American culture that "bigger is better."

While "overgrown educational behemoths" vie for research grants from multinational companies and "are hectored by collective bargaining and demands for cost effectiveness," the small liberal arts institution struggles for survival.

Academic librarianship is not immune to this bias, Moffett said. Library schools don't prepare students well for college reference work and bibliographic instruction. Library literature is dominated by writers from large institutions who have little to say about college libraries. And assistance from library agencies like the Council on Library Resources "almost invariably tilts to large institutions."

"The triumph of professionalism in academic libraries continues the bias," he continued. "Professionalism and specialization are what we term as success in this profession." Moffett predicted, however, that future educators will turn to small colleges for reform and renewal in postsecondary education, because the small college is "less captive to professionalism and more responsive to change."

Moffett's comments also apply to community college libraries, said Mary Sue Ferrell, of Western Nevada Community College, Carson City. Ferrell noted in the conference wrap-up session that out of nine theme speakers, only one was from a community college, and only two refereed papers treated community college library issues.

"Bands of holistic librarians"

Models for central library public services in the 1980s were proposed at one of the conference's four "alternative format" sessions. The integrated service model described by Kathleen Gunning, University of Houston, consolidates reference, collection development, online searching, and bibliographic instruction at one service point. Patrons interested in a subject would contact librarian subject specialists for any of the four services, and groups of library staff would also identify their own "client groups" around campus and offer services outside the library. According to Gunning, the integrated model can make libraries more comprehensible to users, enhance library response to change, and make library work more fulfilling and varied.

Patricia Swanson, University of Chicago, offered an "extended traditional" public service model that builds on the strengths of the traditional reference desk where "human, printed, and electronic resources are amassed," and adds other tasks and roles to vary the reference librarian's work. Swanson said the integrated service model is not specific enough, assumes "we all can do everything well," and can lead to work overload. Also, "we may not be integrating our services at the same time or rate, or in the same subject areas users need," she said. "It's often difficult to find these "small bands of holistic librarians," she added.

Discussion of the two models concluded that a combination of traditional and integrated service works best and that any configuration of support staff, librarians, and resources must respond to the needs of a particular institution.

Contributed papers

The 47 refereed papers read at the conference received mixed reactions, although word of mouth created a runaway bestseller in cassette sales: "A Matrix Model of Organization for a University Library Public Services Division," by Joanne R. Euster and Peter D. Haikalis of San Francisco State University. ACRL Vice-President/President-Elect Sharon Rogers, who chaired the conference wrap-up session, said contributed papers at ACRL national conferences "appear not to be working" as a form of scholarly communication, since papers from both the Boston and Minneapolis conferences have not been cited often in the literature. Rogers and Robert Pesek analyzed papers from all three conferences and found a shift from the "author biographer," who describes systems in various stages of development, to the "author analyst," who performs primary research and discusses issues.

Conference proceedings will be published in mid-1984; *College and Research Libraries* will publish theme session papers. Cassette tapes are available from Audio-Stats Educational Services, Inc., 2639 S. La Cienega Blvd., Los Angeles, CA 90034. □

A NEW SOURCE

Library Use: A Handbook for Psychology, by psychologist Jeffrey G. Reed and librarian Pam M. Baxter, is a research guide especially designed for those entering the field of psychology. Although aimed primarily at undergraduate and beginning graduate students, the guide is equally useful to the more advanced student or researcher by virtue of its comprehensive treatment of available source materials.

Subjects included in *Library Use* are the selection and defining of research topics in psychology and guidelines on how to use more than 40 information resources such as *Psychological Abstracts*, ERIC, computer databases and searches, and government publications. Information on tests and measurements, as well as on services such as interlibrary loans, is also provided.

To make the information as clear as possible, each chapter presents a hypothetical search topic with examples. Each example presents text as it appears in the actual source, along with an explanation of the figure's contents. Illustrations familiarize readers with the actual appearance of information in a source, typical content of an entry, and reading and understanding an entry. 138 pages, $12.00 Members/Affiliates; $15.00 Nonmembers.

Combination Price: A special combination price is available when buying the *Library Use Handbook* and the third edition of the *Publication Manual of the American Psychological Association*. With over 80,000 new users each year, the *Publication Manual* has proven its value. The new *Library Use Handbook* is a worthy addition to APA's publication list and your bookshelf. Both books are available to APA members and affiliates for only $22.00 and to nonmembers for only $27.50.

American Libraries' *first continuing education course: Lesson Four*

MODERN SUBJECT ACCESS in the Online Age

by Pauline A. Cochrane

CONTINUING OUR "MINI-SYMPOSIUM" ON subject access, we present this month the responses of four more practitioners and researchers concerning the role of the Library of Congress and its *Subject Headings* in improving subject access in U.S. libraries. Following the four statements, we hear from Lucia Rather, Mary K.D. Pietris, and Fred E. Croxton of the Library of Congress. At the end of this lesson, I have tabulated the comments and suggestions of our 10 respondents to aid course participants in their own analysis of issues we've raised. (See *AL*, April, p. 250–255, for responses of Marcia J. Bates, Margaret Beckman, Hans Wellisch, Sanford Berman, Toni Petersen, and Stephen E. Wiberley, Jr.)

Helping LC improve LCSH only constructive approach

Bates is right about the need to take an imaginative look forward. There are (at least) two ways to bring library subject access into the online age, and we must move on both of them. One is to take advantage of the computer's ability to carry out search strategies using key words found anywhere in a bibliographic record. Following this route could mean changing the MARC format by adding a field for uncontrolled subject descriptors or other subject-related text we want to include in the MARC record.

The second route, which Bates is emphasizing, is that of modernizing our existing controlled vocabulary system. Doing this is less a matter of altering the MARC formats or MARC records than of restructuring LCSH from a printed thesaurus into a tool for the users of online catalogs. In creating this new tool, it is important not to waste our time and intellect attacking LCSH (we will all be old and out of fashion some day) or wishing we could start an entirely new system. There are millions of LC subject headings embedded in our catalog databases and we are converting hundreds more to machine-readable form every day. Besides, subject analysis is expensive; libraries are dependent upon LC-supplied subject cataloging.

The only constructive approach is to seek ways to work with the Library of Congress in modernizing LCSH. In our July 1983 article in the *Journal of Academic Librarianship* (p. 148–155), J. Herschman and I suggest several ways to do this: restructuring LCSH into a hierarchical thesaurus distributed in machine-readable form and using the resultant thesaurus as an online public access tool; adding entry vocabulary and new headings to LCSH through cooperative projects; and designing systems that enhance access to LC headings in online records by linking the headings to users' keyword searches.

If we are to achieve the transition urged by Bates, we and the Library of Congress must begin to view LCSH not as the cumbersome, always out-of-date "red book," but as a National Subject Authority File Service that represents a cooperative effort among LC and other libraries to maintain, enhance, and distribute a subject thesaurus in machine-readable form. The Name Authority Cooperative (NACO) program* now underway provides a model, although a cooperative subject service is likely to require more centralized editing functions than are necessary for NACO. Ideally, the concept of a national subject authority service would extend to the LC classification schedules, since these too can be important online subject access tools.

To answer Bates's first question: LCSH has much potential for online subject access. But we have work to do.

CAROL MANDEL
Assistant Director for Access Services
University of California, San Diego

*Libraries participating in NACO contribute full authority records to the Library of Congress name authority file for new headings they establish in their own original cataloging. Records contributed by cooperating libraries are then distributed nationwide through LC's Cataloging Distribution Service.—Ed.

Online Catalogs need A&I subject access features

The inadequacy of Library of Congress Subject Headings and their inability to provide quality subject access have been well documented. Subject retrieval failures using LCSH are caused by: 1) a lack of currentness and specificity in subject headings; 2) inconsistent and awkward construction of multiword subject headings; 3) an unsystematic network of *see* and *see also* references; and 4) the sparsity of subject headings assigned to catalog records (an average of 1.8 headings per book).

Libraries have a tremendous investment in LCSH, and the expense of adding subject descriptors to bibliographic records locally is prohibitive. To improve subject access to library materials, we need to provide enhanced access to the information contained in catalog records and promote improvements and enhancements to LCSH.

Increasing the number of access points by providing title word and subject word searching capabilities in COM and online catalogs can improve subject retrieval. Keyword searching can also ameliorate LCSH's problems with heading construction and its lack of specificity. A greater number of headings should be assigned per record. The use of major/minor descriptors and a free text or identifier field should be examined. LCSH augmentation might be directed to subsets of library collections for which improved subject access is most important.

Libraries are performing online searches of *Books in Print, Ulrich's,* and the MARC and REMARC databases through commercial retrieval systems to improve local subject access. The local online catalog, with its potential for sophisticated user interfaces and online user assistance, will also offer the opportunity for improved subject access. Experience with online abstracting and indexing service databases has demonstrated the value of such techniques as term truncation, Boolean operations, proximity searching, and limit commands. These features will have to be added to online catalogs.

The linking of subject thesauri with LCSH and the use of classification scheme terminology could enhance subject access. In addition, a systematic subject authority system for LCSH needs to be constructed and made available in machine-readable form in a timely fashion.

WILLIAM MISCHO, director
Engineering Library
University of Illinois at Urbana-Champaign

LC subject headings will do for now

The short answer to Ms. Bates's question is that LC headings will do. The reason is not that they provide what we need, but that effective subject access to cataloged materials is increasingly being provided by other services. LC headings will do until we cease to need subject access in the library catalog.

Today, the scholarly abstracting and indexing services come very close to providing unified, cross-format subject access for their disciplines. When online catalog users tell us they would like access to the journal literature via the catalog, they are really telling us that they want one place to go for subject searching. The online indexing and abstracting services today add more records for books, per year, than the number of records added to the MARC file.

The library catalog is essential for inventory control and for locating items in the collection. It should be online for those reasons. We have plenty of opportunity to exploit computer and communication facilities to make the online catalog work well for us. Our efforts should go to providing for downloading of project search results, matching results against local holdings, delivering the needed items, and relaying orders for items not in the local collection via online document delivery services, rather than on improving LC headings in our present files.

In his address to a conference on "Prospects for the Online Catalog," Patrick Wilson presented an overview of the purpose of library catalogs. With regard to subject access he said:

> . . . Further and deeper inquiry will quickly have to abandon the subject catalog and turn elsewhere, to bibliographies and indexes and, above all, to the self-organizing apparatus of footnotes and bibliographies in books and articles. And that inquiry will then be led back to the author and title components of the catalog to find the particular items first discovered elsewhere.

As libraries evolve into the age of access to, rather than possession of, information services, the remaining function of the catalog is, as Wilson says, ". . . just what most people have always agreed it had to be, to help locate copies of books and texts that may have been learned about elsewhere. It has to be a local finding device."

SHIRLEY HARPER, director
Catherwood Library, New York State School
of Industrial and Labor Relations
Cornell University, Ithaca, N.Y.

Finer subject indexing needed

One point I would make is that current subject indexing seems too shallow. In large files such as Melvyl (the University of California online catalog), one retrieves too much or too little—even when a search is narrowed further through the computer's post-coordinate searching of atomised precoordinate subject headings. LCSH just was not designed for large online catalogs. Boolean AND or AND NOT operators seem to have too severe an impact on search results. Finer indexing may help.

MICHAEL BUCKLAND, dean of the library school
and Asst. V.P. for Library Plans and Policies (acting)
University of California, Berkeley

* * *

Comments from the Library of Congress

We at the Library of Congress are pleased that Pauline Cochrane has made the reactions to Marcia Bates's statement of 1977 available to us.

We agree with Bates's reevaluation that the ability to search in online systems by individual words in titles, notes, and subject headings provides good access that overcomes some shortcomings of LC subject headings. When this searching capability is available in an online system that also includes LC subject authority records and cross references, the result can be a good system for finding works in a database.

Both the search strategy design and the loading of LC authorities are a responsibility of individual libraries and utilities. The Library of Congress is attempting to provide better service by designing an improved machine-readable subject authority system that will be updated in a manner similar to the updating of name authority records. However, implementation is not expected to begin for another two years.

Those such as Mandel and Mischo, who wish to augment LC bibliographic data with uncontrolled vocabulary, may use the 653 field in the MARC format for bibliographic records for such terms. This field is used by several bibliographic utilities. Lack of staff prevents the Library of Congress from adding such terms to its own records.

We hope to embark on a project to improve our *see also* reference structure by making the references more hierarchical and reducing the number of "orphaned" headings that have no references. This would address some of the concerns mentioned by Mischo and Mandel. However, even the best system of cross references in LCSH would not help libraries that are unable to place this information in their online catalogs. We are aware that few libraries can afford to maintain *see also* references in their card catalogs, and we hope that this will not

also be true in online catalogs.

Some suggestions from the 10 respondents about what to do with LCSH appear to contradict each other. While Berman would have more headings assigned to individual works and to types of works that now receive no subject headings, Wiberley notes the problems of information overload and the need to aid users who find too much information. It may well be that the depth of analysis, and therefore the number of subject headings assigned to an individual work, inevitably depend on the size of the collection into which the work will be placed: many access points are needed for small libraries, whereas large libraries need few access points. This viewpoint assumes that the large library is more likely to have whole books devoted to subjects that may only be chapters of more general works in small libraries.

Harper points out an aspect of LC subject headings often forgotten: the purpose of subject headings is to serve as a finding device to locate items on a subject in a collection. Access to the detailed contents of books should be provided by indexes and indexing services, not by subject headings on bibliographic records.

One longstanding impediment to changing LC subject headings continues to be the large number of catalog records bearing old subject headings in catalogs at LC and in other libraries. The economic implications of change must be considered as improvements to LCSH are contemplated.

The suggestion from Mandel that LC begin cooperative efforts to improve LCSH has been partially implemented with the inauguration of the Entry Vocabulary Project (EVP), in which several libraries contribute *see* references to LCSH. We plan to expand participation in this program and to enable other libraries to propose new subject headings in ways similar to efforts underway in the Name Authority Cooperative program. Now that Judith J. Henderson has been named as the Coordinator for Cooperative Subject Cataloging Projects, we are able to explore these options.

MARY K. D. PIETRIS
Chief, Subject Cataloging Division
LUCIA J. RATHER
Director for Cataloging
Processing Services
Library of Congress

Yes, LCSH can be cleaned up and modernized. It needs to be and the politics, as Wellisch calls it, are for it.

Buckland is someone who seems to remember Mortimer Taube's terminology. I am strongly influenced by his findings and how they point to free language. I feel the investment of

Table 1. Suggestions to the Library of Congress for improved subject access

Topic	Respondent(s)	Suggestion
CATALOG RECORDS	Petersen, Mischo, Wiberley, Mandel, Berman, Buckland	Enhance with aid of subject specialists; create more access points per record
MARC format for catalog records	Mandel, Mischo, Beckman	Add a field for uncontrolled subject descriptors*
SUBJECT AUTHORITY RECORDS	Petersen	Define elements of subject authority record separately from its subdivisions
SUBJECT TERMINOLOGY	Mischo, Petersen, Berman	Improve adequacy and specificity; correct inconsistency of form
Cross reference structure	Mischo	Change unsystematic network of references; form hierarchies*
Replacing LCSH with natural language	Beckman	Structure terminology using artificial intelligence (AI) techniques
RETRIEVAL FEATURES		
Sophisticated keyword searching	Mischo, Bates, Buckland, Beckman	Adopt for online catalog
Full text searching problems	Bates, Wiberley, Mandel	Remedy by automatic display of related term or hierarchy
Library catalogs or database for subject access?	Harper	Library catalogs only for inventory control
Integration of MARC and non-MARC records in files	Beckman	Put artificial intelligence in program for retrieval system to get dynamic results
POLITICAL ISSUES*		
Transform LCSH and LC classification into National Subject Authority Service	Mandel	Follow lead of NACO (Name Authority Cooperative project)
Form new entity—U.S. National Library	Wellisch	Such a library would serve the nation as a bibliographic center

* specific comment from Library of Congress on this point

great amounts of money in an LCSH expansion or replacement is probably bad economics when we have dictionaries and thesauri, such as Roget's, that can be imbedded in our systems.

When subject cataloging led only to card catalogs the name of the "pigeon hole" or "file folder" was important and needed a definition. That is not so important now. The user comes to the automated file with a knowledge of natural language and its nuances just as the author comes to the publisher with a manuscript. Why shouldn't the subject cataloger use that same language, letting everyone lean on the same lexicographic tools? I think it would be more effective and more economical in the long run. Names are discrete, subject terms are not.

The changes will be evolutionary, of course. As Harper suggests, these changes will be forced by the subject disciplines and shaped by the politics.

FRED E. CROXTON, director
Automated Systems Office
Library of Congress

* * *

Analysis of responses

Several respondents have focused on the same issues listed in Table 1, Lesson Three of this course (*AL*, April, p. 250). One respondent, Sanford Berman, has carried through on his suggestion to enhance catalog records and has prepared Alternative Cataloging in Publication records which his library system and others can use because all the data are in machine-readable form. Another respondent, Toni Petersen, is engaged in a new thesaurus project which might eventually replace LCSH in art libraries and museums. Many now see that efforts must be undertaken beyond the Library of Congress to improve subject access. Retrieval system design changes are certainly not within LC's power. Only the system LC has designed for its own use is under its control. Retrieval system changes will be made by vendors, online catalog designers, and bibliographic networks like OCLC, RLIN, WLN, and UTLAS. They, not LC, control what the online catalog in our own libraries may look like. The response from Margaret Beckman at Guelph even envisions changes beyond what present technology can do. She sees major changes being brought about by the application of AI (Artificial Intelligence) techniques in fifth generation computers, which some predict will be in general use in five to ten years. Because we can expect more technological changes, we will focus in the next part of the course on how changes in computers will affect subject access.

The last four topics in Table 1 focus on technical and political changes that many people say should occur for improved bibliographic apparatus in general. We will not elaborate on these suggestions in this course, as they go far beyond subject access topics.

Having read the most recent thoughts of these experts on subject access, what do you think? If you have any questions you would like to ask of me or of any of our expert panel, please send them to *American Libraries*, 50 E. Huron St., Chicago, IL 60611, and we will direct them to the appropriate person for a response. □

software showcase

Overdue Writer:

Overdue notice program for small libraries

by Robert Skapura

Ed. note: "Software Showcase" features announcements of microcomputer programs of special interest to library professionals. Software designers are invited to submit brief factual descriptions of their programs for consideration.

Inclusion of a product in this department in no way constitutes endorsement by ALA or any of its units.

ONE OF THE MOST PROMISing aspects of microcomputers entering libraries is that working librarians (those in the trenches) now have an opportunity to develop practical, useful tools for library management. And unlike most technological innovations of the past few years, this one is downright cheap. Any librarian who wanted to create a 16mm film, videotape, or videodisc found that it required both a great deal of expensive equipment and a certain artistic flair to make the final product look professional. Microcomputer programs require only the time, a machine, a programmer, and a good idea. The time may turn out to be more than first estimated, but both microcomputers and programmers seem readily available.

Few librarians can have a micro in their library for very long without wondering if it can't be put to work doing some of the repetitive tasks necessary to run a library. It was out of such "wondering" three years ago that the first version of the Overdue Writer was created. It was designed not by one librarian but by two: Joseph Ward and Robert Skapura. Librarians are a particular lot, some might say peculiar. No two of them do things exactly the same way. Thus if a computer program is designed by only one librarian, there's always the risk that it will be unique to that library. Collaboration insures that the final product will come closer to universal applicability.

Robert Skapura has been librarian at Northgate High School in Walnut Creek, Calif., for the past eight years. He is currently on a six-month leave of absence to work as a consultant to the Library Software Co.

Can serve as circ system

The Overdue Writer can be used as a full circulation system or simply as a writer of overdue notices. It will produce individual overdue notices, lists by room location or teacher, and master lists. It runs on Apple II+ or IIe or TRS-80 model III or IV computers and requires only one disk drive. Generally it takes about 20 minutes a day to enter data and do updates.

The Overdue Writer has only one procedure that must be followed. There must be a unique number on each check-out card. Computers work fastest and most efficiently when they can search all records looking for a number rather than a name or title. If accession numbers are already used, nothing need be done. Those librarians not accessioning must put a unique number on each check-out card, but this should not be done until after an item has been checked out. This can be done with a hand-held numbering machine that advances each time a card is stamped. These numbers are not put on the book, the book pocket, the shelf list or anywhere else; they go only on the check-out card and they are put there after the material has been checked out. A check-out card receives a number only once, no matter how many times the book is checked out. This number is referred to as an ID number and the computer uses it to search and update records quickly.

Throughout the weeks information is typed in on a formatted screen. Putting in the initial information is hardly different from doing the first overdue. But as books are returned to the library, they are carded and put back on the shelf immediately. Nothing is done with the computer. Then just before printing overdues or bills, the check-out cards that are still at the circulation desk are taken out and only the ID numbers are typed into the computer. The computer is instructed to send overdues or bills for only those cards and to ignore all the others. Rather than telling the computer to delete the records of those returned, the Overdue Writer tells the computer to print the overdues or bills of those that remain.

This system has two advantages: 1) updating can be done very quickly by simply typing in a series of numbers; 2) everything can be done by carrying a handful of cards, never the books themselves, to the computer. The computer allows you to update returned books in a matter of minutes. Since the information is already in the computer, lists, second and third notices, and then bills can be generated as fast the printer can print. A complementary program, The Overdue Collector, automatically accumulates the active records from the Overdue Writer disks and permits the librarian to maintain just one disk of long-term overdues.

It is not even necessary for the computer to be in the library. The system was designed to operate if you can simply use a computer sometime during the day, even if it is located outside the library. All that is needed is a few minutes of computer time each day.

The Overdue Writer was included in *Electronic Learning* magazine's "Notable Software 1982–83," and it was listed by *Booklist* in an article called "Software's Greatest Hits."

The program is $149.95 from The Library Software Company, P.O. Box 23897, Pleasant Hill, CA 94523. Full descriptions and sample printouts of all Library Software Company programs are available upon request. □

SECOND OVERDUE NOTICE - NORTHGATE HIGH SCHOOL LIBRARY COPY #1

NAME: BRAKER, GARY

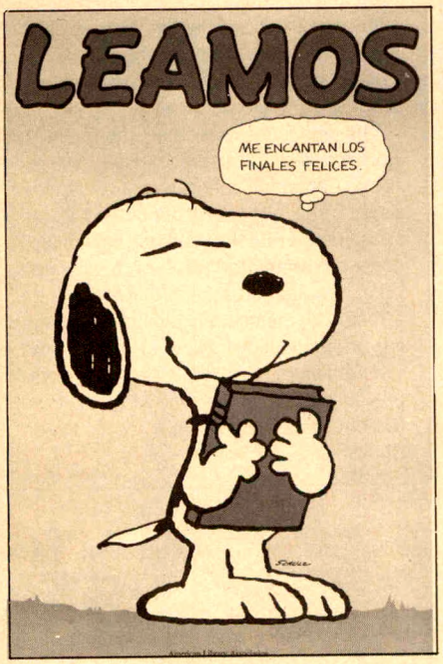
Nonfiction books conference

Noted authors of children's science books will be among the participants at the First International Conference on Children's Nonfiction Books June 18–22. Sponsored by the Brigham Young University library, library school, and others, the conference will take place at BYU's Wilkinson Center.

Among the conference leaders are Vicki Cobb, author of *Science Experiments You Can Eat*, and Seymour Simon, author of more than 60 science books, including *The Paper Airplane Book*. Also present will be Leonard Everett Fisher, author/illustrator of such works as *The Glassmakers*, and James Giblin, editor and author of *The Chimney Sweep*. Beverly Kobirn, publisher of a newsletter that reviews nonfiction books for youngsters called *The Kobirn Letter*, and Peter Usborne, a British publisher of nonfiction books for children, will participate as well.

For those who preregister before May 31, prices are $100 noncredit and $155 for two semester hours credit. After May 31, prices are $120 for noncredit or $175 for credit. Noncredit for a single day costs $25. For information, write Conferences and Workshops, Office 147, Harmon Building, BGU, Provo, UT 84602 (or call 801-378-3556).



Snoopy READ poster in Spanish. Charles Schulz's popular READ poster is now available in Spanish. A result of a cooperative effort by ALA's Public Information Office and the Sociedad de Bibliotecarios de Puerto Rico, the poster may be ordered for $3 plus $1 postage and handling (prepaid) from PIO/ALA, 50 E. Huron St., Chicago, IL 60611.

First YA novel contest winner

Delacorte Press has announced the winner of a new annual prize to a first-time author of an outstanding young adult novel. It is Joyce Sweeney's *Center Line*, one of 800 submissions that were analyzed by editors. An honorable mention has been awarded to Roberta Hughey's *The Question Box*.

Sweeney is a 27-year-old writer from Ormond Beach, Fla. In her novel, the eldest of five motherless brothers, Shawn Cunnigan, realizes he and his siblings have taken enough abuse from their alcoholic father. Taking their father's car, they leave their home in Ohio. At first being on their own is full of adventure, but as the story progresses the group begins to fall apart under the pressures of survival.

Sweeney was awarded a $1,000 cash prize and a contract guaranteeing a $4,000 advance against royalties. Film rights to the novel were acquired by Center Line Films with Benjamin Melnicker as producer. Sweeney will write the screenplay.

The 245-page novel is $14.95 from Dela corte Press, 1 Dag Hammarskjold Plaza, New York, NY 10017 (83-14322, 0-385-29320-8).

Poster sets available

Library Binding Service is offering, at $5 for the pair, two 24-by-38-inch full color posters honoring current and past Newbery and Caldecott medal winners.

The Newbery poster includes winners from 1922 through 1984's recipient, *Dear Mr. Henshaw* by Beverly Cleary. The Caldecott poster features winning picture books from 1938 to 1984's winner, *The Glorious Flight* by Alice and Martin Provensen. Each poster illustrates the covers of the winning titles. To order, send payment to Library Binding Service, Treasure Trove Covers, P.O. Box 1413, Des Moines, IA 50305.

Michael Jackson Look-Alike Contest packs the house

Close to 500 children and adults crowded into the Louisville Free Public Library March 3 to see who could best impersonate entertainer Michael Jackson.

Boys and girls from six to 14 queued up to dance like Jackson for one minute apiece. They did their toe-over-instep turns and moonwalks to cuts from either *Thriller* or *Off the Wall* albums.

Spectators occupied every horizontal surface, including the stacks, to watch contestants perform their routines and show off costumes.

"Whoever mimics Michael Jackson the best—the motions that portray him—will win," said Tony Fields, one of two disc jockeys who judged the contest. He added that race or sex would not be a factor.

A young contestant mimics the moves of Michael Jackson for a contest at the Louisville Free Public Library.

Because so many contestants appeared—57 youngsters performed—the dancing had to be split up into two sections for a runoff. Ten finalists then competed for the showdown in the children's room.

First prize, four tickets to King's Island Amusement Park, went to 12-year-old Devon Khan, apparently a Jackson double.

"I thought I was going to lose at first," Khan said. "I couldn't really dance that good." David Herron, a 10-year-old who wore a sequin-trimmed shirt and a glitter-encrusted white glove, won second. The prize was a calculator. Herron said he had been practicing for months.

The Michael Jackson Look-Alike Contest was conceived by Dorothy Seymour, a children's librarian at the Parkland Branch Library.

"We've never seen anything like this at the library," said Mary Somerville, manager of children's services. "The newspaper said that at least 500 people showed up, but the reporter didn't see the huge crowd who couldn't even get into the rooms. I would say we had about a thousand people here."

Somerville has received letters and phone calls from people all over the country asking for details on the way the program was conducted. □

ala report

Preregister for jobs by June 4, OLPR advises job center users

The ALA Placement Center will be open for applicants and employers in the Dallas Convention Center, West Hall, June 23–26. The hours of operation are: Saturday, June 23, noon–5 p.m.; Sunday, June 24, 9 a.m.–5 p.m.; Monday, June 25, 9 a.m.–5 p.m.; and Tuesday, June 26, 9 a.m.–2 p.m.

To help speed processing and eliminate long lines, the Office for Library Personnel Resources urges applicants and employers to preregister before June 4. Registrations will also be accepted at the conference.

Job seekers and employers will again be able to purchase the completed applicant and job listings by classification category (type of library or function) or in whole sets, mailed from the Dallas conference site.

To obtain forms or price lists and data on purchasing completed sets, contact OLPR at Headquarters. Please enclose a self-addressed stamped no. 10 envelope in requesting a single employer or job-seeker form. Enclose a mailing label with requests for multiple forms.

Orientation and comfort

Applicants and employers are invited to attend an orientation workshop for Placement Center users Saturday, June 23, 9:30–11 a.m., conducted by Terry McLaughlin. A second workshop titled "Job Hunting: Cover Letters and Interviewing," conducted by Jeanne Isacco and Catherine Smith, will be held Sunday, June 24, 8–10 p.m.

Volunteers familiar with the placement service will again staff the Job Seekers' Comfort Station, providing advice and guidance. They will also critique resumes during placement center hours.

Dallas deadlines

The June issue of *American Libraries* will feature the program highlights of ALA's 103rd Annual Conference in Dallas June 23–28. Some events requiring advance reservations are announced below.

Social Responsibilities Round Table

Coretta Scott King will receive a special citation at the Coretta Scott King Award Breakfast in the Reunion Ballroom, Dallas Hyatt Regency Hotel, Tuesday, June 25, 7:30–9:30 a.m. The event is sponsored by the Social Responsibilities Round Table Coretta Scott King Task Force. For tickets, send a $15 check (payable to ALA/SRRT/CSK Breakfast) with a self-addressed stamped envelope to Cordie Hines, Dallas Public Library, 1515 Young St., Dallas, TX 75201, by June 5. Tickets will also be sold at the Conference Meal Ticket Desk through June 24, but not at the breakfast itself.

Friends of Libraries USA

Rosalynn Carter, author of *First Lady from Plains*, will address the Friends of Libraries USA author luncheon Monday, June 25, noon–2 p.m. By June 8, send check or money order for $16 (payable to ALA) to the FOLUSA Luncheon, Public Information Office, at Headquarters.

Young Adult Services Division

Norma Fox Mazer, whose latest book, *Someone to Love*, was selected for the 1983 Young Adult Services Division "Best Books for Young Adults" list, will speak at the YASD author luncheon on Sunday June 24, at noon.

For advance tickets, send a check or money order for $15.75 (payable to ALA) to the YASD Author Luncheon, at Headquarters, by June 8.

Library Instruction Round Table

The Library Instruction Round Table invites all librarians interested in library instruction to join LIRT members at moderately priced meals in Dallas. Write Rosa Babcock, Learning Resources Center, El Centro College, Main and Lamarr, Dallas, TX 75202 by May 15.

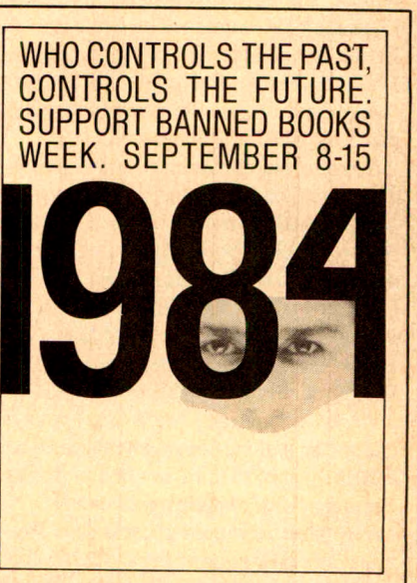
LAMA at Union Station

The Library Administration and Management Association plans a social hour, program, and supper, Sunday, June 24, 5–7:30 p.m. at Dallas Union Station.

Participants will receive complimentary microfiche copies of papers on the program theme, "Accessing the Future: Managing Growth and Change," selected by LAMA President Nancy McAdams. For an advance meal ticket, good for supper, one drink, and a microfiche copy of the president's papers, send a $17 check (payable to ALA/LAMA) to LAMA at Headquarters before June 8.

PLA-FLRT dinner

The Public Library Association Armed Forces Librarians Section and the Federal Librarians Round Table are sponsoring a dinner program, "Marketing the Library," Saturday, June 23, 7–10 p.m. Fred Goodman of Porta-Structures Industries, Inc., will speak. For tickets, send $16 check or money order (payable to Nina Jacobs) to Nina Jacobs, Base Library 60 ABG/SSL, Travis AFB, CA 94535. Deadline: June 15.



Banned Books Week poster

George Orwell's *1984* and the threat of National Security Directive 84 are themes of the third annual Banned Books Week, Sept. 8–15. The event is sponsored by ALA, the American Booksellers Association, the American Society of Journalists and Authors, the Association of American Publishers, and the National Association of College Stores.

The sponsors urge their members to work together to raise community awareness concerning the dangers of censorship. Three posters are included in the 1984 Banned Books Week Kit, which also contains annotated lists of challenged books, a list of books that would be affected by the security directive mandating prepublication review of former government employees' statements, and other publicity materials. The kit is $8 from Banned Books Week, ALA, 50 E. Huron St., Chicago, IL 60611.

ASCLA Awards Reception

The Association of Specialized and Cooperative Library Agencies will present its 1984 awards at a reception in the Dallas Rooms East and West, Dallas Public Library, Saturday, June 28, 6–8 p.m.

Tickets are $9.50 each by advance registration no later than June 15. Send check or money order (payable to ALA) to the ASCLA Awards Reception at Headquarters.

Square dance at the Longhorn

The annual Junior Members Round Table social at Annual Conference will "Bring 'em Back to the Longhorn," the historic Dallas ballroom, on Monday, June 25, 10 p.m.–2 a.m.

JMRT festivities will include square dancing to the calls of Joe Lewis, who will teach guests how, and a square-dance exhibition. Ticket price includes all the draft beer anyone can drink, setups, munchies, and the Longhorn Band.

For advance tickets, send checks for $13 payable to JMRT with a self-addressed stamped envelope to Sharon Herfurth, 1515 Young St., Dallas, TX 75201. At the convention and at the Longhorn Ballroom door, the price will be $15.

Exhibits visitors

Students, teachers, school and business officials, and others who do not plan to register at the conference may visit the exhibits in the Dallas Convention Center June 23–26. For a free badge permitting admission to exhibits only, send a stamped, self-addressed envelope to Exhibits Visitors Badges, Conference Arrangements Office, at Headquarters, by June 1.

ALTA President's breakfast

The American Library Trustee Association has invited "People from the States" to its President's Breakfast Sunday, June 24, 7:30–9 a.m. Trustees may purchase tickets at $10.95 before June 15. Send check or money order (payable to ALA) to ALTA President's Breakfast at Headquarters.

ALTA literacy luncheon

Literacy authority Jonathan Kozol will speak at the American Library Trustee Association luncheon Sunday, June 24, 11:30 a.m.–2 p.m. Send $15 check or money order (payable to ALA) before June 15 to ALTA Luncheon, at Headquarters.

JMRT Awards Breakfast

The Junior Members Round Table Awards Breakfast Sunday, June 24, 7:30–9 a.m., features keynote speaker Hugh Atkinson. Tickets are $13 by advance registration no later than June 13. Send check or money order (payable to Junior Members Round Table) to Brenda Pacey, Lincoln Trail Libraries System, 1704 W. Interstate Dr., Champaign, IL 61821.

ACRL and quality circles

The Association of College and Research Libraries Community and Junior College Library Section luncheon at 11:30 a.m., Sunday, June 24, will focus on "Quality Circles: New Approaches to an Old Game."

Tickets at $12.50 may be ordered before June 9 by sending check or money order (payable to Paul Dumont) to Paul Dumont, District Service Center, Dallas County Community College, 4343 N. Highway 67, Mesquite, TX 75150.

PLA Award Brunch

The Baker & Taylor Company will cosponsor the Public Library Association Allie Beth Martin Award Brunch Sunday, June 24, 11 a.m.–1 p.m. Tickets at $15 may be ordered before June 8. Send check or money order (payable to ALA) to PLA ABM Brunch, at Headquarters.

Newbery/Caldecott Dinner

The Association for Library Service to Children Newbery/Caldecott Awards Dinner is scheduled for Sunday, June 24, 8–11:30 p.m. Tickets are $31 by advance registration no later than June 8. Send check or money order (payable to ALA) to ALSC, N/C Dinner, ALA Headquarters.

Chinese-American dinner

The Chinese-American Librarians Association buffet dinner will be held Sunday, June 24, 6–8 p.m. Tickets are $15; the deadline is June 10. Send check or money order (payable to Chinese American Librarians Association) to Norma Yueh, Library, Ramapo College of New Jersey, Mahwah, NJ 07430.

ALTA dinner dance

The American Library Trustee Association Gala will be held at the Lancers Club, Sunday, June 24, 7:30–10 p.m. Tickets at $40 may be ordered by June 15. Send check or money order (payable to ALTA Gala) to ALTA, at Headquarters.

Midwinter Meeting now Jan. 5–10

The dates for the 1985 ALA Midwinter Meeting in Washington have been changed from Feb. 2–7 to Jan. 5–10, Executive Director Robert Wedgeworth announced in March.

The ALA Conference Arrangements Office recommended the change, Wedgeworth explained, because room rates at the Sheraton Washington Hotel are some $15 lower in January than in February. Rates for the Jan. 5–10 period range from $65 to $71 for singles and $75 to $81 for doubles.

Wedgeworth also noted that the new dates correspond with the Jan. 7–12 period of this year's Midwinter Meeting, which attracted 5,210 registrants and broke all previous attendance records.

International Reception

"A Dallas Delight" is the annual International Relations Round Table reception for foreign librarians at Union Station, Pullman Room, Monday, June 26, 5:30–7:30 p.m. Tickets are $10.50 before June 15. Send check or money order (payable to Interna-

A HIGHLY COST-EFFECTIVE "EASY-GROW" SYSTEM FOR

10,000 TO 150,000 TITLES!

IMAGINE YOUR LIBRARY WITH THIS POWERFUL, EXPANDABLE EASY DATA SYSTEM!

Public libraries, school libraries, plus "Fortune 500" companies, all have chosen the Easy Data integrated library system from Sydney. It's expandable...it grows as your library grows, from a small but powerful mini-computer to a multi-processor distributed network.

Modules available:
• Acquisitions • Cataloging • Inquiry
• Circulation control

Features include:
• On-line authority control • Fully browsable • Powerful on-line inquiry with boolean logic • Fund accounting and management statistics • Microfiche and printed catalogs • Records management applications • Run on Datapoint hardware • State-of-the-art networking capabilities.

Please get in touch. We really have unique advantages for small and medium-size libraries of all types.

Available in public or special library versions. Serials system coming soon.

Sydney Development Corp.

tional Relations Round Table) to Jean Collett, St. Louis Public Library, 1301 Olive St., St. Louis, MO 63103.

AASL Awards Luncheon

Author David Macaulay will speak at the American Association of School Librarians Awards Luncheon Monday, June 26, 12:30 −3 p.m. Order the $16 tickets before June 1 by sending check or money order (payable to ALA) to AASL Awards Luncheon, ALA Headquarters.

ALA Inaugural Banquet

E.J. Josey will begin his term as president of ALA at the Inaugural Banquet at the Hyatt Regency Hotel, Wednesday, June 27, 6−11 p.m. Tickets are $25 per person, $200 for a table of eight. By May 29, send check or money order (payable to ALA) to ALA Inaugural Banquet, Conference Arrangements Office, at Headquarters.

Your input requested

• Gloria Novak, chair of the Library Administration and Management Association Library Buildings Awards Committee, seeks entries by Oct. 1 for the 1985 building awards. Renovated and rehabilitated library interiors will again be eligible. For brochures and application forms, contact Roger Parent, LAMA executive director, at Headquarters.

Novak also needs jurors for the awards program. Applicants must be ALA member librarians who have played a key role in a recent building program. Prospective jurors should send their qualifications by June 1 to Gloria Novak, Library Space Planner, Main Library, University of California, Berkeley, CA 94720.

• The Library and Information Technology Association Discussion Group on Automated Authority Control is distributing a three-page questionnaire on the creation of online-authority-control files. Results will be reviewed at discussion group meetings in Dallas June 25 and 26, 11:30 a.m. to 12:30 p.m. For a copy of the questionnaire, contact LITA at Headquarters or write Barbara B. Tillett, Head, Technical Services, Scripps Institution of Oceanography Library, C−075C, University of California/San Diego, La Jolla, CA 92093.

• What library system, library, academic department, or cooperative group would like to host the 1985 Arbuthnot lecture next April or May?

The Association for Library Service to Children has selected Patricia Wrightson, the Australian-born author of *The Crooked Snake, The Nargun and the Stars,* and *The Ice Is Coming,* to deliver the 16th annual lecture. The program will be supported by the Scott, Foresman Company and Atheneum Publishers.

Prospective hosts may obtain application forms from Anne Carlson Weeks, ALSC executive director, at ALA Headquarters. The completed applications are due June 15.

• Editors and papers are needed to celebrate the 25th anniversary of *RQ,* the Reference and Adult Services Division quarterly, beginning in fall 1985. Six themes have been chosen for the anniversary issue: evaluation and measurement of reference and information services, the future of fee-based reference and information services, the use of nonbibliographic information services, the diversity of adult services, collection development for reference and adult services, and information networks.

Prospective editors should apply to *RQ* Editor Kathleen Heim by May 15, 1984, indicating the issues of interest and expertise in the area. Authors should send abstracts to Heim. Members may apply as both theme editors and writers. Write Kathleen Heim, RQ Editor, School of Library and Information Science, Louisiana State University, Baton Rouge, LA 70803.

• The Library Administration and Management Association Middle Management Discussion Group solicits ideas, experiences, and other relevant info on dealing with problem employees. The data will be summarized in a "Hot Tips" brochure to be made available in Dallas at the program "Problem Employees: Improving Their Performance" cosponsored by the discussion group, the LAMA Personnel Administration Section, and the Office of Library Personnel Resources Advisory Committee Monday, June 25, 9:30 a.m. to noon.

Send your tips to Sue Golden, Assistant Director for Automated Systems, 216 Library, 1408 W. Gregory Dr., University of Illinois, Urbana, IL 61801.

ALANET tests prototype forms, adds AP Videotex newswire

ALANET, ALA's electronic mail and information service, now offers interlibrary loan and photocopy request facilities, enhancing cooperation among participating libraries.

Subscribers can complete ILL forms online for instant delivery to the electric mailbox of the lending library. The forms are prototypes developed by the Z39 Subcommittee AA being tested by ALANET. Subscribers are encouraged to comment on the forms.

The Associated Press Videotex also was recently added to the ITT Dialcom electronic news. Every day, AP Videotex files about 250 stories produced in New York by a special editorial staff. The stories are added to the wire latest to oldest, with the latest displayed first.

Yes, we have a less expensive way to access information. We charge for connect time only.

At VU/TEXT we're aware of how searching costs can add up. So we charge you for connect time only. No search unit charges. No telecommunications charges. No additional charge for 1200 baud. And, in most cases, no display or print costs.

And that goes for such full-text databases as The Washington Post, The Philadelphia Inquirer, The Wall Street Transcript, and more.

For complete information write or call nationwide

Doyle leaves OIF for IFLA post

Robert Doyle, assistant to the director of the Office for Intellectual Freedom since 1980, was appointed coordinator of the 1985 general conference of the International Federation of Library Associations and Institutions (IFLA) effective April 30.

The conference is expected to attract 2,500 librarians from all over the world to Chicago August 18–25, 1985. The U.S. organizing committee is chaired by New York Public Library President Vartan Gregorian and ALA Executive Director Robert Wedgeworth.

Staff appointments announced

Walter Brueggen, assistant exhibits manager, was appointed ALA conference manager in April. He succeeds Chris Hoy, who retired last June.

Before coming to ALA in 1978, Brueggen worked in trade show and convention meeting management in Chicago for more than 12 years. Earlier he spent eight years in the hotel sales management field.

Silas Wilson began work April 4 as the new ALA controller, succeeding Sheldon Landman, who has resigned (*AL*, April, p. 260). Until recently he was senior vice-president for administration at Desaulniers Printing Company in Milan, Ill. From 1966 to 1982 he was vice president in charge of finance and administration at Year Book Medical Publishers in Chicago.

LITA-Baltimore on cassettes

Recordings of two programs presented at the first national conference of the Library and Information Technology Association in Baltimore last September are now available for purchase or rental.

The introductory six-hour information technologies seminar was conducted by Brigitte Kenney Sept. 17. Videocassettes of the seminar, including a workbook, may be purchased for $250 for the three-fourths-inch U-matic format or $150 for the half-inch VHS. The seven-day rental fees are $100 or $75, respectively.

The day-long telecommunications workshop coordinated by Gary Ross was recorded on five audiocassettes Sept. 21. The cassettes are available for purchase only at $34.

The programs may be ordered from Information Yield, 3111 Stonecrest Dr., Syracuse, NY 13214. Specify Videocassette—LITA Information Technologies, noting format and purchase or rental; or Audiocassettes—LITA Telecommunications Workshop. LITA members receive a 10-percent discount on purchase prices only.

The Sign of a Well-Made Book.

When you're looking for books that will stand up to kids, just look for the Bound To Stay Bound seal inside the front cover. Because when it comes to bookbindings, nobody's tougher than BTSB. Not even kids themselves!

BTSB books are bound to rigid LBI specifications for the longest shelf life possible. Then they're carefully inspected to make sure they meet our own high standards of quality and durability. In fact, BTSB books survive more than 100 circulations, five times longer than the average publisher's edition.

BTSB also offers special services to reduce your paperwork, including: complete book processing; lower prices for volume purchases; discounts for BTSB Book Club members; and free pre-order computer lists of your titles. For more reasons why your books should always be signed by BTSB, write today for our free service brochure and 1983-'84 general catalog, listing almost 17,000 in-stock titles.

Films on Central America. Media Network, a national information center on alternative media, has published a *Guide to Films on Central America*. The 16-page guide offers evaluative descriptions of 40 films, videotapes, and slideshows on the conflicts in El Salvador, Guatemala, Honduras, and Nicaragua, focusing on U.S. involvement in the region. The publication also lists distributors, low-cost film libraries, and speakers bureaus, and gives suggestions for planning a successful film program. $2 plus 50¢ postage from Media Network, 208 W. 13th St., New York, NY 10011.

Media equipment dictionary. The *Dictionary of Library and Educational Technology* defines nearly 800 terms used in connection with audiovisual equipment. Author Kenyon Rosenberg also supplies criteria for equipment selection and a selective bibliography.

The expansion of coverage to include reprography, micrographics, communications, and computers nearly doubles the number of terms defined in the first edition of the work, published as *Media Equipment: A Guide and Dictionary* in 1976. 197 p., $24.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-19641, 0-87287-396-X).

French-Canadian AV catalog. Nearly 7,000 16mm films, video recordings, filmstrips, and other Canadian audiovisual materials in French are described in a new 1,100-page catalog. Called *Le Tessier* in tribute to Quebec motion picture pioneer Albert Tessier, the French-language catalog features title, subject, author, and series indexes to the entries, which are arranged in Dewey Decimal order. The volume also gives the addresses of 117 Canadian distributors. $45 Canadian from La Centrale des Bibliotheques, 1685 est, rue Fluery, Montreal, Quebec H2C 1T1 Canada.

Artists on film and tape. *From Museums, Galleries, and Studios* describes over 600 films, videocassettes, and audiocassettes featuring interviews with visual artists or showing them at work. The entries, arranged by artist, give bibliographic citations, descriptive annotations, distributors, and purchase and rental prices. The 199-page volume, compiled by Susan P. Besemer and Christopher Crosman, also includes a directory of producers and distributors and a 4,000-entry index by artist, interviewer, title, and subject. $35 from Greenwood Press, 88 Post Rd. West, POB 5007, Westport, CT 06881 (83-22710, 0-313-23881-2).

The world of the handicapped child is a world that *all* youngsters will recognize as their own. This deeply affecting book shows how fully and richly handicapped children share in the normal experiences of childhood.

Fran Ortiz shows these kids singing, dancing, blowing bubbles, and discovering the world around them. Tricia Brown's insightful text further sounds the book's theme—that all children are special, that each can share in life's gifts.

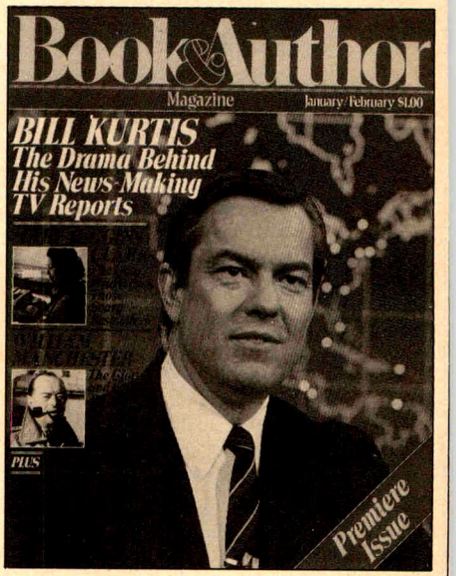
resources



Book & Author is a new monthly magazine aimed at "people who like books." Each issue will contain features on current authors and their books, news and reviews of recent titles, a special readers' section, and other departments. One-year subscriptions are $10 from Book & Author Magazine, Subscription Dept., 232 S. Meramec, St. Louis, MO 63105.

Drug education resources. The American Council for Drug Education is a nonprofit organization that provides current information on the health effects of marijuana, cocaine, and other psychoactive drugs. For a brochure describing monographs, pamphlets, films, and a school library kit available from the group, write the American Council for Drug Education, Inc., 6193 Executive Blvd., Rockville, MD 20852.

Who's Who in American Music: *Classical* contains biographical entries for 6,800 currently active and influential performers, composers, educators, administrators, librarians, managers, and other music professionals. The 582-page

Bang, zoom. "The Honeymooners" is just one of the 150 shows documented in *Television Comedy Series*. The illustrated guide gives episode-by-episode listings and plot summaries of every situation comedy now in syndication, from the Golden Age of Television through the 1980 season. Coverage ranges from the classic ("Burns and Allen") to the contemporary ("M*A*S*H"), with everything in between. Who can forget "The Dick Van Dyke Show"? Who can remember "Hey Landlord"? Who can stomach "My Mother the Car"? Joel Eisner and David Krinsky, authors of the monumental 866-page work, that's who. They've also provided air dates, background information, and credits for cast, writers, and directors, as well as an exhaustive index that even covers guest stars on individual episodes. $49.95 from McFarland and Co., POB 611, Jefferson, NC 28640 (83-42901, 0-89950-088-9).

volume also includes indexes by geographic location and professional classification. $125 from R.R. Bowker, POB 1807, Ann Arbor, MI 48106 (0-8352-1725-6).

Recipe roundup. *The Garland Recipe Index* covers the contents of 48 general, ethnic, and specialty cookbooks—from Claiborne and Child to *The Vegetarian Epicure* and *The Book of Tofu*—arranged in a single alphabetical listing. Compilers Kathryn W. Torgeson and Sylvia J. Weinstein have indexed thousands of recipes by name, principal ingredients, and cooking style, indicating "quick and easy" and "classic" recipes and the presence of illustrations. A unique finding aid for libraries with strong collections of current cookbooks, the 314-page volume is $35 from Garland Publishing, 136 Madison Ave., New York, NY 10016 (82-49257, 0-8240-9124-8).

Mapping out atlases. Over 100 general world atlases are evaluated in *Kister's Atlas Buying Guide*, the latest work from reference book critic Kenneth F. Kister (author of the *Encyclopedia Buying Guide)*. A lengthy introduction discusses the selection criteria involved in choosing an atlas, and appendixes include a chart comparing the major features of the atlases, directories of publishers and out-of-print map dealers, and a bibliography of books and articles on maps and atlases. 236 p., $37.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004 (82-42920, 0-912700-62-9).

Technology in education. The *1984 Directory of Resources for Technology in Education* lists sources of information on the use of microcomputers and, to a lesser extent, instructional television in schools. The 243-page guide is divided into sections covering national and state associations, conferences, computer camps, summer institutes, periodicals, databases, funding sources, and other areas. $19.95 cloth, $12.95 paper from Far West Laboratory for Educational Research and Development 1855 Folsom St., San Francisco, CA 94103 (0-914409-02-6).

Poems in popular periodicals. Hundreds of poems published in nonliterary magazines in the late 1950s are now accessible through the *Index to Poetry in Popular Periodicals, 1955 – 1959*, by Jefferson D. Caskey. Poems appearing in 44 publications ranging from *American Heritage* to the *Harvard Business Review* are indexed by title, first line, author, and subject. 269 p., $29.95 from Greenwood Press, 88 Post Rd, West, Westport, CT 06881 (83-22584, 0-313-22227-4).

Will Dewey work online? A grant of $94,350 from the Council on Library Resources to OCLC and Forest Press is funding a research project on "The Dewey Classification as an Online Searcher's Tool for Subject Access, Browsing, and Display in an Online Public Access Catalog." Forest Press, publisher of the Dewey Decimal Classification, is adding $55,000 to the project and OCLC is contributing computing facilities and overhead costs for a total budget of $304,246.

Karen Markey of OCLC is principal investigator of the four-phased project, which began Jan. 1 and continues through September 1985. Phase one will seek a consensus of expert opinion on the DDC fields and text needed for online access. The second phase will build DDC

The Modern Russian Dictionary for English Speakers

English Russian — Elizabeth A.M. Wilson

- Over 75,000 words and illustrative phrases
- Stresses the practical use of words
- Co-published with the prestigious Russkii Yazyk
- Numerous examples show different shades of meaning
- Good current usage in both languages is illustrated thoroughly and imaginatively
- Concentrates on the spoken language
- Layout allows maximum ease in use

". . . a wealth of contemporary illustration . . . indispensable for advanced Russian students of English. The selection and arrangement of the English words and phrases to be translated is admirable."
Professor O.S. Akhmanova, Moscow State University

"I have never come across another dictionary which formulated its purpose so clearly and achieved its goal so efficiently and consistently."
Professor V. Raskin, Purdue University

The Modern Russian Dictionary for English Speakers is the first dictionary to be written primarily for the native speaker of English who wants to speak and write Russian as it is used in the Soviet Union today. It breaks new ground by providing speakers with full phraseological illustration, enabling them to use words creatively and correctly.

The layout has been designed in such a way that users can quickly find their way through the Dictionary without constant recourse to a grammar or a Russian-English dictionary.

The Modern Russian Dictionary for English Speakers provides an invaluable reference source for English students of Russian at all levels, those who need to communicate "actively" in the language, and teachers of Russian. Moreover, the work also genuinely meets the needs of Russian users, both teachers and students.

The Source

into a demonstration online catalog and test its effectiveness as an online searching tool. Library patrons and staff will then test DDC online, and the final portion of the study will involve evaluation of the project and distribution of results.

Markey predicted the study will provide library patrons with "a powerful new tool" for subject searching that goes beyond current alphabetical and keyword approaches to subject headings.

Simple cataloging for small libraries. Arthur Curley and Jana Varlejs have completely revised and rewritten *Akers' Simple Library Cataloging* to reflect AACR2; the *Sears List of Subject Headings*, 11th ed.; and *Abridged Dewey Decimal Classification*, 11th ed. Library of Congress classification is not included.

The purpose of the new 7th edition is to teach librarians in small public, school, college, or special libraries who do not have professional training how to catalog a library collection. The entire text has been updated and reorganized and almost all examples are new. The authors also expanded the chapter on audiovisual and nonbook materials. Appendixes include selected abbreviations from AACR2, a glossary of cataloging and related terms, and a bibliography of cataloging aids.

384 p., $16.50 from Scarecrow Press, Inc. POB 656, Metuchen, NJ 08840 (83-14423, 0-8108-1649-0).

Paperback PRECIS guide. The revised second edition of *PRECIS: A Manual of Concept Analysis and Subject Indexing* offers a simplified and general approach to PRECIS theory and application and reflects 10 years' experience with the system.

PRECIS (PREserved Context Index System) is used by the British Library for subject indexing of its catalogs and publications. It can be used to construct a very specific subject approach to any library catalog.

The new edition by Derek Austin, who developed PRECIS, offers a system overview and a step-by-step guide to its use. The work includes chapters on thesaurus construction, system management, output options, and the role of PRECIS in online searching.

£8.50 (£5.25 each for 12 or more copies); for an order form, contact Marketing Office, The British Library Bibliographic Services Division, 2 Sheraton St., London W1V 4BH, England (0-7123-1008-8).

New Wyoming union catalog. Every Wyoming county library system and community college and the University of Wyoming have received copies of the state's first union catalog. Produced by the state library to encourage resource sharing, the catalog comprises 420 microfiche containing records for 215,740 unique titles recently acquired by Wyoming libraries.

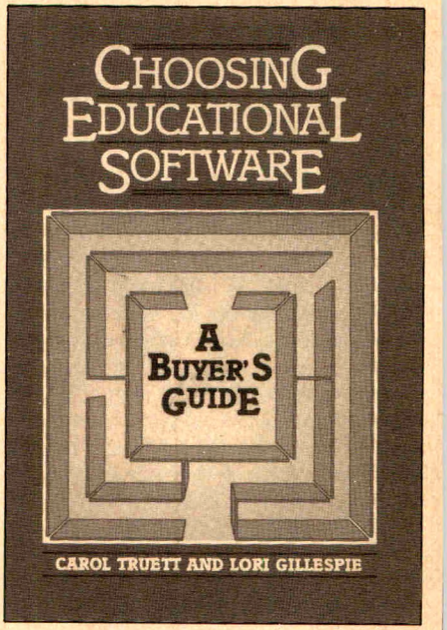
The catalog was compiled using OCLC archive tapes from participating libraries and from Library of Congress card numbers sent to the state library since 1976. Plans call for a new catalog each year and for six-month supplements.

Guidelines for monograph orders. Changes in acquisitions work, including the Standard Address Number (SAN), the Standard Order Form, and online systems, are reflected in the revised second edition of *Guidelines for Handling Library Orders for In-Print Monographic Publications*. The work was prepared by the Bookdealer-Library Relations Committee of the RTSD Resources Section.

The guidelines make basic recommendations about librarian/bookdealer relationships in handling orders for books, pamphlets, and most other monographs, including monographs in series. They cover such topics as order form formats and data elements, claims, cancellations, returns, and invoicing. An appendix offers a "consumer's guide" to prepayment.

21 p., paper, from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-22307, 0-8389-3299-1).

microcomputing



Choosing Educational Software: *A Buyer's Guide* is an introduction to evaluating and purchasing software for grades K–12. Authors Carol Truett and Lori Gillespie offer guidelines and sample forms for evaluating programs, information on directories of available software, descriptions of journals and other selection aids, and a bibliography of further readings. 216 p., paper, $18.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-24906, 0-87287-388-9).

Calls for papers. Proposals for papers and poster sessions are being sought for a "Library Software Conference" to be held at the Philadelphia Hilton October 15–16. *Library Software Review* is sponsoring the two-day seminar, focusing on software applications for minicomputer and mainframe systems as well as microcomputers. The program will include

demonstrations of software packages, product updates by vendors, discussions of software installation and integration in libraries, and advice on software selection. Librarians, educators, and software designers should send proposals on these and related topics to Nancy Jean Melin, Editor, *Library Software Review*, 520 Riverside Ave., Westport, CT 06880.

The Greater Cincinnati Library Consortium (GCLC) is soliciting program proposals for a workshop on the use of microcomputers in academic, public, school, and special libraries. The workshop, titled "The Incredible Usable Microcomputer—Library Applications," will be held September 18 in Cincinnati. Programs should illustrate commercial software adapted for library use or describe "home-grown" library software. For more information and proposal forms contact the GCLC Office, Central Library 447, University of Cincinnati, St. Clair at Woodside Pl., Cincinnati, OH 45221-0033. Deadline for submission of proposals is June 15.

Template clearinghouse. Microcomputer Libraries, a library consulting firm, and the Highsmith Co. have formed a not-for-profit clearinghouse to promote library management applications of general purpose software. Libraries can obtain "templates" (or blank forms) from the clearinghouse to use with their commercial spreadsheet or database software. All templates distributed by the clearinghouse are in the public domain; in fact, users are encouraged to duplicate the templates and share them with other libraries.

Initial offerings include templates for the Apple II and IIe versions of Visicalc and DB Master. Charges for the templates, covering only the costs of duplication, are $5 for single diskette templates and $7.50 for double disk.

For more information on the project or to donate applications templates for public domain distribution, write Eric S. Anderson, c/o Microcomputer Libraries, 145 Marcia Dr., Freeport, IL 61032.

librarian's library

Harrod's Librarians' Glossary *and Reference Book* has been a standard work in the profession since 1938. The British publication encompasses terms used in library and information science, printing and publishing, archives, and related fields.

A new edition of the glossary is now available, adding some 300 entries to the 1977 fourth edition and revising over 700 others, mostly in the areas of information technology, telecommunications, and computer applications. 861 p., $69.95 from Gower Publishing Co., Old Post Rd., Brookfield, VT 05036 (83-17174, 0-566-03460-3).

Medieval libraries. *The Handbook of Medieval Library History* is a translation of volume 3, chapter 5 of the encyclopedic *Handbuch der Bibliothekswissenschaft* (Handbook of Library Science). Written by Karl Christ and translated and edited by Theophil M. Otto, the 492-page survey divides the thousand-year span of the Middle Ages into early, middle, and late periods, with material in each section arranged by country or type of library. The text covers the political, sociological, and cultural developments of the period that affected book production, book collection, and the practice of librarianship. $35 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-15226, 0-8108-1654-7).

Science or not? The library/information science profession is based more on technique and technology than on actual science, relying instead on scientific principles developed in linguistics, statistics, and other disciplines. Most of the leading researchers in the field transfered their attention to computer science in the early 1970s, and no substantive research has occurred since then.

That's the provocative premise of *Research and Information Science: What Where We've Been Says About Where We Are*, a Dalhousie University Library Occasional Paper written by Martha W. West. She proposes the development of a center for research to stimulate research activity and promote cross-fertilization with other fields. 73 p., paper, $11.50 from the School of Library Science, Dalhousie University, Halifax, Nova Scotia B3H 4H8 Canada (0-7703-0175-4).

Quantitative Methods *for Library and Information Science* is an application-oriented text explaining statistical methods, aimed at postgraduate library school students as well as practicing librarians and information scientists. Author I. K. Ravichandra Rao based the 271-page volume on lectures he delivered at the Documentation Research and Training Centre in Bangalore, India. Chapters cover probability theory, correlation studies, sampling methods, testing of hypothesis, and other topics. $24.95 from John Wiley & Sons, 605 3rd Ave., New York, NY 10158 (82-21375, 0-470-27393-3).

intellectual freedom

The Right to Information, edited by Jana Varlejs, publishes the proceedings of the 21st annual Rutgers GSLIS Alumni-Faculty Symposium held in 1982. Representatives from academe, publishing, the information industry, and librarianship discuss the right of privacy vs. the right to know, copyright and the new technologies, private sector publication of government information, and librarians' role in defending public access to information. The 88-page paperback also includes a select, annotated bibliography on right-to-information issues. $9.95 from McFarland and Co., POB 611, Jefferson, NC 28640 (83-26750, 0-89950-097-8).

"Empty Shelves, Empty Minds" is a videocassette produced by the Washington Coalition Against Censorship as a tool for speakers

addressing groups on intellectual freedom issues. The 13½-minute program covers Constitutional protections, reasons materials are attacked, the role of the public librarian, selection vs. censorship, ways to resist censorship, and other areas. Background materials supplied with the tape include "Books Under Fire," a reproducible handout. Available in VHS, Beta, and ¾-inch formats for $50 plus $5 shipping from the Washington Coalition Against Censorship, 2101 Smith Tower, Seattle, WA 98104.

When librarians were censors. At the time of ALA's formation in 1876, librarians served as moral censors, banning books they considered offensive or harmful to the community. By 1939, when the first Library Bill of Rights was adopted, librarians had become guardians of the freedom to read.

The events and attitudes leading to this shift are examined by Evelyn Geller in *Forbidden Books in American Public Libraries, 1876–1939: A Study in Cultural Change*. The study approaches censorship as part of the professional ideology of book selection, showing how librarians have changed their values and their concept of the public interest over the years. Approx. 272 p., $29.95 from Greenwood Press, 88 Post Rd. West, POB 5007, Westport, CT 06881 (83-12566, 0-313-23808-1).

Promoting access to documents is the aim of *Public Access to Government Information*, a theoretical and practical guide for both documents librarians and those unfamiliar with government publications. Authors Peter Hernon and Charles R. McClure examine public access in the context of bibliographic control, collection development, resource sharing, new technologies, marketing, administration, and other areas. In addition to Government Printing Office publications, the volume covers technical reports, state and local resources, and international organizations. 482 p., $49.50 cloth, $25 paper from Ablex Publishing Corp., 355 Chestnut St., Norwood, NJ 07648 (83-25797, 0-89391-100-3 cloth, 0-89391-252-2 paper).

bibliography

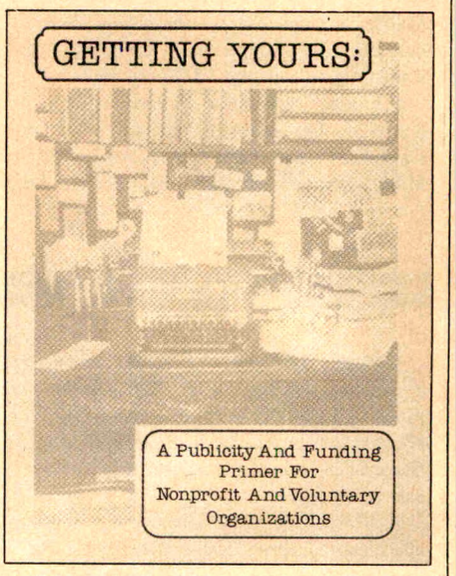
Staying in style. *Style Manuals of the English-Speaking World: A Guide* is a comprehensive listing of 231 current, nontechnical style manuals. The first section of John Bruce Howell's bibliography describes manuals for general use, followed by a section of guides for individual disciplines from agriculture to zoology. Appendixes list manuals for nonsexist language and writing about disabled people. 138p., $22.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004 (82-42916, 0-89774-089-0).

Reading on running. *Running: A Guide to the Literature* offers a rundown of titles devoted to the sport. Authors Bob Wischnia and Marty Post provide descriptions and recommendations for 335 training manuals, biographies, guides for travelers, works of fiction, and other books and pamphlets. Appendixes list running publications and associations and Olympic champions and world record-holders. Entries are alphabetical by author, with title and subject indexes included. 148 p., $18 from Garland Publishing Co., 136 Madison Ave., New York, NY 10016 (83-48258, 0-8240-9105-1).

Architecture: *A Bibliographic Guide to Basic Reference Works, Histories, and Handbooks* also covers specialized literature on building technology, types of buildings, city design, and landscape architecture. Author Donald L. Ehresmann annotates 1,359 books written in Western European languages between 1875 and 1980. 354 p., $55 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-19600, 0-87287-394-3).

Black autobiographies. The newly revised and expanded *Black Americans in Autobiography* contains 710 annotated entries, some 58 percent more than the 1974 edition. The 193-page guide, compiled by Russell C. Brignano, lists autobiographies and books with autobiographical elements written since the Civil War. Each entry includes basic information on the author and NUC symbols of libraries holding the title. The entries are indexed by occupation, title, and location. $27.50 from Duke University Press, 6697 College Station, Durham, NC 27708 (83-20505, 0-8223-0559-3).

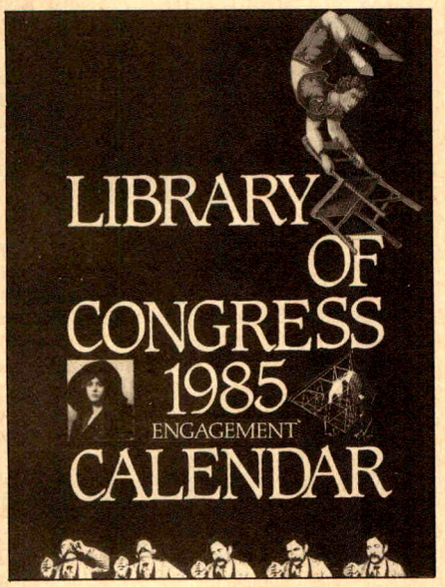
publicity



Guide to getting. *Getting Yours* is a publicity and fundraising handbook aimed at nonprofit and voluntary organizations, produced under a grant from the U.S. Department of Health and Human Services. The manual contains practical information on handling media relations, producing newsletters and brochures, working with other groups and individuals in the community, identifying funding sources, and other areas. 84 p., paper, $6 from Contact, Inc., POB 81826, Lincoln, NE 68501-1826.

The Art of Fund Raising is a guide to all aspects of a fundraising campaign, from conducting a feasibility study, forming a committee, and recruiting a chairperson to rating potential givers, publicizing the campaign, and setting up special events. Author Irving R. Warner, a consultant with 35 years' fundraising experience, also offers statistical information and tips on new techniques such as planned gifts and direct mail. The 176-page mass market paperback is $3.50 from Bantam Books, 666 5th Ave., New York, NY 10103 (0-553-24128-1).

Make a date with a moneymaker. Libraries and friends groups looking for a fundraising product can order multiple copies of the *Library of Congress 1985 Engagement Calendar* at a special discount for resale.



The 7-by-9-inch, wire-bound desk calendar will feature over 70 illustrations from the library's collections, most in color, including a page from a Gutenberg Bible, the earliest map of Manhattan, and a 10th-century Chinese scroll. Each calendar page covers one week, with plenty of space for marking notes and appointments.

The suggested retail price is $10, with libraries' discounts ranging from $8.50 for one copy to $5 each for 100 or more, plus shipping. For full ordering information write GMG Publishing, 25 W. 43rd St., New York, NY 10036.

License to love. A 6-by-12-inch "Love My Library" license plate, red on white with a black border, is available for $3 prepaid from the Mideastern Michigan Library Cooperative, 1026 E. Kearsley St., Flint, MI 48502.

Newsletter abetter. Camera-ready copy for library newsletters is available from the Library Newsletter Service. The new company is headed by David Bryant, a suburban New Jersey library director with 12 years of library public relations experience. Subscribers can receive the copy on a quarterly, bimonthly, or 10-issues-per-year basis, in a choice of formats. For samples and a full description of services send $1 to Library Newsletter Service, POB 637, Belleville, NJ 07109.

info briefs

Facsimile transmission directory. The *FAX/NET Public Access Facsimile Station Directory* lists over 900 companies offering facsimile transmission service for a per-page fee. The stations are located in large cities, smaller towns, and rural areas throughout the United States. Entries, arranged by state and city, include the necessary machine compatibility information. $32.50 prepaid (add $2.50 shipping if invoiced) from Perimeter, Inc., POB 27222, Minneapolis, MN 55427.

Government Computer News is a monthly tabloid newspaper for computer managers, professionals, and end users in the federal government. Each issue contains news stories on computer use in government agencies, articles on software and applications, information on procurement, announcements of new products, book reviews and other features. The publication is free to employees in federal, state, and local government; for a subscription application write *Government Computer News,* 1620 Elton Rd., Silver Spring, MD 20903.

Information and Misinformation: *An Investigation of the Notions of Information, Informing and Misinforming* uses philosophical methods to develop notions of information and misinformation. Author Christopher Fox explains information as propositions rather than in terms of the probability of the occurrence of events, forming a theoretical foundation for information science. The interdisciplinary scope of the work encompasses linguistics, philosophy, communications, and computer science as well as librarianship and information science. Number 23 in the Contributions in Librarianship and Information Science series, the 223-page volume is $29.95 from Greenwood Press, 88 Post Rd. West, POB 5007, Westport, CT 06881 (83-5545, 0-313-23928-2).

International telecommunications. *Issues in International Telecommunications Policy: A Sourcebook* is a guide to legal information on this complex field. Five chapters cover the International Telecommunications Union, the regulatory environment, transborder data flow, telecommunications and trade policy, and intellectual property. For each subject, editor Jane H. Yurow has compiled an essay by an expert in the area; annotated summaries of U.S. laws, regulations, and court decisions; digests of treaties and agreements; descriptions of activities of key international organizations; a selective, annotated bibliography; and other information. 260 p., $49.95 plus $2 shipping, prepaid, from Sourcebook, The George Washington University, Center for Telecommunications Studies, Washington, DC 20052 (83-082231, 0-9612072-0-5). □

ANNOUNCING
PUBLICATION OF

THE FRANKLIN LIBRARY OF PULITZER PRIZE CLASSICS

In cooperation with the original publishers of these books, and with their authors or estates, The Franklin Library will publish, exclusively for subscribers, a collection of the fifty most outstanding works ever awarded the Pulitzer Prize for literature — each volume of which has been individually selected for inclusion by a distinguished panel of prominent Americans.

The Franklin Library of Pulitzer Prize Classics is not associated with or sponsored by Columbia University which administers the Pulitzer Prizes or the Pulitzer Prize Board.

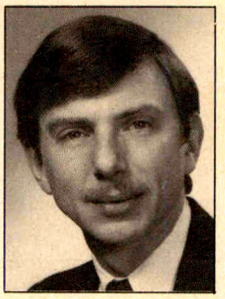
Jennifer Cargill

Lynn Magrath

Leona Salzman



Paul Hudson

June 1 ALA Councilor-At-Large **JENNIFER CARGILL** will become associate director of libraries for technical processing at Texas Tech University, Lubbock. . . . **LEONA H. SALZMAN** is now assistant director of the Clinton-Essex-Franklin Library System in Plattsburgh, N.Y. . . . March 1 ALA member **LYNN MAGRATH** became deputy director of the Pikes Peak Library District in Colorado Springs, Colo. . . . **PAUL T. HUDSON** has been named deputy librarian of the Public Library of Cincinnati and Hamilton County (Ohio) main library. He succeeds ALA member **JACOB EPSTEIN**, who recently retired. . . . At the Milton S. Eisenhower Library of Johns Hopkins University in Baltimore, Md., **EDWARD L. ROSENFELD** is now associate director for collection services; and **BARBARA J. SNEAD** is head of the Acquisitions Department. Both are ALA members. . . . Feb. 29 ALA member **JEAN BLACKWELL HUTSON** retired from NYPL's Schomburg Center for Research in Black Culture. Her distinguished career in black-history librarianship included service as Schomburg's curator and later as chief. . . . Edinburgh University in Scotland has awarded information technology fellowships to two ALA members: **RICHARD DE GENNARO**, director of libraries at the University of Pennsylvania, Philadelphia, and **JOHN SCHROEDER**, director of research and development at the Research Libraries Group, Inc., based at Stanford (Calif.) University. They will study the applications of information technology to bibliographic data handling, including the feasibility of exchanging bibliographic data between U.S. and United Kingdom research libraries. . . . The American Hospital Association headquarters library in Chicago, Ill., recently announced two appointments: **ELIZABETH CRABTREE** as staff specialist, collection organization, and ALA member **JUNE FIFTY** as staff associate, information services. . . . ALA Councilor-At-Large **JODY BUSH** is now assistant director of Berkeley (Calif.) Public Library. Another ALA member, **FRANCISCA SCHNEIDER**, recently became supervising librarian of BPL's West Branch. . . . July 1 **SIDNEY VERBA** will become director of the Harvard University Library, Cambridge, Mass., as well as Carl H. Pforzheimer University Professor at the school. He will succeed **OSCAR HANDLIN** in both posts. . . . July 1 **SHARON J. ROGERS**, president-elect of ALA's Association of College and Research Libraries, will become librarian of the Melvin Gelman Library at George Washington University, Washington, D.C. Rogers currently serves as associate dean of libraries and learning resources at Bowling Green (Ohio) State University. . . . ALA member **ROY MERSKY** has been elected a member of the American Law Institute, a select body of approximately 1,900 leading figures in the legal profession. A past president of the National Librarians Association, Mersky is currently on leave from his post as director of the law school library at the University of Texas at Austin to serve as visiting director of the New York (N.Y.) Law School Library. . . . The Washington Library Media Association recently presented its College/University Administrator of the Year award to ALA member **BARBARA TOLLIVER**. Tolliver, who is director of continuing education at the University of Washington library school in Seattle, is 1983/84 president-elect of the Pacific Northwest Library Association. . . . In March ALA member **JAMES W. FRY** became Michigan state librarian. . . . ALA member **MARY ANN MERCANTE** will become executive director of the Missouri Library Network Corporation, headquartered in St. Louis, on July 1. . . . In January **JEAN STEVENS**, head of the Education Library at the University of Texas at El Paso, received the Donald M. Foos Award for the Librarian of the Year from the Border Regional Library Association. . . . ALA member **MILTON MITCHELL**, director of the Indianhead Federated Library System in Eau Claire, Wis., is the new president-elect of the Wisconsin Library Association. . . . **CHERYL WILSON** is 1983/84 president-elect of the New Mexico Library Association. . . . Six ALA members have been selected for the 1984/85 Academic Library Management Intern program of the Council on Library Resources: **JOSEPH J. BRANIN**, assistant director for collection development at the University of Georgia Libraries, Athens; **NICHOLAS C. BURCKEL**, associate director of the library/learning center at the University of Wisconsin-Parkside; **JAMES ALAN COGSWELL**, head of circulation at Princeton (N.J.) University Library; **CAROLYN LOUISE HARRIS**, head, preservation department, at Columbia University Libraries, New York, N.Y.; **ARLYNE A. JACKSON** associate librarian, collection manager, and head of user services at the Massachusetts Institute of Technology's Dewey Library in Cambridge; and **PAUL DOUGLAS METZ**, head, user services department, at Virginia Polytechnic Institute and State University, Blacksburg. . . . ALA member **MARY D. LANKFORD** is the 1984 recipient of the Distinguished Library Service Award for Texas School Administrators from the Texas Association of School Librarians. Lankford is director of libraries and media services for the Irving Independent School District. . . . **SUSAN R. FALB** is the first historian of the Federal Bureau of Investigation, Washington, D.C. . . . ALA member **BETH PERRY** recently became Rhode Island state librarian. . . . **MONA C. COUTS** is now vice president, operations, at Blackwell Library Systems, Great Neck, N.Y. She last served as vice president, information systems, at Warner-Eddison Associates, a library consulting firm in Cambridge, Mass. . . . ALA member **STEVEN MALLINGER**, Librarian II for the Pennsylvania Bureau of Corrections, recently received a 1983 Outstanding Performance award from the bureau. . . . At the Library of Congress **ROBERT G. ZICH** is now director of the Office of Planning and Development and **DOROTHY GREGOR**, formerly UC/Berkeley's associate university librarian for technical services, is chief of the Shared Cataloging Division. . . . July 1 ALA member **JOHN SHERIDAN** will become head librarian of the Tutt Library at Colorado College in Colorado Springs. He will succeed **GEORGE FAGAN**, who retired last year. . . . **ELOISE KIRK** is 1984 president-elect of the National Association of State Educational Media Professionals. . . . ALA member **DIANA R. NORTON** recently became youth services consultant for the Mid-York Library System in Utica, N.Y. . . . The Ohio Educational Library/Media Association has voted **DONNA BOYLAN** its 1984 president-elect and ALA member **ELLEN STEPANIAN** the 1984 recipient of its Award of Merit. . . . ALA member **NANCY BUNIMS D'AMICO** is now bibliographic systems analyst at CL Systems, Inc., West Newton, Mass. . . . At the Oklahoma Department of Libraries, **INEZ DILLON PRINSTER** is project administrator of a year-long study to assess the condition of archives and historical records throughout the state. . . . ALA member **ANNIE MAY GILBERT** recently retired as chief of materials processing at Dallas (Tex.) Public Library. She was 1979/80 president of the Texas Library Association. . . . **MARY CAY ROJTAS-MILLINER** is now retrospective conversion librarian at the Jennie King Mellon Library of Chatham College, Pittsburgh, Pa. . . . ALA member **BRUCE BUMBALOUGH** is now systems librarian for the Northwest Kansas Library System, in Norton. . . . Four ALA members recently joined the library staff at Virginia Polytechnic Institute and State University in Blacksburg: **LOWELL ASHLEY** as humanities cataloger (music); **MICHAEL D. CRAMER** as science and technology cataloger; **IRENE GLENNON** as head of monographic cataloging; and **LINDA J. WILSON** as project manager of user education. . . . **MARNIE REES** is now administrator of the Lackawanna County Library System, Scranton, Pa. . . . ALA member **DONALD ADCOCK** is 1984 president-elect of the Illinois Association for Media in Education. . . . **NORMA B. HIGGINS** is now archivist of Alfred (N.Y.) University. . . . ALA member **JOSEPH J. ACCARDI** recently became director of the Janesville (Wis.) Public Library.

Deaths

BLANCHE W. COLLINS, city librarian of Long Beach, Calif., from 1960–68 and prominent champion of intellectual freedom, died Oct. 2. . . . **EDGAR HUGH BEHYMER**, former dean and professor emeritus of the Palmer Graduate Library School at Long Island University in Greenvale, N.Y., died March 12. . . . **JENNINGS WOOD**, former chief of the Exchange and Gift Division at the Library of Congress, died Jan. 4. □

Now another choice for your union list.

Faxon has specialized in serials management for libraries for over 100 years. Now we're offering a Union List module on Linx, the online serials management system. Union list groups can add, share, and maintain up-to-date information on their collective serial titles and holdings.

Because we're flexible, we can handle your current machine-readable lists or save time during your manual conversion, thus saving you valuable manpower resources. Our Union List products are available now and include both group lists and individual member lists in hard copy, tape, or microfiche.

Make a choice soon! You don't have to use Faxon's subscription service to take advantage of our Union List. Call our Sales Department at (800) 225-6055 or (617) 329-3350 (collect) and arrange for a demonstration of Faxon's Union List.

Busy

World Book is the most frequently used encyclopedia in print, according to librarians. In fact, according to two independent surveys* reported in the *Encyclopedia Buying Guide*, librarians throughout the U.S. and Canada chose *World Book* over 34 other references as the one that's most frequently used, easiest to use, and easiest to understand.

World Book's popularity isn't the result of just ease of use. The *Guide* awarded *World Book* excellent ratings in nine categories: scope, authority, reliability, recency, objectivity, clarity, accessibility, graphics, and physical format. The closest competitors scored excellent ratings in only six, four and one categories, respectively.

What the ratings don't explain is how *World Book* appeals to children, high school and college students, and adults as well. It's no accident. Articles in *World Book* are written *at the language level of the people most likely to read them.* No matter how difficult the subject matter, *World Book* makes it **understandable.** Selected articles provide readers with quick overviews called "Facts in Brief." And *World Book* brings information to life with more than 29,000 photographs and illustrations.

"*World Book* is, page for page, the best encyclopedia on the market today," reports the *Guide.* "*World Book* is far and away the first choice of professionals who deal with knowledge and information day in and day out."

What's the busiest reference in your library?

Doesn't it make sense to have a *current* set on your shelves right now?

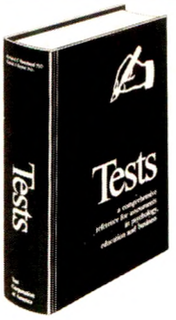
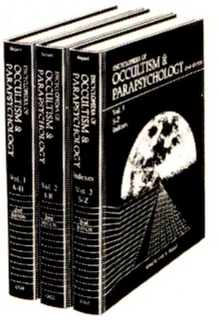
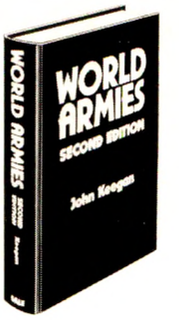
NEW BOOKS FROM GALE







All Gale Reference Books Are Sent on 60-Day Approval

Tests

...A Comprehensive Reference for Assessments in Psychology, Education, and Business. Edited by Richard C. Sweetland and Daniel J. Keyser. 890pp. Indexes. Test Corporation of America, 1983. Hardbound library edition distributed to libraries in the U.S. and Canada exclusively by Gale. ISBN 0-9611286-1-5. $75.00. **(SO)**

Over 3,000 tests used in psychology, education, and business are thoroughly described and evaluated in this new reference work. Entries are grouped for productive browsing in 62 subcategories under the three main classifications: Psychology, Education, and Business. Entries furnish enough information about each test to provide a basis for evaluation, including the test's purpose, a description, relevant cost and availability information, appropriate level, and whether the test is self-administered. Six indexes: Categories/subsections, Title, Author, Publisher, Scoring Services, and Visually Impaired.

Currier and Ives: A Catalogue Raisonne

...Gale's Comprehensive Catalogue of the Lithographs of Nathaniel Currier, James Merritt Ives, and Charles Currier, Including Ephemera Associated with the Firms, 1834-1907. 1st ed. Edited by C. Carter Smith and Cathy Cashion. 1,024pp. in 2 vols. Slipcased. Bibliography. Indexes. Gale, 1984. ISBN 0-8103-1638-2. $250.00/set. **(SO)** Two softbound supplements, $75.00/both. **(SO)**

This comprehensive work is the most thorough catalogue of the lithographs of Nathaniel Currier, James Merritt Ives, and Charles Currier. It provides detailed descriptions of more than 7,000 prints, including 400 previously unrecorded. Containing some 1,000 illustrations to enliven the text, the catalogue updates and corrects information from several previous checklists and features a concordance that links Gale's entry numbers with those of previous checklists. Detailed entries provide title, subtitle, and full transcription of verse or prose appearing on the print, size, coloration, description, compiler's notes, institution(s) where print is on view, and whether hand-colored. Five indexes: by subject, artist, date, site depicted, and illustration title.

World Armies

2nd ed. Edited by John Keegan, Senior Lecturer in War Studies, Royal Military Academy, Sandhurst. 688pp. Maps. Photographs. Published in the U.S. and Canada by Gale, 1983. ISBN 0-8103-1515-7. $80.00. **(SO)**

Now among the most powerful and significant institutions in international relations, armies consume enormous portions of national budgets and exert tremendous influence in economics, politics, and society. This work is a comprehensive reference source for information on the armies, military establishments, military histories, equipment and operations, and related subjects for every nation of the world. Numerous maps identify areas of military significance in today's world, and photographs provide a visual record of commonly used military equipment.

Encyclopedia of Occultism and Parapsychology

...A Compendium of Information on the Occult Sciences, Magic, Demonology, Superstitions, Spiritism, Mysticism, Metaphysics, Psychical Science, and Parapsychology. 2nd ed. Edited by Leslie A. Shepard. 1,800pp. in 3 vols. Indexes. Gale, 1984. ISBN 0-8103-0196-2. $200.00/set. *(Vol. 1 just published)* **(SO)** *Occultism Update*, interedition supplement, $85.00. **(SO)**

The second edition is a completely revised, updated, and reset reference guide to occult phenomena and personalities. Containing about 6,000 entries, the new edition features much new material, including new entries and additions to existing entries; expanded bibliographies with citations to recently published works; current country entries dealing with developments in individual countries around the world; biographical details that update old entries, plus entries on newly prominent individuals; additional cross references; and more.

Films and Filmmakers

Edited by Christopher Lyon and Susan Doll. 2,600pp. in 4 vols. Indexes. Vol. 1, *Films*. Vol. 2, *Directors/Filmmakers*. Vol. 3, *Actors and Actresses*. Vol. 4, *Writers and Production Artists* (including screenwriters, cinematographers, producers, editors, and designers). St. James Press, 1984. Available in the U.S. and Canada from Gale. $50.00/vol. $200.00/set.

Four volumes provide detailed reference material on films, directors/filmmakers, actors and actresses, and writers and production artists. Coverage is worldwide and focuses on individuals that have shaped the history of film: great pioneers of the U.S., England, France, and Germany; Hollywood stars of all periods; great directors and writers of the post-war period from countries as diverse as Italy and Japan; the contemporary avant-garde; and the filmmakers of Eastern Europe and the Third World. About 500-700 entries per volume.

(SO) These titles are available at Gale's 5% Standing Order discount. Deduct 5% if you send check with order. Customers outside the U.S. and Canada add 10%.

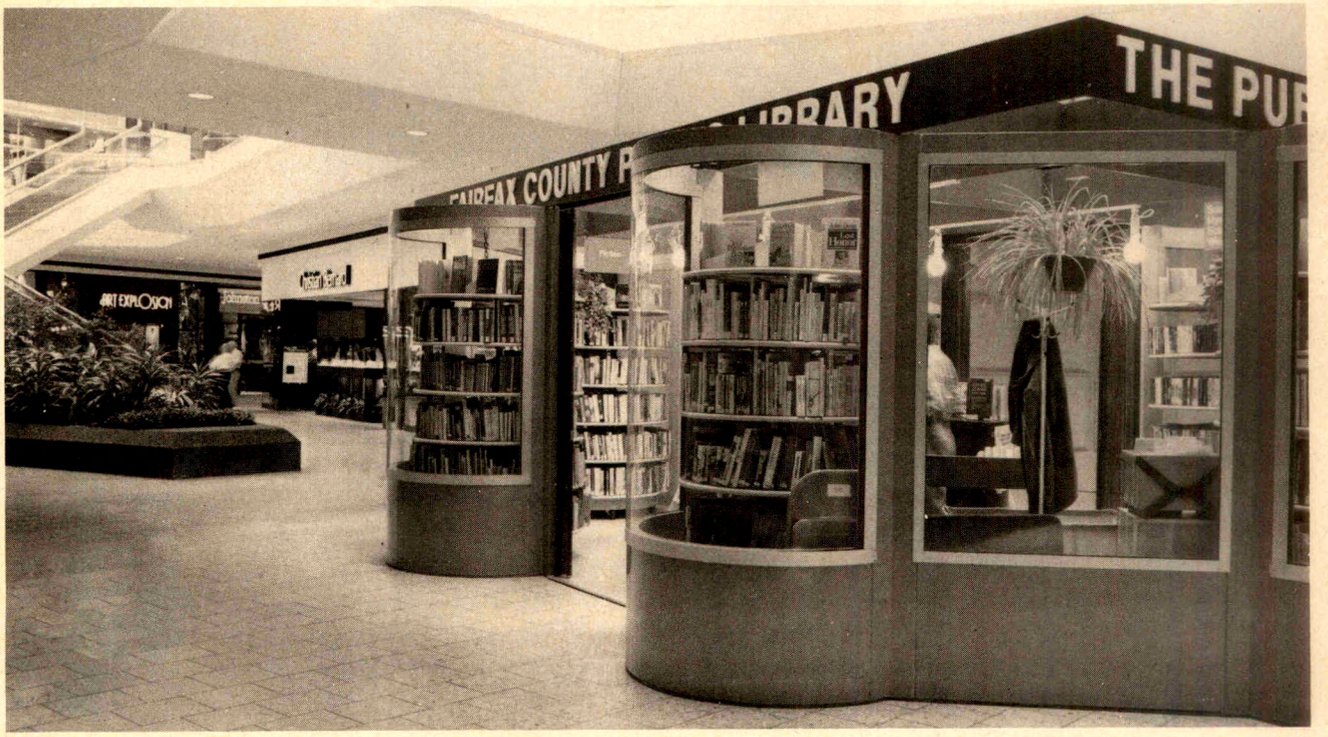
Now For The First Time At ALA See The Shopping Center Porta-Boutique™ At Booth #354

The new marketing approach to Library Service that's circulating more books per square foot than any other Libraries in the nation.

A Proven Winner
These new shopping mall Porta-Boutiques™ are already smashing successes in Houston, Cincinnati, Fairfax County, VA., Oakland.

New Circulation Records
Porta-Boutiques™ are circulating as many as 120,000 books per year from just 296 sq. ft. of space. Imagine how low the cost-per-book circulation costs are. Interestingly, the Porta-Boutique™ helps improve sales for book stores in addition to helping build mall traffic.

Most Cost Effective
These units take the books to the people and provide a viable solution to the cost problems facing your system. Outreach programs have never been this exciting.



Unbelievable Book Capacity
Porta-Boutiques™ can hold as many as 11,000 hard and soft cover books in just 296 sq. ft. on its unique Port-Carousel™ rotating shelves, and there's room for plenty of patrons to browse.

Indoors, Outdoors, Anywhere
Porta-Structures™ can be built on street corners, islands, town squares, recreation areas, parks, parking lots of shopping centers, etc. We provide turnkey libraries in months instead of years.

Seeing Is Believing
Now, for the first time at ALA, you can see, touch, stand in, walk around and experience the unique quality and designs of Porta-Structures™. Come see us in Booth #354. You'll be pleasantly surprised. Seeing is Believing.

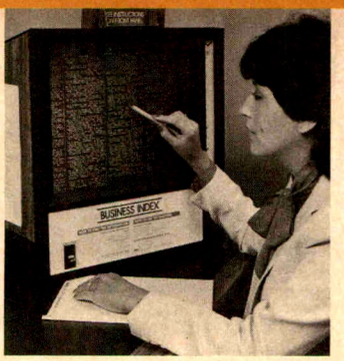
Porta-Structures Industries, Inc.

P.O. Box 30193 □ Washington, D.C. 20814 □ 301-951-0500

1

Whether you use the BUSINESS COLLECTION,™ or the MAGAZINE COLLECTION,™ you take the same 4 fast steps from article citation to printed copy.

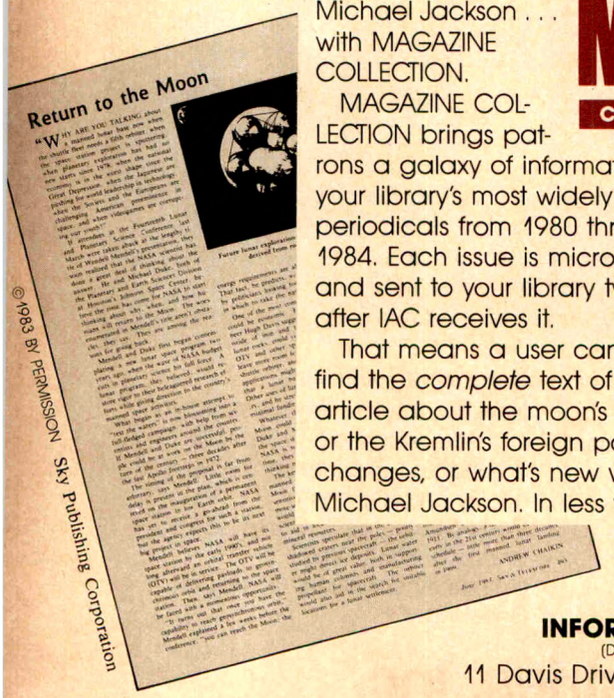
You easily find a citation through the BUSINESSS INDEX™ or the MAGAZINE INDEX.™



2

Using the location code, select the microfilm cartridge that contains the full text of the article you want.

4 FAST STEPS TO THE MOON



Return to the Moon

"WHY ARE YOU TALKING about the shuttle three months a fifth century when the space station program has had no new starts since 1978, when the commercial exploitation of space is in the Great Depression, when the Japanese are pushing the world leadership in technology, when the Soviets and the Europeans are challenging American preeminence in space, and when consequent are coverage ... ?"

It's only 4 steps to the Kremlin, too . . . or to star Michael Jackson . . . with MAGAZINE COLLECTION.

MAGAZINE COLLECTION brings patrons a galaxy of information from your library's most widely read periodicals from 1980 through 1984. Each issue is microfilmed and sent to your library two weeks after IAC receives it.

That means a user can easily find the *complete* text of an article about the moon's surface, or the Kremlin's foreign policy changes, or what's new with Michael Jackson. In less than 20 seconds the patron can make a copy. All this is with a minimum of staff time because MAGAZINE COLLECTION is a speedy, self-service unit. It eliminates damage and theft, a 15% loss to a library's bound periodicals.

It's a space-saver, too. Each roll of microfilm contains about 65 periodicals (or 6,500 pages).

So, promise your patrons the moon . . . and deliver it with MAGAZINE COLLECTION!

Visit IAC booths 468–474, 567–573 at ALA.

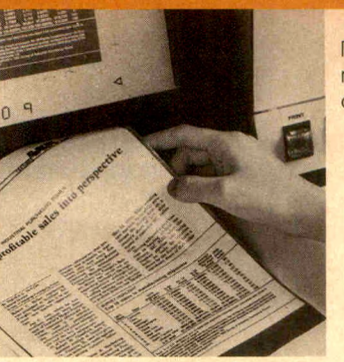
4



Read the article and make a copy, if you choose.

4 FAST STEPS TO WALL STREET

REFERENCE NETWORK

BUSINESS COLLECTION™

. . . or to the latest news about leverage buyouts . . . or to Silicon Valley . . . with the BUSINESS COLLECTION.™

BUSINESS COLLECTION helps a researcher make every minute count with fast access to more than 800 pertinent business periodicals. That means cover-to-cover indexing, to full text review, to printed copy—all in a few minutes and always accessible.

That's good news for your library, because BUSINESS COLLECTION is entirely self-service and requires almost no staff time.

BUSINESS COLLECTION also means good news to a researcher who finds that the magazine with information about the newest hot technology in Silicon Valley is in circulation—or the article has been torn out. On microfilm each article is immediately accessible; theft and damage are minimal. And bi-weekly updating guarantees that news is current.

The all-in-one system saves space, too. You would need shelves for 100 magazines to hold the information in only *one* BUSINESS COLLECTION cartridge!

So, show the way to Wall Street—save library money, too!

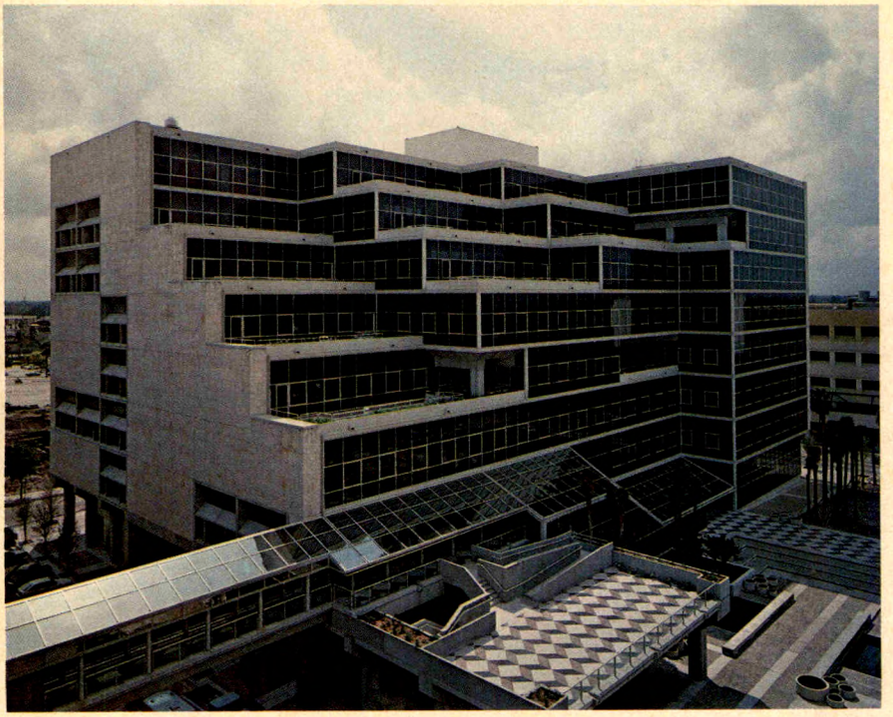
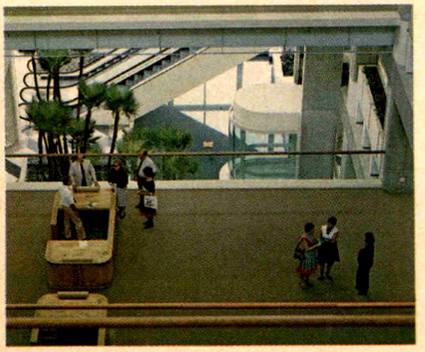
Inside this beautiful Florida library is a beautiful idea for your library.



In the heart of downtown Fort Lauderdale rises a gleaming eight-story building, the north side a stepped facade of glass complemented by landscaped terraces. Inside, Florida greenery graces a seven-story atrium, a glassed courtyard with reflecting pool, a restaurant open on one side to the Florida sun...and a brand new 250,000-volume collection of information and research materials.

The $39 million Broward County Main Library, which opened its doors in April 1984, is the pride of the Broward County Library System. Over the next ten years, the collection of the Main Library, principally a research facility, will grow to more than one million volumes—all newly acquired.



Nearly forty percent of that collection—both present and planned—is in microform to conserve future space and increase patron access to information. On each of the four research floors is a comfortable microform reading area, complete with the most modern microform hardware.

Phyllis B. Cartwright, Main Library Director, comments on the Broward County Library's success: "With the opening of the Main Library, the entire southeast Florida area has a major research library providing access to the widest possible range of materials. We couldn't have done it without community support *and* the strong partnership that exists with a supplier like University Microfilms International (UMI).

"UMI supplied most of our information in microform—more than 160,000 volumes/issues—and all of our microform reading equipment. They also provided an even more valuable resource—ongoing

consultation and service to make sure our collection is what it needs to be. We'll continue to look to UMI in the same capacity as we expand."

University Microfilms International has a commitment to the future. Won't you join us in a partnership? Contact your UMI Serials Sales Representative or call us toll-free at 800-521-3044.

The Last Chance Library Awards of 1983-84

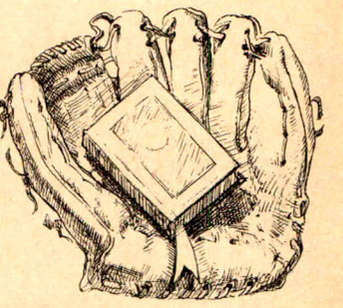
These are the editor's awards, providing one last chance before Annual Conference for fame and glory. No presentations, no cash sweeteners. Never had 'em, never will. And now the awards.

The Golden Bun. To a TV promotion for *The Lottery:* "A prim librarian wins $2 million and is transformed into a globe-trotting beauty."

Fate Worse than Death Award. The *Scranton Tribune,* for reporting a personnel matter at an elementary school under the head: . . . BOARD DEMOTES PRINCIPAL TO LIBRARIAN.

Distinguished Harassment. To the boss of a librarian in the new Japanese film, *Irezumi.* The librarian undergoes a two-year tattooing of her back to please the old boy.

Better Late than Never Trophy. The British Library, announcing in an April 24 press release: "A publicity leaflet has been issued for the first time to aid those wishing to study within the British Library Reference Division."



The Natural Patron Prize. Robert Redford, who said in a May interview, "Back when I was growing up in Van Nuys, . . . we [my father and I] played catch almost every day, and that and checking books out of the library was our big entertainment."

Poltergeist Medal. The New York Public Library, which *Time* (Aug. 29) says stands on a former potter's field.

Highest Binding Standards. The 17 suspects arrested in January for planning to ship 20 lbs. of cocaine from Colombia to Chicago in the bindings of children's books.

Thanks but No Thanks Citation. The U.S. Office of Personnel Management, for wanting to "expand opportunities for entry to the library profession at grade GS-5," an opportunity that would pay a professional $13,369 a year.

Don't Write for Me, Argentina. Great Britain, for its July banning of Argentinian books for British libraries.

Lickety-Split Award. The *America's Libraries* postal stamp: born, heralded, withdrawn, and destroyed within 18 months.

Library Economy. The consortium director who cried out in mock-panic at the ALA 1984 Midwinter Meeting: "Good heavens—I left my purse near the consultants!"

Modesty Blades Medallion: *Christian School Builder,* fo explaining how to correct immodesty in school encyclopedias after marking pens rub off. "You can overcome this by taking a razor blade and lightly scraping the surface until it loses its glaze. After this is done, the marker will not erase." Quoted in *Christian Century,* 9/28.

Remember the Neediest. To the latest supporters of a U.S. Public Lending Right akin to Britain's—which garnered Barbara Cartland an extra $7,500 in public funds this year.

Plus ça change. To problem patrons everywhere. "Then there is a large number of idlers. They are library squatters. . . . They sit all day long and now and then fall into a gentle slumber." —*Leslie's Weekly,* Feb. 28, 1895.

Reference Interview of the Year. Kansas State University Libraries, reporting this telephone exchange in February:

"Can you help me?"

"I'll try."

"Thank you." And the caller hung up. —*Art Plotnik*

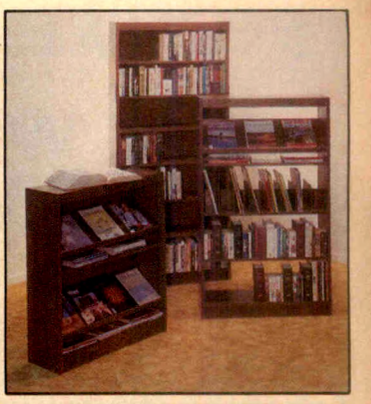
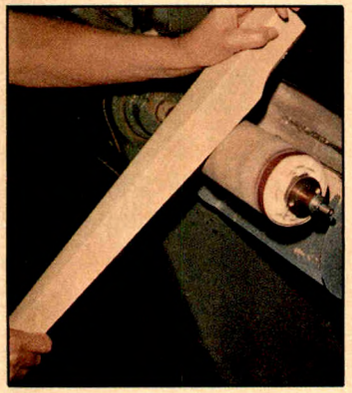
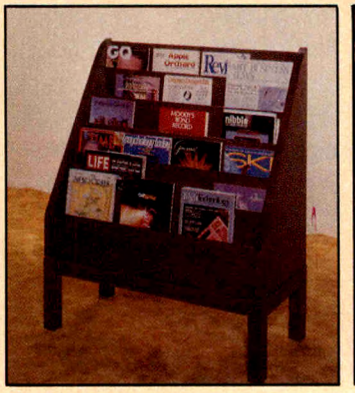
LIBRARY MICROFILMS & MATERIALS CO.
707 AUGUSTA ST. • INGLEWOOD, CA 90302

Made by Gaylord, Furniturewise.







Remove the Middle Man. Do Business Directly With the Source—Gaylord. Manufacturer and Marketer of Library Equipment and Supplies Since 1896.

We surpass dealers, catalog houses and other middle men in three ways:

Full Selection

If libraries use it, Gaylord manufactures it.

Expanding, Remodeling, Retrofitting, New construction. With hundreds of special and technical products to choose from, Gaylord Furniture will harmonize with your interior and your intent.

Choices. From Wood shelving to reading, reference and index tables. From magazine and newspaper racks, atlas cases and dictionary stands. To browsers, book trucks and charging desks. And, you have a variety of select hardwoods to choose from—quality oaks or maples in nine stains and finishes. Middle men offer limited choices.

Ship from Stock

DELIVERYwise, we ship orders fast directly from our factory.

With our exclusive "Ship from Stock" program we keep a large central inventory. So your order is shipped in *three to four weeks* because items come from stock, not production runs—that start with your order.

Local Source

With Gaylord, the personal touch still remains. You get more than a catalog.

You're helped by our—your—local Gaylord sales person who values your library's business. And, they understand libraries; in fact, our sales force averages twenty years of service to the library field.

Trusted Source

Depend on a Furniturewise manufacturer . . . Gaylord, your trusted source.

To order, call your local Gaylord representative at: 800/448-6160. In NY call 315/457-5070.

☐ Please send a Gaylord catalog containing wood furniture
☐ Please have a Gaylord sales person call

Data Phase Today

SUPERIOR SOFTWARE REQUIRES EXTRAORDINARY EFFORTS.

FOR WHAT IT MEANS FOR YOUR LIBRARY, IT'S WORTH IT.

SOFTWARE IS INTRICATELY SPECIFIED, DESIGNED, PROGRAMMED AND TESTED CODE THAT TELLS THE COMPUTER TO PROCESS INFORMATION THE WAY YOU WANT IT TO.

Guaranteeing its quality requires a substantial investment in research and development. One that most companies aren't readily willing to commit to.

Data Phase spends an extraordinary 40% of its annual budget on research and development. Every dollar represents a return in the form of vastly superior automation products.

DATA PHASE'S RIGID DEVELOPMENT PROCEDURES ASSURE THE PROPER INTEGRATION OF THE "RICHEST SOFTWARE IN THE INDUSTRY."

Data Phase software provides you with substantially more integration, flexibility and functional capability. Designing such a system requires great discipline.

Our specification, software design and programming, and testing phases must adhere to rigid benchmark requirements.

In a field where standards are slow to evolve, our approach assures quality control throughout the entire software development process.

DATA PHASE HAS AN INDEPENDENT QUALITY ASSURANCE GROUP — AND THE TECHNOLOGY TO SUPPORT IT — TO ASSURE SOFTWARE RELIABILITY IN YOUR LIBRARY.

Our quality assurance group tests the software to its limit, before you do.

Simulating the transaction load found in a real library environment, they uncover problems that otherwise would be discovered on a library site.

It takes weeks to test any single function. Time to fix the problems we find.

But to assure the reliability of the software, it's necessary.

DATA PHASE'S 24-HOUR, 7-DAY-A-WEEK ONLINE SOFTWARE SUPPORT MEANS LESS DOLLARS YOU SPEND ON MAINTENANCE.

Data Phase is the only turnkey vendor providing its users with online dialup software maintenance 24 hours a day, 7 days a week.

Most problems are quickly resolved over the phone. Those that aren't can be more thoroughly diagnosed before an engineer is dispatched to repair the problem.

DATA PHASE'S DEDICATION TO TECHNICAL PROCEDURES AND TECHNOLOGICAL INNOVATION WILL PROVIDE MORE FUTURE OPTIONS FOR YOUR LIBRARY.

A turnkey vendor must be flexible in terms of both hardware and software in order to take advantage of new technology for its users.

Our use of unmodified Data General and Tandem hardware provides many more options to our customers. Unlike most other vendors, we are not bound to the equipment we manufacture, or just one product line.

And since our software is written in standard languages, it will easily interface with future technological innovations.

It takes great effort to coordinate the wide range of variables that our approach takes.

But there's no other way to assure that your investment today will help you meet the challenges of tomorrow.

AND, DATA PHASE PROVIDES YOU WITH THE EXPERTISE OF THE MOST EXPERIENCED PROFESSIONALS WORKING IN SOFTWARE DEVELOPMENT TODAY.

We have over 50 full-time professionals in one of the finest research and development groups to be found supporting any automation endeavor.

They spend thousands of man-hours a week designing, testing and supporting Data Phase software.

And they are dedicated to being a part of the finest turnkey system offered to the library community.

The effort that we have put forward in developing our product for your library is extraordinary.

But it's what provides Data Phase users with extraordinary software.

There's no doubt that it's well worth it.

Data Phase

in the news

U. of Minnesota terminates librarian claiming tenure

Three years ago cataloger Linda DeBeau-Melting filed a sex discrimination suit against the University of Minnesota. Employed by the university library since 1969 DeBeau-Melting complained that she had been induced to trade secure civil service status for tenure track faculty status in 1974 and had twice been denied tenure due to her sex.

"I knew I was being discriminated against as I watched men less qualified than I being tenured in the libraries," the ALA member said. The tenured faculty in her catalog division had unanimously recommended her for tenure as had most other tenured librarians.

After a 26-day trial involving 23 witnesses and more than 300 documents, the special master appointed by the U.S. district court awarded her tenure retroactive to 1981 and attorney's fees. "The library administration reneged on its promise to DeBeau-Melting," Special Master Viola Kanatz ruled in her 98-page decision. "Her tenure review at the administrative level was not only ineffective, it was a sham." Kanatz attributed both tenure denials to discrimination.

To have legal force, the special master's ruling must be upheld by the U.S. district court. The university does not question the court's power to award tenure, but it maintains no discrimination was involved in the tenure reviews. A ruling is expected this summer.

Meanwhile, the university board of regents voted in April to send DeBeau-Melting a termination notice marking the end of her tenure probationary period this month. According to the notice, her appointment is to end June 30, 1985. She was appointed assistant professor last year as the result of a successful class action suit filed by 37 librarians (*AL*, June, 1983, p. 337).

In the termination letter, University President C. Peter Magrath wrote that "nonreappointment carries no implication whatsoever as to the quality of the faculty member's work or conduct, and for this reason, no statement of cause is given."

DeBeau-Melting said she had expected the termination. "The university neither understands nor appreciates library work," she said.

Within 60 days of the April 12 discharge notice, DeBeau-Melting told *AL*, she will file another suit protesting the termination. To date, she has spent some $200,000 in legal fees, which are being paid by the National Education Association.

ALA favors pay equity bills, rejects OPM monitoring

ALA applauds the intent of HR 4599 and HR 5092, which deal with equal pay for work of comparable worth in federal and nonfederal agencies, ALA Washington Office Director Eileen Cooke wrote Rep. Mary Rose Oakar (D-Ohio) April 26.

Cooke was commenting on the pay equity hearings held early in April by Oakar's House Committee on Post Office and Civil Service Subcommittee on Compensation and Employee Benefits. Cooke took particular exception to testimony by Donald Devine, director of the Office of Personnel Management (OPM).

ALA believes that requiring the Equal Opportunity Employment Commission, the Labor Department, and the Justice Department to report on actions taken to prohibit pay discrimination is valuable and important, Cooke wrote. But the Association has serious reservations about the HR 4599 provision entrusting the Office of Personnel Management with the responsibility for studying and identifying discriminatory wage practices and proposing ways to eliminate them.

Cooke said that reading Devine's statement to Oakar's subcommittee "further increases our unease. His description of the standards development process does not square with our experience in the development of federal library job standards . . .

"On the basis of . . . inadequate, incomplete, and ill-organized data, OPM developed a proposed standard for library jobs which appears to us blatantly discriminatory," she explained. OPM has made no response to ALA's request that the proposed standards be withdrawn and rewritten.

If the proposed standards are adopted, Cooke warned, "then pay equity between librarians and their peers in other professions in the federal government will be even less achievable than it is today."

To give OPM the responsibility for studying and reporting on discriminatory wage practices in the federal government might intensify rather than mitigate that discrimination, Cooke argued. She proposed that HR 4599 be revised to mandate that an unbiased study be made by private experts reporting to the General Accounting Office, which would in turn report to the president and Congress and make recommendations for eliminating the discriminatory practices.

On Legislative Day in Washington, D.C., seven Illinois "lobbyists" surround their Democratic member of Congress, Rep. Paul Simon (in bowtie), who is running for the Senate this fall. From left to right: Jarislawa Benko, Niles Public Library District trustee; Estelle Black, Rockford Public Library; Valerie Wilford, Illinois State University library school and Illinois Library Association (ILA) president; Willine Mahony, ILA executive director; Marilyn Shulski, DuPage Library System; Chadwick Raymond, Addison Public Library; Rep. Simon; Alex Ladenson, Urban Libraries Council executive director; and Karen Stone, Fondulac Public Library trustee, East Peoria.

Record numbers visit D.C. to rally library support

The 10th Annual Legislative Day in Washington, D.C., April 10 attracted 356 library supporters from 42 states and the District of Columbia, topping last year's record high. The event was hosted by the ALA Washington Office and the District of Columbia Library Association and funded by library associations, friends, and vendors.

The morning began with an 8:15 a.m. briefing session in the Rayburn House Office Building. Library supporters then spent most of the day visiting Congressional offices, talking to their legislators and key aides, and giving them Congressional information fold-

ers filled with local library data and program success stories.

At the afternoon wrap-up, Rep. Major Owens delivered a stirring speech, telling the visitors how important it is to bring the message from the grassroots to Congress and to keep legislators informed all year long. Votes count, he assured his listeners, and only the constituents can tell their legislators how federal programs are working.

From 5 to 7 p.m. some 25 members of Congress and 200 Congressional staffers celebrated National Library Week with the library supporters at a buffet and champagne reception in the House Education and Labor Committee hearing room. The visitors reported that members of both parties seemed more receptive to the library message than they had been in the previous two years. Few legislators indicated any support for the Reagan Administration proposals to eliminate library programs.

27 senators ask FCC to ease library phone charges

When the Senate tabled the Universal Telephone Service Preservation Act in January, Sen. Larry Pressler (R-S.D.) vowed to find a way to protect libraries from the crippling telecommunications charges scheduled to begin in June (*AL*, March, p. 129).

True to his word, the senator wrote Federal Communications Commission Chair Mark Fowler last month, asking the FCC to consider initiating a special private-line service for public, school, academic, and medical libraries and cooperative library networks.

"Under this service," Pressler wrote, "all exchange and interexchange carriers would furnish entities providing nonprofit bibliographic services with unswitched point-to-point and multipoint service under the terms and conditions in effect Sept. 30, 1983, with modest annual adjustments."

Pressler sought and received bipartisan support from his colleagues. The letter delivered to the FCC May 8 was signed by 26 additional senators, including Pete Domenici (R-N.M.), Paul Laxalt (R-Nev.), Daniel Moynihan (D-N.Y.), Paul Sarbanes (D-Md.), and John Tower (R-Tex.). Other senators indicated they would write separate letters.

Sen. Pressler pointed out that the private line tariff filed by AT&T last October would increase current charges for connection to OCLC by an average of 73 percent. Individual libraries face increases as high as 138 percent.

"We view libraries as the common carriers of information and a library private-line service as consistent with the universal service philosophy of the 1934 Communications Act," Pressler wrote. He asked the FCC to explore the idea of a library service and postpone the increases during the investigation.

Millions in state support ride on 11th-hour strategies

By mid-May, library supporters in Pennsylvania, New York, and other states were still working with legislators to pass crucial library funding measures before the end of the fiscal year July 1. Over the nation, libraries scored some gains and some losses. A partial roundup:

- In New York State, optimistic library supporters were crushed by lack of action on the Regents' Omnibus Library Bill, which would add $15 million to the current $43 million in state funding. The state budget approved March 31 included no increases for public library and systems funds or collection development aid, no conservation or technology funds, no means of continuing INTERSHARE, and no permanence for school library systems. Legislators bickered over details of a library construction bill, but Sen. Hugh Farley, chair of the Senate Subcommittee on Libraries, promised, "There will definitely be library aid passed and flowing from New York State this year." New York State Library Association Legislation Committee Chair Janet Welch told *AL* that NYLA is still hoping.
- Pennsylvania Gov. Dick Thornburgh

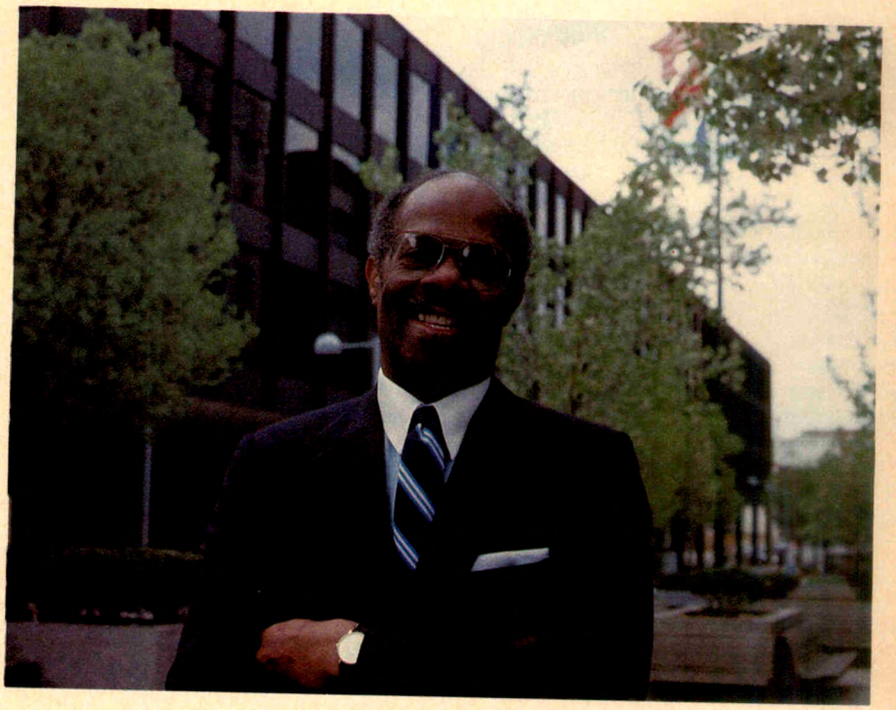
Decision Maker **5**

Dr. Hardy R. Franklin
Director
District of Columbia Public Library
Washington D.C.

"We have a close working relationship with CLSI. Their people understand and respond to our unique needs."

10 years ago when Dr. Franklin decided to put the D.C. Public Library in the forefront of library automation, he began with the limited resources available to him at the time, namely, some modest federal grant funds. Within several years the success of his pilot program at the central Martin Luther King Library led to solid budgetary support for extending the LIBS 100 throughout the main library and to all 20 branches.

The entire DCPL database, including the online catalog and Community Information Service will also be available at the University of the District of Columbia and in public high schools.



"Personal attention from local CLSI staff assigned to our area for sales, installation and field service gives our staff the daily, ongoing support it needs to best serve our patrons."

Because CLSI knows there's more to library automation than just hardware and software. It's people with very special skills to work with you to bring out the best in your system. Of our 200 employees, 100 are in customer service positions. That's how CLSI guarantees a network of dedicated professionals who know how to make the technology do what you want. Right now and on into the future.

"The software was flexible enough for our staff to develop an on-line Community Information Service listing the day to day services of D.C. agencies and more than 700 community organizations."

You can expand your system to include more libraries and more functions in one integrated system. There's no need to convert data, retrain your staff or discard one penny's worth of your original investment. With CLSI's ongoing research and development program you expand your existing system with the latest in computer technology. So the system grows as your automation budget grows as your library grows.

"As a community institution supported by city taxpayers, the D.C. Public Library has to keep a careful eye on efficiency and economy."

Statistics provided by CLSI's integrated library automation system help demonstrate the strong demand for library service. They'll show you who's reading what—right down to specific titles. And you know where, when, how many and how often your patrons are borrowing. These reports can be used in the training of staff in book selection.

"CLSI's people meet our needs now and their automation provides management data that are vital at budget time."

When it comes to library automation, we're your guarantee.

Martin Luther King Library designed by Ludwig Mies van der Rohe.

requested increases of nearly 7 percent in state aid to libraries in his 1984–85 budget, but the House increased his figure of $17 million to $20 million. The Senate is discussing the funding bill.

● Virginia's general assembly increased state funding for public libraries by 46 percent for the next biennium in March. The $13.7 million 1983–84 appropriation will increase to $20 million in 1985–86. Caroline Arden, Richardia Johnson, and Dean Burgess played key roles in increasing the funding from $4.6 million in 1977–78 to $13.7 million in 1983–84. State Librarian Don Haynes worked the inside logistics for the legislation.

● The March Nebraska Library Commission newsletter *Overtones* reported a dramatic photo finish in the legislature on March 30 resulting in $270,000 for library system funding and the interlibrary loan network. Originally, Democratic Gov. Bob Kerrey requested $530,000 for library aid programs, but the legislative Appropriations Committee trimmed the figure to $270,000. The day after the budget bill was passed March 29, Kerrey exercised his line-item veto authority to delete the library funds along with other items.

On March 29, the Appropriations Committee presented a budget amendment restoring about half the deleted programs, including the library aid. Thirty votes were needed to overthrow the governor's veto, but the package plan won only 27.

Next day the Appropriations Committee chair introduced the motion to override the library fund veto. Lincoln Sen. Shirley Marsh and others spoke in support of the motion, but an Omaha senator backed the governor's veto, saying it was intended to limit spending. The library funding, he suggested, could wait until next year.

When the vote came, libraries garnered the necessary 30 votes to win.

● The April 16 *Hitchhiker* published by the New Mexico State Library reports that a Senate bill which would have appropriated $2 million to the library failed to pass the legislative session that ended Feb. 16.

Owens leads U.S. House in salute to libraries

By special order at the end of the business day in Congress April 11, House pro tempore Speaker John Murtha recognized Rep. Major Owens (D-N.Y.) for a 60-minute salute to National Library Week. Owens' mighty rhetoric and the bouquets tossed by 26 other members of Congress should have set librarians ears tingling pleasantly across the land.

Owens, a former librarian from Brooklyn, led off by contrasting President Reagan's warm NLW message with the White House desire to stop funding the Library Services and Construction Act. Then Owens attacked *A Nation at Risk*, the President's Commission on Excellence in Education report, because it neglected to place the nation's libraries at the apex of the education structure.

"To plan for the revamping of the education system without discussing the role of libraries and the information function is as ridiculous as a design to streamline transportation without considering roads and bridges," Owens said. ". . . Any planning for the future in this age of information which leaves out libraries is planning for disaster."

Owens proposed a library addendum be attached to the *Risk* report, concluding with nine recommendations designed to put librarians and libraries at the center of the educational process.

The 26 legislators who followed Owens discussed a variety of library needs, laws, and services in the Washington, D.C., area and in their home districts. Some representative quotes:

● "The universal credit card of this nation is the library card. It is free . . . and provides all individuals, without bias, an opportunity to learn. We must continue to recognize the importance of libraries in a free society and work to assure that their services remain free

Chosen by ALA For "Outstanding Reference Sources 1983"

Guide to Genealogical Research in the National Archives

Interest in genealogy and local history is growing rapidly. More than 20,000,000 individuals in the United States are now conducting research into the histories of their families and communities. In response, the National Archives—official keeper of more than 1.3 million cubic feet of federal records—has revised and substantially expanded its GUIDE TO GENEALOGICAL RESEARCH IN THE NATIONAL ARCHIVES. Genealogists everywhere have been waiting eagerly for this edition, which expands and updates the 1964 GUIDE.

❧ The 320-page GUIDE is an indispensable tool for both sophisticated and beginning researchers. It can help them make a systematic review and selection among the wide range of federal records important to genealogists and local historians:

Census records
Military service and pension files
Ship passenger arrival lists
Federal land records and many more. . .

❧ The GUIDE includes references to more than 550 microfilm publications available from the National Archives. Numerous citations to secondary sources will also prove valuable to reference librarians in assisting their patrons to locate relevant materials. In addition, the GUIDE makes clear what records are not in the National Archives and frequently indicates where they might be found.

❧ An essential addition to any genealogy or local history reference library.

and accessible to all." *Rep. Mario Biaggi (D-N.Y.)*

- "It is appropriate to recognize America's libraries both with our words and with our appropriations. It is impossible to imagine a world in which libraries were allowed to disappear, where one did not have access to their collections." *Rep. Barbara Kennelly (D-Conn.)*
- "With the rigorous demands posed by the high tech society of today, I would like to commend the efforts of our dedicated librarians who provide invaluable assistance to the citizens of this country." *Rep. Edolphus Towns (D-N.Y.)*
- "Our nation's libraries are an extremely important, yet unheralded, part of our educational system and I am proud to pay tribute this week to the thousands of dedicated librarians who open the world of learning to all of us." *Rep. C. W. Bill Young (R-Fla.)*
- "Libraries are places of discovery, of skill development, and of training. During National Library Week, let us examine the requirements of these great institutions so that they may continue to meet the needs of society during every week of the year." *Rep. Nick Joe Rahall II (D-Wis.)*

The April 11 *Congressional Record*, p. H2745–55 publishes the speeches of Reps. Owens, Thomas of Ga., Staggers, Goodling, Rangel, Frank, Frenzel, Ford of Mich., Wortley, Rowland, Derrick, Spratt, Clinger, Oberstar, Conyers, Morrison of Conn., Kennelly, and Dyer of N.J. (p. H2777). The April 12 *Congressional Record Extensions of Remarks* carries Young of Fla. (p. E1616), Weiss (p. E1625), Madigan (p. E1625–6), Bevill (p. E1634), Fuqua (p. E1642), Biaggi (p. E1646–7), Towns (p. E1665–6), Solarz (p. E1673), and Rahal (p. E1682).

In the Senate, Sen. Alfonso D'Amato (R-N.Y.) recognized National Library Week in brief remarks published in the April 12 *Congressional Record*, p. S4670.

OMB regs on lobbying may "harass" nonprofits

After two earlier versions aroused a storm of protest, the Office of Management and Budget finally published the third and final version of regulations designed to prevent nonprofit organizations from using federal money for lobbying.

OMB Circular A-122, "Cost Principles for Nonprofit Organizations," was published in the April 27 *Federal Register*, p. 18260–77 and scheduled to take effect May 29.

Opponents complained that the rules would still impose burdensome bookkeeping chores. The regs require contractors and grantees to keep detailed records of their political activities in order to tell the government exactly how much they spend on lobbying.

OMB said the new rules would not prevent nonprofit groups receiving federal grants or contracts from lobbying to influence state or local legislation, lobbying on regulatory actions, or making presentations at the request of Congress or state legislatures. The rules bar only the use of federal funds to pay for any portion of a group's expenditures for lobbying and political activities.

Rep. Jack Brooks (D-Tex.) charged that the rules violated the First Amendment. "There can be but one motive for collecting such information," he said, "and that is to subject these groups to harassment and discriminatory treatment."

UNESCO question:

Don't isolate U.S. scientists, ALA rep urges Congress

Testifying before two subcommittees of the House Committee on Science and Technology March 15, ALA Past President Thomas Galvin urged the U.S. to stay in UNESCO and continue to allow U.S. scientists "full, prompt, and ready access to both the published and unpublished research results of their counterparts . . . throughout the world."

As chair of the ALA International Relations Committee, a member of the U.S. National Commission for UNESCO, and an educator (dean of the University of Pittsburgh library school), Galvin addressed a joint hearing of the Subcommittee on Natural Resources, Agriculture Research and Environment, and the Subcommittee on Science, Research, and Technology. Rep. Doug Walgren (D-Pa.), who represents Galvin's district, chairs the science subcommittee.

Galvin presented the ALA Council resolution of Jan. 11 at the hearing. ALA had asked Secretary of State George Schultz and UNESCO Director General Amadou-Mahtar M'Bow to negotiate the problems that caused the Reagan Administration to announce the U.S. will withdraw from the international organization Dec. 31, 1984. Galvin said we are "deeply troubled" because the State Department has made no attempt to initiate such negotiations. "Time is running out," Galvin said.

Galvin recognized the conflict at the political level, but he declared, "What UNESCO has done in the information field, at the operational level, is to develop and implement successful, nonpoliticized practical programs of cooperation and development that are vital to U.S. interests and for which no workable alternatives exist."

He pointed out the need for U.S. participation as international policies are developed on copyright and the electronic flow of scientific and technical data.

To withdraw from UNESCO, Galvin declared, "would isolate the U.S. scientific community, would result in a decline in the leadership position the U.S. now holds in international science, and would encourage further politicization of UNESCO in ways potentially very damaging to U.S. commercial, academic, and research interests."

Rep. George Brown (D-Calif.) asked Galvin if the withdrawal from UNESCO would place at risk the $49 million U.S. share of the world market in communications equipment. Galvin replied that UNESCO might adopt normative standards which would give advantages to U.S. competitors such as France and Japan. Galvin also told Brown that the total volume of U.S. exports placed at risk could exceed the present U.S. contribution to UNESCO of $50 million.

On May 7, Galvin submitted a similar statement for inclusion in the hearing record of the House Committee on Foreign Affairs Subcommittee on Human Rights and International Organizations and the Subcommittee on International Operations.

Galvin has invited UNESCO Director General M'Bow to speak on "Access: The Geo-Political Dimension" as part of the International Relations Committee program "Access: The International Dimension," June 25, 2 p.m.–4 p.m., in the Dallas Convention Center East Ballroom A.

news in brief

Symbol to be reconsidered. When a Federal Highway Administration advisory committee rejected the ALA library symbol as a national road sign to be included in the *Manual on Uniform Traffic Control* last winter, the Association asked symbol-supporters to protest (*AL*, March, p. 129–130). Several hundred people, including librarians, friends, members of Congress, literacy volunteers, lawyers, graphic designers, and a university director, responded, directing their arguments and photographs to Room 4205 at the Highway Administration headquarters in Washington, D.C.

Many writers directly disputed the highway committee's recommendation to use the word "library" on the *green* background, which denotes destination, rather than blue, which indicates services to motorists. Libraries *are* services to all the public, argued the protesters. Southwestern residents wrote that the word "library" might confuse Spanish-speaking travelers who know *liberia* means a bookstore. Pennsylvanians pointed out, with illustrations, that the symbol is official in their state and is being used effectively on street and road signs.

ALA Associate Executive Director Peggy Barber presented a collection of symbol data, newspaper articles, letters, and photographs of signs to John Eicher, director of the Federal Highway Administration Office of Traffic Control May 9. Eicher told Barber that the administration had deferred the final decision on the symbol: it will be reconsi-

It's High Time You Tried BRS

Look What's Waiting For You!

- 82 databases—37 available exclusively from BRS—give you access to timely, unique information.
- Convenient grouping of databases by major subject categories provides you with a breadth of online information.
- Simple interactive language makes BRS easy to learn and use, whether you're an online searching pro or a first-time user.
- Available when and where you need it, home or work, 22 hours every working day, plus weekend and holiday hours.
- Wide choice of access plans lets you tailor your usage to your budget.

dered by the advisory committee at its June 13–15 meeting in Santa Fe, N.M.

USC library program wins support. Indications that the University of Southern California might close its library school brought "exciting" support for the program in May, according to Dean Roger Greer.

Hundreds of letters from alumni and the professional community poured into USC administration offices, demonstrating that the library community exists as a constituency, Greer told *AL*. An alumni phonathon and banquet raised $17,000, matched by an additional $10,000, for the school.

At meetings held by the faculty subcommittee appointed to review the library program, Los Angeles County Librarian Linda Crismond, LAPL Director Wyman Jones, Pasadena PL Director Edward Szynaka, and many others presented eloquent arguments. They stressed the need for future graduates, pointing out that the full funding of California's Public Library Foundation Program is expected to create a shortage of librarians throughout the state.

Greer was optimistic over the future of the library program. "We're winning, but we don't yet know what we've won."

SmartCard scores in Rockford. When home rule ended in Rockford, Ill., last year, the library property tax rate dropped from 24.5 cents to 15 cents per $100 assessed valuation. Library Director Joel Rosenfeld projected a $245,000 budget deficit for 1984, pending a referendum March 20.

In the Primary Day poll, citizens were asked to double the tax rate to 30 cents. To win "yes" votes, a library board member proposed promoting the library card as a "SmartCard" providing access to all kinds of services.

Eight community members, including the mayor, were persuaded to hold up their SmartCards for a photo. The shot was featured in a brochure delivering the message, "Do something for yourself. Insure your SmartCard. . . . vote YES." The message was repeated by Miss Illinois and other local supporters on 60-second cable television spots which brought scores of people into the library.

On election day, a majority of the 40,799 Rockford voters chose Fritz Mondale for Presidential candidate and a higher tax rate for the library. The library vote was 20,701 to 17,141. □

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

CENTRAL AMERICA

Confronted on the evening news by still more mayhem in Central America, the confused viewer has but two choices: switch channels immediately to a "Leave It to Beaver" rerun or make a concerted effort to figure out what's going on in the troubled nations to the south. Librarians will want to have Irwyn Applebaum's *The World According to Beaver* (Bantam, $7.95) on hand for those exercising the first option; but for readers seriously trying to keep the republics straight from the dictatorships and separate the good guys from the bad, the following list of books on Central American affairs may prove invaluable. The titles selected were published within the last two years.

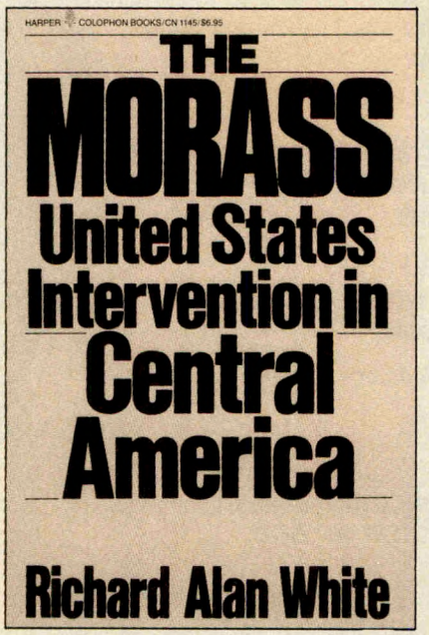
Buckley, Tom. *Violent Neighbors: El Salvador, Central America, and the United States.* Times Books, 1984, $17.95. (0-8129-1035-4, 82-40366)

Although Buckley is critical of the Reagan administration's foreign policy, his examination of current events in El Salvador is not strictly bipartisan. The tragic picture he paints of ever-escalating violence transcends political ideology.

Didion, Joan. *Salvador.* Simon & Schuster, 1983, $12.50. (0-671-47024-8, 83-327)

Novelist Didion's trip to El Salvador in 1982 was not intended as a fact-finding mission. Rather, she hoped to absorb the atmosphere of the country, to feel the oppressive fear that dominates everyday life. As this gripping account testifies, she succeeded admirably.

Guatemala in Rebellion: Unfinished History. Ed. by Jonathan L. Fried and others. Grove/Evergreen, 1983, $17.50. (0-394-53240-6, 83-1420)



White draws on years of on-site investigations and interviews to provide this analysis of forces in Central America.

The various materials collected here share a point of view: that civil disorder in Guatemala stems from an honorable attempt to resist tyranny in all its forms, specifically those supported by the U.S. Not a book likely to be found on the Reagans' bedside table.

Montgomery, Tommie Sue. *Revolution in El Salvador: Origins and Evolution.* Westview, 1982, $22.50. (0-86531-049-1, 82-8367)

Joan Didion tells us what daily life in El Salvador feels like today; Tommie Sue Montgomery explains why. Excellent source material on the country's revolutionary politics.

Nouwen, Henri J.M. *Gracias! A Latin American Journal.* Harper, 1983, $12.95. (0-06-066318-9, 82-48935)

A Yale professor and theologian describes his six-month stay in Latin America. His experiences living among the people and visiting orphanages and prisons provide a valuable perspective on the ubiquitous poverty and suffering in the area.

Trouble in Our Backyard: Central America and the United States in the Eighties. Ed. by Martin Diskin. Pantheon, 1984, $19.95. (0-394-71589-6, 83-42810)

These essays do much to explain the growth of the various revolutionary groups throughout Central America. Recommended reading for anyone who needs a rebels' who's who to understand the morning news.

Skidmore, Thomas E. and Smith, Peter H. *Modern Latin America.* Oxford, 1984, $19.95. (0-19-503366-3, 83-8007)

The current situation in Latin America is analyzed in terms of the region's economy, particularly the transition from midcentury industrialization to contemporary doldrums. Heavy reading, but valuable as background material.

White, Richard Allan. *The Morass: United States' Intervention in Central America.* Harper, 1984, $14.95. (0-06-015312-1, 83-48942)

One man's opinion on how American involvement in Central America has led to the current quagmire. Not everyone will agree with White's analysis, but his position on why present U.S. policy will only make matters worse is forcefully argued. □

For maximum data on microcomputers...

check DIALOG® first.

Microcomputer capabilities and applications are developing at astonishing rates. To keep up with the latest developments, turn first to DIALOG—the world's most comprehensive online information retrieval service. Here are just a few of the ways DIALOG can help you:

- **Stay** abreast of the most recent advances in microcomputer technology with Inspec and Compendex.
- **Identify** software for your applications, using the International Software Database. Check Magazine Index™ and Microcomputer Index™ for software reviews and evaluations.
- **Track** microcomputer industry trends in Disclosure™ II, the D&B Databases, FIND/SVP Reports and Studies Index, Harfax Industry Data Sources, Newsearch,™ Predicasts' PTS databases, and Trade and Industry Index.™
- **Learn** how micros are being used in various professions. In business, with ABI/Inform and Management Contents.® In medicine, with Medline. In education, with ERIC.
- **Find** information on leaders in the field with American Men and Women of Science, Biography Master Index, and Marquis Who's Who.
- **Locate** your closest retail computer store in the Electronic Yellow Pages.
- **It's now here...**The Computer Database.℠

Whether you're researching microcomputers or macroeconomics, **start with DIALOG,** the choice of professionals and experts worldwide. For full details, contact DIALOG Marketing, Dept. 20, 3460 Hillview Avenue, Palo Alto, CA 94304. Call 800/227-1927. In California, call 800/982-5838.

Computer talk dominates library communications

Q. Who has AV materials or computer programs for training staff in library automation? ***Lois E. Godfrey, IS-4, MS-P362, Assistant Head Librarian, Los Alamos National Laboratory, Los Alamos, NM 87545*** **(*AL*, Jan., p. 14).**

A. In conducting computer literacy training for the entire staff of the Health Sciences Library at the University of North Carolina/Chapel Hill, we are using the following commercially produced material:

1. "How to Use Your IBM PC in 10 Easy Video Lessons," a cassette program designed to be used with a computer for hands-on training. It includes introductions to hardware, PC DOS, and BASIC. $69.50 for the half-inch cassette, $150 for the three-quarter-inch cassette from computer stores or Kennen Publishing, Bldg. E, 150 Shoreline Hwy., Mill Valley, CA 94941. Also available for Apples and PC Jr.

2. The INSTRUCTOR for the IBM PC, a delightful self-instructional CAI program on how to use the PC keyboard. $44.95, or $94.95 with Professor DOS (below) from computer stores or Individual Software, Inc., 1163-1 Chess Dr., Foster City, CA 94404. Also available for the Texas Instruments Professional Computer.

3. Professor DOS, computer-assisted instruction on the PC DOS commands. More tedious than the INSTRUCTOR but fairly good. $59.94, or $94.95 with INSTRUCTOR from stores or address above. Also available for Texas Instruments Professional Computer.

4. Cdex Training for the IBM Personal Computer, a self-instructional CAI introduction to PC hardware, DOS commands, and BASIC programming. Useful, although too much time is spent reading the screen and hitting the key to read the next screen instead of practicing the lesson. $69.95 from computer stores. By Cdex Corp., 5050 El Camino Real, Los Altos, CA 94022. Available for a variety of computers and software programs. *Sue Stigleman, Microcomputer Specialist, Health Sciences Library 223H, University of North Carolina, Chapel Hill, NC 27514.*

Q. What regional libraries have developed collections of microcomputer software to lend to other libraries? What are your selection criteria and problems? ***Mary Merrill, Senior Librarian, Library Service Center, Connecticut State Library, 786 S. Main St., Middletown, Conn.*** **(*AL*, March, p. 132).**

A. Since last fall the Mid-Hudson Library System has been circulating software through its member libraries. We have concentrated on collecting educational and tutorial software for all ages and skill levels and have also acquired public domain software regardless of subject content. The service has proved enormously popular throughout our five-county area with only limited publicity.

Currently we are acquiring materials in five micro formats: Apple, IBM, Radio Shack, Commodore, and Atari. Our only problem has been our inability to check various patron complaints of malfunctioning disks, since we have access to only two of the five brands of hardware. *Michael D. Miller, Department Head, Project Manager NYSCAT Project, Mid-Hudson Library System, 103 Market St., Poughkeepsie, NY 12601–4098.*

(Continued on page 372.)

Queries to automation buffs

1. What compatible public library software can we use online with our IBM System 38 computer? Our eight-branch county library is an OCLC member. (Wis.)

2. Who will share experiences in developing plans for using a school district Digital 4411 mainframe computer for library management functions? (Pa.)

3. We're preparing current periodicals lists and topical bibliographies on our DECmate II digital word processor. What other academic library applications exist? (N.Y.)

4. Has anyone developed programs for printing LC labels from the machine-readable records produced during retrospective conversion from Dewey to LC? (Ky.)

5. What policies and procedures have academic libraries developed for the acquisition and use of public domain software? Do you purchase software out of the library budget? If your policy excludes purchase, do you still inventory or catalog software programs? (Wis. and Mont.)

6. Have any academic libraries developed or purchased software for scheduling the work hours of pages (student assistants)? (N.Y.)

7. Have any libraries developed or purchased public or tech services software for an IBM Display Writer? (APO NY)

8. Can you comment on the use of the Gaylord Telemark III automated catalog card production system? (La.)

9. Do any libraries provide a central terminal for an electronic mail system serving faculty and staff? (Ill.)

10. What automated circ system can notify a borrower that another user requests the material and can also tell the original borrower when the second user returns it? (Pa.)

Now another choice for your union list.

Faxon has specialized in serials management for libraries for over 100 years. Now we're offering a Union List module on Linx, the online serials management system. Union list groups can add, share, and maintain up-to-date information on their collective serial titles and holdings.

Because we're flexible, we can handle your current machine-readable lists or save time during your manual conversion, thus saving you valuable manpower resources. Our Union List products are available now and include both group lists and individual member lists in hard copy, tape, or microfiche.

Make a choice soon! You don't have to use Faxon's subscription service to take advantage of our Union List. Call our Sales Department at (800) 225-6055 or (617) 329-3350 (collect) and arrange for a demonstration of Faxon's Union List.

faxon

The Faxon Company, 15 Southwest Park, Westwood, MA 02090

The odds are stacked in your favor that we have the back issues you need.

We maintain a comprehensive inventory in our warehouse that spans many years of back issues as well as up-to-date issues.

Our customer service staff is anxious to answer your telephone or written requests. And now you can even access us through the FAXON-LINX network under "Jaeger." For a copy of our current catalog and brochure please call, write or fill-out and mail the coupon.

Q. What printer or tractor do libraries use to accommodate Gaylord non-jamming, continuous fan-fed catalog cards produced by an Apple II? ***Ted Theobald, Librarian, William H. White, Jr., Library, Woodberry Forest School, Woodberry Forest, VA 22989 (AL, Dec., p. 711).***

A. We use a Radio Shack DMP-400 printer. Although we used a TRS-80 Model 4 microcomputer to drive the printer, its Centronics-compatible parallel port allows it to be used with Apple II and others. *Rick Richmond, Director, Sublette County Library, Pinedale, Wyo. 82941.*

A. Gaylord distributes Okidata Microline Printers, which have optional or standard tractor-feed mechanisms. The Okidata printers have been tested with many Apple programs and have proved efficient and reliable. *Margaret A. Trinca, Product Manager-Software, Gaylord Bros., Inc., POB 4901, Syracuse, NY 13221.*

A. I would suggest the Epson MX-80 printer . . . Be sure to move the platen back from the printer to prevent jamming. *Jennifer R. Salmon, Coordinator, Library and Computer Services, University of Puget Sound/Seattle Campus, 315 Yesler Way, Seattle, WA 98104.*

A. We have been using a TEC Serial Printer F10-40 and the Gaylord slotted continuous catalog cards PERMEC #1800 for about a year. This is a daisywheel printer with tractor feed. It has given us good service and has not required major adjustments. *Mary I. Mazeau, Asst. Director, Half Hollow Hills Community Library, 55 Vanderbilt Pkwy., Dix Hills, NY 11746.*

Q. Have any medium-sized public libraries purchased another library's database in converting their holdings to machine-readable form? What was the basis for selection? Was an accurate hit rate established? What unanticipated problems were encountered? ***Sally Bailey, Assistant Director, Municipal Library, City of West Palm Beach, POB 3366, West Palm Beach, FL 33402 (AL, March, p. 132).***

A. In converting our 50,000-item book collection to a COM catalog, the Palmdale (Calif.) City Library is using the Los Angeles County Public Library COM catalog. We chose LACO because we are a former LACO branch and about 33 percent of our collection is "old" county books. Also, LACO has a large database, and since we belong to the same network they did not charge us anything.

The process involves matching our work to the county's and then inputting the BAN number to Brodart, the jobber for both COM catalogs. BAN numbers are input for "hits" and "partial hits," which require editing. No-hits are input by LC number or ISBN, if available; if not, original input is necessary. We have completed matching against LACO and are working on the LC numbers. Our hit rate including partials was about 70 per cent. *Linda L. Storsteen, City Librarian, Palmdale City, Library, 700 E. Palmdale Blvd., Palmdale, CA 93550.*

A. The Cleveland Heights-University Heights Public Library has joined with the Cleveland Public Library in the use of its integrated automation system. The cooperative venture has provided access to CPL's database of more than one million titles. We are using the database for retrospective conversion and for cataloging new acquisitions.

To our amazement, we found that even after heavy weeding some 15–20 percent of our holdings were not in the database. This has caused more work for us and for Cleveland, since it must "dump" the necessary MARC records. However, we

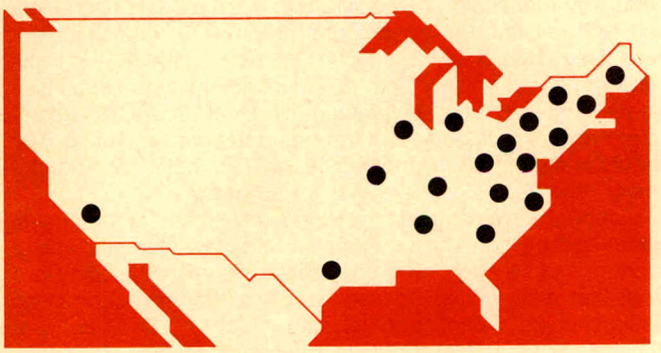
OCLC UPDATE

LS/2000 automated local system acclaimed in libraries across the United States.

Coast to coast, libraries across America are using LS/2000. Over 20 libraries located in cities shown on the map have selected this powerful integrated local system.

Their verdict: "In Allentown's extremely busy public library, our new system—with its flexibility, ease of operation, quick response, and still growing depth of capability—has been an invaluable service tool in all circulation and reference areas."—*Kathryn Stephanoff, Director, Allentown Public Library, Allentown, Pennsylvania.*

"We have an easy-to-use online catalog that is oriented toward the patron. Reaction from users has been positive—students, faculty and librarians all like the system."—*Gai Carpenter, Director, Johnson Library, Hampshire College, Amherst, Massachusetts.*



"LS/2000 gives you a great deal of flexibility you don't have with other systems. We added a broad subject field that allowed us to produce bibliographies by medical specialty so we could send all the cardiologists on staff special book lists. You can assign your own patron categories and communicate with your patrons."—*Carolyn Fishel, Assistant Library Director, Glendale Adventist Medical Center Library, Glendale, California.*

LS/2000 supports an online public access catalog for staff and patrons with true keyword access in *any* field from library, office or home; MARC bibliographic and authority files with global real-time updating plus edit, merge and cross reference capability; automated circulation control that assures current information about the collection; and with full serials control to be available in 1985. This is a multi-site system which has the capability of searching specific locations within a library system.

Our LS/2000 users appreciate its extensive bibliographic control aspects that maximize technical staff productivity. They also appreciate the variety of LS/2000 options ranging from timesharing to standard profile package systems for smaller libraries to a choice of Data General minicomputers sized to fit their library needs.

When you look for an automated local system, look for LS/2000—the proven system from the leader in library automation...

ABBREVIATIONS:

The Comprehensive Dictionary of Abbreviations and Letter Symbols

for the Computer Era

Arranged in Two Volumes:
Volume 1, Abbreviation to Word;
Volume 2, Word to Abbreviation.

- Contains some 70,000 entries, twice as many as any existing abbreviations dictionary.
- Includes every contemporary abbreviation of a given word currently in use.
- Develops unique word/abbreviation relationships for computer applications.
- Provides both abbreviation-to-word and word-to-abbreviation arrangements for convenient reference.

Abbreviations is the first comprehensive dictionary of shortened words for use in the computer era.

Entries are drawn from all conceivable sources, but mainly from primary documents designed for data processing. The existence of a "shortened language" for computer data entry, transmission, and output is reflected in this invaluable tool.

This publication captures tens of thousands of unique word/abbreviation combinations, and it frequently presents "unique" variations from which application choices can be made.

The development of unique abbreviations presents growing opportunities for "shorthand" input of text and data, the storage of data and text in unique abbreviated format, the transmission of data in abbreviated format, and the ultimate output in "exploded," non-abbreviated format.

In addition, **Abbreviations** is the most comprehensive, standard guide to abbreviations now in use. All known abbreviations for a word are presented, with up to fourteen abbreviations identified for a specific word. The comprehensive coverage allows identification of abbreviations encountered in daily work.

See us in Dallas!
Booth 780

PIERIAN PRESS
P.O. Box 1808 Ann Arbor, MI 48106

have increased our potential to lend materials to CPL, our major source for interlibrary loan, and we feel good about starting to pay back what we have historically received free. *Stephen D. Wood, Deputy Director, Cleveland Heights-University Heights Public Library, 2345 Lee Rd., Cleveland Heights, OH 44118.*

Q. Have any libraries computerized their borrower's registration files to provide "go" or "no go" info to the circulation desk? *Marvin Scilken, Director, Orange Public Library, 348 Main St., Orange, NJ 07050.* (AL, April, p. 205).

A. Any borrower who has not returned material after we send an overdue notice is automatically stopped by the computer if he or she tries to borrow more items. The patron's status is automatically cleared when material is returned. We can also manually set a "no go" signal if we have any other problem with a patron. *Eleanor R. Crary, Deputy County Librarian, Technical Services, Alameda County Library System, 3121 Diablo Ave., Hayward, CA 94545-2787.*

A. The LAPL has online access to patron registration and overdue files at selected library agencies. The online file is maintained on an IBM 3033 computer at the city's Data Service Bureau and is accessed by library staff through CRT terminals located at circulation desks. The only access point to the file is by a patron's unique eight-digit ID number assigned by our automated registration system.

When a patron presents materials for check-out, the circulation desk clerk keys the ID number on the CRT terminal keyboard, and the patron record is immediately displayed. If there are any delinquent items charged against the record, the patron may not borrow the material until the delinquencies are resolved. Patron records can be cleared or adjusted online. *Thomas E. Alford, Assistant City Librarian, Los Angeles Public Library, 630 W. Fifth St., Los Angeles, CA 90071.*

Q. What college libraries use computer-assisted instruction in bibliographic instruction? Did they purchase the programs or develop them in house? If "home grown," what were the costs (especially in staff time), type of program, equipment required, and user and librarian satisfaction? *Rebecca Sturm, Head of Public Services, Northern Kentucky University, Highland Heights, KY 41076.*

A. The Mansfield University Library has produced, evaluated, and revised a microcomputer program for library orientation titled "Search and . . . Find It" for use on the IBM PC with disk drive and printer. Cost for the original was a sabbatical-leave semester for one reference librarian. Costs for a complete rewrite included 100 hours of staff time for writing; 100 hours of student assistant time, at $3.35 an hour, for programming; and $200 for 20 copies of software.

Although evaluation showed no significant difference in learning between microcomputer-instructed students and a control lecture-exercise group, librarians are pleased with a tool that allows them to use staff time for more advanced instruction, and student enthusiasm is high. *Deanna Nipp, Coordinator of Bibliographic Instruction, Mansfield University, Mansfield, PA 16933.* □

LS/2000 Micro Series— available for small libraries without large system prices.

"There is no comparable system for small libraries that can match LS/2000's price and comprehensive features including true keyword access and separately searchable locations."—*Dr. Richard Dick, Director of Planning, Local Systems*

The new LS/2000 Micro Series provides economically designed systems for small libraries, specialized subcollections or libraries needing "starter systems" with upward compatibility. Cost-saving standard profiles are currently available for medical, legal, corporate, academic and public libraries.

The LS/2000 Micro Series incorporates powerful functions and features you'd expect to find in much larger systems—complete integrated software with keyword access, Winchester disk technology, and a fast, reliable backup system.

It's sized right...with micro or minicomputer options that will support up to 30 terminals.

It's priced right...because you acquire only the capacity you really need.

Because it operates in a standard office environment, the system requires no costly computer room preparation.

Because it uses the same data format as the LS/2000 automated system for large libraries, conversion is much easier as your needs and budget grow.

The LS/2000 Micro Series presently has an online public access catalog, circulation control, bibliographic and authority file maintenance—with full serials control available in 1985. Big system convenience and efficiency at a small system price from the leader in library automation...

reader forum

LETTERS AND BRIEF COMMENT FROM OUR READERS

American Libraries encourages comment up to 250 words on recent content in our pages or on matters of general interest to the library profession. Letters must be signed and are subject to editing for economy. Longer contributions may be submitted to the "On My Mind" department.

Is it ethical?

The ALA Ethics Committee has asked *American Libraries* to publish some hypothetical questions designed to stimulate thought on ethics in professional library service. (The first four were published in 1983 issues and answered.) Here's the fifth:

In a college or university reserve room, do faculty have the right to examine circulation data to determine which students have been performing reserve reading?

Comments under 150 words sent to *American Libraries* (Editor, "Reader Forum") will be considered for publication.

Standards ALA's raison d' etre

MEMBERS OF THE AMERICAN LIbrary Association and other librarians should be grateful to Dean Edward G. Holley of the library school of the University of North Carolina and Library Director George Lewis of Mississippi State University for the courage, fortitude, intelligence, and deep professional concern they displayed in the Merwine vs. Mississippi State University case (May, p. 327–30). On the other hand, ALA's executive director, Executive Board, and legal counsel have done the profession a great disservice by not upholding the ALA-MLS degree, as reported.

> "The Mississippi State lawyers were astounded that a professional organization would not defend its own degree. They couldn't imagine the American Bar Association taking a similar 'hands off' position. Nor, might I add, can I."

It seems crystal clear to me, and I am sure to many of my colleagues, that the first order of business of the American Library Association should be to uphold its professional degree. Any poll (and please conduct one) of ALA's membership would reveal that the great majority of members would agree with me. The executive director, Executive Board, and legal counsel must be made to realize, even at this late and unfortunate juncture, that ALA came into existence for the purpose of establishing and maintaining standards for the profession. Indeed, this is its "raison d' etre." If this fact is not actively realized by the present ALA leadership, then its sense of mission is seriously distorted and the Association is in serious trouble. The membership should not for one moment tolerate leadership which will not uphold ALA's *primary* concerns. Certainly, the following quote from Dr. Holley's article has caused great alarm throughout the profession and has made many librarians wonder: "Just why do I belong to ALA?"

> "Doubtless these fears are what lead the ALA Executive Committee to accept the recommendation of Executive Director Robert Wedgeworth and legal counsel that 'ALA divorce itself from the tangled Merwine Case, where the facts are in dispute, and talk about principles.' "

This statement illustrates conservatism and poor judgment in the thinking of the executive director and ALA's legal counsel. In all legal proceedings the facts are in dispute!

ALA's present leadership should be strongly urged, by a task force or a letter-writing campaign, to heed Dr. Holley's suggestion and join the Merwine vs. Mississippi State University case as a friend of the court.

> "The plaintiff in the Merwine Case has appealed Judge Powers' decision to the Fifth Circuit of Appeals. In my opinion, this would give ALA an excellent opportunity to enter the case as a friend of the court. Since this case may wind its way eventually to the U. S. Supreme Court, there is a lot at stake for librarians in the ultimate outcome."

It is high time the ALA leadership shed its cloak of Victorian pedanticism and come into the twentieth century especially since we are near the twenty-first century. Our leadership might look for direction to organizations like the National Education Association and such individuals as Mary Futrell, who are actively fighting to maintain the standards of their professions.

MARC IN
MARC OUT

EMILS/3000 & THE MARC STANDARD
A LONG-RANGE INVESTMENT

When you can read in MARC tapes from any recognized source and write out MARC tapes from your own turnkey system, then your conversion dollars are soundly invested. You know that the records in your system database are part of a recognized standard. With all the flexibility of MARC and the local control provided by EMILS/3000, your database will grow increasingly valuable. And if you need to share your records with others, then EMILS/3000 is the logical choice.

This innovative system replaces the archaic command language with elegant and functional screens controlled by single-stroke fast keys. It includes a powerful database management system which allows all modules to access a single MARC record through multiple indexes—true integration.

Above all, it sets new standards for ease of use, sophistication, and efficiency.

EMILS/3000 is built around Hewlett-Packard's premier computer, the HP3000. Electric Memory brought this highly reliable computer and the MARC standard together. The resulting system is a thoroughbred which may change library automation forever.

a member of the OLPR Advisory Committee I must take issue with Dean Holley's article on the Merwine case and the MLS degree in the May issue (p. 327–30).

First, I resent being accused of fear, vacillation, and poor decisions because I respect the laws of the land and, by the way, happen to believe in the principles of affirmative action and equal opportunity. I cannot imagine any library administrator who would not admit that he or she had known paraprofessionals qualified to be professionals by virtue of experience on the job. Indeed, we've several on the staff of the Santa Fe Regional Library, and I've encouraged them both to apply for professional vacancies and also to apply to ALA-accredited library schools so that they will have greater job choice and flexibility for advancement.

However, the MLS, whether ALA-accredited or not, has not been validated, and the recent King study on competencies really did not bring us further along the path toward validation. Dean Holley compared librarians to lawyers and the ALA to the American Bar Association, but he failed to mention that state bar associations have bar tests to be passed before one can practice law in the state and that, legally, one does not have to have a degree to take the bar test. Some state libraries have, in a similar fashion, promulgated certification tests for paraprofessionals to qualify for professional positions in that state without an MLS.

Until the ALA or state library associations, backed by state law in the latter cases, develop a certification technique or validate the MLS, a library manager would be illegal and unethical to refuse to consider a paraprofessional for a professional position. The danger we in the field now face is the lack of help we get when we have to do this. We must try to compare experience vs. degree in as objective a way as we can devise on our own.

It is time for Dean Holley to stop jousting at windmills and put the vast resources of library education into a practical solution to alternate routes such as certification or, if he insists upon the sanctity of the ALA-accredited MLS, a validation of it as an entry-level requirement.

Limiting leisure listening

FELICIA CARPARELLI'S ARTICLE, "Public Library or Psychiatric Ward" (April, p. 212), could have been penned by any of us at the Central Library of Buffalo and Erie County Public Library.

The members of my department, the Music Department, have frequently discussed ways of limiting access of the "creme de la creme" to our doors. City Mission residents flock to the department as soon as we open to make appointments for leisure listening on our phonographs. This is an ongoing problem for us, as our equipment demands that we be disc jockeys for the patrons who want to listen to reference collection selections.

In our library we include pop, rock, soul and jazz in the reference collection, or else we would not have a single record left.

The listening booths are controlled from a panel behind our desk. We have limited an individual's use of this facility to one hour per day. This change in policy seems to have broadened our patrons' horizons, as they now shift to other areas of the building heretofore unknown to them.

Judith Lopez Del Moral,
Buffalo and Erie County Public Library,
Buffalo, N.Y.

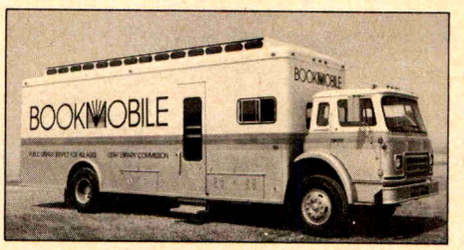
Monroe alumnus gets "special feeling"

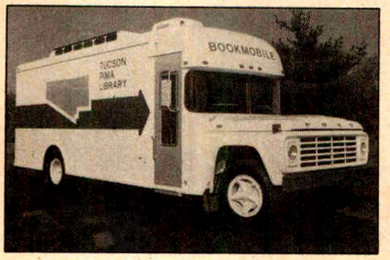
AS A MEMBER OF ALA AND AN alumnus of James Monroe High School, I would like to thank Mr. Plotnik for his article, "Wanted: A good angel," in April (p. 196).

James Monroe has had a proud heritage of graduates, and the dedication of the faculty and the administration has kept this heritage alive in today's students during a time of inner-city decay. Mr. Beck's Oral History Project gave today's students some contact with the past and hope for the future.

The library was an important part of our lives at James Monroe just as it was an important part of today's Monroevian life. If the inner city is to be reclaimed, knowledge has to be our strongest weapon..

It gave me a very special feeling that an





Bookmobiles that meet budgets

Constantly increasing land and construction costs and the squeeze of restricted budgets make it very difficult to maintain, let alone expand library services.

As a viable option to closing branches and reducing services, consider bookmobiles.

Then, consider GERSTENSLAGER BOOKMOBILES. We make them in all sizes. Custom designed from the chassis up. From mini-units to complete multi-media centers on wheels. Exactly the way you and your Gerstenslager sales engineer planned it.

If you're thinking bookmobiles, don't settle for someone else's assembly line, production-type vehicle. **Instead, write or call for free brochures** and examples of units we've built for other libraries. Write: Gerstenslager, Dept. B, Wooster, OH 44691.

In the same way that Libraries are more than just books, Integrated Library Systems are more than just software!

When you buy a Geac Library Information System you buy a "total solution." A complete Geac system consisting of hardware, software and support–to provide you with ease of operation, productivity and reliability–by design, not adaptation.

We have your experience.

Geac is a leading designer and manufacturer of hardware and software systems for computer-assisted library functions.

Our extensive experience and expertise are reflected in our impressive list of applications in major libraries throughout the world.

Our hardware family.

Geac builds a family of compatible transaction processors, ranging from the single processor 2000 to the four processor 8000. Our priorities are the same as yours: uptime and throughput–essential for library applications.

Our terminals suit different functions.

Geac terminals are purpose-designed for the library environment. Three models are available: Public Access, Circulation, and Technical Services terminals providing the full ALA/BLA character set.

Our software is flexible.

We implement needed features at all software levels in the System. We also know how to help you get the best out of today while working to take you where you want to be tomorrow. As library standards are developed, we can modify the operating system to incorporate them. The Library System continues to be designed by librarians, to meet your needs. Our first and newest customers work with us to design and improve the integrated system.

Our support services really support you.

Machinery without people to support it is not what a library needs. Geac is the only library vendor manufacturing its own hardware. Also, we provide our customers with on-going software and hardware support that continues for the life of the system.

Geac has information for you.

To find out all there is to know about Geac Integrated Library Systems call or write: Arlene Rowell, Manager of Marketing Library Systems Division, Geac Computer Corporation Limited, 350 Steelcase Road West, Markham, Ont., Canada, L3R 1B3. Telephone: (416) 475-0525

"Angelitas" to the rescue

I HAVE JUST READ ABOUT THE FIRE at the James Monroe High School library (April, p. 196).

Perhaps instead of "a few good angels" with large amounts to contribute, many of us smaller "angelitas" with just a few dollars to spare could help our fellow librarians.

In this spirit, please pass on this small contribution and all my good wishes for their continued courage in the face of what must seem overwhelming odds.

DOROTHY BRONSTEIN, ALA member, Christiansted, St. Croix, Virgin Islands

Help for Monroe High School library

YOUR EDITORIAL (APRIL, P. 196) touched my heart (and wallet)—I am enclosing a very small check to help the library of the James Monroe High School. I know that this will not go far, but if others feel as I do, you should be receiving an avalanche of mail.

I sincerely hope that this will be the case. I don't mind if other libraries *do* send out a call when such a disaster occurs. I would help whenever I could with a check.

I wish I could do more.

YVONNE E. GREEAR, The University of Texas Library, El Paso

Lacking an "avalanche," we are still hoping for more good angels.—Ed.

The continuing saga of no. 10000000

I HAVE BEEN FOLLOWING THE CONtinuing saga of OCLC no. 10000000 since the record was input into the database by California State College last October (*AL*, Dec., p. 698; Jan., p. 16; and Mar., p. 134).

I believe the overall issue that has been raised is the quality of the member-contributed cataloging found in the OCLC database. OCLC is obligated to correct obvious errors that appear in each millionth record as a result of the publicity that these records and their inputting institutions are given. These particular records are highly visible in the library technical services community in a way that does not match any of the other member-contributed records.

OCLC Bibliographic Input Standards requires new descriptive cataloging to conform with AACR2 and LC rule interpretations. Record no. 10000000, as entered into the database, did not conform to those requirements and was justifiably corrected. The staff at CSCSB could have entered the record into the database according to the prescribed standards and then edited to meet their local cataloging policy requirements. The fact that few people would normally see or use CSCSB thesis records is no basis for inputting an inaccurate and misleading record.

OCLC handles thousands of corrections each year at great expense, the cost of which is passed on to all OCLC participating institutions. In addition, individual libraries can spend a great deal of time and money editing "bad" records when dealing with member-contributed cataloging. The need for consistent cataloging becomes more important when records are available for the use of others outside the originating library in acquisitions, cataloging, identification, and interlibrary loan. Even the California State University Libraries, of which CSCSB is a part, plan to eventually implement an online union catalog. The usefulness of such a system would be enhanced if it contained uniform catalog records. In light of this and the recent publicity, I would hope that CSCSB library will review its thesis cataloging policy.

I congratulate CSCSB library on having input no. 10000000; in fact, I may have helped bump their record into that slot by inputting no. 9999999. In any event, I feel the quality of cataloging in the OCLC database is slowly improving. Let's hope the trend continues so that record no. 11000000 is error-free.

Southern California Rapid Transit District Library

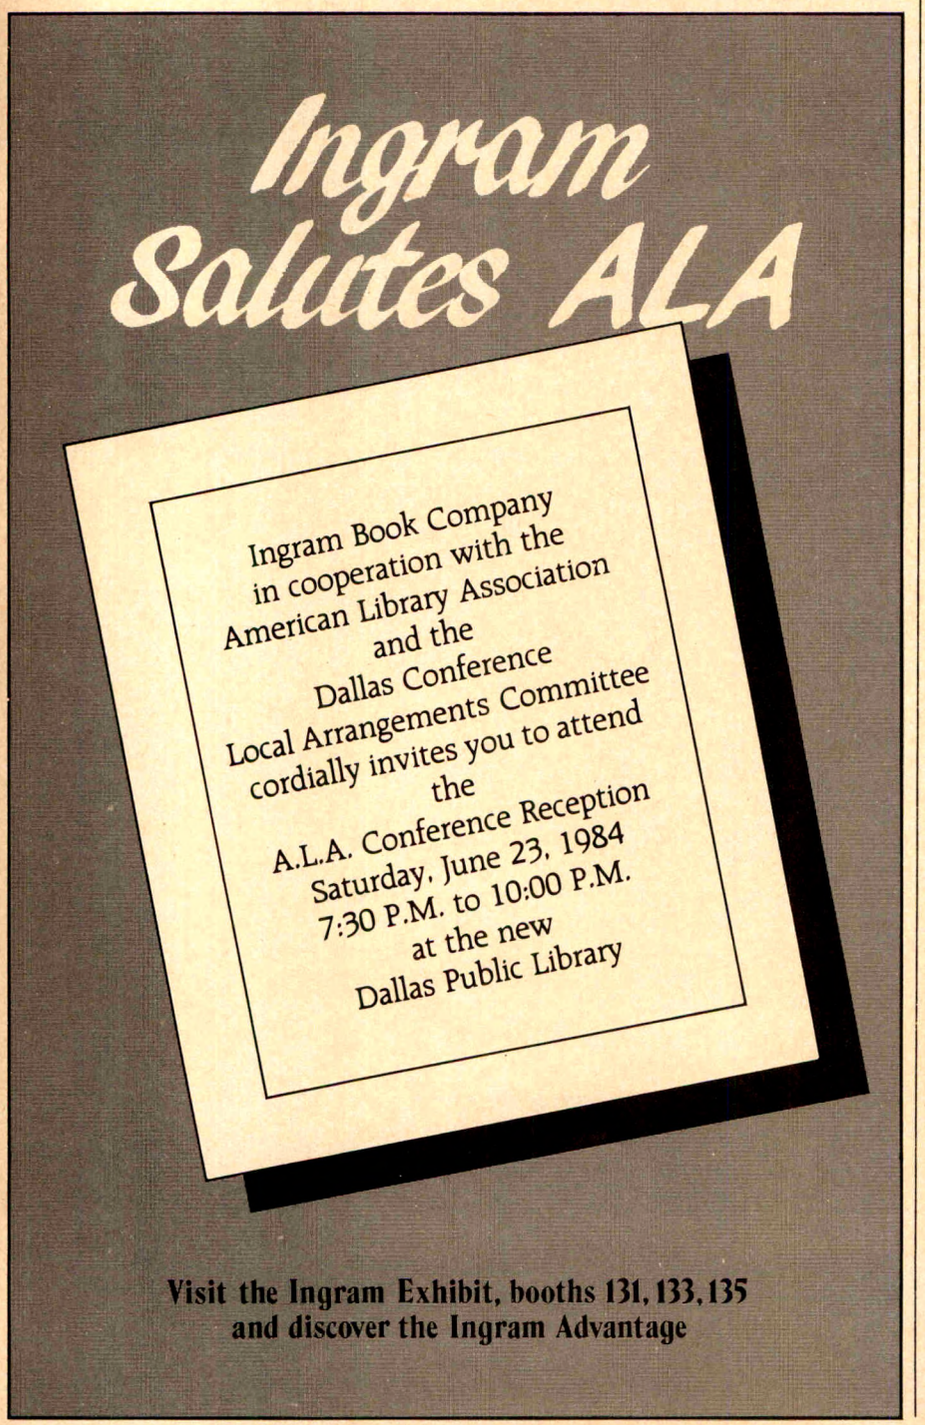
Government cassette guide

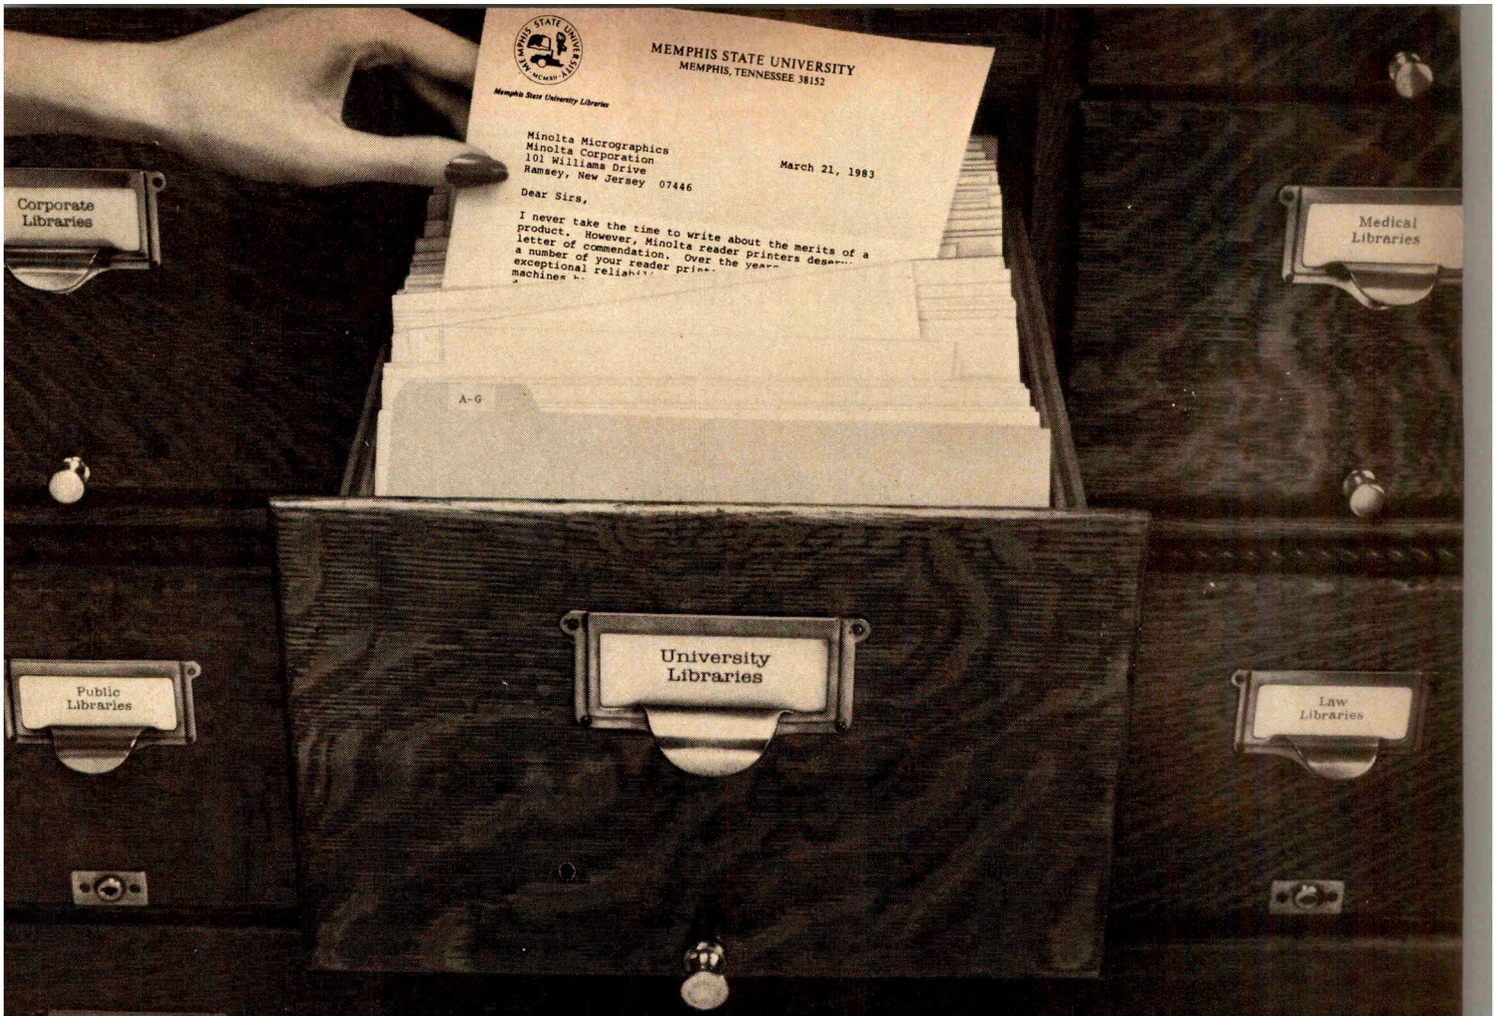
BRYAN DAVIS IS CORRECT ABOUT the burgeoning market in cassette-recorded books for general audiences (Mar., p. 165–170). The National Library Service for the Blind and Physically Handicapped has been tracking these developments for a number of years and has identified literally hundreds of sources for purchase or rental of full-length books, as well as abridgments and adaptations.

We issue a series of circulars with the general title, *Guide to Spoken-Word Recordings*. There are four separate guides in this series: Foreign Language Literature and Instruction; Educational, Professional, and Self-Development Materials; Literature; and General Nonfiction.

Each guide includes names and addresses of sources, price ranges, and brief descriptions of the types of materials offered. Copies are available free from the Reference Section, National Library Service for the Blind and Physically Handicapped, Library of Congress, Washington, DC 20542.

LINDA REDMOND, National Library Service for the Blind and Physically Handicapped, Library of Congress, Washington, D.C. □





THEIR REFERENCES WOULD FILL A LIBRARY.

Libraries from A to Z have written us referencing the quality and reliability of Minolta RP 405E and RP 407E reader-printers.

We're pleased, but not surprised. Because both models have a lot to offer libraries. They give you sharp, positive, permanent prints from either positive or negative film. Prints you can write on with just about any writing instrument.

They feature Minolta's exclusive fully automatic exposure control for quality prints the first time. Saving time and reducing paper costs. And they accept virtually every microformat made. With carriers that permit even untrained operators to switch from roll film to fiche in seconds.

See them at any authorized Minolta dealer in our nationwide network. Check the Yellow Pages for the one nearest you. Or call toll free 800-221-3333. In N.Y., (212) 775-1395.

Minolta reader-printers. Because libraries are where classics belong.

Throwing out belles lettres with the bathwater

A patron protests what he considers boorish weeding of library collections

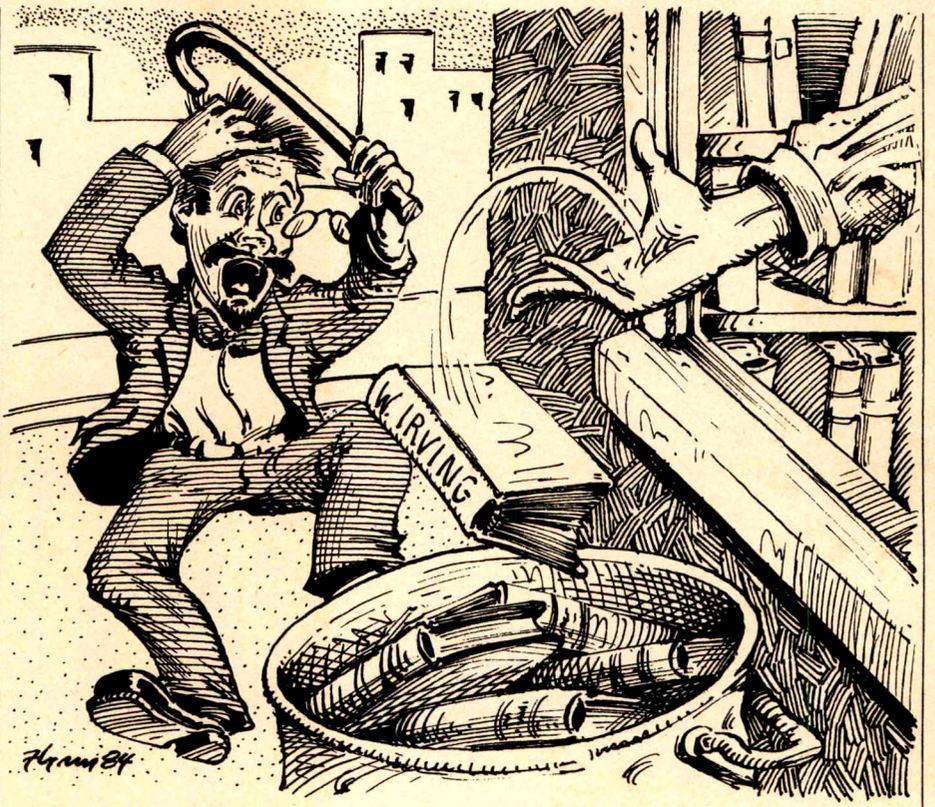
by J. Wesley Miller

AN INFESTATION OF BOORS has taken control of our libraries. They don't know what they're doing, and they're proud of the job they're making of it. They are library professionals, which means that like John Earle's "A Pretender to Learning" (1628), they are "great Nomen-clators of Authors, which they have read in generall in the Catalogue, and in particular in the Title [page], and go seldome so farre as the Dedication." For depth they occasionally dip into *Choice*, a magazine of brief reviews for acquisitions librarians. Mindless of Milton's admonition that "as good almost kill a man as kill a good book" (*Areopagitica*, 1644), they are merrily throwing away books with enough vigor to make book burnings under the Inquisition look like a hotdog roast at a Methodist Sunday-school picnic. Unfortunately, there are no journals providing counsel to deaccessioning librarians.

Periodically things get crowded, and well-run libraries have always systematically weeded out worn and useless books. But never before has it been done on the scale, or for the motives, with which it is being done today.

"Everybody's doing it"

"Everybody's doing it," a librarian told me. In a small Vermont library one summer I discovered that all the library's titles by Mary E. Waller, the prominent Vermont local colorist who did 15 books with Little Brown, were up for immediate sale because the new librarian, fresh out of library school, had lacked the intellectual curiosity to find out who Waller was. (They were also discarding an Isaiah Thomas Bible.) A dealer sold me my copy of another Waller book, *Our Benny*, a Lincoln centenary item. The bookseller had purchased it from yet another Vermont library to which it had been given by the local G.A.R. chapter after they had received it, as did all Vermont G.A.R. chapters, as a personal gift from Waller.



At a small liberal arts college with a strong ministerial preparation program and a very weak collection in English literature, the definitive three-volume edition of Arminius, the noted Dutch theologian, and the collected works of the Rev. Sydney Smith were tossed out because the religion department no longer had use for them. The librarians failed to recognize that Arminius is basic to Milton and that Smith was a major essayist and cofounder of *The Edinburgh Review*.

In a major city library which has always had closed stacks so that people never could see what they contained anyway, I was given my choice of anything on a booktruck for a dollar a volume. I discovered through conversation that the librarian doing the weeding had missed a local imprint and didn't recognize the importance of Hall's satires, Shenstone, and the great classicist Basil Gildersleeve. I was told, moreover, that sets of major authors such as James and Cooper were being broken and only titles that circulate with some regularity were to be saved. Thus, *The Deerslayer* was safe, but *Oak Openings* was to be stung.

Security a problem, too

And at a major university with an annual rare book budget in the thousands but no electronic security system to protect its general collections, a sophisticated graduate student who is a rare book investor told me, "It's a good thing I'm honest, because I could walk off with $50,000 in

J. Wesley Miller, an English professor and analytical bibliographer, publishes frequently in literary history, education law, and bibliography.

books from the stuff in the stacks in a few weeks."

If library schools succeed in producing, as I believe they do, friendly, people-oriented individuals, that does not guarantee graduates who know anything about books or who are competent to be entrusted with the care of them. It isn't merely in deaccessioning that lapses are visible. Old-school reference librarians could tell you it was the green book over by that pillar. Recently, young but not brand-new reference librarians have confessed that they didn't know what Mansell, STC, and the *Union List of Serials* were. They have to look things up in the card catalog: They don't *know* the collection.

Patron complaints often ignored

Patron complaints about these goings on are often ignored, or put down with the simple statement that there is no call for the material (and anybody who does call for it is Strange). "If we ever had a research collection here, we can't afford it any more. We only get $100,000 a year to buy books, and that isn't very much," one librarian told me. Surely this is an extremely good reason for exercising high selectivity when making new purchases, but it can't justify dismantling substantial collections of worthwhile material built on the thrift of earlier generations.

Another librarian, a cultivated non-WASP, lately remarked, "You can't expect *us* to pay to preserve *your* cultural heritage." Thus, economic racism is apparently a seldom articulated but real part of the picture, too.

One common argument is that sales of old books raise money. Many libraries hold an annual book sale, and have made, it might be added, bigger profits from the discreet sale to far-out-of-town dealers of valuable old books skimmed out of the collections. A museum library quietly sold off, among a large batch of fine Victorian volumes, its founding benefactor's personal set of Bryant's *Picturesque America* (2 vols., Appleton, 1872–1874), which retails as high as $450. Then within a year the librarian had to borrow a set from a neighboring library 30 miles distant in order to display two plates from the book in an exhibition.

Not a renewable resource

The fact that "everybody's doing it" is a real problem, because antique books are not a renewable resource. Prices never go down. Though a library director can look smart for a year or two as he strips the collections of their guts to finance innovative puppet-loan programs, public lectures, and salaries for added subordinates to play these games, these goodies can only be sold off once, and then they are gone forever. Yet if library trustees hold firm and insist on hiring knowledgeable subject specialists, the library may lose its credibility, its eligibility for funding, or other special benefits.

Interlibrary loan no answer

Ultimately, patrons are assured, books can be requested on interlibrary loan (which takes weeks and costs money) or by visiting a nearby college library (which also takes time and can entail special arrangements). Beyond immediate limitations, such a view is short-sighted, because it fails to recognize that many colleges and universities are private organizations with no obligation whatever to serve the public, and because emerging technologies and spiraling inflation promise to render live-in universities as we know them obsolete sooner than we think. Learning will go on, but it will be in universities without walls, and probably also without libraries.

American democracy was established and has been sustained on the proposition that local free public schools and libraries are the foundation stones of our civic well-being. No matter what dimensions educational technology may assume in the years ahead, local free public libraries will continue to be in demand as community information, research, and recreation centers.

Classics should persist

The enormous strength of the historic preservation and collectibles movements belie claims that there is no demand for worthwhile old books and authors. Taste is always cyclical, but after the sifting and winnowing, the classics emerge and persist. The whole novels of Cooper are a natural and social ecology of the early years of the Republic, and any librarian who would discard them is in need of an education. Likewise for Prescott, Froude, Parkman, Lingard, Irving, Longfellow, and a host of lesser figures.

Even old bindings and engravings are a part of our heritage that people want to savor. Thackeray is not Thackeray without the original engravings, nor is he Thackeray in a modern dust jacket encased in plastic cover. Thackeray is a green binding with gold stamping and beveled boards.

The ideal weeder

It takes a great deal of learning to know just how important minor authors are, and the weeding of library collections must be left to the most learned, experienced, and conservative of multidisciplinary information specialists. Weeding library collections, even more than building them, is an art, not a science, and those who deaccession without knowing what they are doing do not deserve to be called professionals.

Countermeasure to damage

As a counter-measure to the damage already done, every public library should establish a substantial American Heritage collection containing the whole works of classic authors of Anglo-American culture up to 1900. As with large-print, women's studies, ethnic, and other collections, the size of any particular American Heritage collection will depend on the size of the particular library. A library that never owned the whole works of Irving certainly should not be expected to go out and buy them now. But it is time to recognize that we are first and foremost Americans, we have a proud and rich heritage in the *belles lettres*, and that, too, must be venerated and preserved at the local, grass-roots level. □

500 YEARS OF CONFLICT

The New York Public Library announces the most comprehensive exhibition ever mounted on the burning issues of censorship. *CENSORSHIP: 500 YEARS OF CONFLICT* presents the never-ending struggle between freedom of expression and the threat of oppression in an extraordinary exhibition of books, prints and manuscripts, drawn from the Library's world-renowned collections.

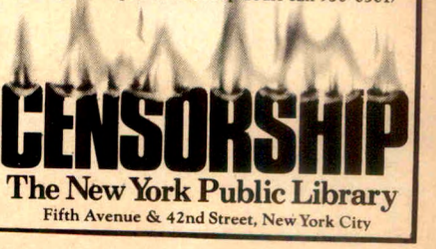
On view in the newly restored D. Samuel and Jeane H. Gottesman Exhibition Hall, the exhibit illuminates the conflict between the censor and the censored from the advent of printing to the present.

Open from June 1st through October 15th, 1984, the exhibition is free. See the words, the books, the declarations and manifestos that have turned philosophers into rebels, artists into outlaws and set the world afire.

CENSORSHIP:
500 YEARS OF CONFLICT

Made possible by The National Endowment for the Humanities, Exxon Corporation, The J.M. Kaplan Fund, Inc., The New York Times Company Foundation, Inc., Time Inc., and other donors.

Exhibit Hours: Mon.-Sat. 10 am-6 pm. Free Tours: 12-1 pm, 2-3 pm. (For Group Tours call 930-0501)



The New York Public Library
Fifth Avenue & 42nd Street, New York City

The making of *The Transfer Agreement:* A library odyssey

by Edwin Black

Ed. note: Edwin Black is the author of the fast-selling new title, *The Transfer Agreement; The Untold Story of the Secret Pact Between the Third Reich and Jewish Palestine* (Macmillan, 1984). A Chicago writer whose parents survived the Holocaust, he has appeared recently on the *CBS Morning News* and discussed his controversial book in numerous other media stories. He wrote the following article for *American Libraries* not only "to thank librarians throughout the world," but to help make some of them more sensitive to the needs of a "lay" researcher.

IN LATE 1978, I EMBARKED UPON A JOURNAListic endeavor that would take me back into the upheavals of 1933. The world then was hoping to recover from a ruinous Depression, and the Jews were struggling to secure a homeland in Palestine even as Adolf Hitler was determined to annihilate them and conquer Europe. Out of this drama and chaos came a pact between the Third Reich and the Zionist Organization to transfer 60,000 German Jews and $100 million to Palestine in exchange for subverting a Jewish-led anti-Nazi boycott threatening to topple the Hitler regime in its first year. This extraordinary story was to be told with full particulars in my book *The Transfer Agreement*.

Normally, a historian or journalist would begin by preparing a list of archives and then spend weeks or months of time bent over boxes of loosely arranged documents. Frequently the researcher follows a bias—or perhaps *preference* is a better word—leading to archives *to the exclusion* of libraries. In doing so, however, the researcher often overlooks a trove of resources and services. But I took a different approach. Although I indeed probed the depths of many archival repositories, I decided early on to also make the fullest use of the numerous public, private, and special libraries in the U.S. and abroad.

My first stop was the Asher Library of Spertus College of Judaica in Chicago, headed by Jewish scholar Richard Marcus. I was fortunate because Marcus, the former assistant archivist of the Zionist Archives in New York City, could provide excellent guidance and perspective. Marcus was in fact the person who helped me locate obscure German and Hebrew manuscripts within the Spertus collection that verified the existence of the Transfer Agreement. He then gave me a short course on using libraries to their maximum: how to use the union catalog and interlibrary loan; which libraries possessed which collections; and what services could be expected. He even allowed me to hire his assistant for preliminary translations of the German and Hebrew materials we had found.

As the project developed, Spertus became a sort of home-base library. I checked in and out with progress reports and requests for help with problem solving. Marcus never failed to steal time from his busy schedule to help, and never failed to offer the full resources of the Asher Library.

Naturally, the Library of Congress Hebraic Section in Washington, D.C., was another important helping hand. This section is dedicated to Jewish, Israeli, and Holocaust studies and is staffed by resourceful and knowledgeable scholars. LC's contribution was to continually locate materials at libraries across the country, and seek out Nazi newspapers and German dissertations in its own stacks. Frequently LC staff would advise me of materials I had not yet heard of, and they would often circumvent the normal photocopying and mailing procedures to help me make a deadline.

Outstanding special libraries

Several special libraries also stand out. Especially vital was the Zionist Library attached to the Zionist Archives in New York City. At the time, it was headed by Zionist scholar Sylvia Landress, who immediately offered the utmost cooperation. Most important at the Zionist Library was a microfilm copy of the unexploited papers of Louis Brandeis, former Supreme Court Justice and American Zionist leader. The library also housed endless volumes of precious contemporary pamphlets and newspapers of the Zionist movement and Palestine during the 1930s. On many occasions I was granted special permission to remove these materials to a nearby photocopying outlet.

Also of great importance, but not quite as helpful, was the nation's most complete Judaic collection, the eminent Klau Library attached to the Hebrew Union College in Cincinnati. I spent days just wandering through its stacks. Although it was my custom to introduce myself and my project to the head librarian on my first visit, the supervising librarian of Klau felt this was unnecessary and perhaps silly. Therefore, I was left alone to discover Klau's intricate holdings, with very little time in my schedule. Fortunately, library staff members were able to show me shortcuts, and my visit was ultimately most fruitful.

Additionally, in the basement of Klau, overlooked by many who come to the institution, is a precious, obscure special library, the American Jewish Periodical Center. The center stocks America's most complete collection of Jewish serials, many dating back to the nineteenth century. If this library doesn't carry a publication, the staff often know where

In a May 10, 1933, rally urging Americans to ban all German products and services, some 100,000 Jews and other boycott supporters marched through the streets of New York. Edwin Black's book explores why the boycott was later stopped. (Photo courtesy of the American Jewish Congress.)

else to find it. The staff of the Periodical Center not only helped me survey their holdings for relevant content, but for several years they mailed photocopies of key articles to me in 24-hour turnaround time. Since the Periodical Center is one of the few sources for the vital *Jewish Daily Bulletin,* for example, all manuscript work would often pause until its package arrived and its information was unveiled.

Another key library is the Center for Research Libraries on Chicago's South Side, which I often called the "dungeon library" after its reading room, then located just below street level. The Center is cooperatively operated by scores of larger university libraries, including the University of Chicago library. The Center's hard-to-define specialty might best be described as holdings not found in other libraries. For example, I found it to be one of the few locations housing the *Manchester Guardian*. Here, too, the staff regularly interrupted their schedules to accommodate my whirlwind requests.

Masterpiece of a library

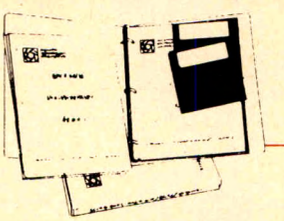
Among the many public libraries that helped, three stand out: Chicago, Boston, and New York. Of course, no one can even think about Jewish research without visiting the extraordinary Jewish Section of the New York Public Library. This masterpiece of a library approaches the value of an archive in that it holds priceless minutes, protocols, and pamphlets dating back to the nineteenth century. Its staff members have a keen sense of the inventory and are more than willing to help. There are slight distractions as derelicts and other street creatures periodically wander in; as an occasional young, aggressive Jewish scholar demands a rare publication shouting, "I know you have it, and you're hiding it!"; and of course as users suddenly break into tears as they discover a painful moment in Jewish history.

NYPL also maintains a valuable "manuscript collection" that is really an archive. Ensconced in an 11th Street warehouse are the records of the Joint Boycott Committee documenting its valiant efforts to overthrow Hitler. NYPL did not permit photocopying at the time, due to an inexplicable regulation even the staff abhorred, but the library finally agreed to create a special microfilm of the documents that I was able to have printed out in hard copy. Since then, I understand, the rules have changed.

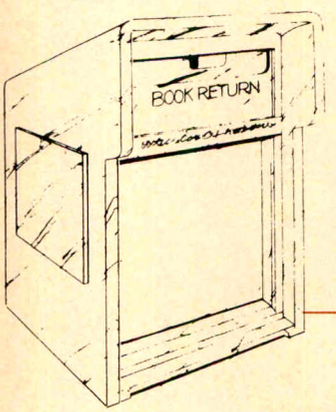
The Boston Public Library's great value was its microfilm copy of the captured German Foreign Ministry records. These essentially duplicated files at the National Archives in Washington, the Politische Archive in Bonn, and Yad Vashem Holocaust Memorial in Jerusalem. Hence I was able to learn of an important document from research assistants in Jerusalem and Bonn, and then call in the microframe number to another assistant in Boston who would run down to BPL and obtain a printout for express mailing to me or to my translators in Texas and Maryland. This would save great amounts of time by avoiding the delay of overseas mail. BPL

Innovative Products that Meet Traditional Library Needs

At Highsmith, we are continually looking for new ways to meet your needs. You'll find most everything from traditional products to the latest computer technology for library management, including these exciting products:

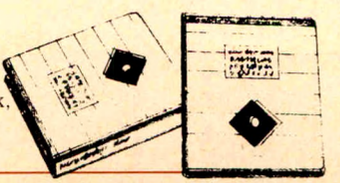


Personal Bibliographic System compiles, formats and types bibliographic data according to ANSI. Menu-driven, with search capabilities.



New Book Return stands up to rigorous use. Five-year guarantee. Large-capacity, one-piece construction, molded from high-density polyethylene. Contemporary putty and brown colors. Optional front or rear door for curbside/sidewalk access.

Paperback and periodical racks offer attractive, convenient ways to display materials. Space-saving design allows easy browsing, enables you to add on modules as needed. Engineered for stability. Many different models to fit your specific needs.



Circulation Plus™ affordable, automated management system. Hard-disk, menu-driven software. Barcode entry of patron and item numbers.

See these products and more at Highsmith's booths in Aisle 900 at ALA in Dallas.

There were several instances when the system became obstructive and unworkable. The hardest obstacle to accept was the intellectual hoarding of certain eminent university libraries.

had its own time requirements, but routinely waived them for the benefit of the transfer research, often providing us with immediate turnaround.

Once in particular, BPL was a lifesaver. A Nazi document of great importance to the book was discovered in Washington, but key passages were out of focus on the National Archives' copy. I checked with Bonn and Jerusalem, and their copies were also unreadable. Finally, we checked BPL's copy, which for some reason was not out of focus. The result was a breakthrough in determining exactly when a climactic telegram sent from Palestine was received in the German Foreign Ministry in Berlin.

The Chicago Public Library was crucial because its newspaper holdings included many long-forgotten publications that were important in 1933. What's more, the book acquisitions of CPL were prodigious during the 1930s and 1940s, far more extensive that any buying the library is capable of today. As a result, its shelves are filled with obscure biographies and memoirs of the sort typically published during the period in very small runs, many of which cannot be found elsewhere. These biographies frequently gave me insights into the mindsets of the principals of the era.

Intellectual hoarding

While I was generally successful in making the library system work for me, there were several instances when the system became obstructive and unworkable. The hardest obstacle to accept was the intellectual hoarding of certain eminent university libraries. For example, the University of Chicago Library is one of the most valuable sources of serials, monographs, and obscure foreign language materials. Yet they refuse admittance to all except the school's own students and staff.

U of C librarians claim the prohibition can be circumvented on an extremely limited if complex basis. For example, those who don't live in the Chicago area can obtain a pass allowing them in five days per quarter. Chicago-area residents can obtain a one-day pass to review a specific book *if* it does not exist elsewhere and is not obtainable from any other library via interlibrary loan. For example, I was once told to go through the weeks-long process of obtaining a book from Columbia University's library rather than being permitted to examine it in my hometown of Chicago.* The result of these strictures is that very few journalists and scholars except those connected with the university can really use its extraordinary holdings.

A second hoarder was Northwestern University, although it at least allowed the public to enter during daytime hours to examine its holdings. This can be equally frustrating, since at the time Northwestern denied lending privileges to all but its own. No scholar or journalist can put together a complex project involving scores of books without being able to take at least some of them home. Northwestern has since instituted a $50-per-quarter fee that at least extends borrowing privileges to serious scholars not affiliated with the university.

The intellectual hoarders have ready explanations for their policies: overuse, vandalism, community abuse, and the need to help justify the high cost of tuition with exclusive library rights. Many of these are valid points. But the fact remains that the great university libraries of Europe and America in the main are open and unrestricted; otherwise, knowledge could not be exchanged. The students and staff of the University of Chicago are free to use other public and university libraries, but the privilege is not reciprocal. And although Northwestern students can borrow free of charge from, for example, Evanston Public Library next door, Evanstonians and others must now pay $50 per quarter to borrow from Northwestern's holdings.

Unworkable ILLs

Interlibrary loan was another unworkable part of the system. For the serious scholar requiring many books for sometimes a month or two at a time, and needing to obtain them quickly, interlibrary loan was little help. First, the process can take many weeks. Second, by the time the book arrives there is usually very little time left in the lending period for actual user review. For instance, it once took five weeks to move a title from a southside Chicago Public Library branch to one close to my home, and when it finally arrived I was only allowed three days for use.

Renewals were another obstacle. For very good reasons, each library has its own renewal policy. Those that permitted repeat renewals until the book was actually needed by another user were the most helpful. Those that allowed only two or three renewals before turning the book in made life difficult. Renewals by mail and telephone were the easiest. Renewals required in person caused havoc on a weekly basis.

The only way to circumvent the obstacles of intellectual hoarding, interlibrary loan, and renewals was to maintain a network of students and assistants at every university and in every city where important books were to be found. These people were given the responsibility of checking out the titles, mailing them to me in Chicago, and seeing to renewals. It cost me a great deal of time and money, but in this way I was able to continuously use over 500 titles from several dozen libraries across the United States.

But more important than the obstacles was the inherent value of the library system. The sheer magnitude of its accumulated knowledge and its general accessibility was the factor that allowed me to discover the details of the secret pact between Germany and the Zionist movement. Had it not been for the library system, indeed I could have never written the book, and the world would still not know the story of the Transfer Agreement. □

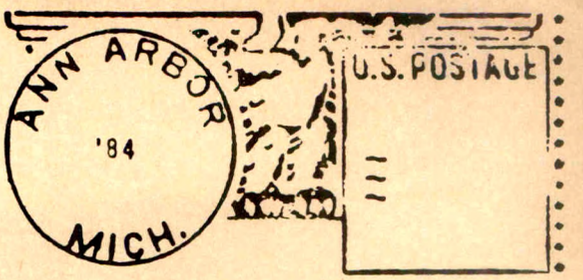
* Paul Klain, head of lending services at the University of Chicago's Regenstein Library, told *AL*, "If the item were not available in the Chicago area, we would let him in to look at the book." Klain, who did not deal with the author, also stated that it is possible for researchers to make arrangements for long-term use of the library in subject areas in which materials are unavailable elsewhere. —*Ed.*

Introducing the
that only travel

The instant you place an electronic order with UMI Article Clearinghouse, we receive it. And we'll ship it first class within 48 hours. That's a promise. One day delivery is also available by Express Mail and Federal Express.

Another first-class feature of UMI Article Clearinghouse is that we *guarantee* article availability *and* copyright clearance from over 8,000 periodicals. You are assured of coverage for most titles from 1978 to the present, and thousands of new titles will be added over the next few years.

You don't have to wait forever for articles to arrive, and you don't have to spend much, either. Prices start as low as $4 per article. Those prices hold regardless of



article reprints first class.

how lengthy the article is.

You can order using the OCLC ILL Subsystem, DIALOG's Dialorder, ITT Dialcom, which offers a gateway to ALANET, and CLASS OnTyme. Other online vendors will soon be available.

In this fast-paced Age of Information, UMI Article Clearinghouse helps you keep up. After all, a first-class institution shouldn't have to wait for third-class mail.

Publishing at ALA: The quest for success

Can the ALA imprint, worth more than $4.4 million a year in revenues, thrive within a framework almost 100 years old? No, says ALA's new publishing chief.

by Edith J. McCormick

The American Library Association's publishing unit has been controversial for almost a century. The unit's current name, Publishing Services (PS), suggests a status subservient to the various interests in the profession. The publishing operation has never quite made itself felt as an independent force; it has been shaped, for better or worse, by a Publishing Committee of ALA members. The committee interprets the needs of the field to the head of the publishing department, and guides the department's editorial direction.

Publications are essential to the Association. They not only reflect its activities, but are the chief means of exchanging information and ideas among ALA members, the profession here and abroad, and the publics that librarians serve. The ALA imprint has influence worldwide.

This article focuses on the ALA's core publishing program familiarly known as "Books and Pams," which includes all types of publications except periodicals.[1]

A one-dollar marvel

At an annual conference in Milwaukee in 1886, ALA first established a Publishing Section. An annual $1 fee allowed members to receive all publications, which amounted mainly to papers presented at conferences and those published in *Library Journal*, then the Association's vehicle for reaching its members. In 1900, the section's name was changed to the Publishing Board.

In 1902, Andrew Carnegie gave the association $100,000 for the preparation of bibliographies, indexes, reading lists, and other library aids. Members appreciated the program, because it provided libraries with small publications that would not have been published by commercial houses. During these early years, ALA Publishing was primarily an agency that bought printing and warehoused the books. Members generated the manuscripts and did their own editing. In 1935, Everett O. Fontaine became the first acting chief of Publishing, then known as the Department of Publishing and Cooperative Services.

Today, Publishing Services is at a critical turning point, perhaps the most challenging in its 98-year history. Not only are new technologies dramatically changing the profession, but competition among library publishers is becoming more intense in today's economic climate. Gary Facente, ALA's new Publishing Services director, occupies the hot center of this transition.

In sustaining Publishing Services' increasing revenues (up 11 percent from 1981 to 1983), Facente has made his mark as a capable manager in his first year and a half on the job. At the end of fiscal 1983, publishing surpluses returned to ALA's General Funds were at a five-year high (see chart).

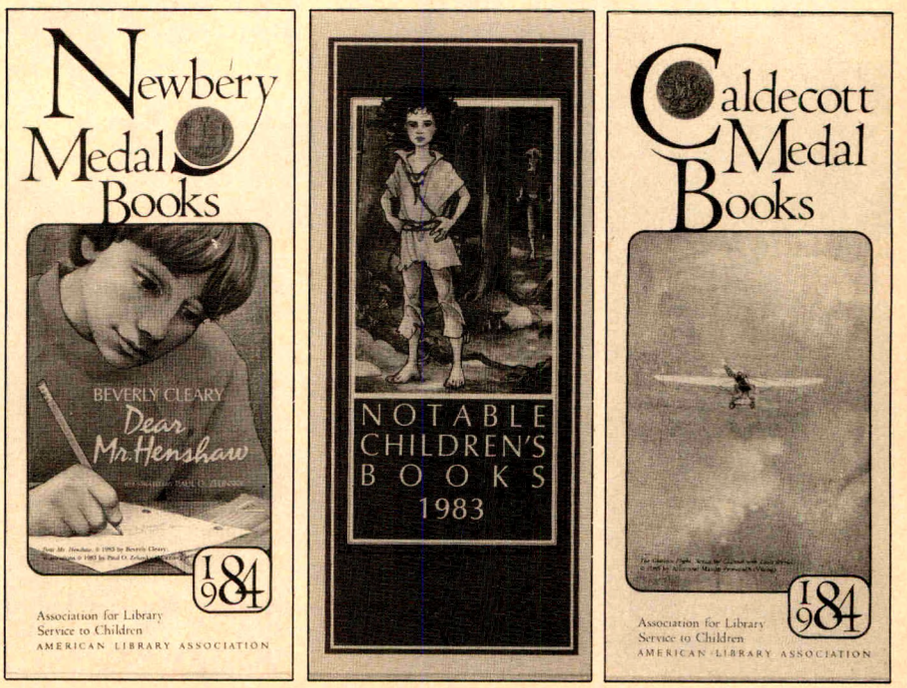
How important are publishing revenues to the Association? Last year, more than 51 cents of every dollar in total ALA General Funds revenue came from Publishing Services income.

That's a pretty important number. Yet, most ALA members know very little about the Association's publishing operation and the new approaches to it being fostered by Facente.

What difference will these approaches make to the imprint of the world's largest library association?

A climate of austerity

Facente came to the Association in September 1982 with 12 years' experience in trade publishing. He was selected over some 105 candidates.



The "pams" produced by "Books and Pams" include such popular pamphlets as these guides to award-winning books, selected by Association for Library Service to Children committees.

[1] Administratively, ALA Publishing Services also includes *American Libraries*, *Booklist/Reference Books Bulletin*, and *Library Technology Reports*. The Central Production Unit, which handles all aspects of production for seven journals and eight newsletters from various ALA units, also reports to the publishing director. Divisions and offices have varied publishing programs not under PS management.

Edith McCormick, assistant managing editor of *American Libraries*, has been with ALA 19 years and writes frequently on publishing developments. The opinions expressed here are her own.

He walked into an organization in a mood of austerity. Executive Director Robert Wedgeworth had recently concluded his report to the membership on the state of the Association: "Curbing our appetite for program expansion until new revenues are on stream is the major task ahead."

In a recent interview with *AL*, Facente confessed he had no idea what lay ahead of him when he became director. "I never suspected an organization could be this complex," he said. "The publishing program is essentially sound, but because ALA is such a horizontal organization with so much participation on the part of members, change comes slowly."

Six weeks after arriving, Facente faced his first meeting with the ALA Publishing Committee, chaired by John Cole of the Library of Congress Center for the Book.

Facente's first confrontation

Established as a Council Committee in 1974,[2] the 10-member group "controls the use of the ALA imprint. . . . and gives counsel and guidance to the administrator of the publishing unit." This mandate empowers the committee, among other things, to make recommendations on budgetary matters to the Committee on Program Evaluation and Support (COPES) and other appropriate units.

At that meeting, Facente emphasized the need for Publishing Services "to adapt to changing conditions in the outside world" and to make budgeting more realistic—an allusion to a previous budgetary practice of overestimating projected revenues.

One year later, in fall 1983, Facente made his point before the committee and COPES. He said: "We must establish a good administration that puts us into the present scene of what it takes to be competitive in the publishing business. Publishing is not healthy when stretched to its limits. There's no discretionary money or time . . . no slack at all." He then made his pitch. "Most firms reinvest 60 percent of their profits into the business," he said. "Let us take 10 percent of our surplus as reserves to do innovative things with, providing for growth, staff development, and new projects."

A few days later the Executive Board authorized that reserve: $51,150.

---

[2] The Editorial Committee and Publishing Board were merged into the present Publishing Committee in 1975. Before that time, a committee of members, the Editorial Committee, decided what would be published.

Top-level team is headed by new ALA Publishing Services Director Gary Facente (right); Herbert Bloom, senior editor, is responsible for building ALA's list; and Helen Cline, managing editor, oversees all aspects of production, including scheduling, editing, design, and physical production.

Calling on librarians his initiation

Now 39, the new publishing director has a broad grasp of the publishing business. He started as a sales rep in the film division of McGraw-Hill Book Company in 1970, calling on school library media specialists and supervisors as well as academic film librarians. He was the first head of McGraw's Educational Television Department and its Midwest regional manager. From 1977 to 1980 he was general manager of Follett's Trade Book Department. Facente was editorial director when he left Follett.

"I know about the financial end of the business because I've had jobs that required profit-and-loss responsibility," Facente told *AL*.

Publishing's strengths and weaknesses

ALA Publishing Services compares in size to the average scholarly book publisher. With a staff of 11 (see photos), including two acquisitions editors, it produces more than 30 books a year. About two-thirds of ALA Publishing's business is backlist—a healthy sign. Its titles also stay in print longer than those from competing houses, according to Facente, who estimates "active" titles at 150.

The editorial staff meets weekly and independently chooses what will be published. It acquires projects from outside the Association as well as such ALA units as the Office for Intellectual Freedom (*Censorship Litigation and the Schools*). ALA's list reflects a diversity of profes-

Comparable in size to the average scholarly book-publishing staff, ALA Publishing Services personnel include, left to right (top): Patricia Foley, publishing assistant: Joe Brinley, associate editor, responsible for building ALA's list; Robert Hershman, operations manager; Harriett Banner, production and planning director; Betty Crowley, Gary Facente's secretary; Matt Jobst, supervisor of Order Services, which has recently merged with Publishing; (bottom) Mary Huchting and Sylvia Royt, production editors; Paul Kobasa, marketing manager; Marcia Rasmussen, graphic artist; and Donna Kitta, assistant to the production staff.

sional concerns, from Anne Mathews' *Communicate: A Librarian's Guide to Interpersonal Relations* to Francis Miksa's *The Subject in the Dictionary Catalog*.

"The books we publish are physically as good or better than those of our competitiors, in bindings, acid-free paper, graphics. We're careful to select suppliers who have done quality work for us, including designers," Facente said. He does admit, however, that ALA is sometimes slower in producing a book from manuscript to book than it should be.

He prefers to publish fewer books rather than increase staff to produce more titles within a demanding time-frame. "Many times we feel constrained to return a specific surplus to general funds, and we believe the only way to accomplish this is to produce more books," he said. But now that the reserve fund is in place and the reinvestment precedent established, Facente feels the pressure has diminished.

Among some 40 publishers in library science, Facente counts as ALA's major competitors Neal-Schuman, Libraries Unlimited, Oryx, Scarecrow, Shoe String, and Greenwood. In reference books, he calls Gale and Bowker "the ones to watch."

He believes ALA has encouraged writers who have subsequently gone on to other houses, but he said they shift for many reasons. "In some cases, they get more money elsewhere; in others, they think another organization can do better marketing for them."

Herb Bloom, acquisitions editor with ALA since 1969, made another distinction. "Some authors go to other houses with different projects because of the specialties each house has developed," he said, "but they will continue to publish with us. We maintain relations with authors after their first book. So if they go to another publisher with their second title,

How to publish with ALA

Potential ALA authors are encouraged to suggest new publication projects.

Send a brief letter of inquiry to Herb Bloom or Joe Brinley, Publishing Services, ALA, 50 E. Huron St., Chicago, IL 60611. In the letter, state your background and present work, and the project you are proposing. Provide just a few paragraphs describing the project, emphasizing its distinctive characteristics, especially those that would serve potential buyers. Indicate the stage of your project; e.g., outline only, a few finished chapters, or completed manuscript. Do not send any material at this point.

ALA Publishing is interested in creating a distinctive place for each project in its publishing program. Early notice from an author who wants to prepare a publication allows the editor to shape books that will be complementary rather than redundant.

If your letter of inquiry describes a project of interest to the editors, they will ask you to write a longer proposal. The proposal should identify the specific audiences for the book, its projected length, other works on the subject, and special considerations. A more detailed description of content, structure, and method is required at this time.

ALA issues contracts and pays advances against royalties often without waiting for books to be completed. Normally, advances range from $300 to $3,000. If the sales potential is promising, some advances exceed this range.

they will return to us on the third one.''

Recent authors ALA has supported with first books are Caroline Bauer, Nancy Melin, Patricia Breivik, Heartsill Young, Ann Prentice, Ronald Blazek, and William Gray Potter.

Top sellers

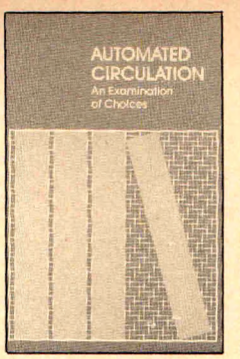
In terms of copies sold, bestseller honors for 1982–83 go to the *Anglo-American Cataloguing Rules*, 2nd ed., and all its permutations (see box). ''Dollars, on the other hand, come from big reference books such as Eugene Sheehy's *Guide to Reference Books*, the *ALA World Encyclopedia of Library and Information Services*, and *Who's Who in Library and Information Services*,'' Facente said.

Asked why ALA has only a few such big books, Facente blamed lack of money to reinvest in major projects.

A recent acquisition he considers ''our big book for 1984'' is a revised edition of *Computer Readable Databases: A Directory and Data Source Book*, which Facente went after in competition with commercial publishers. It was written by Martha Williams, a professor of library science at the University of Illinois and the editor of *Online Magazine*. The directory was first published by The American Society for Information Science. ALA plans to publish it in softcover this fall.

Bringing new life to the list

Facente sees the ALA market as a changing one. ''Librarians can no longer buy everything. They have to be more selective, and *we* have to be more selective,'' he said. He believes ALA's successful titles will be those giving librarians practical information to help them in their work. ''*Online Searching Technique and Management* is that sort of book, as is *Output Measures for Public Libraries*,'' he said. ''Or books that apply to one's immediate job, such as Joe Matthews' *Automated Circulation: An Examination of Choices*, and handbooks on carrying out policy such as the *Intellectual Freedom Manual*.''



Typical of the practical handbooks Facente wants to see characterize the ALA list is this title, edited by Joseph Matthews and Kevin Hegarty.

He also wants to speed up ALA's published information sources, including proceedings and collections of papers.

Herb Bloom wants ALA to publish

(Continued on p. 421.)

ALA's top 25 sellers in units and revenue, 1982–1983

Saga of an RFP for an automated system

Choosing a vendor is a gruelling ordeal; but somebody has to do it

by Tom Smorch

Ed. note: The request for an automation proposal is a fact of library life not to be taken lightly. Indeed, we were impressed by the very weight of the 115-page "Request for Proposal for the Acquisition, Installation, and Maintenance of an On-Line Integrated Library System for the Genesee District Library." We were impressed also by the library's long and careful preparation for the proposal, a model for other libraries wishing to know in advance what may be involved, and how to go about it.

In fall 1980, the director, assistant director, and the three regional managers of the 16-branch Genesee District Library of Flint, Mich., first began discussing the possibilities of automating our circulation system. Two-and-a-half years later, after extensive research and investigations, writing and reviewing a request for proposal (RFP), careful analysis of the vendor responses, demonstrations, library board actions, and contract negotiations, GDL finally signed a contract with an automated-system vendor.

At the beginning, journal articles on automation made us realize we needed more information. GDL Director Marian Gamble, then assistant director, and I, then manager of the southern region, enrolled in a graduate course in library automation offered by the University of Michigan Extension Office in Dearborn. The professor, Edwin Cortez, taught the basics of the technology and discussed the historical development of library automation and the methodology used to analyze vendors and their products.

Our class studied automation functions and their impact on the library environment. The analysis of library needs helped us review our own needs at GDL, and this review became the groundwork for the development of our functional specifications. The course work also exposed us to computer terminology, and the detailed examination of vendors and their products pointed up the advantages as well as limitations of automation.

Our reading assignments included some authors already familiar to us, such as Richard Boss and Joseph Matthews. The *Journal of Library Automation* (now *Information Technology and Libraries*), *Library Technology Reports*, *American Libraries*, and *Library Journal* were mandatory reading, and still are, for anyone striving to keep up with current developments in the field.

Preliminary investigations

While we were taking the course, Gamble and I began investigating microcomputers and systems along with Edward Whittaker, then GDL director. A local vendor proposed using a distributed system in a configuration of four branches communicating with a database at the regional library or with all 15 branches communicating directly with the Central Processing Unit (CPU) at GDL Headquarters in Flint.

Because we were studying distributive processing in our class, we were familiar with the vendor's concept. We were apprehensive about the limited library software then available for microcomputers. We studied compatible packages and discussed the possibility of custom software written specifically for GDL.

We learned a lot from the experience, but found we spent most of our time with the vendors explaining library needs. The vendors' lack of familiarity with libraries made us question their ability to provide the database management system and software options we needed. The programmers working with these commercial systems had no experience with MARC formats or library patron files. We needed communication between the branches in the three regions as well as with headquarters. The microcomputer configurations didn't solve the problem.

ALA Annual Conference input

Just before ALA Annual Conference 1981 in San Francisco, I attended the June 25-26 preconference on "Automated Circulation: An Examination of Choices," cosponsored by the Library Administration and Management Association and the Library and Information Technology Association. At the highly informative workshops and meetings, we shared ideas with librarians experienced in automation. Vendors were given the opportunity to discuss their products and their relationships with librarians. We heard that the Chicago Public Library, Evergreen State College, and the King County Library System in Washington had produced exemplary RFPs and were encouraged to acquire them and others.

At the Annual Conference exhibits I visited the computer vendors and collected information on systems and their projected enhancements. I took advantage of the hands-on demonstrations to get a better idea of how the equipment and software functioned. Annual Conferences are prime occasions for interacting with virtually all the major automation vendors.

At home we began exploring the time-sharing concept with the Genesee County Data Processing Department and Charles Stewart Mott Community College. Both owned mainframe computers that could

We emphasized immediate needs and gave consideration to future possibilities that include system growth, expanded services, a management subsystem, and sharing the database . . .

Smorch is automation manager at the Genesee District Library, Flint, Mich., A graduate of the University of Michigan School of Library Science, he has worked 12 years at the library in various capacities.

have been expanded to accommodate the library. Both institutions, however, lacked understanding of the bibliographic record formats in both print and tape forms, and would have required a great deal of library staff time to train their programmers. Response time and priorities of the CPUs were other problems.

Our staff prepared a chart comparing library turnkey, commercial, and time-sharing vendors on the criteria of software, hardware, maintenance, site preparation, and political implications. We shared the chart, the estimated cost figures, and our recommendations with Bobby Sage, chair of our library board's Forward Planning Committee.

Automation Task Force at work

In fall 1981 the library board approved our recommendation to appoint Director Whittaker, Sage, Gamble, and myself to an Automation Task Force charged with writing an RFP. We gave ourselves a deadline of six weeks, and met two or three times each week.

We felt we were well prepared by now and concentrated on plans to automate for our present needs while planning for the future. Because we understood what the vendors could provide, we knew which capabilities should be included in the RFP. To achieve a successful response, we felt we had to balance GDL needs with vendor capabilities.

The task force as a whole wrote the introductory material and the mandatory contractual functions. The contractual provisions were particularly important, and the library board attorney helped us with them.

Writing the technical and functional specifications required us to use all the information we had collected since the beginning. Gamble and I had worked at GDL for more than 10 years, and our knowledge of the library's daily operation allowed us to be very specific about the requirements. We relied heavily on the RFPs we had collected and rewrote many of their specifications to fit GDL needs. We stressed the integration of functions to provide for film bookings, circulation of materials to the blind and physically handicapped, and management reports on library services.

Using the same database for varied functions was a priority. We emphasized immediate needs and gave consideration to future possibilities that include system growth, expanded services, a management subsystem, and sharing the database with other public, academic, and private libraries.

When the vendor brought the demonstration [system] to GDL, we connected a video monitor to the terminal so tha staff could watch the transactions as they occurred.

Staff members helped us write our administration subsystem, covering personnel records, payroll, and accounting jobs, among other functions. We included an acquisitions subsystem even though some vendors were not yet offering it.

Our RFP also covered specifications for downtime, acceptance tests, response time, telecommunications networking, and security. Michigan Bell provided cost estimates for the installation and monthly charges for data lines to connect the libraries. The mandatory verbatim and content provisions were collected in the appendix. Vendors could be judged responsive to the RFP only if they answered the contractual provisions.

Consultant's role

Despite all our preparation, we still lacked confidence in our ability to evaluate vendor responses to the technical requirements. The task force decided GDL needed an outside consultant to review the RFP and evaluate the responses, and we considered several experts. The library board concurred with our recommendation that Professor Cortez serve as our consultant, so we sent the RFP to him for review. The lawyer also reviewed and approved the final draft before it went to the printer.

We distributed the RFP Jan. 12, 1982, and gave the vendors six weeks to respond. While waiting for the responses, the task force ranked the functions by priority to help Cortez develop a cost/performance ratio for comparing vendor responses. He assigned weights to the functions based on our priorities.

Cortez picked up the responses on deadline day, Feb. 26, and discussed them with the task force. None of the respondees could provide the totally integrated system specified in the RFP, so Cortez asked the board to postpone a decision and give some of the newer vendors an opportunity to respond.

We gave the newer vendors the same six weeks to reply, and Cortez evaluated their responses using the cost/performance ratio. At the library board meeting Nov. 17 Cortez asked the board to invite one particular vendor* to demonstrate hardware and software capabilities system for the staff and board mem

Staff members' involvement

From the beginning of the RFP pro GDL staff members had been inform and involved with the task force activ We presented updates on the autom project at regular staff meetings be we knew staff cooperation and u standing were vital in the transitic automation. When the vendor brough demonstration to GDL, we connect video monitor to the terminal so that could watch the transactions as they curred. Staff members thoroughly c tioned the sales rep on the performa and expressed a positive reaction.

The vendor rep also demonstrated terminal operations to interested lit board members in January 1983. B members asked questions about cost volved, maintenance contracts, and c munications possibilities. Cortez atte the demonstration and reported his ob vations and the cost/performance fac involved. The board then accepted recommendation and voted unanimo to begin contract negotiations.

The RFP is part of the contract sig Feb. 14, 1983. Since the signing, C staff has been involved in site preparat which included remodeling the buildin create a computer room. Staff mem have also participated in negotiations the telephone company for data li delivery and installation of equipm computer operator and staff training, d base loading, and the conversion proj We have trained more than 100 volunt to help the staff with conversion.

Each phase of the project has r firmed our belief in a thorough request proposal. We are constantly surprised pleased that the problems that have ari were anticipated and addressed in the F and the contract.

Librarians who are interested in any ditional information may contact me Genesee District Library, G-4195 W. Pa dena, Flint, MI 48505 (313-732-5570).

HIGH-DENSITY MOBILE STORAGE SYSTEMS

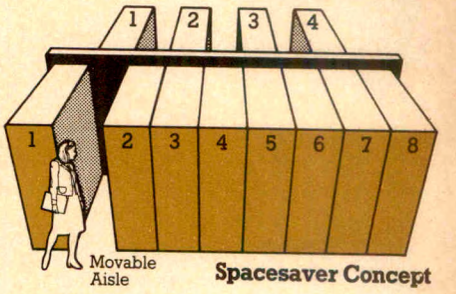
LIBRARIES SPACESAVER

University of Michigan, Ann Arbor, Michigan.

It Just Makes Sense...

Double Your Storage Capacity Without Doubling Your Space

Conventional Layout



Spacesaver Concept

Library floor space is expensive. And cramped storage facilities with growing collections and more & more volumes can only add up to a continual space "crunch", year after year.

Now, Spacesaver offers an alternative to conventional storage methods ...high-density mobile storage systems. By eliminating multiple *non-productive aisles* and their wasted space, you can condense your present library stacks into *50% less space* or *double your stack capacity.* And with the price of library construction today, Spacesaver doesn't cost money, it saves money! Send today for full details and copies of other library installations that have discovered the benefits of a Spacesaver system. Spacesaver. The better way that just makes common sense... for you.

The Spacesaver Group.

Space efficiency is our business.

The Linked Systems Project

RLG/WLN/LC computers ready to "talk"

Three disparate bibliographic systems will link up this fall

by Ray Denenberg and Sally H. McCallum

AS RECENTLY AS 10 YEARS ago, many of those planning for library automation visualized one national bibliographic network that all libraries could use for shared cataloging and interlibrary loan. By the late 1970s, it was clear there would not be one library network in the U.S., but several large networks, each with its own database and set of library-clients. Today, the technology is leading to decentralization of even the large networks, causing planners to consider a "linked system approach" as a realistic and cost-effective alternative to a single network.

The barriers to creating a "supernetwork" of linked library automation systems are substantial. Differences in hardware, software, and operational procedures severely limit the ability of such systems—large and small—to communicate with one another. To remedy this problem, the Washington Library Network (WLN), the Research Libraries Group (RLG), and the Library of Congress (LC), are partners in the Linked Systems Project (LSP), funded largely by the Council on Library Resources. The LSP approach is not to change systems whose differing environments demand different approaches to automation, but to connect them in an "open" manner.

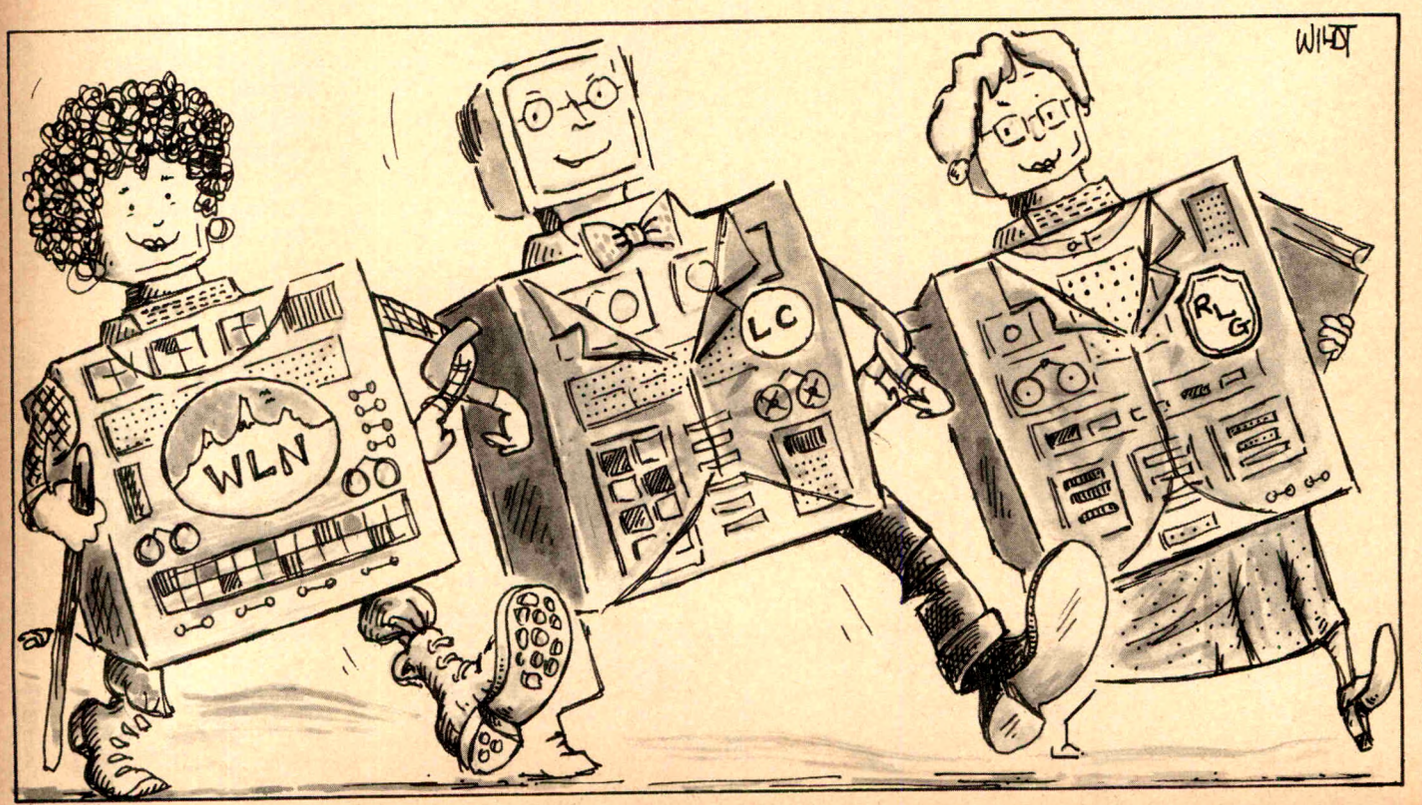
"Open systems"

All computers and automated systems have unique characteristics and idiosyncracies. Most computers can communicate and exchange data with other computers of the same make and model. In general, however, computers from different manufacturers cannot exchange data because of differences in hardware, software, and data representation.

Thus two library systems with different equipment must develop special procedures and software to exchange messages. If a third type of system wants to "talk" with the first two, additional sets of procedures and software are required, and so on as each new system is added. Such an approach could require new communications interfaces at an exponential rate, and is obviously so costly and complex as to be untenable.

(Continued on p. 402.)

Ray Denenberg is senior network specialist, Network Development Office, at the Library of Congress. **Sally H. McCallum** is assistant to the director for Processing Systems, Networks, and Automation Planning in LC's Processing Services Department.



Chris Wildt

INGRAM

THE LIBRARIAN'S ADVANTAGE

Ingram customers consider us to be the state of the art in the book industry. We are proud of our reputation for excellence.

Over 2,500 libraries have turned to Ingram for the many advantages we offer:

1. Weekly updated microfiche listing of our entire book inventory—over 55,000 titles and growing.
2. Toll-free telephone ordering.
3. On-line order entry.
4. Instant stock verification.
5. 24-hour order turnaround guaranteed.
6. Ingram Delivery, a program offering up to 50% savings over other modes of transportation.
7. The most current and authoritative marketing information in the industry.
8. Professional promotional materials to boost circulation.
9. The most comprehensive, innovative catalogs and monthly magazines to assist in selection and ordering.
10. Programs designed to serve libraries and patrons.
11. The best wholesale discounts uniformly available to all libraries.
12. Efficient, courteous service on which you can rely.

Ingram

America's Leading Distributor Of Trade Books

Visit the Ingram Exhibit at A.L.A., booths 131, 133, 135 and discover the Ingram Advantage.

(Linked Systems Project continued.)

To solve this problem, the standards community developed the "Open System Interconnection" (OSI) model, a standard telecommunications model governing the communication of information between different systems. Under OSI, a system can talk with any other OSI system using one communication procedure. Adding a new system to a network has little impact on existing participants. Librarians, who have a healthy appetite for standards (much to their credit), may regard this as an obvious solution to computer communication problems, but the explosion of new technology, and political and competitive pressures, have held back development of standards in this area.

Keeping up with standards

Although this description of OSI sounds simple, requirements for it are complex. A significant segment of the standards community concerned with computer communications has been involved in its development. A generic "OSI Reference Model," developed by the International Organization for Standardization (ISO), divides into seven "layers" all the procedures that must be painstakingly standardized and programmed in order for two different computers to communicate.[1] Standards for the first four OSI layers are finished; work is underway on the fifth and sixth. The part of the seventh layer that is related to intersystem searching is currently being standardized by National Information Standards Organization Z39 (formerly ANSC Z39). The Linked System Project is using all completed ISO and American National Standards Institute (ANSI) standards, and drafts for those not yet approved.

Advantages of linking systems

Librarians are familiar with terminal-to-computer interaction between a user and a system. Computer-to-computer communication extends the terminal-computer relationship beyond a single system by enabling a terminal user to access a remote computer through the local computer.

Without this capability, the following situation prevails: A WLN member wanting to use RLG's RLIN database would need an RLIN terminal and knowledge of the RLIN search procedures. To search OCLC, that user would need an OCLC terminal and familiarity with OCLC search procedures. In the worst case, a user would need a different terminal and search procedure for each remote database used—a situation that gives librarians nightmares.

In the computer-to-computer scenario of the Linked Systems Project, a WLN member can search the RLIN files using a WLN terminal and WLN search procedures.

In the computer-to-computer scenario of LSP, the WLN member can search RLIN's files from a WLN terminal, using WLN search procedures. This "native mode" search at the WLN terminal is first converted into an intersystem "language" by the WLN system, and then into a form comprehensible to the RLIN search programs when it reaches RLIN. Results from the search are sent back to WLN in the intersystem record format, USMARC,* and shown to the searcher using WLN search result displays. Thus a user can search many remote databases from a single terminal using familiar search procedures.

Another important advantage of computer-to-computer intersystem searching is that the systems are transferring full USMARC records in standard format from the remote database to the local database. A user who wants to "keep" a record, i.e., add it to the local database, can do so without waiting for a tape copy—because the full record is available immediately.

Interchange of authority data

WLN, RLIN, and LC will first use the LSP communications link to build a joint authority file.[2] An obvious question is, "Why authorities?" Normalization of headings is important in a single catalog, but yields even greater benefits in a shared cataloging environment. Normalization of headings across files in different institutions assists intersystem searching and interlibrary loan, which are so important in these days of reduced book budgets.

Sharing authority data also reduces cataloging costs, because approximately 50 percent of a cataloger's time is spent creating headings and related cross references for bibliographic records. All three LSP partners easily agreed to the exchange of authority records because all have a firm commitment to authority control. This commitment is supported by the fact that nearly all recent major bibliographic system development efforts have included or are planning authority control capabilities.

NACO provides a head start

LSP planners examined a variety of methods for building one authority file when contributors to the file are spread across the U.S. But they consistently agreed on one point—that while LSP partners require a copy of the authority file for their own systems, there should also be a "Master File" that participants could refer to for backup, problem solving, etc. Making the LC copy the master file has made it easier to fit the LC Name Authority Cooperative Project (NACO) into the LSP framework.

NACO allows 28 libraries to contribute records to the LC Name authority file (making it the NACO authority file) by sending worksheets to LC. LC converts their records to machine-readable form and distributes them to the library community. Because NACO participants cannot check the up-to-date NACO file before establishing a new heading, LC catalogers must recheck all their worksheets to avoid duplicate records. This considerable amount of rechecking would be eliminated if NACO participants could access the current NACO file and immediately key the new record.

In addition, some NACO participants must both fill out a worksheet for LC and key the same authority record into their utility. LSP will enable NACO participants in WLN or RLIN to have timely access to the NACO file and to key each record only once, thus reducing the workload of both LC and the participants—one of those rare changes economists call "pareto-optimal."[3]

Record transfer and intersystem search

Two basic LSP capabilities are being developed to support the building of the NACO authority file: record transfer and intersystem search. Record transfer will be used for online distribution of authority records from LC to WLN and RLIN at least every 24 hours and perhaps more frequently. Online transfer replaces tape distribution, in which a week to a month or more may elapse from the time a record is added to the NACO master file and the time it appears in RLIN or WLN. This timely online distribution of new records will allow catalogers on WLN and RLIN to create authority records with relative assurance that they are not creating duplicates.

A companion record transfer procedure

* USMARC is the MARC (Machine-Readable Cataloging) record format developed at the Library of Congress and used by most U.S. libraries.

How to research the world's most powerful city at the speed of light.

What happens in Washington, D.C. each day affects people, organizations and governments in every corner of the world.

And nowhere in the world are these important events reported more thoroughly and accurately than in *The Washington Post.*

That's why, as a researcher, you will be interested in our new Washington information data base, The Electronic Washington Post.

Because, in the time it takes you to read this ad, you could search every word in today's *Washington Post.*

And every word of every *Post* of the last *six years!* (Depending on which computer vendor you choose).

Not only would you be able to access information at the speed of light, but you'd be connected to one of the most extensive computerized newspaper files in the world.

Over 400,000 items. And growing by 1,200 each week. Stories, columns, sections, and reports, as far back as January 1, 1977.

What's more, you can search through Pulitzer Prize-winning material word-by-word. Subject-by-subject. Day-by-day.

The Electronic Washington Post can feed you *Post* stories published on any topic. And every report is retrievable in its entirety or in summary form.

Imagine how much more thorough your research would be if you could do in a minute what is humanly impossible to do in a month!

THE ELECTRONIC WASHINGTON POST

Write for more information today. Address your requests to The Electronic Washington Post, Washington, D.C. 20071-7850.

allows the "contribution" of records to the NACO master file. Using this module, new name authority records from NACO participants in WLN and RLIN are sent online to LC as soon as they are completed. The new records or updates are then available for redistribution online to other LSP participants and for tape distribution to libraries that subscribe to the MARC authorities distribution service. The emphasis throughout the linked systems project has been on avoiding manual checking of data wherever possible by using the machine, offering proper training, and establishing reasonable goals.

The final use of the link is for intersystem searching. While the need for intersystem searching in the authority file project may appear slight due to file replication and online distribution, there will still be many "non-NACO" authority records in both RLIN and WLN that NACO contributors will want to draw upon for information. One example is the New York Public Library authority file on RLIN. The intersystem search has many other potential uses for the interchange of bibliographic records.

LSP limitations

Yes, there are limitations on the LSP capabilities. They are not imposed by the OSI communications environment but by the goals for the initial implementation, scheduled for September/October 1984. First, each LSP site is providing access only to authority records. A follow-up enhancement being planned now will add bibliographic-record access, a "simple" matter (if anything involving automation ever is) in comparison to the initial effort since it will not require alterations to the existing communications facility.

Other limitations affect the types of searches supported. The LSP partners are not implementing any new searches; thus, intersystem searching is limited to searches already available on all LSP systems. For example, LC offers author/title key searching: neither WLN nor RLIN offers this search, so it will not be available in intersystem searching initially. The available searches are basic, but a good start. Future enhancements may allow users at one LSP site to formulate searches available only on another system.

Although LSP is using the OSI communications model to link large mainframe computers, OSI itself is not size-specific. Thus, the LSP link—presuming it tests well in this first implementation—is a step toward standards and software for any computer-to-computer link. If the same standards are followed throughout the information community, the only remaining barriers to exchange will be human-produced, because the machines will be cooperating with one other. □

Notes

1. In the seven-layer OSI reference model, the "bottom" layer controls the physical link to the target computer, while the seventh or "top" layer is closest to the application programs. A message from one computer to another is passed from the terminal user to the application programs to the "top" communication layer. The message moves down through each layer to the bottom one, then across the communication link (leased line, TELENET, etc.) to the target computer. At the target it enters the bottom layer and travels up through each communication layer to the top and finally to the target's application programs.

2. An authority file is made up of records that specify the authorized forms for headings, e.g., authors' names. It also lists known alternate forms of the headings as cross references.

3. A change that leaves everyone better off.

A good recent article on the OSI model with applications, uses, and plans is: Rauch-Hinden, Wendy, "Communications standards, ISO poised to make its mark," *Systems and Software*, March 1984. A more detailed discussion of LSP is: Davison, Wayne, "The WLN/RLG/LC Linked Systems Project," *Information Technology and Libraries*, March 1983, p. 34–46.

LIB. SCI.: asst. prof. position available Aug. 1984. Bkgrd. in info. sci. & lib. computer appl.; behavioral/quantitative, & other theoretical orientations desirable. PhD req. for tenure-earning appt. (ABD discussable). Salary range $22,000-$24,000, 9 mos.; summer tchg. available. The school is housed in a new (1981) facility, w/tchg. labs for major areas. Appl. deadline: Aug. 15. Send resume & ref. to: Harold Goldstein, Dean, Schl. of Lib. & Info. Studies, Fla. State U., Tallahassee, FL 32306. The Fla. State Univ. is an equal-opportunity, affirmative-action employer.

HEAD, ACQ. DEPT., Univ. of Fla. Libs. Resp.: admin. of acq. dept. incl. serials, binding, gifts & exchange, & monographs sections; prep. & admin. of the acq. budget. Qual.: ALA-accred. MLS, 5 yrs.' or more exp. in acq. in a large research lib. Fiscal & budgetary abil. req. Benefits: 12-mo., tenure-track appt. w/faculty status. Fla. state retirement, Blue Cross-Blue Shield, 22 days' vacation. Rank & salary: assoc. ln. ($15,660-$26,100); ln. ($18,660-$31,100). Appl. should be submitted no later than July 15 to: James H. Renz, Assoc. Dir. for Tech. Svcs., Univ. of Fla. Libs., Gainesville, FL 32611. Please submit names & adds. of 3 ref. w/ltr. of appl.

ASST. HEAD OF ACQ./SERIALS DEPT. Resp. for asst'g. in the admin. & supvsn. of a combined dept., w/major emphasis on quality control of serials. ALA-accred. MLS & 2 or more yrs.' prof. exp. in serials acq. & control w/some serials cat'lg. exp. desired. Supvsy. exp. & knowl. of computer-based record systems desirable. Salary $20,000 min. depending on qual. & exp. 12-mo., tenure-track, TIAA/CREF, 22 days' annual leave, many other fringe benefits. Situated in the Ozark Mountains, Fayetteville (36,000 pop.) is surrounded by natural beauty & offers convenient access to outdoor activ. associated w/a moderate climate. Position available immediately. Appl. accepted until position filled. Send resume w/names, addresses, & ph. nos. of 3 ref. to: John A. Harrison, Dir. of Libs., Univ. of Arkansas, Fayetteville, AR 72701. An EO, AAE, welcomes appl. from all qualified individuals.

HEAD OF ACQ. at Ariz. State. Book budget of nearly $3 million; staff of 20; implementing DataPhase ALIS III total lib. system; reorganizing to separate acq. from collection dvpt. Req.: ALA-MLS; in-depth knowl. of acad. lib. acq. & the book trade; demon. mgr'l. & supvsy. exp.; min. of 5 yrs.' prof. exp. in acad. lib. tech. svcs.; knowl. of lib. automation; written & oral communication skills. Pref.: acad. lib. exp. in 2 or more tech. svc. areas; knowl. of one or more lang. in addition to English. Salary: $24,500 min. Apply by July 20 (postmark accepted) to: Constance Corey, Asst. Univ. Ln., Hayden Lib., Ariz. State Univ., Tempe, AZ 85287. Address all qual., enclose resume, & send names, addresses, & ph. nos. of 4 recent ref. Write for complete position description. An EEO, AA employer. Minorities are encouraged to apply.

HEAD TECH. SVCS. LN.: Lee Co. Pub. Lib. System, Fort Myers, Fla. Must direct dept. using OCLC/SOLINET for cataloging & ILL; resp. for retrospective conversion now in preparation w/future automation plans; some orig. cataloging w/OCLC standards; reqs. MLS from an ALA-accred. schl.; 2 yrs.' pertinent exp. w/lib. automation req. One yr.'s exp. in supvsy. capacity highly desirable; salary range $13,572-$21,164; deadline July 15. Send resume to: Lee Co. Courthouse Persnl., POB 398, Ft. Myers, FL 33902-0398; 813-335-2167. EOE.

ASST. DIR. Salt Lake City P.L. seeks strong pub. svcs. admin. to serve as asst. dir. Resp. incl. admin. of main lib. pub. svc. agencies, collec. dvpt., budget & long-range goal dvpt. Commitment to participative mgmt. & strong ldrshp. & org'l. skills req. Candidate should possess an MLS or an approved equiv. & 5 yrs.' progressively resp. exp. Likely starting sal. of $32,000. Resume should be sent by July 9 to: Persnl. Dir., Salt Lake City P.L., 209 E. 500 S., Salt Lake City, UT 84111. Interviews will be sched. at ALA. We are an affirmative-action, equal-opportunity employer.

PERSNL. DIR. Salt Lake City Pub. Lib. seeks indiv. to manage persnl. functions, staff dvpt. prog., prof. collection, & performance appraisal system. Candidate should possess qual. which provide broad bkgrd. & exp. in libs. & human resource mgmt. Strong interpersonal & communications skills req. Salary range of $20,196-$31,308. 22 days' vacation. Resume should be sent by July 9 to: Persnl. Dir., Salt Lake City Pub. Lib., 209 E. 500 S., Salt Lake City, UT 84111. Interviews will be scheduled at ALA. We are an affirmative-action, equal-opportunity employer.

BRANCH LIB. SUPVSR. for the St. Louis P.L. system. Resp. incl. programming, mat'l. selection, supvsn., budget prep., gen. mgmt. of the branch facility, & dvpt. of the branch prog. objectives. Req.: an ALA-accred. MLS; at least 4 yrs.' related prof. exp. incl. some exp. in a pub. lib.; strong adult svcs. bkgrd.; demon. abil. to establish effec. community relations. Starting sal. $17,892-$22,057 dep. on exp. Sal. range to $26,222. Send resume & salary history to: Richard L. Bal'icki, Persnl. Dir., St. Louis P.L., 1301 Olive St., St. Louis, MO 63103. An equal-opportunity employer.

LIB. AUTOMATION CONSULTANT. Resp. for introduction, promotion, installation, & ongoing support for automated lib. systems. This position reqs. an MLS degree & a min. of 3 yrs.' exp. in lib. automation. Good written & verbal skills. The job is based in St. Louis & will req. about 25% travel. Starting min. salary is $22,100- higher, dep. on exp./qual. Send cover ltr. & resume to: Ms. Moor, Data Research Assoc., 9270 Olive Blvd., St. Louis, MO 63132. Will be interviewing at ALA Dallas.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries*, 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

JOBLINES

Joblines will appear in full on a quarterly basis—February, May, July/August, and November—and in abbreviated form the rest of the year. Space saved will be devoted to expanded Positions Open listings.

For complete Jobline info.: May *AL* p. 310.

POSITIONS OPEN

ACADEMIC LIBRARY

Acquisitions librarian, monographs. Responsibilities: participates in acquisitions, collection development, faculty liaison, and other professional activities, emphasizing scientific/technical areas. Requirements: ALA-accredited MLS; experience in an academic or science/engineering library; undergraduate degree in a scientific/technical discipline with some graduate work preferred; reading knowledge of at least one foreign language desirable; effective communication skills. Salary: $17,000 (10.5-mo. contract). **Closing date, July 15.** Send resume and names of 3 references to: Don Frank, Chair, Search Committee, **Texas Tech University Libraries, Lubbock, TX 79409.** Texas Tech University is an equal-opportunity employer.

Administrative services librarian (search reopened). Position to be filled between Aug. 15 and Oct. 1. Manages circulation, reserve, microforms, and shelving. Responsible for supervision of public areas of the building and space utilization, a full-time staff of 8 and 40 student assistants, and an online circulation system. Qualifications: MLS from ALA-accredited library school. An additional graduate degree is desired and is one of the expectations for tenure. This position demands a strong management and public service orientation. The incumbent must be able to work effectively with students, faculty, and the general public, and to articulate circulation policies to these groups. Desirable qualifications include supervisory experience, work in academic libraries, and knowledge of data processing. Salary and benefits: appointment range $22,000—$26,000 for 12 mos., depending on qualifications and experience. TIAA, Blue Cross-Blue Shield. **Send letter of application and resume by July 15** to: James C. Eller, Associate Dean for Library Services, **Wichita State University, #68, Wichita, KS 67208.** Finalists will be invited for expense-paid interview. Wichita State University is an affirmative-action, equal-opportunity employer.

Assistant director for public services. Responsible to executive director for operations and policy formulation for reference services (general/government documents reference desks, library orientation/instruction, online searching, college/dept. liaison) and collection development; implementation of access to public online catalog; administration of faculty development program and grants in library; liaison to Friends of Polk Library. To assume additional responsibility for access services (circulation, interlibrary loan, 3 resource centers, audiovisual services to classrooms, collection maintenance) within 3 yrs. Required: ALA-accredited MLS or equivalent and second master's or doctorate; significant reference and/or collection development experience in academic or research libraries; significant administrative experience in reference, collection development, or access services; demonstrated successful experience in personnel management and oral and written communication. Faculty rank and salary (minimum $29,000) subject to qualifications. 12-mo. contract. **Closing date: June 30.** Send letter, resume, names of 3–5 references to: J. Daniel Vann, Executive Director, **Libraries and Learning Resources, University of Wisconsin-Oshkosh, Oshkosh, WI 54901.** An AA, EO employer.

Assistant head, archives and rare books department, University of Cincinnati Libraries. Assists head in the management of the department and is responsible for implementation of the university records management program; for assisting in acquisitions and processing, and providing reference assistance with the university archives and other departmental collections. Receives general direction from and reports to the head of the department. Acts as liaison and consults with other departments, libraries, and faculty on matters concerning archives and rare books. Acts as head in the absence of that individual. Qualifications: MLS from an ALA-accredited library

school and appropriate subject master's degree or relevant combination of education or experience. PhD desirable. Relevant experience working with archival or manuscript collections required. Records management experience desirable. Ability to communicate clearly, both orally and in writing. Ability to work effectively with patrons, other library staff, and university personnel. Salary minimum $16,615. **Send resume with cover letter and the names of 3 references postmarked by July 15** to: Sharon Tuffendsam, Libraries Personnel Officer, **University of Cincinnati, Cincinnati, OH 45221-0033.** The University of Cincinnati is an affirmative-action, equal-opportunity employer.

Assistant head of catalog department. Under the direction of the department head, supervises and coordinates monographic acquisitions and cataloging. Participates in planning and development of departmental policies and procedures. Performs original cataloging as necessary and is responsible for government document cataloging. Participates in collection development in assigned bibliographic areas. The department consists of 4 sections: order, new materials, record management, and special formats, and is staffed by 3 full-time professionals and 10 FTE paraprofessionals. Required: MLS from an ALA-accredited school, thorough knowledge of AACR2, LC classification and subject headings, MARC formats, and OCLC (or other bibliographic utility). Preferred: minimum of 2 yrs.' experience in technical services, demonstrated ability to supervise, and excellent oral and written communication skills. Position is 12-mo., tenure track, CREF. Salary range: $16,500–$18,300. **Send letter of application, vita, transcripts, and 3 letters of recommendation by July 2** to: Deborah Babel, Chair, Search Committee, **Hunter Library, Western Carolina University, Cullowhee, NC 28733.** Western Carolina University is an AA, EEO employer.

Assistant librarian, Wabash College. Primarily responsible for supervising cataloging and processing, doing some original cataloging on OCLC, and maintaining the card catalog. Will be principal database searcher (DIALOG & BRS) and share reference service with other 2 librarians. Qualifications: broad, informed intellectual interests evidenced by a record of strong preparation, at least at the undergraduate level, in a liberal arts discipline. Organizational skills. MLS from ALA-accredited school. Preference will be given to candidates with appropriate work experience and/or academic preparation in social sciences or physical/life sciences. The position is effective no later than fall 1984. Salary negotiable w/min. of $18,000, initial 2-yr. appointment, associated faculty rank with all faculty privileges except tenure and sabbatical leave, good fringe benefits. **Send a letter of application, resume, and the names and telephone numbers of at least 3 references before July 1** to: Larry Frye, **Lilly Library, Wabash College, Crawfordsville, IN 47933.** Women and minorities are encouraged to apply. AA, EOE.

Assistant reference librarian. Primary "outreach" person for faculty and students. General reference desk duties. Instruct students in use of library. Develop bibliographies. Responsible for card catalog maintenance. Some night and weekend duties. MLS from ALA-accredited library school and 2 yrs.' professional academic reference experience required. Experience in library instruction required. Public relations experience preferred. Salary range $14,500–$15,500. **Send letter of intent, resume, copy of graduate transcript, and names, addresses, and telephone numbers of 3 recent references by or before July 9** to: Tony Moffeit, Chair, Search and Screen Committee, **University of Southern Colorado Library, Pueblo, CO 81001; 303-549-2751.** The University of Southern Colorado is an EEO, AA employer.

Bibliographic instruction librarian. Major responsibility is to direct and expand the library instruction program. This includes the formal instruction, self-instruction, and faculty outreach programs. Other responsibilities are to serve in a support capacity to the primary online search librarian, share in reference desk schedule (daily, evening, weekend), and collection development. Requirements: ALA-accredited MLS, science or engineering degree or significant coursework or experience, and good interpersonal and communication skills. Position available Nov. Initial screening of applications will begin July 1. Applications accepted until position is filled. Minimum salary for this classification is $15,300; however, qualified candidates displaying previous related work experience or special qualifications may negotiate a salary within the first quartile of the salary range. Please send letter of application, resume, and names of 3 references to: Lee J. Lebbin, **Library, Michigan Technological University, Houghton, MI 49931.** Michigan Technological University is an equal-opportunity educational institution/equal-opportunity employer.

Catalog librarian for either the social sciences or the humanities plus special collections cataloging (rare books and Arizona/Southwest monographs and manuscripts). Required qualifications: ALA-accredited MLS; minimum of 3 yrs. of post-MLS original cataloging experience in a research library (preferably a large academic library); working knowledge of AACR2, LCSH, and LC classification; experience with OCLC or similar utility and its practice; working knowledge of minimum of 2 Western European languages; academic background and cataloging experience in the social sciences or humanities; good communication and organization skills. Preferred: demonstrated successful supervisory and training experience and familiarity with special or archival collections cataloging. Salary: from $18,000, dependent on qualifications. **Closing date: June 30 (postmark accepted).** Send application, including statement of qualifications, current resume, and names, addresses, and telephone numbers of 4 current references to: Constance Corey, Assistant University Librarian, **Hayden Library, Arizona State University, Tempe, AZ 85287.** ASU is a committed, equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

Catalog librarian/project supervisor. The University of Arizona Library is seeking a professional librarian for a temporary, 12-mo. position. The individual will supervise the library's part of a cooperative microfilm cataloging project, adding catalog records into OCLC for books and other materials in the *Wing Short Title Catalog*. This HEA Title II-C project will be coordinated by the Indiana University Libraries and will be done in cooperation with 5 other university libraries. The project will be funded from January 1985 through December 1985. The project supervisor will be responsible for directing the University of Arizona's cataloging activities for the project, which will include training and supervising 4 paraprofessional catalogers. The project supervisor will report to the head catalog librarian. Requirements include: ALA-accredited library degree; working experience with AACR2, LCSH, and OCLC or a similar utility. Good communication skills are essential. Preference will be given to candidates with supervisory experience. Professional librarians at the University of Arizona are academic professionals and voting members of the faculty, have 12-mo. appointments, earn 22 vacation days each year, and 12 days' sick leave. The salary range is $16,500–$18,000 per year. **Send letter of application, resume, and names of 3 references by July 15** to: W. David Laird, University Librarian, **University of Arizona Library, Tucson, AZ 85721.** An equal-opportunity, affirmative-action, Title IX, Section 504 employer.

Catalog librarian (search reopened). Duties include original cataloging and editing OCLC copy in all MARC formats. MLS from ALA-accredited school required. 2–3 yrs.' experience preferred. Preference will be given to applicants with working knowledge of LC classification, AACR2, and OCLC. Familiarity with at least one European language is highly desirable. Online catalog/circulation system operational, summer 1984. 12-mo. appointment, tenure track, faculty rank commensurate with experience. Proposed effective date: Sept. Minimum salary $17,000. Excellent retirement, health, and insurance benefits. **Application deadline: July 13.** Send resume with names and addresses of 3 references to: Raymond A. Frankle, Director, **J. Murrey Atkins Library, The University of North Carolina at Charlotte, Charlotte, NC 28223.** The University of North Carolina at Charlotte is an equal-opportunity, affirmative-action employer. Women and minorities are encouraged to apply.

Cataloger position available at Unification Theological Seminary Library to catalog monographs, serials, and microforms online with OCLC; to maintain quality control of new cards; to determine and type authority records and cross references; to help file catalog cards; to assist in administrative and supervisory duties, in analysis and resolution of problems, and in the preparation of reports; and to perform occasional reference work. MLS and LC/AACR2 cataloging experience needed. $15,000/yr. + fringe benefits. For details, send resume and 3 references to: Library Director, **UTS Library, 10 Dock Rd., Barrytown, NY 12507.**

Cataloger to participate in adding the holdings of North American libraries to the international *Eighteenth-Century Short Title Catalogue* database. Qualifications: MLS; advanced degree in history or English with relevant specialization desirable; computer cataloging experience desirable. Available July 1. One-yr. position, with continuation for 3 more yrs. possible. Salary: $13,500–$16,000, depending upon qualifications. **Preference will be given to applications received before July 1.** Send applications to: Judith Singleton, **ESTC/NA, College of Arts and Sciences, Louisiana State University, Baton Rouge, LA 70803-5111.** LSU is an equal-opportunity employer.

Catalog/reference librarian. University library seeks librarian to head cataloging department which has 2 full-time assistants, 10 student assistants, and one part-time librarian. The department is engaged in retroconversion and reclassification projects using OCLC. All 8 librarians participate in reference service. ALA-accredited MLS plus cataloging experience required. Begins as soon after Aug. 15 as possible. Salary commensurate with experience: range from $17,000 to $21,000. **Send resume and letter of application by July 20** to: Charlene Hurt, Director of Library and Media Services, **Mabee Library, Washburn University, Topeka, KS 66621.** Recruitment will continue until a suitable applicant is found. Washburn University is an equal-opportunity, affirmative-action employer.

Coordinator of online searching and science reference librarian. Primary responsibility of this new position will be to develop and publicize online search services beyond current level, perform online searches, maintain records, and coordinate search procedures. Other responsibilities include acting as library liaison to natural science depts., participating in collection development for these depts., providing some bibliographic instruction, and serving at reference desk for about 12 hrs. a week, including weekends and evenings on a rotating basis. ALA-accredited MLS, and 2 yrs.' online searching and library reference experience required. Undergraduate science degree or science background strongly preferred. Experience in bibliographic instruction and faculty liaison desirable. Faculty status, tenure-track position. Salary in mid-to-upper teens. TIAA/CREF and other benefits. **Send resume and letter of application by July 13** to: Michael I. Stevenson, Reference Dept., **University Library, University of Nebraska at Omaha, Omaha, NE 68182-0237.** AA, EOE.

DIRECTOR OF LIBRARIES
TEMPLE UNIVERSITY

Temple University invites applications and nominations for the position of Director of University Libraries.

Temple University, located in Philadelphia, is part of the Commonwealth system of Higher Education of Pennsylvania. Temple enrolls some 30,000 students, including 6,000 graduate and professional students. The faculty numbers over 2,000. Bachelor's degrees are offered in 108, master's in 103 and doctorates in 79 different fields, through 14 schools and colleges.

The central library system includes the main library, four departmental libraries, and five branch libraries extended over four campuses. The holdings of the central library system include 1.4 million volumes, 10,000 serials, and 825,000 microform units. It has an operating budget of $5.3 million, professional librarian staff of 48, and a support staff of 107. Temple is a member of CRL, ARL and RLG. The Director of Temple University Libraries is the chief administrator of the central library system and reports to the Provost. The Director sits on the Council of Deans.

QUALIFICATIONS: Candidates should have a strong commitment to academic excellence, scholarship, and research, and to providing support for instruction at the graduate and undergraduate levels. An ALA-accredited MLS is highly preferred and an academic area master's or doctorate desirable. Candidates must have extensive experience in the management of research/academic libraries; demonstrated skill in planning and leadership; and evidence of continuing professional growth and scholarly activities. The candidate should have demonstrated success as an advocate within a university and with potential donors, and have knowledge of current trends and applications of library information technologies.

RESPONSIBILITIES: The successful candidate will provide leadership to the library system of a major research university; bring planning and evaluating skills to support the university's academic goals; encourage interaction between the library system, campus academic units, and alumni and professional groups; direct current library services; plan for future expansion; plan and manage the budget; implement new information technologies; assist the development office in soliciting grants and gifts from foundations and private donors; and administer library personnel.

SALARY: Open and competitive with a minimum of $50,000.

DEADLINE FOR APPLICATIONS: August 1, 1984

Applications should include a complete **curriculum vitae.** Nominations and applications should be sent to:

Search Committee for Director of Temple University Libraries
c/o Dr. Terry M. Parssinen
Office of the Provost
Temple University
Philadelphia, PA 19122

TEMPLE UNIVERSITY Equal Opportunity Employer

Engineering reference librarian/bibliographer. Responsible for the library's collection development in the area of engineering, including approval plans, firm orders, gifts, and serials. Provides service at the reference desk, including some weekend and evening hrs. Participates in an active program of library instruction and computerized database searching in engineering fields. Requires a master's degree from an ALA-accredited library school and an undergraduate degree in a pertinent science discipline or science reference experience. $15,500–$19,500 hiring range depending on qualifications plus 3-percent increase Sept. 1. Excellent benefits including choice of retirement programs. The University of Houston–University Park Libraries have 1.4 million vols., a materials budget of $2 million, and a staff of 59 professionals and 180 support staff. **To ensure consideration, applications must be received by June 30.** Send letter of application, names of 3 references, and resume to: Dana Rooks, Assistant to the Director for Administration, **University of Houston Libraries, 4800 Calhoun, Houston, TX 77004.** Equal-opportunity employer.

Head, acquisitions department. Responsibilities: administers acquisitions department; responsible for order and receipt of monographic and serial publications. Monitors expenditures, prepares statistical and other reports. Serves as liaison with bibliographers and book trade. Participates in library planning. Reports to the assistant director for technical services. Library anticipates use of Geac acquisition module. Library faculty are expected to fulfill faculty obligations in areas of contribution to the advancement of the profession and university service, as well as specific library assignments. Qualifications: MLS from an ALA-accredited library school. A minimum of 3 yrs.' experience in monographic and serials acquisitions in a medium-to-large academic or research library including 2 yrs.' successful supervisory experience. Knowledge of automated procedures, OCLC/RLIN, one or more foreign languages, book trade, and approval plans required. Skills in procedural analysis, written and oral presentations, and interpersonal relations required. Experience in automating acquisitions preferred. Salary and rank: commensurate with education and experience; salary from $21,000 depending on qualifications. **Inquiries should be received by June 20.** Send letter of application, current resume, names and addresses of 3 references to: Deborah Duchala, Library Personnel Officer, **University Library—Rm. 140, SUNY at Albany, 1400 Washington Ave., Albany, NY 12222.** SUNY at Albany is an equal-employment-opportunity, affirmative-action employer. Applications from women, minorities, and handicapped are especially welcome.

Head catalog librarian and catalog librarian (2 positions). Search extended. Available immediately. Permanent appointments with full faculty status and benefits, 12-mo. contracts, 20 days' vacation. 1) **Head catalog librarian** reports to the head of technical services. Supervises one professional and 3 support staff. Coordinates all cataloging activities including the efficient organization and management of workflow. Responsible for cataloging 10,000 titles per year using WLN. Requirements: MLS from ALA-accredited library school; 3 yrs.' cataloging experience, including supervisory responsibilities; knowledge of AACR2, LCSH, LC practice, and MARC format; reading knowledge of Romance languages; and familiarity with a bibliographic utility, preferably WLN. Minimum salary: $16,500. 2) **Catalog librarian** reports to the head catalog librarian. Responsible for the cataloging of all materials in the subject areas of theology, philosophy, and the classics using WLN. Requirements: MLS from ALA-accredited library school; knowledge of AACR2, LCSH, LC practice, and MARC format; reading knowledge of Latin and modern Romance languages; familiarity with a bibliographic utility, preferably WLN. Minimum salary $15,000. Applications will be accepted until suitable candidates are chosen. Send resume and 3 recent references to: Robert L. Burr, Director, **Crosby Library, Gonzaga University, Spokane, WA 99258.** An affirmative-action, equal-opportunity employer.

Head, library systems department. Reports directly to the associate director for technical services. Responsibilities: plan and coordinate bibliographic and administrative computing, including Data General MV8000 minicomputer for the DataPhase ALIS II system, and 10 IBM PCs for in-house administrative systems; oversee department staff (one professional and one paraprofessional); perform systems analysis and programming; develop hardware and software specifications; coordinate telecommunications requirements related to systems operations; maintain system security plans; act as liaison to automation vendors; assist library departments; develop in-house policies and documentation; act as the resource on relevant technologies; oversee the automation budget. Required qualifications include: knowledge of systems analysis methods; proven ability to write detailed programs in at least one high-level language (preferably MIIS/MUMPS); strong background in current library systems applications, including for micro- and minicomputers; proven analytical skill; ability to accomplish work within deadlines; ability to design and implement research studies, including knowledge of statistical and word analysis methods; proven supervisory and managerial skills. An ALA-accredited MLS or MS in computer or information science is required. Knowledge of the MARC formats, OCLC, and ALIS are preferred. Environment: university library services serves the 20,000 students on both the academic and medical campuses. The bibliographic database contains over 360,000 records, and the 1984/85 acquisitions budget will be approximately $1.8 million. The DataPhase system is now used for circulation and acquisitions; plans are underway for the online catalog, and authority and serials control. Microcomputers are used for word processing, statistics, budgeting, online database searching, and general administrative computing. Salary: $20,000–$30,000 per year, depending on qualifications. **Application deadline: July 15.** Interested candidates should submit a resume and the names of 3 current references to: Arnold Hirshon, Associate Director for Technical Services, **Cabell Library, Virginia Commonwealth University, 901 Park Ave., Richmond, VA 23834.** A complete job description is available upon request or application. Virginia Commonwealth University is an equal-opportunity, affirmative-action employer.

Head, map room, Hatcher Graduate Library. Administers the map room collection; is responsible for cartographic collection development in the graduate library, a broad range of services including reference, instructional, and consultative to a diverse population of users from the university, local community, and research community; and for the hiring, training, supervision, and evaluation of the map room staff. Qualifications required: accredited MLS, undergraduate courses in geography and cartography, substantial work experience in an academic or research library, demonstrated supervisory and interpersonal skills; working knowledge of 2 or more European languages. Desirable: undergraduate degree in geography or cartography, experience with standard LC/AACR2 cataloging practices and database searching. Salary dependent on directly relevant experience with a minimum of $18,000. **Applications received by June 30 will be given first consideration.** Apply to: **Library Personnel Office, 404 Hatcher Graduate Library, University of Michigan, Ann Arbor, MI 48109.** The University of Michigan is a nondiscriminatory, affirmative-action employer.

Head, monograph cataloging and classification unit. University of Cincinnati Libraries. Responsible for organizing and supervising the work of the monograph cataloging and classification unit of the central processing catalog department, for formulating policies and coordinating monograph cataloging done by members of other units, and for some original

cataloging. Reports to the head of the catalog department. Supervises librarians, support staff, and students assigned to the monograph cataloging unit and coordinates procedures for monograph cataloging done by staff in other units (includes all MARC formats except serials). May act as head of the department when the latter is absent. Plans are underway to automate the cataloging and circulation functions of the libraries. Specific responsibilities of staff may change as a result of automation. Qualifications: master's degree in library science from an ALA-accredited program. Minimum of 3 yrs.' cataloging experience using *Anglo-American Cataloguing Rules*, Library of Congress classification schedules and subject headings; including 2 yrs.' experience working with the OCLC system. Demonstrated supervisory and leadership ability. Demonstrated ability to communicate clearly, both orally and in writing. Demonstrated ability to work with other library staff at the support and unit/department head level. Reading knowledge of one or more foreign languages. Experience or demonstrable interest in assisting the public in the use of bibliographic records. Minimum salary: $16,615. **Send resume with cover letter and names of 3 references, postmarked by July 15,** to: Sharon Tuffendsam, Libraries Personnel Officer, **University of Cincinnati, Cincinnati, OH 45221-0033.** The University of Cincinnati is an affirmative-action, equal-opportunity employer.

Head of serials section. Responsible for serials control, including check-in, claiming, binding, government documents, union list reports, and invoices; performs periodical cataloging; minimal reference desk duty as assigned. Knowledge of OCLC preferred. Familiarity with foreign languages desirable. Supervision of 1.2 FTE staff plus student assistants. Qualifications: MLS and 2 yrs.' professional experience working with serials, including serials cataloging. Salary $19,000–$20,500, TIAA/CREF and usual fringe benefits; 12-mo. trustee appointment. **Send resume and names of 3 references by July 16** to: Willis E. Bridegam, Librarian, **Amherst College Library, Amherst, MA 01002.** Also interviewing at ALA June 23–25. EOE, M/F/H, AA.

Librarian/archivist. Fort Lewis College, Durango, Colo. Full-time, 12-mo., instruction appointment. Librarian with archival training to maintain a collection of materials on the Southwest, including historical records and archives. Responsibilities include providing reference service to students and scholars, collection development for Southwest studies and related areas, liaison work with individuals and agencies, and supervising student assistants. Required qualifications: master's or higher degree from ALA-accredited library school; academic training in Southwestern history or a related area; archival training or experience; ability to communicate effectively with small, closely knit library staff. Preferred qualifications: knowledge of Spanish; graduate studies in history, archaeology, or anthropology; reference experience. Position available Sept. 1. Salary $15,000–$16,000 for a 12-mo. appointment. 20 days' vacation, 12 holidays, state retirement, and other fringe benefits. Fort Lewis College is a state-supported, undergraduate, liberal arts college with 3,700 students located in a town of 12,000 population at 6,500 ft. elevation in the San Juan Mountains of southwestern Colo. **Submit letter of application, resume, and names of 3 references, postmarked no later than July 7,** to: Daniel W. Lester, Director of the Library, **Fort Lewis College, Durango, CO 81301.**

Librarian, assistant head of catalog and head of system cataloging and catalog maintenance, University of Rochester. Available immediately to supervise new unit created as part of catalog reorganization. Responsibilities include providing cataloging records for monographic titles with available LC or member copy on the OCLC system and for added copies and volumes; correcting and updating cataloging records in the library's card and online catalogs; and converting card records to machine-readable form. The individual in this position will plan and direct the work of the unit reporting directly to the head of the catalog department and working closely with the assistant department head for original cataloging. Unit staff numbers 8.5 FTE. Evaluate staff performance and advise the department head on staffing and other personnel matters; train unit staff in the use of appropriate standard cataloging and classification rules; develop, analyze, and implement organizational and procedural systems for the unit; develop and maintain unit production standards; participate in department and division planning, budgeting, and policy-making processes; supervise retrospective conversion project. Qualifications: MLS + minimum 4 yrs.' supervisory experience in a cataloging or conversion unit, preferably in a research library; experience in original and copy cataloging; knowledge of LC subject headings and classification, AACR2, and MARC; OCLC experience; proven communications, training, analytical skills, and ability to provide creative solutions to problems; ability to develop plans and to work effectively in a continuously changing environment as a member of a professional team. The University of Rochester Library is presently using OCLC and is implementing Geac online catalog and circulation systems. Approximately 50 percent of the library's titles will be on the Geac system by the end of 1984. Salary: $24,000+ depending on qualifications and experience. Send application with detailed resume and names of 3 references to: Ruth M. Susat, Administrative Assistant to the Director of Libraries, **University of Rochester Libraries, Rochester, NY 14627.** Equal-opportunity employer, M/F.

Librarian. Johnson County Community College, a comprehensive community college in suburban Kansas City with an enrollment of 8,000, seeks an experienced librarian. The library has more than 50,000 vols. and is on an automated circulation system. The library is part of a comprehensive educational media center which includes AV, photography, graphics, and TV depts. In addition to supervising the activities associated with the acquisition, cataloging, and processing of library materials, the person selected will provide some reference service. Requirements include an MLS from ALA-accredited school and 3 yrs.' professional experience. Cataloging experience using LC classification schedules, MARC formats, and AACR2, and experience with automated library applications are preferred. $21,860 minimum for 12 mos., outstanding benefits. Available Aug. 15. **Application deadline June 29.** To apply, contact the: **Personnel Office, Johnson County Community College, 12345 College at Quivira, Overland Park, KS 66210-1299; 913-541-3877.** An equal-opportunity employer.

Librarian, reference. Position in liberal arts college library. Duties include reference service to faculty and students, library instruction, online searching, and collection development. Major responsibility for management of interlibrary loan service. MLS from ALA-accredited school required; reference experience desired. Good communications and interpersonal skills essential. Salary: $15,000–$16,000. Faculty rank; one mo.'s vacation; TIAA/CREF and good benefits. **Apply by June 15.** Send resume and names of 3 references to: Paul W. Crumlish, Librarian, **Hobart and William Smith Colleges, Geneva, NY 14456.**

Library automation coordinator. Responsible for providing technical expertise in evaluating the library's requirements for automation and, thereafter, in planning, coordinating, and implementing a comprehensive automated library system. Qualifications: experience with automated library systems essential, and a familiarity with programming, system design and organization, and telecommunications desirable; ALA-accredited MLS or degree in computer science; problem-solving and communication skills; ability to work well with all levels of staff. Faculty rank on a tenure track. Salary: $19,500 minimum and fringe benefits. **Deadline: July 1.** Send letter of application, resume with a description of experience in library automation, and 3 letters of reference to: Director's Office, **Olson Library, Northern Michigan University, Marquette, MI 49855.** NMU is an EO, AA employer.

Library cataloger. In cooperation with other professionals in the unit, be responsible for the cataloging of materials in a variety of formats with special emphasis on serials. Also will be expected to take charge of special projects as appropriate. Should be familiar with OCLC, the use of a variety of computing equipment, and AACR2 serials authority work. MLS required, with second master's desirable. Salary: $18,000–$21,900. Faculty rank and status. **Send resume and the names, addresses, and phone numbers of 3 references by June 30** to: Patricia A. Goheen, **Western Illinois University Library, Macomb, IL 61455.** WIU is an equal-opportunity, affirmative-action employer.

Media specialist. Experience in material evaluation/selection, database searching, OCLC (optional), and media production skills at secondary or junior college level. MLS and/or educational media degree required. Base salary $15,500. 12-mo. nontenured position beginning July 1. **Send resume including current detailed job description, letter of application, and references by July 13** to: LTC M. B. McLaren, Director, **Toles Learning Center, New Mexico Military Institute, Roswell, NM 88201.** No phone calls please. AA, EOE.

Public services librarians. IIT, a private, medium-sized, coeducational university, is expanding its library services and collections as a result of the departure of the John Crerar Library from campus. The amount of available space in the main university library will triple, and the collections and staff will double in the

Positions Open continued on p. 413.

Assistant Reference/Cataloging Librarian

GENERAL RESPONSIBILITIES: under the direction of the director of the Learning Resources Center, assists the public services librarian and the technical services librarian half-time each in reference and circulation and retrospective conversion on OCLC. *DUTIES:* 1) Provides reference and bibliographic services to students and faculty. 2) Provides orientation programs in use of resources by students and faculty. 3) Performs assigned duties during night and weekend library hours as required. 4) Prepares card catalog for retrospective conversion using AACR2 utilizing OCLC.

QUALIFICATIONS: 1) ALA-accredited MLS degree required. 2) Familiarity with OCLC, AACR2, and/or other automated systems. 3) Demonstrated ability to work with a wide range of people. 4) Library experience preferred. 5) Commitment to community college philosophy.

SALARY RANGE: commensurate with education and experience; $22,000–$28,000. Target date for employment: Aug. 20. **Deadline for applications: June 30.**

APPLICATION PROCEDURE: letter of application, current resume, and 3 references should be forwarded to: **Personnel Office, Clark County Community College, 3200 E. Cheyenne Ave., North Las Vegas, NV 89030.** Official college transcripts will be requested of finalists at a later date.

An affirmative-action, equal-opportunity employer

Data Phase Today

TODAY, DATA PHASE GIVES YOU A SUPERIOR APPROACH TO LIBRARY AUTOMATION.

See us at ALA. Booth 967.

Today, Data Phase's turnkey approach to integrated library automation gives you solutions that are sensitive to your library's special needs and systems that serve your priorities and goals.

Data Phase's Tandem and Data General computers give you a firm foundation on which to build. Your hardware is configured to respect your budgetary requirements and support your needs.

Data Phase gives you the most innovative software available. Software that gives you infinitely more reliability and capabilities for greater access to your library's information.

Data Phase offers you the most comprehensive customer support programs. Library consulting and staff training help you implement your system smoothly and learn its capabilities quickly. And, system support is specifically designed to give you maximum uptime and access.

With a total commitment to meeting the needs of the library community, we are designing turnkey programs of exceptional quality — from the products we offer to the services that support them.

Data Phase automated systems offer the most functionality in the most cost-effective solutions available today, with the assurance that they won't be obsolete tomorrow.

A

"WE'VE ACHIEVED A REMARKABLE 98.13% 'UPTIME' WITH OUR DATA PHASE SYSTEM."

"WE WERE OVERWHELMED WHEN OUR ALIS SYSTEM TURNED OUT TO BE 10 TIMES FASTER THAN OUR PREVIOUS MANUAL SYSTEM IN CHARGING AND DISCHARGING MATERIALS," says Joe Jax, Library Director at the University of Wisconsin-Stout. "Even though we originally anticipated it being twice as fast."

System speed and efficiency aren't the only things that have the University's library officials pleased these days. Joe says the system's verified, high uptime of 98.13% has also been a key element in making their library one of the most innovative in academic circles.

Within a record six months of signing their contract with Data Phase, the University was accessing its library collection online and was circulating materials two months later. Joe attributes the training support provided by Data Phase and Stout's previous library automation expertise to helping them meet that implementation schedule.

"Training was very efficient and easy to understand," he says. "With it, we didn't have to rely on trial and error to learn our system. We received the software releases in advance, had time to study them, and then our Data Phase Consultant came on site to provide training and answer any questions."

"OUR FIELD SERVICE HAS BEEN ABSOLUTELY WONDERFUL," says Cate Dixon, project director at New Orleans Public Library. She's referring to the hardware support provided by Data General for the library's Data Phase system. (The hardware in all Data Phase systems is serviced by the hardware manufacturer itself.)

"We have never had a delay in service," Cate says. "And, they have really become an integral part of our staff. They know our library, our computer, and our system. They are really concerned about keeping our system up all of the time."

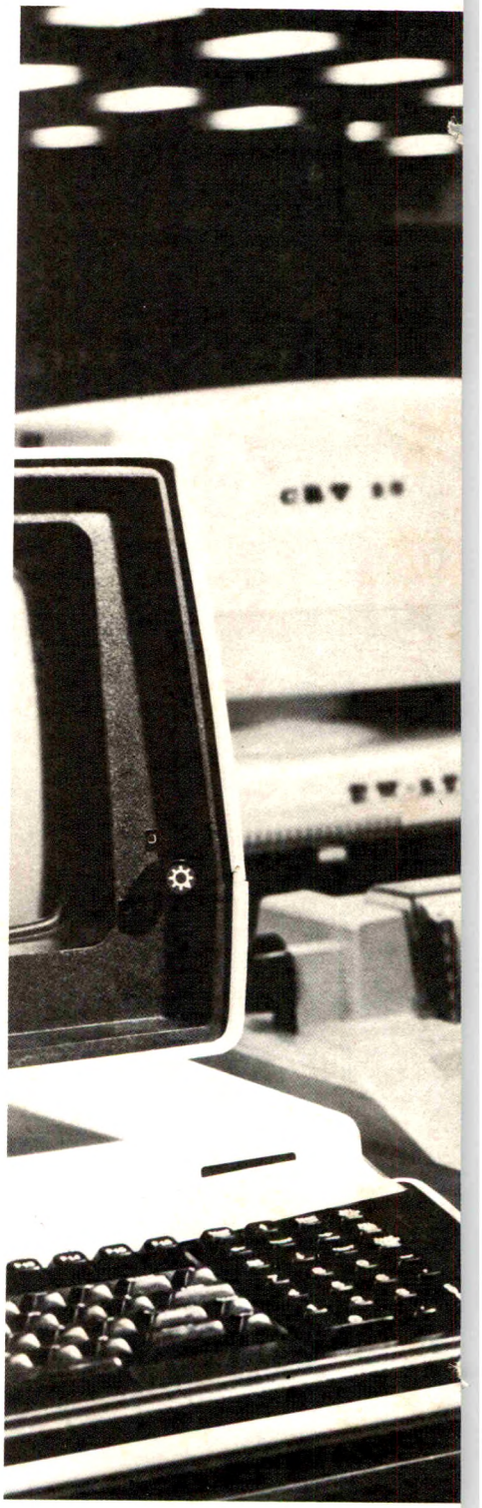
"Even with our upgrade (the library recently added a bigger computer), they kept the system running. They were here, making sure everything went smoothly, morning, noon, and night."

"WITH ONE OF THE HIGHEST CIRCULATIONS PER CAPITA, WE'RE RELYING ON DATA PHASE TO HELP US MEET THE GROWING NEEDS OF OUR COMMUNITY," says Mary Johnson, project director at the Orange County Public Library (California). "We want to provide our patrons with the best service possible. We're depending on the ALIS system to provide them with almost instantaneous information on materials status."

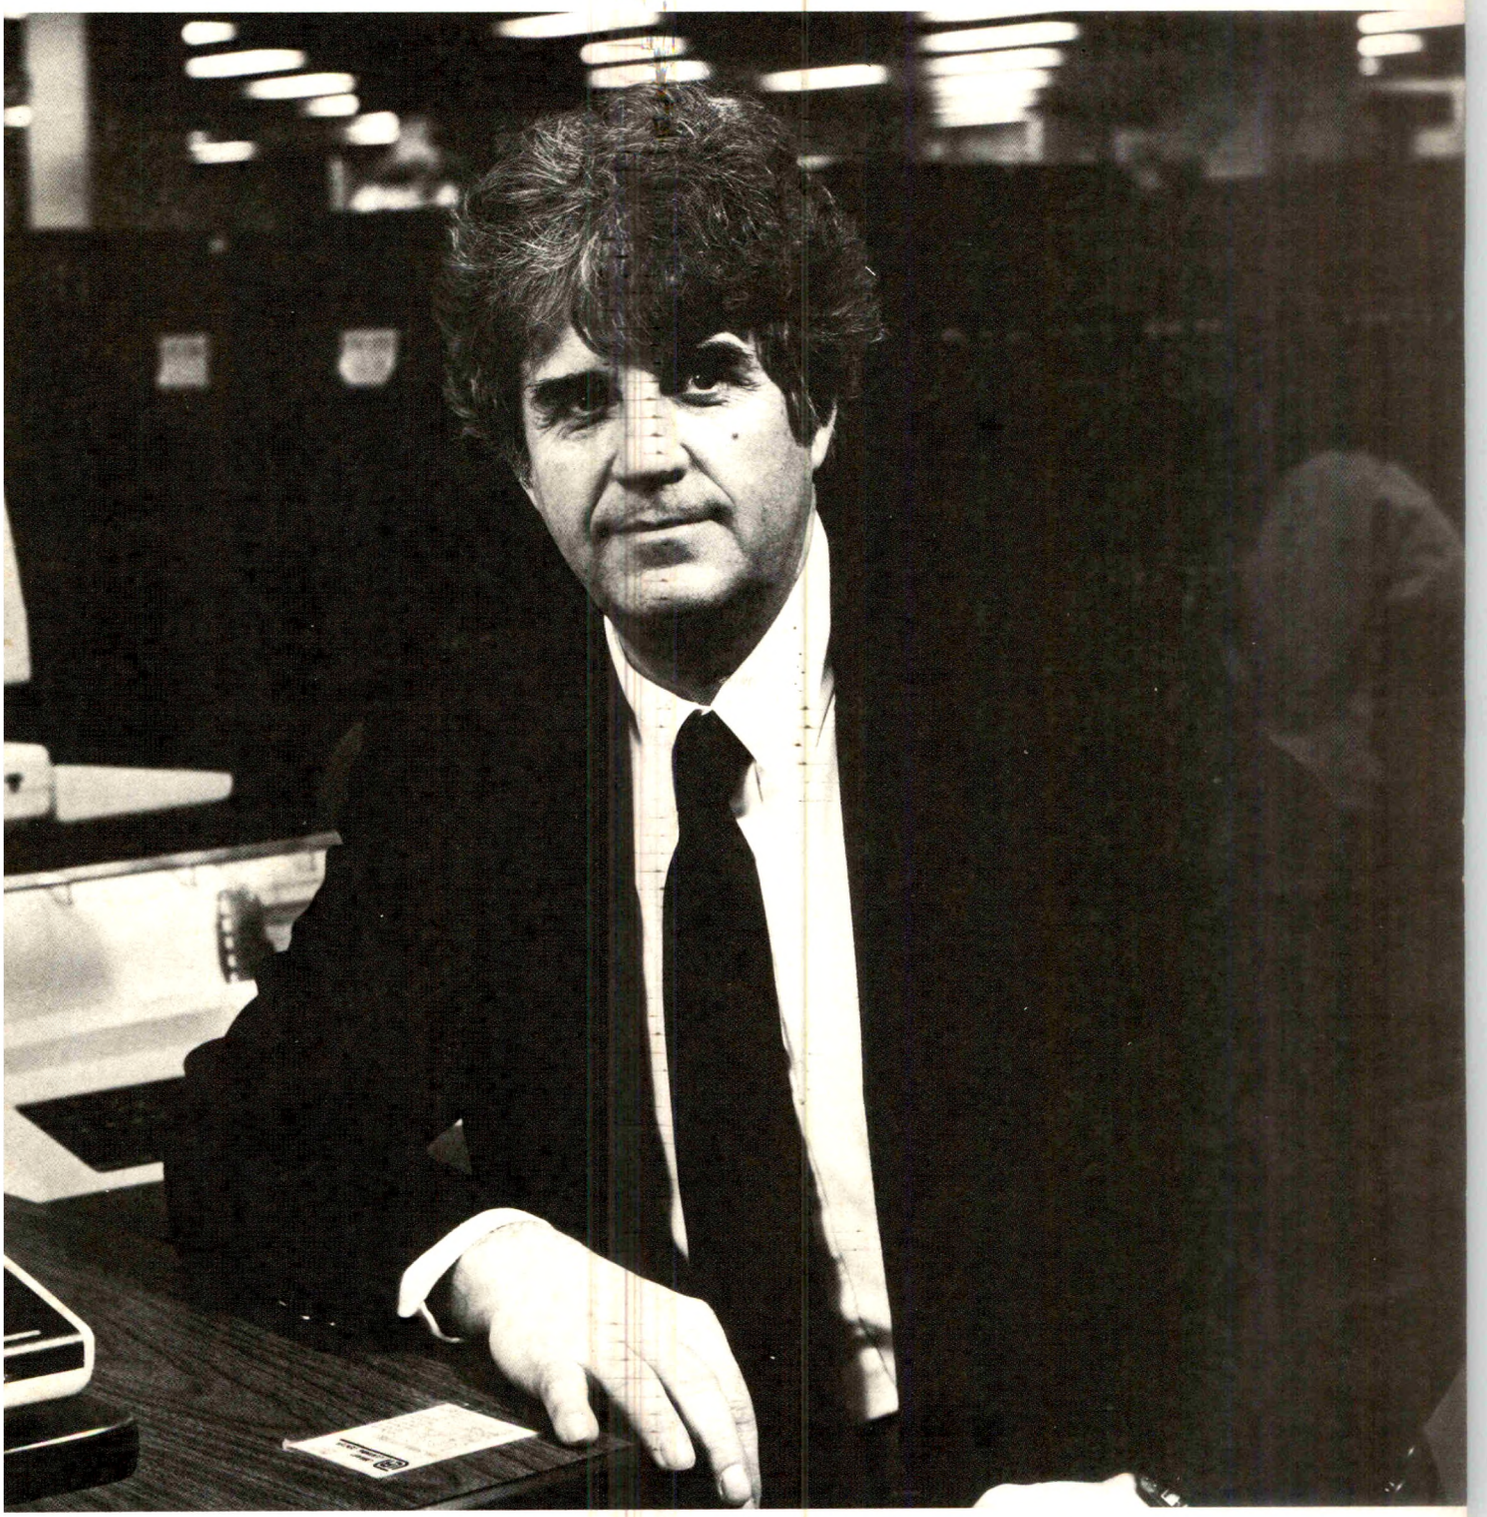
According to Mary, the Data Phase support system has played a major role in helping them work toward their goals.

"It's good to be able to depend on our Data Phase Consultant to help us make decisions. She is great at getting answers for us and serves as a direct link between the Data Phase technical staff and our library."

"The 24-hour systems support desk has also been very helpful," Mary adds. "Especially when I need help after hours and on weekends."



"WHEN WE BEGAN OUR AUTOMATION PROCESS IN 1981," says Sallie Foster, project director at Arizona State University, "we knew our system had to respond to a lot of demands. We needed to be able to expand. And, we wanted to interface with other university systems."



Sallie says they chose the Data Phase system that utilizes Tandem hardware because, "having such a sophisticated hardware option in a system where the software so appropriately met our needs made it a natural choice."

"We have already utilized our Data Phase circulation module in the ways we had planned," Sallie continues. "Currently our patron records are loaded from the registrar and payroll system, so we don't even have to do any data entry. And soon, we'll be extracting fine and billing information to our central accounts receivable system so that the library doesn't have to collect fines. In addition, we're looking forward to bringing up the patron access catalog this fall."

"We have excellent uptime and response time," says Sallie. "I am indeed pleased."

Data Phase Today

DATA PHASE CUSTOMER SUPPORT IS THE MOST COMPREHENSIVE IN THE LIBRARY AUTOMATION INDUSTRY.

HERE'S WHY.

DATA PHASE LIBRARY SYSTEMS PROVIDE LIBRARIES WITH THE MOST COMPREHENSIVE CAPABILITIES AVAILABLE.

Data Phase's Customer Service Program is designed to help you get the most out of those capabilities. It is based on three objectives. To help you implement your system smoothly. To provide you with the skills to utilize your system as fully as possible. And, to maximize your system uptime.

Data Phase's customer support is tailored to your library's needs. Because we feel generic customer support programs are not really useful or effective.

YOUR DATA PHASE CONSULTANT IS WITH YOU EVERY STEP OF THE WAY.

Your Data Phase Library Systems Consultant is a library automation expert and problem solver who becomes an integral member of your project management team.

A constant resource to your staff, your consultant works with you to plan all facets of your system implementation, conversion, and training.

DATA PHASE TRAINING PROGRAMS ARE FOCUSED ON YOUR STAFF'S NEEDS.

All user training is designed to maximize your own expertise and thoroughly prepare each member of your staff to utilize the system according to their needs.

Different levels of training allow your library's staff to develop a full working knowledge of the system.

DATA PHASE IS THE ONLY LIBRARY SYSTEMS VENDOR TO PROVIDE 24-HOUR, 7-DAY-A-WEEK DIALUP SOFTWARE SUPPORT.

Data Phase's 24-hour-a-day, 7-day-a-week dialup software support means immediate response to any software questions or problems you may have.

Most problems can be resolved over the phone. Those that can't be are thoroughly diagnosed before onsite maintenance begins.

DATA PHASE'S USE OF UNMODIFIED HARDWARE MEANS YOUR COMPUTER CAN BE SERVICED BY THE MANUFACTURER'S OWN SERVICE ENGINEERS.

Because Data Phase utilizes only unmodified Tandem and Data General hardware, your computer can be serviced immediately by their technicians.

Both companies are widely known for the quality of their service support. A call to Data Phase's 24-hour systems support desk allows us to coordinate any maintenance with hundreds of engineering offices located throughout the country.

DATA PHASE CUSTOMER SUPPORT DOESN'T END WHEN YOUR SYSTEM IS UP AND RUNNING.

In partnership with you, Data Phase helps you respond to your library's evolving needs before, during, and after your system is up and running.

Our continuing support is part of our total commitment to providing the library automation industry with leading-edge technology and the programs to support that technology.

It's a commitment that has created the most comprehensive and effective customer support program available today.

Positions Open continued from p. 411.

foreseeable future. In August we will need a **reference librarian,** a **reference/interlibrary loan librarian,** and a **documents librarian.** We are looking for individuals who can tolerate ambiguity and respond to the challenge of helping to shape the services needed by students and faculty in a high-tech curriculum and research center. Requirements include an ALA-accredited degree; knowledge of current theory and practice of public services and collection development in academic and research libraries; skill in communicating orally and in writing, in analyzing problems, in negotiating questions, and in carrying out complex search strategies. Salary depends on qualifications with the range beginning in upper teens. **To ensure consideration, send a letter of application, resume, and arrange for us to receive a placement file or 3 letters of reference by July 1.** Apply to: Susan Guziak, **Illinois Institute of Technology, 3300 S. Federal, Chicago, IL 60616.**

Reference/education librarian. Under the general direction of the head, reference division, serves as reference/education librarian, providing reference and information services and participating in collection development with special emphasis on education. Supervises the Curriculum Materials Section, providing management and policy guidance, developing programs and services, hiring and training personnel, selecting and purchasing materials, and participating in service programs. The Curriculum Materials Section holds over 51,000 vols., including a children's literature collection (26,000 vols.) and curriculum material for K-12 (textbooks, tests, and games). MLS degree from an ALA-accredited school of librarianship required. 2 yrs.' post-MLS reference experience in a large academic library required. Experience with selection of education-related materials and in computer-based reference service preferred. Experience in user education and knowledge of one or more foreign languages desirable. Salary: $19,000 minimum. 24 days' vacation, TIAA/CREF, premiums fully paid for medical, dental, and life insurance plans. **Applications must be received no later than 5 pm, Friday, July 6.** Send letter of application, resume, salary requirements, and name of 3 references to: Charles E. Chamberlin, Head, Personnel and Administrative Services, **University of Washington Libraries, FM-25, Seattle, WA 98195.** AA, EOE.

Reference librarian/bibliographer, Rare Book and Manuscript Library, and curator, Herbert H. Lehman Suite and Papers. Responsible for administering the operations of the Lehman Suite and Papers, including providing general and in-depth reference service for the suite and the Rare Book and Manuscript Library reference center; processing, describing, and cataloging manuscript collections and archives for the suite and manuscript department; inputting data into the RLIN database; keeping all records necessary for the suite's use; maintaining and developing the collections of the suite by gift; supervising the Lehman Suite assistant and the general assistants; assisting on special projects of the Rare Book and Manuscript Library. In addition to an accredited MLS, the position requires a knowledge of and experience in manuscript and archival management techniques and skills as demonstrated by previous relevant experience and/or superior performance in a formal

course. Also highly desirable are knowledge of historical, social science, and literary research methods; knowledge of reference sources, tools, and techniques in rare books and manuscripts; and effective writing and speaking skills. Preferential consideration will be given to applicants with a reading knowledge of French, German, and Latin; and a graduate degree in American history or literature, or other relevant degree. Salary ranges (through June 30) are: Librarian I, $18,000–$23,400; Librarian II, $20,000–$26,000. **Deadline for applications is July 6.** Submit resume, listing 3 references and salary requirements, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** An equal-opportunity, affirmative-action employer.

Reference librarian for sciences. Faculty position. Requires an ALA-accredited MLS and academic training in biology or chemistry or substantive science reference experience. Online searching experience and at least one yr.'s experience in an academic library preferred. Salary minimum $15,000. **Send letter of application, resume, and names of 3 references by July 1** to: Tim Byrne, Chair, Search Committee, **Virginia Commonwealth University, James Branch Cabell Library, Richmond, VA 23284-0001.** Virginia Commonwealth University is an affirmative-action, equal-opportunity employer.

Reference librarian/instructor. Faculty position with 12-mo. contract (4 weeks' vacation), TIAA/CREF, and other benefits. Duties: teaching in library science dept. as well as responsibilities in reference, circulation, and collection development. Some night and weekend work. Qualifications: MLS from accredited school and ability to work well with students, faculty, staff required. Experience in teaching and reference work—especially database searching—preferred, though **entry-level** applicants will be considered. Salary: $15,000–$20,000, depending on qualifications. Position available immediately. Send resume, transcript, and references to: Ben F. Crutchfield, Dir. of Library Services, **West Virginia Wesleyan College, Buckhannon, WV 26201.** An EO, AA employer.

Reference librarian/interlibrary loan librarian. Instructor level. Full participant in reference services, incl. reference desk, database search, and BI. Shares evenings/weekends with 5 other professionals. Will manage ILL service, using OCLC-ILL subsystem and state ILL network. ALA-accredited MLS, database experience/coursework, and ILL experience required. Academic library experience and fine arts or soc. sci. background preferred. Salary $19,000 (11 mos.). TIAA/CREF and full benefits. Position available on or before Oct. 1. **Send resumes by July 13** to: George Parks, University Librarian, **Colgate University, Hamilton, NY 13346.** AA, EOE.

Reference librarian (life sciences). In addition to traditional reference duties, incumbent will provide in-depth reference and consultation service, perform online searches, maintain and develop BI classes, and be responsible for collection development in the biological and life sciences. Qualifications: ALA-accredited MLS. MS in a life science and minimum of 2 yrs.' experience desirable. Benefits: faculty status (12-mo. appointment). Salary range $19,000 to mid-$20s depending on qualifications. **Application: send letter of application, resume, and names of 3 references by June 30** to: Kenneth R. Murr, Chair, Reference Librarian Search Committee, **R. M. Cooper Library, Clemson University, Clemson, SC 29631.** Clemson University is an equal-opportunity, affirmative-action employer.

Reference librarian. Provides reference services and bibliographic instruction and performs online bibliographic searches. Has supervisory, training, and budgetary responsibility for the information desk and reference department student assistants. Directly supervises approximately 12 undergraduate and graduate student assistants. Qualifications: MLS from an accredited library school required; other advanced degree and supervisory experience desirable. Training in online searching or other computer background highly desirable. Good communication and supervisory skills and the ability to work effectively with colleagues and library users. Salary: $16,000–$18,000. **Applications received by June 29 will be considered.** Send letter of application and resume, including names of 3 references, to: Lance Query, Director of Library Research, Analysis, and Personnel, **Northwestern University Library, Evanston, IL 60201.** An EO, AA employer.

Reference librarian, Undergraduate Library. Responsible for reference desk services; library instruction; collection development; and faculty liaison. ALA-accredited MLS, or equivalent, required; reference experience preferred; library instruction and database searching experience desirable; ability to relate well with undergraduate students; effective communication skills. Tenure-track position. 12-mo. appointment, 24 days' annual leave, tuition remission, usual benefits. Salary: $16,000 minimum. **Send letter of application, current resume, and the names, addresses, and telephone numbers of 3 recent references by July 20** to: Jill Kedly, Personnel Librarian, **The University of Tennessee Library, Knoxville, TN 37996-1000.** UTK is an EEO, affirmative-action, Title IX, Section 504 employer.

Reference librarian with special responsibilities in business reference. Appointment for one year only, Sept. 1984–Aug. 1985. Duties: general and government documents reference, collection development, library instruction, online database searching. Required: ALA-accredited MLS or equivalent; significant reference experience, preferably in academic/research library. Preferred: subject master's or doctorate; degree in business-related field; experience in business reference online database searching, library instruction. Academic staff. Salary from $17,200 dependent upon qualifications. 22 days' vacation. **Send application letter, vita, and names of 3 references by June 30** to: Tina C. Fu, Assistant Director for Public Services, **Libraries and Learning Resources, University of Wisconsin/Oshkosh, Oshkosh, WI 54901.** Request references to send letters direct. An EO, AAE.

Reference librarians, 2 positions at Central Michigan University, serving 16,000 students and 600 faculty, report to the coordinator of public services. Responsibilities: general reference service at the library's main reference desk. This involves online searching and the use of public service OCLC terminals. Emphasis on bibliographic instruction, including the teaching of at least one section of a course on the use of the library. May serve as subject bibliographer with responsibilities for collection building and faculty liaison in an area of specialty. Scheduling includes flexible work hours with some night and weekend assignments. Required: ALA-accredited MLS degree. Desirable: second master's degree and/or appropriate subject background in English, communication, or education. These are 10-mo., tenure-track, faculty positions. Reappointment and promotion dependent upon meeting university criteria based on professional, scholarly, and creative activity. 2-semester salary is negotiable according to qualifications and experience: at least $16,000 at instructor level and $18,000 at assistant professor level. Opportunity for additional summer employment exists. **Application must be postmarked no later than Aug. 17.** Submit application, resume, and the names and addresses of 3 references to: Chair, Selection Committee, **Central Michigan University, POB 2067, Mt. Pleasant, MI 48858.** CMU is an affirmative-action and equal-opportunity institution.

Science-engineering reference librarian (new position). The University of Arizona is seeking a professional librarian to fill a position with responsibilities in the Science-Engineering Library and in the catalog department. The person filling this position will be responsible for providing reference service, conducting online searches, and cataloging monographs in the science subject areas. The Science-Engineering Library is a separate branch covering all fields of science/engineering technology and has a staff of 7 reference librarians and 7 career staff. Services offered include reference, online searching, and an active bibliographic instruction program. The catalog department is one of 4 departments within the technical services division and employs 11 professional catalogers and 44 career staff. The library system uses the LC classification, LCSH, and AACR2, and is a member of AMIGOS. Applicants for this position must have an ALA-accredited degree and either an academic background in the sciences or experience in an academic or special science library. Candidates with experience in reference, online searching, or cataloging will be preferred. Working knowledge of German or Russian is desirable. The beginning professional salary is $16,500; a higher salary can be negotiated depending upon qualifications and experience. Professional librarians at the University of Arizona are academic professionals and voting members of the faculty, have 12-mo. appointments, earn 22 days of vacation per year, and 12 days of sick leave. The position is available July 30. **Deadline for application is July 15.** Send letter of application, resume, and the names of 3 referees to: W. David Laird, University Librarian, **University of Arizona Library, Tucson, AZ 85721.** An equal-opportunity, affirmative-action, Title IX, Section 504 employer.

Science reference librarian, assistant librarian, University of California, Santa Cruz. Provides reference service in the sciences, participates in bibliographic instruction, coordinates online bibliographic search services in the sciences. Qualifications: graduate degree in librarianship; prefer one yr.'s professional reference experience in an academic or research library, training and experience in online searching, degree or equivalent in the sciences. Salary: $18,836–$23,844. Position available Sept. 17. **Send resume and 3 references by June 29** to: Katherine Beiers, Assistant University Librarian—Personnel, **University Library, University of California, Santa Cruz, CA 95064.** Equal-opportunity, affirmative-action employer.

Science reference librarian/bibliographer. Provides service at the reference desk, including some weekend and evening hours. Responsible for collection development, user education, and computerized database searching in chemistry and/or geology, and related physical science areas. Requires a master's degree from an ALA-accredited library school and an undergraduate degree in a pertinent science discipline or professional reference experience. $15,500–$19,500 hiring range depending on qualifications plus 3-percent increase Sept. 1. Excellent benefits including choice of retirement programs. The University of Houston–University Park Libraries have 1.4 million volumes, a materials budget of $2 million, and a staff of 59 professionals and 180 support staff. **To ensure consideration, applications must be received by June 30.** Send letter of application, names of 3 references, and resume to: Dana Rooks, Assistant to the Director for Administration, **University of Houston Libraries, 4800 Calhoun, Houston, TX 77004.** Equal-opportunity employer.

Serials cataloger. Cleveland State University seeks qualified individual for serials cataloger at assistant or associate librarian level. Position available Oct. 1. Duties include cataloging and classification of serials; responsibility for *Serials Holdings List;* supervision of 1.6 FTE. Minimum qualifications: MLS from accredited ALA program; demonstrated interest in and aptitude for serials cataloging. Preferred: recent experience in cataloging serials; experience with serials automation; supervisory experience; ability to relate serials cataloging to other technical processes and user needs. Salary: $16,000–$24,000, dependent upon qualifications. **Send letter of application,**

resume, and 3 letters of recommendation by July 13 to: George Lupone, Chair, Search Committee, **Cleveland State University Libraries, 1983 E. 24th St., Cleveland, OH 44115.** Equal-opportunity employer, M/F/H

Serials cataloger. Performs new cataloging, recataloging, and classification of serials at all levels of difficulty for Northwestern's automated system, NOTIS, using the Dewey Decimal Classification, Library of Congress Subject Headings, and the Anglo-American Cataloguing Rules. Functions as liaison to catalog management section of the catalog dept. and assists the senior serials cataloger with problem solving and other difficult work of the serials catalog section. Qualifications: MLS from an accredited library school; working knowledge of 2 or more languages, preferably including French and German; ability to catalog in unfamiliar languages using a dictionary. Serials cataloging experience in an automated system using the MARC serials and authorities formats preferred. Salary: $16,000–$18,000. **Applications received by July 15 will be considered.** Send letter of application and resume, including names of 3 references, to: Lance Query, Director of Library Research, Analysis, and Personnel, **Northwestern University Library, Evanston, IL 60201.** Northwestern University Library is an AA, EO employer.

Louisiana Tech is an affirmative-action, equal-opportunity employer.

University of Washington Libraries
Associate Director of Libraries, Branch Libraries

The associate director of libraries, branch libraries, reports to the director of libraries and is responsible for the policy and program development and for the overall administration of operations and personnel matters in the 17 branch libraries and the resource sharing program; for the close coordination of those policies and procedures with administrators responsible for Suzzallo public services, the Undergraduate Library, and the Health Sciences Library to form a consistent, uniform set of policies for public services in the libraries; for coordination with bibliographic control; for contributing to the administration and management of the libraries; for occasional additional major administrative responsibilities; and such other areas as may be assigned in the future.

Qualifications: a degree in librarianship from an ALA-accredited school of librarianship required. At least 10 yrs. of library experience with 5 yrs. in progressively important administrative positions in public services or other applicable areas in a decentralized academic library system. Experience as the head of a large branch library desirable. Knowledge of current public service issues and problems on the national level as well as those specific to academic libraries. Demonstrated knowledge of library administration and management techniques; record of successful accomplishment in management and/or administrative positions, understanding of service needs of an academic community; energy and creativity to actively pursue solutions to current public service problems in academic libraries; ability to foster cooperative attitudes within the group of units managed and between those units and units managed by other members of the director's staff; ability to conduct studies falling within the scope of this position. Superior communication skills are required.

Salary: $40,000 minimum. Commensurate with qualifications and experience. 24 days' vacation, TIAA/CREF, premium fully paid for medical, dental, and life insurance plan.

To ensure consideration, applications must be received no later than 5:00 pm, Friday, July 6. Send letter of application, resume, names of 4 references, and salary requirements to: **Charles E. Chamberlin, Head, Personnel and Administrative Services, University of Washington Libraries, FM-25, Seattle, WA 98195.**

CORPORATE LIBRARY

Architectural information manager. We can offer you a superb opportunity to combine a top-notch professional position with an out-

standing living environment. We are an expanding, fast-paced architectural/engineering firm in North Carolina's Research Triangle area (Raleigh/Durham/Chapel Hill). Our information needs range from sophisticated research for our designers and marketers, to the development of indexing and filing systems. We require new and updated systems to organize and store correspondence, books and periodicals, slides and photographs, specifications, materials and samples, product literature, project information, and audiovisual equipment. Clerical personnel assist in maintaining the systems. We are searching for someone familiar with basic computer operations and information retrieval with the ability to analyze as well as locate data. If you have an MLS or can bring enough knowledge and experience to the job to organize and manage our entire information function, we would like to talk to you. Salary range $14,000–$16,000. Send us your resume: **POB 12037, Research Triangle Park, NC 27709.**

MEDICAL LIBRARY

MONOGRAPHIC CATALOGER

NATIONAL INSTITUTES OF HEALTH

The National Library of Medicine needs an experienced cataloger librarian to perform original cataloging for print and/or nonprint biomedical monographs. All cataloging activities are performed online which includes online authority work. Cataloger librarians participate in contracting activities, special projects and must be able to train new professional staff. The NLM uses AACR2, LC and NLM rule interpretations and its *Medical Subject Headings* (MeSH) and classification schedule; LC classification schedules are also utilized. The NLM also participates in the NACO and CIP programs; it distributes its bibliographic data in machine readable form to international biomedical libraries and users groups. The applicant must have minimally 2 yrs. of experience in original cataloging of print and/or nonprint monographs applying AACR2 and at least the LC rule interpretation, must have performed subject analysis and classified, prepared authority records for names and series, and good working knowledge of one of the Germanic or Romance languages, or Japanese. Experience in an automated environment is also very desirable. The position is graded at the GS9-11, salary range $21,066-$33,139, has the standard Federal government fringe benefits, and has promotion potential to the GS12.

Interested applicants should send a completed SF-171, Personal Qualifications Statement, a narrative discussion of the type of work performed which concisely addresses the knowledges, skills, and abilities required for the position and a current Notice of Eligibility from OPM's Librarians or Medical Librarians Register. If an applicant has already submitted the forms, but has not yet received a notice of eligibility for either the Librarians or Medical Librarians Register please indicate this in item 12 of the SF-171. Interested applicants who do not have a notice of eligibility or have not previously applied to receive one should immediately contact the Office of Personnel Management/Federal Job Information Center, 1900 E Street, NW, Washington, D.C. 20044, telephone (202) 737-9616 to obtain the required forms or call Ms. Eunice Fairchild or Ms. Marilyn Apolito on (301) 496-4943.

Please send a Standard Form 171 by July 31, 1984.

Ms. Eunice Fairchild
National Library of Medicine
National Institutes of Health

(Publishing at ALA, cont. from p. 396.)

interesting books. "Books that are well executed but don't have appeal are not going to do well." Though most titles[3] are in library science or reference, he said, ALA is moving gradually into subject-oriented reference books. Bloom is high on one such title scheduled for next spring: *A Dictionary of Sacred Music*, by Samuel Rogal and David Poultney. For children's librarians, two works of interest coming out in December are *Storytelling with Puppets*, by Nancy Renfro and Connie Champlin, and *Series for Children*, by Susan Roman, a new author. Roman's book will build on the popularity of Janet Husband's *Sequels*. (A sleeper on the 1982–83 list, *Sequels* was an annotated guide to novels in series that included such new writers as John Jakes and such time-tested favorites as John Galsworthy.)

Other forthcoming titles Bloom finds noteworthy are *A Video Handbook*, by William Saffady (late fall), a readable reference book for learning the uses of video in the library and other continuing education contexts; and *Budgeting for Libraries*, by Richard Rounds and Margo Trumpeter (fall), a practical guide directed to public libraries but suitable for other types as well.

Planning Research and Academic Library Buildings, by David Weber and Philip Leighton (fall), is a revision of Keyes Metcalf's significant McGraw-Hill work of 1965. Bloom noted that Metcalf recommended Weber for the rewrite.

Bloom's associate, Joe Brinley, highlighted Phil Clark's *Electronic Spreadsheets for Libraries* (spring 1985), a manual for using spreadsheet programs to prepare current library management data. According to Bloom, teachers and media specialists should like Ruth Bienstock's *Careers in Biography and Fiction* (fall), which will provide an annotated bibliography to help YAs relate to careers. Finally, he cited *The Acquisition of Library Materials*, 2nd edition, by Rose Mary Magrill and Doralyn Hickey (fall), a "sound and well developed" textbook for teaching acquisitions work.

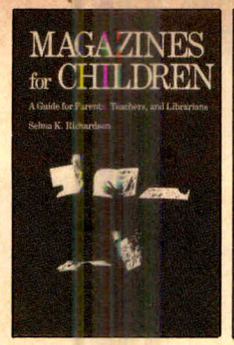
Facente has also been exploring non-book products for the publishing program and researching what ALA can do with video, software, and electronic transmission of information.

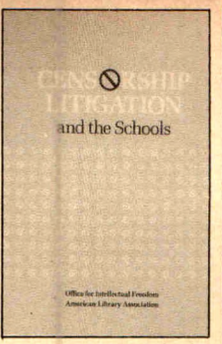
"We've just arranged for the promotion and distribution of the RTSD Video Conference at Los Angeles, which will be available for purchase and rental through PBS Video in Washington, D.C." he said.

Facente has contacted software developers about products appropriate for continuing education. He is looking at reference books and other print products as databases that could be transmitted electronically. But he noted: "Some people think print journals are going the way of the dinosaur, that people will just call up electronically the articles they're interested in. I don't think that's coming as soon as some others do. But we want to get the experience of capturing the file, so that when and if that occurs, we'll be positioned to move quickly."

In September, Publishing Services' Central Production Unit obtained the Quadex Data Entry System, which captures and retains the file of all *Booklist/Reference Books Bulletin* material.

(Continued on p. 422.)





These paperback titles reflect the variety on ALA Publishing's current list.

ALA Publishing booth at Dallas Conference

The "new" ALA publishing operation will be on view at exhibit booths 754, 756, and 758 during the Association's Annual Conference in Dallas. Exhibit days are June 23–26.

A special feature this year will be a June 26 drawing for recent ALA titles.

Among offerings at the large combined exhibit will be examination copies of new books, catalogs, and complimentary copies of *American Libraries* and *Booklist/Reference Books Bulletin*. Conferees can also pick up free bookmarks, handy reading lists, and mini-posters at the exhibit.

On hand to speak to conferees will be Gary Facente, associate executive director for publishing services; Helen Cline, managing editor; Herbert Bloom, senior editor; and Paul Kobasa, marketing manager. Journal editors will also be available.

Many ALA Publishing titles will be on sale at the ALA Store, which is being established for the first time by the ALA Public Information Office. Materials from ALA units and PIO can also be purchased at the Store, which is located in the ALA Professional Exhibits area. The bookstall will be tended by Robert Hershman, Publishing Services' operations manager.

International contacts

While at the 1983 Frankfurt Book Fair, Gary Facente and Paul Kobasa of ALA Publishing Services and Executive Director Robert Wedgeworth made an initial contact with Maruzen Co., the largest publisher in Japan. Maruzen bought the *ALA Glossary* translation rights. ALA is also negotiating with the French on translation rights to *Introduction to Automation for Librarians*, by William Saffady, and with the Spanish on the *ALA Glossary*.

At Frankfurt, they also signed a distribution agent in the Middle East, which ALA has never had before. He is based in Amman, Jordan. They lined up additional distributors in Africa as well.

The trio made initial contact with the primary distribution agency for foreign books in the People's Republic of China, the China National Publications Import and Export Corp. in Beijing. Now ALA publications appear in the CNPIEC's catalog and can be ordered by institutions and individuals in the PRC. The CNPIEC extracts information for its catalog from ALA catalogs, ads, leaflets, and news releases Kobasa sends them. All orders for the U.S. books are processed through that agency's representative in New Jersey, the Beijing Book Company.

Facente also established agreements with ALA's Western European and U.K. distributor, Eurospan Limited, to publish titles under dual imprint. The first co-edition under this agreement will be Bernard Middleton's *The Restoration of Leather Bindings*. Eurospan's publishing unit, Adamantine Press Ltd., will issue the title.

During a March trip to London, Facente began negotiations with a European publisher on co-editions of Martha Williams' *Computer Readable Databases* and of a revised *ALA World Encyclopedia of Library and Information Services*.

[3] Books are mentioned by their "working titles," which may be changed by publication date.

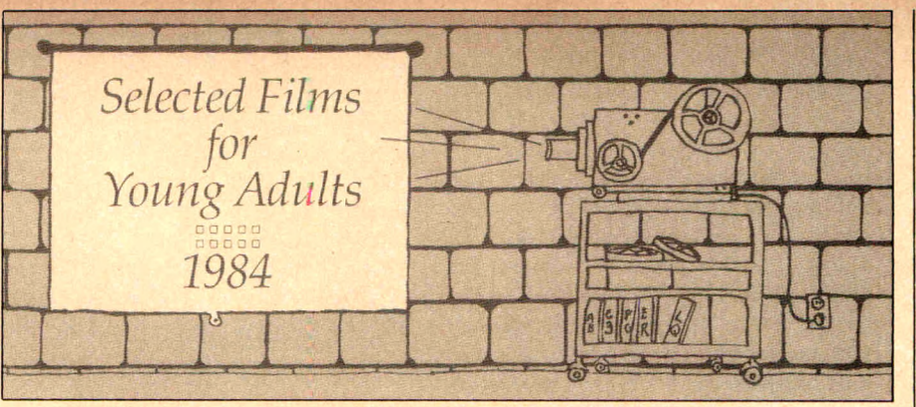
In touch with the market

Facente would like to supplement reviews in the literature with more direct mail to tell customers what ALA is publishing. By distributing tables of contents, for example, he believes librarians will be better able to evaluate what they are considering for purchase. When customers do make purchases, they need fast processing of their orders.

Publishing Services has just installed an STC Pubs Data and Subs Fil order fulfillment system for books, pamphlets, and subscriptions. Besides turning orders around quickly and resolving age-old fulfillment nightmares, the system will give ALA a great deal of new information about customer needs. This will help Marketing Manager Paul Kobasa target his direct marketing efforts.

The burden of politics

Facente has learned to be patient with ALA's complexity and the demands of committee work. "After all, it's a members' organization," he said. "It's a big change [for me]. The values are different. At McGraw-Hill and Follett, the purpose was to make money. Here, we have to make money, but within a certain context and under certain requirements."



Another pamphlet from Publishing highlights 16mm films selected by a YASD committee.

Those requirements include consulting with the Publishing Committee four times a year on a formal basis and, frequently, for informal guidance. He credits the Publishing Committee, currently chaired by Robert Stueart, dean of Simmons College library school, and previously by John Cole, for much assistance in his efforts so far. But meetings take time. He must also go to COPES with the department budget, and to the Executive Board with reports. "All of this is time-consuming," he remarked. "It takes many weeks during a year when you're not involved in publishing: you're involved in preparing reports and in the politics of the association."

Though he realizes that Publishing Services can never have financial autonomy, Facente believes the only way it can grow significantly is through investing no less than 30 percent of its net surplus back into development.

In general, he said, "the major restric-

The Librarian's Network:

ALANET

electronic mail & information service of the American Library Association

NOW!
for both individual and institutional subscribers

featuring ALA databases, including: ALA Washington Newsline • Conference schedules • ALA News Bulletin • Intellectual Freedom Alert • Online forms for orders, interlibrary loans • and much more!

electronic mail: instant, efficient communication among hundreds of your colleagues, libraries, suppliers, associations, and with ALA Headquarters • full editing and word processing capabilities

additional databases: Official Airlines Guide • UMI Article Clearinghouse • Electronic News (UPI, AP and more)

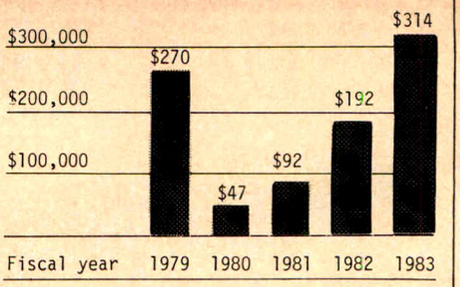
tion is that we're not able to change fast enough, because of the necessity of consulting with various levels of membership governance. COPES and the Executive Board are trying to look at what's best for the whole Association, and the interests of the whole association and Publishing aren't necessarily concurrent."

Personal publishing philosophy

Facente wants his department to be more aggressive in acquiring books, other media, and new authors instead of waiting for ALA divisions, offices, and their committees to come to Publishing with projects.

"I want to enrich the list with books of use to practicing librarians," he said. "I don't want to publish on the basis of sentiment, and I want to continue the tradition of high-quality products. I think that's what ALA has represented over the years. In today's economic climate, it's more important than ever that we try."

Among his special satisfactions to date is the first Caldecott Calendar, which came out last year and featured full-color illustrations from outstanding children's books. It sold out in March. In the short term, he is also encouraged by Books and Pams sales income of more than $1.5 million last year. Operations Manager Robert Hershman commented, "This was a few thousand over our target and certainly is respectable, considering the lack of a new Sheehy or other bread-and-butter title on our '82–'83 list."



Total surpluses returned to General Fund, Fiscal Years 1979-1983: $915,000.

The above chart shows surpluses returned to the General Funds, fiscal years 1979–1983, in thousands.

The financial turnaround last year was another satisfaction for Facente.

"Our initial projections were that we would have to borrow substantial amounts from the endowment." he said. "The Publishing Department performed exceedingly well, including *AL*, which gave $80,000 back to the General Fund that hadn't been anticipated." Due, in part, to Publishing's sound financial performance, the Association did not have to borrow from the endowment.

Under his management in fiscal year 1983, ALA Publishing revenues exceeded $4.4 million. Counting *AL*'s $80,000, the department's surplus exceeded $300,000.

How well Facente has improved service to members will only be known when the new STC fulfillment system begins to stabilize delivery of orders. And only when sales figures start coming in on the new titles from Books and Pams late this year will the early results of his editorial reforms be known.

Facente will not bring an end to controversy over what the ALA imprint should represent, and what Publishing Services should do, for whom, and in what ways. Controversy is part of publishing, and especially association publishing. But Facente wants to assure that when controversy continues to rage in Publishing Services 100th year, 1986, it will do so in an environment of sound financial management, editorial responsiveness, and efficient service. □

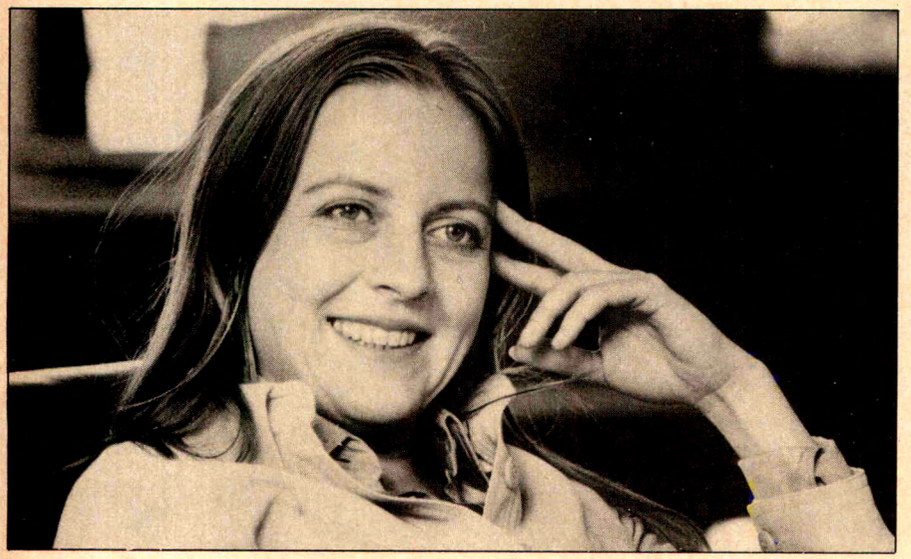
ALA's 103rd Annual Conference:

A handy subject sampler



Frances Fitzgerald, author of* Fire in the Lake, *will speak at the opening session.

"Preliminary Program Information" on the American Library Association's 103rd Annual Conference in Dallas June 23–28 was mailed to all personal members in April. The 46-page publication lists the exhibit hours, general sessions, special events, and registration data.

The official "1983 ALA Conference Program" distributed at registration will detail more than 2,200 programs and meetings. The hours and locations in the topical sampling below should be checked in that program.

The following selections are presented to whet the educational appetite. In each item, the June date falls between the slashes after the sponsoring unit and before the hours, as in JMRT/23/2–4p. Late schedule changes will be posted in the registration area in the Dallas Convention Center.

ALA orientation

"ALA's Hidden Agenda: Great Personal Payoffs for Professional Service," featuring Dorothy Anderson of the UCLA library school and interviews with ALA leaders discussing involvement in ALA and strategies for success. JMRT President's Program/24/2–4p, Convention Center East Ballroom B.

Academic Libraries

"Quality Circles: New Approaches to an Old Game." Luncheon table discussions followed by speakers Mary Ellen Mortola and Daniel Sell of the Houston Community College System. ACRL Community & Junior College Libraries Section/24/12:30–5:30p, Hilton Embassy Ballroom.

Celebrate with ALA!
